# HOUSE OF REPRESENTATIVES—Wednesday, December 15, 1982

Hammerschmidt

Hall, Sam

Hamilton

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

Protect, O God, all people from the assaults of poverty, injustice and fear. We recognize that the promises of a full life are not realized by all and that too often individuals fall short of their expectations and hopes. Inspire in us and all people the vision of a world where righteousness and mercy are the standards of our common life and peace is our focus and goal. Amen.

# THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. SMITH of Oregon. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. SMITH of Oregon. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 270, nays 57, answered "present" 3, not voting 103, as follows:

Mr. DANIEL B. CRANE changed his vote from "yea" to "nay."

So the Journal was approved. The result of the vote was announced as above recorded.

# MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 823. An act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other pur-

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 4481. An act to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes; and

H.R. 7356. An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 4481) entitled "An act to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. Thurmond, Mr. Specter, Mr. Mathias, Mr. East, Mr. Biden, Mr. KENNEDY, and Mr. HEFLIN to be the conferees on the part of the Senate.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 7356) entitled "An act making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1983, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. McClure, Mr. Stevens, Mr. Laxalt, Mr. Garn, Mr. Schmitt, Mr. Cochran, Mr. Andrews, Mr. Rudman, Mr. Hat-FIELD, Mr. ROBERT C. BYRD, Mr. JOHN-STON, Mr. HUDDLESTON, Mr. LEAHY, Mr. DECONCINI, Mr. BURDICK, Mr. BUMP-ERS, and Mr. PROXMIRE to be the conferees on the part of the Senate.

APPOINTMENT OF CONFEREES ON H.R. 7356, DEPARTMENT OF THE INTERIOR AND RELATED APPROPRIATIONS. AGENCIES

Mr. MURTHA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 7356) making appropriations for the Department of the Interior and Related Agencies for the fiscal year ending September 30, 1983, and for other pur-

poses with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania? The Chair hears none. and appoints the following conferees: DICKS. Messrs. YATES, MURTHA, WHITTEN, AUCOIN. RATCHFORD. LOEFFLER, and McDade. REGULA. CONTE

# ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed on Tuesday, December 14, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 7340, by the yeas and nays; and S. 1965, by the yeas and nays.

The Chair will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on the additional motion to suspend the rules on which the Chair has postponed further proceedings.

# OREGON WILDERNESS ACT OF 1982

The SPEAKER. The unfinished business is the question of suspending the rules and passing the bill, H.R. 7340, as amended.

The Clerk read the title of the bill.

The SPEAKER. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) that the House suspend the rules and pass the bill, H.R. 7340, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were-yeas 247, nays 141, not voting 45, as follows:

#### MOVE TO EXPEDITE DECON-OF TROL NATURAL GAS ALARMING

(Mr. SKELTON asked and was given permission to revise and extend his remarks.)

Mr. SKELTON. Mr. Speaker, this morning's Kansas City Times has an article that states that the Energy Secretary supports speedup of gas decontrol. In this article we also find that President Reagan recently affirmed a campaign pledge to accelerate the decontol of gas prices.

We all know what this means for the senior citizens and those people on fixed income in our country should this come to pass. Gas prices would go through the ceiling.

Mr. Speaker, there is legislation that I have introduced along with the gentleman from Kansas (Mr. GLICKMAN) and others, that would address this.

I would also point out that the fact there are those who say that since automobile gasoline has been decontrolled the price has gone down, in that case the American citizen has conserved. You cannot conserve when it gets cold. You have to turn the fur-

I think this is something we should view with alarm, Mr. Speaker.

# SPACE CAUCUS

(Mr. AKAKA asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. AKAKA. Mr. Speaker, as the 97th Congress draws to a close, I want to take this opportunity to remind my colleagues, in case anyone has forgotten, just how important I think our Nation's space program really is. History has shown that an investment in space has been one of the best investments that we have made in our country's future. We have gained national prestige from our leading role in man's effort to explore the cosmos. When Apollo landed on July 20, 1969, on the surface of the Moon, we were the envy of every nation of the world. The world respected and admired our achievement.

Furthermore, our space program and the technology we have developed for our space program have driven our technology base during the last 2 dec-

ades. During the 97th Congress, many of our colleagues have recognized the vital importance of our space program. It was in the 97th Congress that the Congressional Space Caucus was born. Starting with a small band of stouthearted supporters, the Space Caucus now boasts a membership of 71 Members of the House. Since January of this year, our membership has more than doubled. I am confident that it will continue to grow during the course of the 98th Congress. To all those who are members of the Congressional Space Caucus, I offer you my heartfelt congratulations. You have taken a leading role in shaping the future of our Nation's space effort.

For those of you who have not yet joined, let me encourage you to do so. There is an added benefit to joining the Congressional Space Caucus-to date, membership is free, for there are no dues. I encourage all of my colleagues to take advantage of this opportunity.

I am inserting the names of the members of the Congressional Space Caucus in the RECORD at this point:

# MEMBERS OF THE CONGRESSIONAL SPACE CAUCUS

Daniel K. Akaka (Cochairman), Bill Alexander, Don Bailey, Tom Bevill, George Don Clausen, Thomas Coleman, Brown, Silvio Conte, Jim Coyne, Baltasar Corrada, Dan Daniel, Ed Derwinski, Norman Dicks, Charles Dougherty, David Dreier, Mervyn Dymally, Don Edwards, David Emery.

Cooper Evans, Vic Fazio, Jack Fields, Ronnie Flippo, Tom Foley, Don Fuqua, Newt Gingrich (Cochairman), Wayne Grisham, George Hansen, Charles Hatcher, Cecil Heftel, Harold Hollenbeck, Steny Hoyer, Jerry Huckaby, Duncan Hunter, Jim

Jeffries, Dale Kildee, Ken Kramer. Tom Lantos, Bob Livingston, Bill Lowery, Mike Lowry, Manuel Lujan, Raymond McGrath, Robert Matsui, Nick Mavroules, Dan Mica, Norman Mineta, Joe Moakley, Steve Neal, Bill Nelson, Clarence D. Long, Mary Rose Oakar, George O'Brien, Mike Oxley, Bob Livingston.

Leon Panetta, Robert Roe, Harold Rogers, John Rousselot, Edward Roybal, Eldon Rudd, Jim Scheuer, Norman Shumway, Joe Skeen, Fofo Sunia, Mo Udall, Doug Walgren, Bob Walker, Wes Watkins, Bill Whitehurst, Tim Wirth, Robert A. Young, C. W. Bill Young.

# VOTE EXPLANATION

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, it is frustrating and embarrassing, working and voting yesterday in opposition to a pay raise for Members of Congress, that press accounts spread throughout the Commonwealth of Kentucky today that "U.S. Representative Carroll Hubbard voted in favor of the Fazio amendment to increase congressional salaries by \$9.137.50."

Indeed, it is especially frustrating because I realize the majority of my constituents in western Kentucky have complained loudly that Congress should not be entitled to a 27-percent pay increase or, in fact, any salary increase. This is certainly not the time to vote pay raises for ourselves when so many people are unemployed or unable to pay their bills. I have consistently advised my constituents that I would oppose efforts to raise congressional pay as their Representative in Congress.

The amendment offered yesterday by Representative Vic Fazio is now described by the media as a vote for a 15-

percent pay increase.

I voted yes on the Fazio amendment to oppose the House Administration Committee's unwise and unbelievable recommendation for a 27-percent pay raise for Members of Congress. A 'yes" vote on Fazio was the best as step No. 1 toward killing the congressional pay raise. The amendment offered by Mr. Fazio permitted a situation where Members could vote themselves an increase in salary by voting either "yes" or "no" on the amendment. A "yes" vote meant a 15-percent increase where a "no" vote meant a 27percent increase. While I oppose this way of handling the issue, I voted for a reduced level of increase.

It is unfortunate that how Members of Congress voted on the critical Traxler amendment-to kill the Fazio amendment and reimpose the current pay cap-has been almost totally ignored by the press. Indeed, my "yes" vote for Traxler should be a strong message for my constitutents that I am opposed to increases in congres-

sional salaries.

Another strong indication of my opposition to pay raises is my "no" vote yesterday against the final passage of the continuing appropriations for fiscal year 1983.

# AUTHORIZATION AND APPROPRIATION

(Mr. NICHOLS asked and was given permission to address the House for 1

minute and to revise and extend his remarks)

Mr. NICHOLS. Mr. Speaker, along with many other Members of this House, I am deeply concerned about the manner in which we do things-by that I mean the congressional process. That is the reason I raised a point of order last week on a matter in the Defense appropriations bill.

There is yet another problem with the process that was not adequately addressed during consideration of that same bill-the relationship of authori-

zation to appropriations.

At present, for defense programs the House authorizes and appropriates by legislation only large dollar amounts. The legislation does not address specific programs—except in certain cases. The detail by program is contained in the committee reports and has been regarded as binding on the Department of Defense. Unfortunately, the authorization and appropriations committees on occasion provide contradictory instructions for some programs in the reports. We have tried to work out these differences in the past, and we tried again last week but were unable to do so "given the press of business." Both sides worked in good faith and have tried sincerely to minimize the problem.

Unfortunately, the effect of these differences is to leave the final decision to the Department of Defense. The current situation is not good for

the congressional process.

Because no other alternative seems feasible, I wish to state publicly my intention to work next year for a defense authorization bill that will, on a line item basis, provide specific authority for defense programs erase any doubts as to how the money authorized and appropriated to the Department of Defense can be used.

# AUTHORIZATION AND APPROPRIATION

(Mr. DICKINSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DICKINSON, Mr. Speaker, in the legislative system in the Congress, both the Authorization and the Appropriation Committees have important roles to play. The House rules carefully prescribe the rolls for each.

On occasion though, the actions of one tend to overlap the other. I want to say that in the defense area, the Armed Services Committee and the Appropriations Committee have tried very sincerely to minimize this overlap, and I personally appreciate the efforts of those on the Committee on Appropriations.

On too many occasions, however, the actions in the appropriations process in the other body do not evidence the

same regard. When the result is that the appropriations legislation and its accompanying report provide guidance to the Department of Defense that is different than the guidance provided during the authorization process—not just in terms of less money for a specific program, but actually a different direction for the program to take—the effect is for the department to be caught in the middle. More importantly, this anomaly often allows the Department to go its own way on issues on which the Congress has a strong interest.

Efforts have been made to solve this problem on an informal basis, but serious problems remain, particularly in the approach taken in the other body.

I believe the need for resolution of this problem outweighs any disadvantage that may result from a line item authorization. I will be prepared, therefore, to consider next year a defense authorization bill that will leave less room for confusion as to how the Congress wants defense resources spent—as well as to how funds cannot be spent—if the conference report on the 1983 Defense appropriations bill does not conform with authorization legislation.

# HOUSE WASTING TIME WHEN IT COULD PASS REGULATORY REFORM

(Mr. LEVITAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, on many occasions this House takes wise and noble actions and on other occasions the actions of this House are less than wise and not necessarily noble.

Today we are about to do some of the latter. Part of the program for today is a resumption of consideration of the so-called domestic content bill which, according to a press report today, has been identified by the Speaker as legislation which will not even pass the Congress this year.

Yet in the closing days of this session we are going to spend time on a bill that will not pass Congress while at the same time there is legislation which is not being considered that could pass in a very short period of time, legislation that has widespread bipartisan support. I refer to the regulatory reform legislation which has already passed the other body by a vote of 94 to nothing.

Notwithstanding certain specific commitments and understandings and promises, that bill is still bottled up in the Rules Committee of this House. It is a perversion of the priorities of the time and business of this House and the Members, not to consider important legislation that can pass through this House and the other body, be enacted and into law while at the same

time wasting time on legislation which has already been publicly identified by the Speaker as never ever having a chance of passing. That does a disservice to the dignity of this House. No wonder the American people sometimes shake their heads in disbelief at our antics.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. LEVITAS. I am happy to yield. Mr. WALKER. I thank the gentle-

How many times have we received assurances on this floor in the course of the last year that regulatory reform is going to be taken up? I think it is at least a dozen.

Would the gentleman agree?

Mr. LEVITAS. I have lost count. It has been more than a dozen times.

It just seems to me it is unfortunate that this House is being deprived of the opportunity to work its will with the overwhelming bipartisan support that it has. In light of the fact that the other body has already passed this legislation, we could dispose of this and pass it within a couple of hours while, instead, we are going to be wasting time on legislation which the Speaker has already said will never be passed by Congress.

# □ 1100

# THERE IS AN IMMEDIATE NEED FOR ARTICLE II BANKRUPTCY COURT LEGISLATION

(Mr. BUTLER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUTLER. Mr. Speaker, we are now 9 days away from December 24, which the world will celebrate as Christmas Eve but which a few of us may look back upon in future years as the last day for some time that the bankruptcy court system functioned efficiently. This is the day the Supreme Court's stay of its order in Northern Pipeline Construction Co. against Marathan Pipe Line Co. will expire. No one expects a further extension, as is clear from a letter from the Attorney General to the Speaker of the House, which was placed in the Recorn yesterday.

RECORD yesterday.
It is true that the Judicial Conference has prepared a model rule for adoption by the Federal district courts if Congress fails to act. But let us not delude ourselves into thinking that anyone knowledgeable in the bankruptcy area thinks that this model rule would actually work. The Department of Justice, for one, considers it unworkable, and so testified before Senator Dole's Courts Subcommittee on November 10. And the National Bankruptcy Conference has stated that in its view the proposed rule is invalid, or of such dubious validity that the additional litigation it

will provoke will bring about the same chaos it is supposed to avoid, and that in any event it is wholly unworkable.

It is now up to the House to bite the bullet and act now to place the bankruptcy court system on a firm constitutional basis, either by enacting the Bankruptcy Court Act already reported from the Judiciary Committee, H.R. 6978, or by adopting the slightly different approach embodied in title II, subtitle A, of my Omnibus Bankruptcy and Court Improvement Act (H.R. 7349).

As the Attorney General suggested in his letter:

There is a dimension to the urgency for congressional passage that is not present with regard to any other bill currently pending in this session. That dimension is the recognition and respect that we, as representatives of the legislative and executive branches, owe to the judicial branch. For this reason it is imperative that remedial legislation reconstituting the bankruptcy court system on a sound constitutional basis be enacted before the end of the current legislative session.

Mr. Speaker, to do less than this would be to abdicate our responsibility to the American people.

# A TURNABOUT BY OPPONENTS OF OUR LAND-BASED DETER-RENT

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, the temporary setback for the MX missile revealed an interesting turn about in the thinking of the critics of U.S. defense initiatives.

For some 20 years, until recently, we have heard from those who have so vigorously rejected the notion that the Soviets would attempt to use offense weapons capable of surpassing our once-advanced Minuteman. It was said during the 1960's and 1970's by these critics we need not modernize our own forces, since the Soviets lacked both the will and ability to topple our supposedly invincible, strategic forces.

Well, times have changed, with a massive buildup by the Soviets rendering our Minuteman, and other U.S. systems, vulnerable in any strategic context, with the critics' new understanding of the motivations and technical abilities of the Soviets, a new doctrine has emerged.

We were told that we should reject a superior, land-based deterrent, the MX missile, because no matter how we deploy it it will never work. But even if the MX does work, so say these critics, it would be a destabilizing weapon because the Soviets would sure enough build an even better missile; so, we are told, there is no use even trying.

about-something I urge my colleagues to keep in perspective.

# AMERICA'S TUNA INDUSTRY

(Mr. HUNTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUNTER. Mr. Speaker, today many American industries find themselves at a crossroads. The recession has taken a steep toll that leaves some industries hanging on by a slender thread.

One such business is America's tuna industry. Plagued by seizures by foreign governments, depleted fisheries' stocks, and a down market, our fishermen are presently struggling to survive. My own district of San Diego has recently experienced a plant closure that eliminated about 1,000 jobs.

Soon we will be faced with dealing with the Caribbean Basin Initiative designed to improve the trade status of our neighbors to the South. Unless there is an opportunity for amendment, the act which is aimed at economic recovery for the Caribbean Basin could well mean the economic devastation of America's tuna industry

I hope, Mr. Speaker, that this body will allow and accept amendments to the Caribbean Basin Economic Recovery Act that will allow us to pass a bill while allowing the American tuna industry to survive.

# IMMIGRATION REFORM AND CONTROL ACT OF 1982

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MAZZOLI. Mr. Speaker, I would like to address the House simply to bring to the House's attention that we are on the verge of an historic moment in the history of this House. Tomorrow debate will begin on the Immigration Reform and Control Act of 1982, a bill which for the first time in 30 years would reform in a correct, humane, and sensitive way the immigration laws of this Nation. The act would have an effect upon every American citizen in every district which we would represent.

There has been some discussion, Mr. Speaker, that because of the lateness of the hour in this lameduck session, we would not have time to complete our work, in the careful way that the House operates, and still go to conference and return a conference report. I would like to note this and underline it to the House that the Senate has passed a bill very much like the bill which is pending before this body. I have every confidence that, working with the junior Senator from Wyo-

This is a rather astonishing turn- ming, the House and Senate conferees could produce a good bill and return the good bill to this House for ratifica-

> I urge the Members of the House to attend the debate and to be involved in the debate as we begin the immigration reform bill on tomorrow.

# IMMIGRATION REFORM ACT

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, I would like to reiterate what the immediately preceding speaker said. We have an opportunity to do something about an issue that is very much in the forefront of the minds of many of our constituents; that is, the question of immigration policy. For 30 years we have failed to act in a substantial and comprehensive way. The problem is that the national interest truly requires that we do something. Unfortunately, very special interests would be well served if we did nothing. This I think is a test of this Congress, whether in the waning days the special interests will win out, or whether we will address something that needs to be addressed in the name of the national interest.

We have an administration, the first one in about 30 years, that has bitten the bullet and attempted to try to do something about our immigration problems. This bill has passed the Senate. All it needs is for us to take some time to work out the problems here on the floor of the House so that we can have a conference and send it to the President for his signature. It is my fear that if we do not do this in the waning days of this Congress, we will not do it in the Congress that is coming up because the new Congress will be in a Presidential election cycle. Truly our country would not be well served by our avoidance of our duty on this important issue.

# AGRICULTURE, RURAL DEVELOPMENT AND RELATED AGEN-CIES APPROPRIATION, 1983

Mr. WHITTEN. Mr. Speaker, I call up the conference report on the bill (H.R. 7072) making appropriations for the agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes.

The Clerk read the title of the bill. The SPEAKER pro tempore (Mr. FOLEY). Pursuant to the rule, the conference report is considered as having

been read.

(For conference report and statement, see proceedings of the House of December 10, 1982.)

The SPEAKER pro tempore. The entleman from Mississippi (Mr. gentleman from Mississippi

WHITTEN) will be recognized for 30 minutes, and the gentlewoman from Nebraska (Mrs. Smith) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. WHITTEN).

Mr. WHITTEN. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker and my colleagues, we come today to what is certainly the most basic bill that we deal with. The ability of this country to produce food and fiber has been the foundation of our great success and our high standard of living. As I have said many times:

It takes so few of us to provide food, clothing, and shelter for the rest of us, that it enables the rest of us, to provide the thousand and one things that allow for our high standard of living.

Not only is agriculture basic in that way, but also it is our biggest dollar earner in world trade. It is the biggest advantage that we have over Russia, for they can in no way compete with us in the production of food. Unfortunately, we are failing to use that advantage. Instead of using this advantage, we hold our farm commodities off world markets, store them instead of making these "surplus to domestic need," commodities available to the needy people of the world.

We must sell. To sell we must offer at competitive prices. This would not be dumping-for our support price is to offset high American costs. Other countries do the same thing through taxes-but they do sell in world markets what they have and do not need. Thus we hold an umbrella over the world price; our competitors sell, 7/e hold.

We set up the Commodity Credit Corporation to sell competitively. Unfortunately, for several years we have not used this \$25 billion Corporation for that purpose. We must return to

# WE MUST SELL AT COMPETITIVE PRICES

In the mid-1950's, when Ezra Taft Benson was Secretary of Agriculture, large inventories of commodities were accumulated by the Commodity Credit Corporation similar to what is happening today. Outside influences on the White House and State Department kept the Corporation from using its authorities to sell at competitive prices in world trade.

At that time, under an erroneous decision, a policy was set up of making the American support price substantially the offering price in world markets. As a result, we were put in the position of being a residual supplier, a holder of inventory for the whole world.

At that time, an inventory of over \$8 billion was built up of wheat, corn, dairy products, cotton, and tobacco. The news media was full of stories about how it was costing \$700,000 a day in storage costs, with no mention that we had this inventory because we would not sell.

This huge inventory hung like the sword of Damocles over the American farmer. It was used by the Eisenhower administration to cut support prices and institute acreage controls.

In 1955, by Secretary Benson's own figures, 55,000 farm families were put off farms in the South solely because of the acreage reduction that year.

All of the history of this period was reprinted in part 2 of our committee's hearings for 1980. Because of demand for the volume we will reprint it this vear.

#### PAYMENT-IN-KIND

You have been reading recently about the proposed payment-in-kind program. Well, I think our agriculture today is in such bad shape that those engaged in agriculture are glad to have any help that will increase their collateral so that they can borrow money with which to farm is this coming year. So the payment-in-kind is welcomed by many because it does give them an increse in collateral in order to remain in agriculture. But may I say to you that the minute you pay in kind, sooner or later there will be a year when farmers will not have to farm, and then all of agriculture will go broke.

This payment-in-kind reduces all the gross spending that would normally go on in the farm community-chemicals, equipment-everything seed. farm connected with agriculture. If this reduction is kept over a period of years we will feel the effects, and we will all

be in worse shape.

Now, you say: Why is that true? COMMODITY CREDIT CORPORATION

Years ago-and I find that so many of my colleagues do not recall this and have not read about it-the Congress, realizing that industry and labor were getting a bigger and bigger share of the consumer dollar, established the Commodity Credit Corporation. CCC is the biggest revolving fund that I know of in history. It was set up for the purpose of supporting farm prices, and to buy and sell commodities.

CCC was originally incorporated under the laws of Delaware and is now a wholly owned Government corporation. CCC operates as a fully funded revolving fund of \$25 billion with authority to support prices, to buy commodities, and to sell competitively in world trade. The proceeds are re-turned to the fund for further use. CCC is the only organization of our Government that has the authority under its charter to buy and sell, the same way as our competitors.

To hold U.S. commodities off world markets is to hold an umbrella over world prices at the expense of U.S. farmers. Our customers can then take delivery from our competitors at just

under our price.

SELLING IN WORLD MARKETS

For agricultural commodities, the world price is the only real price. The rest of the world sells to their domestic market at the world price, but then taxes their people. We, however, choose not to add a user's tax to food, but rather maintain a cheap food policy for our domestic market, and make up the difference between domestic price and world price by direct payments in order to keep our farmers in business. This policy results in Government-owned inventories at artificially inflated prices.

Yet, when we try to sell in world trade at competitive prices—the rest of the world calls it dumping. By doing so, they try to conceal their own do-

mestic policies.

As a result, we do not sell our commodities, we store them. By storing our commodities and offering only at an artificial inflated price, we hold our umbrella over the world price and let the rest of the world make the sales.

Refusing to sell surplus products and then making the farmer pay the cost of that policy is unacceptable. These products are surplus to domestic needs—they are not surplus to world needs. It is unconscionable to refuse to sell food when millions of people throughout the world go to bed hungry every night, and then make the farmer bear the cost of that policy. Not only is this policy unconscionable, it also will not work. The history of our efforts at production controls clearly demonstrates that such controls are not a satisfactory substitute for competitive abroad.

CCC'S AUTHORITY TO SELL COMPETITIVELY

The Commodity Credit Corporation Charter Act provides unlimited authority to sell competitively in world markets. Like most exporting nations of the world, we should sell what we produce and do not need for what it will bring in the world markets. Past experience has shown that, when buyers have the opportunity to support world prices by their bids, marthroughout the world strengthened and commodities flow freely through the normal channels of trade. Loss of markets to our competitors has proved the dangers of an artificial price umbrella over world markets fixed by a governmental policy.

Mr. Speaker, I would point out that it is the obligation of the officers of any corporation to protect the assets of their corporation. So it is with the officers of the Commodity Credit Corporation. Failure to sell is a failure to protect the assets of the Corporation. The present directors and officers of the Corporation, including the General Sales Manager, are all employees of the Department of Agriculture and are also subject to policies from outside the Department which, at times, clearly are not in the interests of U.S.

agricultural producers. If, by being Federal employees, they are unable to operate freely in carrying out their duties, then they should step aside and allow their positions to be filled by non-Federal employees, who have had experience in world trade and who can and will properly discharge their responsibilities as officers or directors of the Corporation. This change would give the Corporation the independence of action that Congress intended and would free the Corporation from restrictive sales policies.

WE MUST REGAIN OUR WORLD MARKETS

So I say, as we come here now, if we are going to restore health to the farm commodity area and to the farmers, we again are going to have to move back competitively in world markets as everybody else does. And I hope the press will learn that we support the price for the domestic market, in order to reflect the cost, but when we compete in world markets at world prices, we are not dumping anything. And yet the press always claims that that is true.

Let me again point out what we face. FACTS WE MUST FACE UP TO

American farmers are more than \$200 billion in debt.

Interest rates range from 15 to 20 percent on outstanding loans.

The number of those engaged in agriculture is less than 4 percent, freeing the other 96 percent to do other things, including processing of agricultural commodities.

Agriculture, as an industry, is bigger than the auto, steel, and housing industries combined. Agriculture is the biggest industry and employer in our country, and the farmer is in the worst trouble since the Great Depression.

In the last 2 years, farm costs have gone up 22 percent, while prices are down. The farmer has faced embargoes and threats of embargo. The result of embargoes is to merely turn the markets over to our foreign competitors.

We have refused to sell when we are dependent on exporting the production from 2 out of every 5 acres.

In a hungry world, this country should not hold back on food for people, while sending them guns and weapons of war, which the people do not want but their leaders do—as status symbols. Our records show we have sold or provided such weapons of war to 78 countries—many of them tiny countries you never heard of—and we are always surprised when they use

# SUMMARY OF THE BILL

Mr. Speaker, may i say that so far as I know there is absolute agreement on this conference report by all members of the committee.

The bill before us, is \$107.8 million less than the amount appropriated for fiscal year 1982. It is \$99.7 million less

than the amended budget request submitted by the President.

We also, may I say, in this bill, restore the conservation programs to last year's level, including ACP and funds for the Soil Conservation Service.

As I have said many, many times, the one thing we have behind all our activities is a strong country and we cannot let it go down the drain. A strong economy is essential if we are going to meet our problems. Certainly our economy will be strengthened if we protect our land, our soil, and our rivers and streams.

Some of the programs we provide for might be classified as consumer programs. But they have been in this bill a long time.

We provide \$125 million for water and sewer grants, and \$375 million for loans as proposed by the House. Thirty percent of these funds will go to expanding existing systems. I think one of the great things we have done throughout history for the American people is to provide rural electricity. Then we came along with rural telephones. Now we have come along with rural water systems. It adds to the wealth of the country, to the wellbeing of those in rural areas, and it is essential to our prosperity.

We also provide full funding for the WIC feeding program, food stamps, and child nutrition. We have provided funds for the full year with the cooperation of the President in that he recently sent a budget request down to match the cost.

We directed the Department to reestablish procedures for direct distribution of commodities in cooperation with local units of Government, as proposed by the House.

Now, we have had some of these surpluses distributed, without any system at all from what I understand. Certain areas will have it where the folks just throw it around and other places badly need these commodities.

I think that in many ways the distribution of surplus commodities was one place where you tied the rural population who are in farming to a great degree with the interests of the city population.

Anyway, we have asked the Department to come up with the mechanics to do this on a proper basis and I think it is one of the finest things we have insisted on. The Senate has gone along with us.

Mr. Speaker, we bring you a good bill, and we hope that we will have the support of all the Members in its passage.

Mr. Speaker, I will provide detailed tables for the Record at this point:

I have had a chance to call attention to these problems to the President and the Secretary of State. I have done it by letter and personally. But I also find that many of our colleagues need to understand that we in agriculture not only have all of these problems that are related to consumers, but we also have the job of seeing to it that we do not follow policies that take farmers out of the business of providing food for all of us.

# CONCLUSION

Mr. Speaker, I would like to note how fortunate we are in the membership of the committee. I would like to say to the House that through the years my colleagues on this committee have done a tremendous job. This year particularly, they have all made major and essential contributions to the development of this bill.

Mr. Speaker, may I say that I would particularly like to express my appreciation of the gentlewoman from Nebraska, Mrs. Virginia Smith, as the ranking minority member of the subcommittee, for her diligent and thoughtful work in developing this legislation. I would also like to add my thanks to the gentleman from Michigan (Mr. TRAXLER), our ranking majority member, the gentleman from Arkansas (Mr. ALEXANDER), the gentleman from New York (Mr. McHugh), the gentleman from Kentucky (Mr. NATCHER) who I have worked closely with for many years now, the gentleman from Texas (Mr. HIGHTOWER), the gentleman from Hawaii (Mr. Akaka), and the gentleman from Oklahoma (Mr. WATKINS). I would also like to commend our other minority members, the gentleman from Virginia (Mr. Robinson), the gentleman from Indiana (Mr. Myers), and the gentleman from California (Mr. Lewis).

Mr. Speaker, may I also say it has been a pleasure this year, not only on this bill but all bills we deal with, to work with the gentleman from Massachusetts (Mr. Conte), the ranking minority member of the full committee.

Mr. Speaker, all of these people have done a marvelous job, and we have been able to bring this bill to you because the House has confidence in them and in their efforts on this bill, which is so important to the standard of living of every American. I give my personal thanks to each and every one of them.

Mr. ALEXANDER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to my colleague, the gentleman from Arkansas.

# □ 1115

Mr. ALEXANDER. I thank the gentleman for yielding.

Mr. Speaker, a number of us have expressed great concern over the inability of a large percentage of our farmers to repay the obligations that are due to the Farmers Home Administration because of the disaster year that they have had in 1982 and the preceding years. Action has been taken in this body, which is pending in the Senate, to provide for a moratorium on farm debt to permit farmers to continue farming that receive their credit from the Farmers Home Administration.

I am advised that the conference committee in effect put in the report language which reenacted the existing law and did not treat this very difficult question that we have debated here on providing a moratorium for our farmers.

Could the chairman respond to the thinking of the conference in being unwilling to treat this very difficult question.

Mr. WHITTEN. May I say that we do not have the authority to write legislation on an appropriations bill. We have used our position as best we knew how to get the Department to use their existing authority to declare a moratorium on foreclosures in proper cases, to stretch out payments in proper cases, and to work with private lenders to refinance or defer repayment where appropriate, because in foreclosure they reduce the value of farm commodities. We, of course, have no authority over private lenders. But the legislative committee would have to write what the gentleman refers to. All we can do is call on them. If we say 'you must," that is legislation. We have done everything we can.

Mr. ALEXANDER. I appreciate the gentleman's response. We are limited on appropriations bills. And the subject of farm debt moratorium is an issue that we must treat in a legislative bill which must be brought to the floor separately from an appropriations matter.

Mr. WHITTEN. This is beyond our reach in an appropriations bill. We make our intention as clear as we know how. And the Secretary already has authority he can exercise where the Farmers Home Administration is concerned.

Mr. ALEXANDER. I thank the gentleman.

Mr. WATKINS. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from Oklahoma.

Mr. WATKINS. I thank the gentleman for yielding.

Mr. Speaker, I would like to commend the chairman for addressing this particular problem. I think it is appropriate and it is time that we address in a rational manner and organized manner the possibility of renewing a distribution of surplus commodities at a time when food stamps are being drastically cut back, and also at a time when we have surplus commodities—it looks like it would be a good marriage and not be doing something in a loose organization.

Mr. Speaker, through the gentleman's leadership the gentleman is looking at that and addressing that problem and I commend him.

I would like to say in this particular bill the Agriculture and Rural Development Appropriations Subcommittee that the gentleman chairs has done its best to try to address the problems of agriculture within the overall limitations that we have, especially a limitation of dollars.

Also we have begun to try to address the other facet of rural development as much as we can. Rural development goes hand in hand with agriculture.

This year the American farmers earned two-thirds of their income off the farm, only a third of it on the farm. That means they had to have a job or some additional income. So we have got to have a rural development program. And the gentleman has attempted to work on this program.

As the gentleman well knows, the late Senator from Minnesota, Hubert Humphrey, in 1972, with the Rural Development Act, many of my colleagues worked with him, passed a program, but we did not receive the funding in 1980. We had a program. We are trying to get some emphasis placed on it. And in this bill we have indicated to the Secretary that under the national rural development strategy a portion of it should go to trying to have a job creation program through technology and industrial innovation, and trying to build the necessary jobs out in rural America.

Mr. Speaker, I commend the gentleman for that, and I thank him for his leadership in that area.

Mr. WHITTEN. I appreciate the very valuable Member from Oklahoma and the contributions he has made.

Eighty-six percent of the land in the United States is classified as rural. Do my colleagues know in agriculture we have less than 4 percent of the population. But they have the biggest investment of any group in the world. They have the highest risks. If we keep their production bottled up in the United States at a time when the world is begging for it, not only is it a shortsighted foreign policy but it will lead to disaster for those engaged in agriculture.

There are few rural people. But may I say that they are the key part to our economy and overall well-being.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support for the conference report on H.R. 7072, making appropriations for agriculture, rural development, and related agencies for 1983 and yield myself such time as I may consume.

Our chairman, Mr. Whitten, and all the members of the committee in both Houses have worked long and hard to bring you an agriculture appropriations bill that is under the budget and before you in time to avoid funding our critical agriculture, rural development, and domestic feeding programs through another stopgap continuing resolution.

Let me say to the Members that I have talked personally with Office of Management and Budget Director, Dave Stockman, and he assures me that our bill is within the budget and that he will not be recommending a veto as he was with earlier versions of the measure.

The original House-passed version did not contain full funding for food stamps, child nutrition, or WIC. Legislation proposed, along with the original administration budget request, was not passed—so consequently funding needs were higher than originally estimated. The House committee has now received formal budget amendments from the administration which will allow for full year funding of these feeding programs.

Also, the House and Senate bill contained a mandatory \$500 million direct export credit program to help get rid of our market depressing grain supplies. This funding provided through the Commodity Credit Corporation revolving fund has been made discretionary with report language instructing the Department of Agriculture to use the earmarked money for expansion of the successful "blended credit" program.

USDA has obligated \$440 million in a combination of direct and guaranteed credits for Morocco, Eygpt, Yugoslavia, the Philippines, Pakistan, Brazil, and Portugal. These credit offers, if fully utilized, will result in additional export of 2.075 million metric tons of wheat, 350,000 metric tons of corn, 1.85 million metric tons of soybean products, and 43,000 bales of cotton. The committee expects the USDA to expand this effort.

Mr. Speaker, I want to remind the Members that this bill, with the new budget amendments submitted by the President, is below last year's appropriations by \$107 million and below the President's request by \$99 million.

American agriculture is facing its fourth straight year of depressed income—according to experts speaking at the USDA's annual Outlook Conference. We need the critical funding contained in this bill for agricultural price supports, export promotion, research and extension, conservation, farm lending, and a host of other activities so important to this Nation's largest and most important industry.

Since the Depression there has not been a time when a strong agriculture appropriations bill is needed more. Agriculture is experiencing its third straight year of falling income. The USDA recently announced their estimate of 1982 agricultural income at \$19 billion, down from \$19.6 in 1981 and \$24.4 in 1980.

The cost price squeeze continues with prices paid by farmers increasing 9 percent while their incomes have fallen 5 percent in the past 2 years.

Farm indebtedness is 12 times higher than farm income—the highest ratio ever.

On top of poor commodity prices borrowing power is being eroded by decreased land values for the first time in 30 years. As of June 1, 33.9 percent of the loans by Farmers Home Administration were delinquent.

I will not go on, but I could. What is most important for me to get across is that the agricultural industry must recover if we are to ever expect recovery in the rest of the economy.

Being larger than the auto, steel, and housing industry combined, and with more workers than any other industry, agriculture has a very large impact on the general economy.

A recent study completed by Chase Econometrics shows that full recovery cannot be achieved without recovery in the agricultural sector. The study shows that depressed farm prices are causing a national loss of \$2.2 billion in gross national product, \$4 billion in disposable personal income, and \$2.8 in net farm exports.

Contrary to other industries agriculture is not undercapitalized or suffering from a decline in productivity, rather it is a victim of its own success. Our food production capacity is the envy of the world. It provides the basis for American consumers to spend less of their disposable income on food than any other group of people in the world. However, when our production is greater than demand and surpluses pile up, it means bad times on the farm and ranch.

One note about our overproduction and that is to say that supply is only large relative to demand. Anyone who is knowledgeable about our international market will agree that this industry's marketing base has been ruined by embargo after embargo and the food weapon has been used at considerable detriment to our demand side of the marketing equation.

The small amount of funds provided in this bill for agricultural programs are needed to help repair the market damage and protect our most important natural resource—that being the food producing capacity of American agriculture.

The committee provides \$1,023 billion for agriculture research and extension activities. This is \$34 million more than last year and demonstrates our commitment to maintaining the critical scientific work that has been probably the most important factor in expanding our production and efficiency. Science must now play a leading role in finding new uses for our products, pioneering less expensive methods of production, developing systems that do a better job of preserving our soil and water resources, and delivering that knowhow to the producers through our Cooperative Research

For protection of plants and animals from pests and disease the committee has provided \$288 million—down slightly from last year—but at adequate levels to continue the battle against disease and pests

The committee has decided to restore funding for such control programs as golden nematode, grasshopper, gyspy moth, imported fire ant, witchweed and several other important programs that have proven effective over the years.

Rural development through the activities of the Farmers Home Administration is funded at levels that will allow the Department to maintain or in some cases increase its participation levels. We have provided the request for higher FmHA operating loan levels in order to see that producers have more adequate access to last resort lending during these hard times.

The Rural Electrification Administration is continued at virtually the same levels as last year. REA has provided a critical link in facilitating the modern and efficient agriculture we see today. It has also improved the living standard of our rural population. If it were not for past rural electrification programs our rural people would not enjoy the convienences of modern day living.

In an effort to halt our very serious land and water erosion problem your committee has restored, as we are forced to every year, the funds for conservation and forestery efforts. Almost every major publication in this country has run stories on our critical erosion situation. Our intensive farm-

ing practices and push for volume to make up for low prices has aggravated the loss of our farmland.

Producers can not bear the expensive erosion control measures by themselves. It is to society's benefit that everyone join in the effort to preserve our natural resource base. As my chairman has said so many times—all real wealth is linked to the soil and if we destroy that resource we are destroying our foundation.

As I mentioned earlier the food and nutrition programs that provide the needed assistance for low-income American's are also funded in this bill. The committee has only provided full funding of the food stamp, child nutrition, and women, infants, and children programs.

H.R. 7072 also funds the international agricultural programs. The Foreign Agriculture Service will be receiving \$7.5 million more in 1983 than in 1982. The primary function of this organization is to help American agriculture in maintaining and expanding foreign markets for agricultural products, so vital to the economic well being of the Nation.

I and the entire committee remain very concerned about our lack of an effective way to combat the loss of our overseas markets. Other exporting countries are using every means available to export their surplus, eating away at our markets, and eroding the earning potential of our own producers.

One of the reasons our producers were able to take advantage of increased demand for grain during the 1970's was the fact that we had been operating a strong Public Law 430 concessional sales and food donation program. In addition, USDA operated a very successful direct loan program for financing export sales. These programs were used for market development and gave us the leading edge that allowed the United States to capture most of the world grain and vegetable oil market.

The committee believes that now is the time to revive export credit activities. Our carryover supplies of wheat, feed grain, soybeans, and dairy products has reached unmanageable levels. We can no longer sit back and hope that the export situation will change or that some disaster will increase demand for our products.

The export credit program funded out of CCC existing authority at \$500 million will help get rid of our products by offering terms and conditions more favorable than commercial lenders. If used in conjunction with funds provided in the budget reconciliation measure this program could be very effective in raising commodity prices by reducing inventory and could also reduce Government price-support assistance.

I urge a "yes" vote on H.R. 7072 and ask unanimous consent to revise and extend my remarks.

Mr. JEFFORDS. Mr. Speaker, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Vermont.

Mr. JEFFORDS. I thank the gentlewoman for yielding.

First I just have a question which I would like to inquire of the chairman.

In looking through the conferees' report, I have been unable to find specific reference to the wool research program. It is my understanding from discussions with staff that there is money available in there as there was in the House bill or similar thereto.

I wonder if the chairman would be able to answer that question for me.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman from Mississippi.

Mr. WHITTEN. We have met that problem. I think it will be satisfactory to the gentleman.

Mr. JEFFORDS. I thank the gentle-

man for his comment.

I would also raise another question which I am not fully prepared at this time to discuss but will be looking into when we get into the areas of disagreement. That is with respect to the limited resource loans, or the ability of people with limited resources to take part in the FmHA programs.

It is my understanding, although I am checking it out, that the word "shall" applies to insuring that 20 percent of these loans are available for people in limited resource programs. It is my understanding that the conference report changes the word "shall" to "may" and realizing there is some concern and confusion as to what the status of the FmHA programs are right now, since the Senate has not acted on the House bill, I wonder if the chairman has any information with respect to that?

Mr. WHITTEN. The Senate included a number of legislative provisions of which the gentleman discusses one. A direction of "not less than shall" in the bill would be legislation. The Senate had it in that way, so it was legislation. We resisted all the legislation they had, included, which is what we should do

we should do.

The word "may" is not legislation. But there is no question but what the Senate knows how we feel, and we feel that the word "may" would take care of it. At any rate we could not agree to the Senate amendment.

Mr. JEFFORDS. I understand. It seems to me this is a confusing situation with the expiration of the existing FmHA law—but the existing law is "shall." It seems that the legislative change is in reality being made, not unmade. I just raise that question. I do not have the answer to it. But I would hope, and I am sure the chair-

man recognizes, if that discretion is not exercised it will probably mean there will be no new young farmers coming in except those who have rather wealthy resources. And I would hope that the committee, along with our committee, would excerise oversight to insure that we do not preclude even though we have some difficult situations now as far as surpluses of young farmers being able to get into business.

#### □ 1130

Mr. WHITTEN. Over the years, on occasion, we have included legislation by request here in the House, never asking for a rule to waive points of order where one objection could knock it out. Our rules do prohibit us from legislating on an appropriations bill, and where the Senate had added legislation we tried not to bring it back.

I trust they will use the word "may" as though it means "shall" because we made it quite clear we expect this.

Mrs. SMITH of Nebraska. I thank the chairman.

Might I add that in my home State of Nebraska FmHA used the full 20 percent, but in some other States there were not enough applicants who qualified, so it was not possible to use the full 20 percent allotment.

Mr. MYERS. Mr. Speaker, will the gentlewoman yield?

Mrs. SMITH of Nebraska. I yield to the gentleman from Indiana (Mr. Myers).

Mr. MYERS. Mr. Speaker, I thank my colleague for yielding me this time.

I rise in strong support of this conference report. The appropriation bill for agriculture is very, very important to rural America and even for our country; but really, I believe the most important part of this conference report is in the report language itself. The gentlewoman from Nebraska mentioned this. The chairman has mentioned it.

On pages 13 and 14 where we address the surplus problem that we have in rural American farms today with agricultural products, particularly grain, and also dairy products, we not only encourage, but we strongly tell the Department of Agriculture to dispose of these surpluses through world markets. We have not done this in the past. We have been able to move along and say we will go ahead and build up these big surpluses, store them as we did with dairy surpluses in the country, we still have a large surplus and we are giving it away. We are suggesting here that we dispose of our surpluses in world markets. I think this report language itself is a most important part, possibly the most important part of this conference report. I am sure we are going to hear more about that.

The department is going to be watched very closely, not only by this committee, but the Congress, to make sure that we start working very, very diligently to start disposing of our surpluses.

I am proud that our chairman and our ranking member worked very hard in that direction to make sure that we do dispose of those surpluses—good job.

Mrs. SMITH of Nebraska. Mr. Speaker, I thank the gentleman.

Mr. Speaker, I reserve the balance of my time.

Mr. WHITTEN. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. TRAXLER).

Mr. TRAXLER. Mr. Speaker, I thank the distinguished chairman for yielding this time.

I wish to commend the chairman and the distinguished gentlewoman from Nebraska, the ranking minority member, for bringing to us an excellent conference report. This is the bill which will fund American agriculture in all its forms. I think the committee and its leadership has done an outstanding job.

Mr. Speaker, I rise in complete and enthusiastic support of the conference report on H.R. 7072, the agricultural appropriations bill for fiscal 1983. I want to commend our chairman, Mr. Whitten, for once again doing all in his power to maintain the House position on as many programs as possible in conference, while having an unswerving respect for not exceeding any budgetary limitations.

Mr. Speaker, in these times of reducing the size of the Federal deficit, agriculture is providing its share. This bill is nearly \$108 million below the bill for fiscal 1982, despite the fact that there are increasing needs for many of USDA's programs, be they farm credit programs or feeding programs. We are nearly \$100 million below the President's amended budget request as well.

I want to take a few minutes to address some of the highlights of this bill. There are some very key projects funded with this bill, and I believe that it is important that all of our colleagues understand what is in this bill.

Title I provides funding for the agricultural programs operated by USDA. One of the very key programs included in this portion of the report is agricultural research. If we are to maintain low food prices for consumers and low costs for farmers so that they have an opportunity to maintain a reasonable standard of living, such research is crucial for the future of these two interests.

We maintain directions for using funds for soybean genetic varietal research in this report. The House report on the 1983 bill provided such direction, and since the Senate did not disagree with us on this point, there was no need for the conferees to make

any additional statements of direction to the Agricultural Research Service. I am sure we will be discussing the progress on this work at our fiscal 1984 hearings.

For the Cooperative Research Service, we restore a number of special grant projects that are crucial to Michigan. Included in this list are \$34,000 for dairy photoperiod research, and \$99,000 for bean flour research. The Senate had already accepted \$97,000 for the Saginaw Valley Bean and Beet Farm, and \$96,000 for blueberry shoestring virus research work, so that it was not necessary for these items to be addressed in conference.

We provide \$17 million for the competitive grants program, and while this is the accepted compromise, I maintain my concerns about the necessity of such a competitive process as opposed to a more traditional contract grant award. USDA has yet to convince me of the value of this method of operation. I do not at all doubt the quality of the research, but if we are to be forced to reduce spending for many programs, then I want to be certain that the programs we do fund operate as efficiently as possible.

We restored a number of programs for the Extension Service, including the farm safety program, the urban gardening program, and \$2 million in new funds for the promising renewable resources program. The Extension Service does an admirable job of helping farmers understand the new developments that can help them improve their methods of farming. The agency has shown that it is worthy of our support, and for this reason will continue to have it.

In the Animal and Plant Health Inspection Service, we have provided a little more than \$84.2 million for the brucellosis eradication program, including such sums as may be required for whole herd depopulation. We have this disease under control, and it is only through continued vigilance that we will keep it that way. The administration's proposals to reduce the program were ill-advised, and were rejected on that basis. I am pleased that we were able to provide nearly a \$7 million increase over the House figure, because this program is important and deserves the funding.

For the Statistical Reporting Service, we also maintain the \$25,000 for statistical reporting work on dry bean acreage in Michigan. The project should be completed during fiscal 1983.

We provide an increase over the House figure for the Agricultural Cooperative Service, recognizing that it is essential that cooperatives obtain more assistance in export marketing efforts. Cooperatives have helped farmers tremendously, and we must continue to support them if we are to support agriculture.

Under the Commodity Credit Corporation, the state of managers advises the Secretary to not charge the 50 cents per hundredweight fee on milk until such time as he regularly offers dairy products for sale in the world market at competitive prices. I regret that we were not successful in placing this language in the bill, but our resolve is just as strong: We want these products sold so as to not be a drag on the U.S. market and a source of constant harassment of dairy farmers who are simply trying to maintain a standard of living.

The committee provided admirable support for programs offered by the Farmers Home Administration under title II of the bill. Farmers need credit to continue operations, and rural areas often do not have banking institutions which will make loans in the absence of FmHA guarantees. For this reason, we continue to support FmHA programs, recognizing that our budgetary situation does not allow us to provide as much support as we might like.

Title III is the title of controversy. In this section of the bill we provide funding for all of USDA's feeding programs. It is essential that everyone of our colleagues understand how strongly our chairman held out in order to get the President to request proper levels of funding for the feeding programs. The Senate appeared to be \$2 billion over the House bill, and it was only after the President submitted the requests demanded by Mr. WHITTEN that we agreed to the higher figures.

No one should misunderstand our intentions. Our subcommittee is committed to adequate funding for all feeding programs. But when the budget plays games with how much money is needed, we must stand firm and force the administration to be honest about how much money is needed.

Child nutrition programs are provided with adequate support to continue at essential levels. We rejected the ill-fated block grant proposal several months ago when it was proposed because it is beyond the scope of the appropriations committee to act on such matters, and I am sure it will be rejected again next year.

The real potential center of controversy on this bill will be found with the language contained in the statement of managers regarding the women, infant and children's feeding program. Let us not lose sight of the fact that the real issue with this program that should have your interest is the level of funding. We have provided \$1.06 billion, so that we can have this program fully funded for the year. But attention is being drawn to this report language nonetheless.

This is one of the most misunderstood sections of our action. We are not suggesting that we are going to force children to eat food that is harmful to them as some have suggested. All we are doing is saying that any changes in the food package not yet implemented-and this includes regulations which were issued in November of 1980, have been delayed several times, and are still not yet required and will not be until the end of this month-meet a scientific standard. We want the decisions on the WIC food package to be based on comprehensive scientific evidence, not the whims of some who have a particular disagreement with a certain food item.

WIC was created by Congress in 1972 under the direction of the late Senator Hubert Humphrey to prevent iron deficiency anemia, a problem of particular significance for low-income women and children because of their need for iron at this time of physical

development.

Since that time, WIC has been praised as the most successful program in improving the nutritional status of the eligible population. All of this has happened without any limits on sugar in breakfast cereals, and it is these limits that now have us concerned.

USDA wants to force a 6-gram limit on sugar. There is substantial doubt of the sufficiency of the scientific evidence that was the basis of this change. The materials provided with the regulations in November 1980 did not indicate that the decision to limit sucrose was being made by scientific experts. Rather, it simply said that sugar needed to be limited even though there has been no scientific

As recently as 2 weeks ago, the Food and Drug Administration reaffirmed the generally regarded as safe (GRAS) status of sugar, saying that at present consumption levels that there is no danger to health, barring those situations where people have particular sensitivities such as diabetes.

USDA wants to ban cereals. What are those cereals? Raisin Bran, Buck wheat and Instant Cream of Wheat in three flavors: apples and cinnamon, bananas and spice, and maple and brown sugar. None of these cereals are the type of foods that some people believe are generally of questionable value. Kelloggs has no intention of putting Fruit Loops on the program, and no one should act as if they do.

The point is a simple one: We want the food package standards based on science. If the science is there to keep a particular food out, then it should be kept out. If the science is not there, then we should not force the value judgments of some upon poor people who cannot react.

We want to maintain the nutritional quality of the WIC food package, and we believe the only way to do this is to take the selection process to a level of scientific adequacy. Responsible scientists do not believe that it is possible to impose a limit on a single constituent of a food in order to improve or enhance a total diet, and we believe this fact should be a critical factor in deciding what to do about the food

Our statement also addresses a very critical problem with administrative funding for the commodity supplemental feeding program. The local operators have lost administrative support on a per participant basis because of the fact that USDA has changed its method of procuring food since the last time the authorizing committee had an opportunity to review the matter. For this reason, our report directs the Department to supplement the administrative grant with funds from section 32 and CCC in order to more adequately provide for the full administrative cost of the program. We also direct the Department to reassess the method of giving administrative funds so that it reflects the food package and not merely the number of people. Not all programs provide the full food package, and should not, therefore, receive full administrative support. The current method of providing administrative funds does not consider this factor. We will be paying close attention to further developments on this issue.

Under the general provisions portion of the bill, the conferees rejected changes in the dairy standards of identity because the matter is beyond the jurisdiction of the appropriations committee. However, our report does recognize the fact that the proposal deserves further attention, and we urge the appropriate legislative committees to take action as soon as possible on the proposal.

Mr. Speaker, this report provides funds for many essential programs. It deserves the support of all of our colleagues.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield 2 minutes to the gentlewoman from New Jersey (Mrs. Rou-KEMA).

Mrs. ROUKEMA. Mr. Speaker, I have some questions of clarification for either the chairman or the gentleman from Michigan concerning the conference report with regard to the WIC program, under general provisions, title VI.

I have carefully read the languageprompted and motivated to read this language carefully-because of recent newspaper accounts which have indicated that rules and regulations have been changed or legislation has been modified regarding the WIC program to the effect that now, if we understand the newspaper accounts, for the first time sugar-coated cereals will be an approved food for WIC standards.

The language here, however, somewhat ambiguous and I would like clarification. The report states that standards for the composition of the food package should be made on "comprehensive scientific evidence necessitating the consideration of a food item as a whole and not eliminating any food item based on a single component thereof.'

Well, now, it seems to me that is irrelevant language. Could the gentleman explain whether that is permissive with regard to sugar-coated cereals and, if so, who makes the judgment and how is the scientific determination made?

Mr. TRAXLER. Mr. Speaker, if the gentlewoman will yield, I assume the distinguished gentlewoman is a friend of the WIC program and wants to see it continued.

Mrs. ROUKEMA. Yes.

Mr. TRAXLER. I am pleased to welcome the gentlewoman to the committee's viewpoint.

The subcommittee, as I am sure the gentlewoman from Nebraska (Mrs. SMITH) will tell us, as well as our distinguished chairman, Mr. WHITTEN, has been a zealous guardian of this program and its funding. The record clearly indicates this.

Happily, the world of reality and the methods and the decisions of the Congress are far more rational than are oftentimes reported in the press. You know, on a quiet day, reporters oftentimes do not have very much to do and in order to have a story, some of them become imaginative. If the gentlewoman has read some of the press reports on the pay raise votes yesterday, I am sure she was quite surprised to note the wire service's interpretation of those votes.

What we are really talking about here is reality and not the press, so let us talk about what the facts are. The fact is that sugar cereals have always been eligible for inclusion in the WIC program. The way in which a particular food item gets in the WIC program is that the manufacturer makes a request of the U.S. Department of Agriculture for its inclusion. The U.S. Department of Agriculture notes that and requests public comments on such an item being included in the WIC program. This has not changed in the report language.

What we are asking the Department to do-and the Department does not have to include the item; it makes its own determination-but what we are saying is that for future inclusions, please do it, first, on the basis of scientific evidence, and second, on the basis of the total ingredients of the item.

I cannot understand how anyone could object to that kind of a standard being established. Heretofore we have not had any guidelines for the WIC program. What we are saying is please do this on the basis of some objective criteria and not necessarily politics or whims.

Mrs. ROUKEMA. Mr. Speaker, I thank the gentleman. That is a helpful clarification.

The SPEAKER pro tempore. The time of the gentlewoman from New Jersey has expired.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield 1 additional minute to the gentlewoman from New Jersey.

Mrs. ROUKEMA. Mr. Speaker, I

thank the gentlewoman.

I would like to note, I would hope that the RECORD would show that it is the intention of the committee that this be done on scientific evidence and that when the Department of Agriculture does make its determination, there is full consideration of medical evidence, as well as dental testimony by the dental societies and nutritionists as to the efficacy of the foods included.

Mr. TRAXLER. I think the gentlewoman is totally correct. Scientific evidence, and certainly if that is scientific evidence, then it ought to be considered, and that is the purpose of the language and none other.

I deeply regret the misunderstandings that were created as a result of some newspaper articles which were highly imaginative.

Mrs. ROUKEMA. Well, I think this

colloquy should be helpful.

Mr. TRAXLER. I hope so, too, and I thank the gentlewoman for her support of the WIC program.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Speaker, I wonder if I might ask a question of

the distinguished chairman.

The bill went out of the House at about \$23 billion, went out of the Senate at about \$25 billion, and came back in the conference report at nearly \$32 billion, which is nearly \$9 billion over the House total and \$61/2 billion over the Senate total.

As I computed when it left the House, the bill was one-half of a billion dollars over our budget in both outlays and BA; so it must be something like \$9 billion over now.

I wonder if the distinguished chair-

man could explain those discrepancies and how the gentleman could bring back a conference report that is so far over both the House and the Senate versions.

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, the conferees acted on the revised requests submit-

ted by the President.

In the WIC program, the original request had enough money for about half a year, so we appropriated what money was requested by the President.

Subsequent to House action, but prior to the conclusion of the conference, the President sent Congress a request for the full year.

In addition to that, the subsequent request by the President on the Commodity Credit Corporation was for an additional \$6.7 billion. The Commodity Credit Corporation, as the gentleman knows, does so many things in the way of supporting prices and other things that their capital was impaired and the President's recommendation was an urgent request for an additional \$6.7 billion for the Commodity Credit Corporation. These funds are to carry out the obligations of the Government and of the Commodity Credit Corporation. All of these increases were backed up by urgent requests from the President of the United States. They are urgent and necessary right now; so we agreed. I called attention to it in my remarks earlier, that the conference agreement does include these official requests by the President and they are emergency in nature, as the committee determined.

Mr. FRENZEL, Mr. Speaker, I thank the gentleman.

The committee did, however, exceed the scope of the conference committee by a considerable number of dollars; is that correct?

Mr. WHITTEN. Well, personally, I say that outlays are controlled by the executive branch, as the gentleman knows. This additional \$6.7 billion for CCC is budget authority, not outlays. The Commodity Credit Corporation restorations are not listed as outlays, and because the corporation had its capital impairment restored does not necessarily mean that they will spend

I repeat again what we all know. Money appropriated does not come out of the Treasury until it is spent. In this case, the President said additional funding was needed. We provided it and I think it does not violate any of the overall ceilings imposed in the substitute budget resolution which may I tell the gentleman was unrealistic in many ways because it left out \$5 bil-

lion needed by the CCC.
The SPEAKER. The time of the gentleman from Minnesota (Mr. FRENzel) has expired.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield 1 additional minute to

the gentleman from Minnesota. Mr. FRENZEL. Mr. Speaker, I thank the gentlewoman for yielding.

May I ask one final question. In the opinion of the distinguished chairman. is there some likelihood that supplementals will be required for any of the

items in this appropriation?

Mr. WHITTEN. May I say that I work up here and others work downtown. There are certain obligations that are fixed by law. So far as I know, this will meet the need. So far as the President's estimate is concerned, this will meet the need. But nobody can tell when things like the flood in Arkansas will occur, which has a disastrous effect on agriculture, there is no way to foretell. But when those things do come up, they will have the serious attention of this committee.

We are very proud of our record of holding down expenditures. As the gentleman knows, not all our problems come from the Appropriations Committee. We have been below the administration's appropriations requests in 37 out of 39 years. It is backdoor spending that creates our overall budget problems as well as entitlements, which of course come from the legislative committees.

Mr. FRENZEL. Mr. Speaker, I thank the distinguished chairman.

Mr. Speaker, the chairman of the Appropriations Committee has told us that this bill is approved by the administration, is within the budget, and will require no supplementals.

I agree that commodity programs have escalated beyond our expectations and must be funded. But they, and other features of this bill, are monstrously over our budget.

The same is true of the WIC and food stamp programs. They are way over budget, too. As best I can compute, this bill is more than \$9 billion over our budget resolution.

Our commodity programs account for about \$6 billion of this total and WIC and food stamps make up most of the rest. Because our laws say so, we must pay those bills, but I object to describing this conference report as under the budget.

Although our chairman says differently, most observers believe that a supplemental appropriation will be needed to fund extra food stamp costs. I do not like planned supplementals. We ought to know the truth now.

I voted against this bill when it passed the House because it was over the budget. I do not object to paying due bills. I do object to overspending in discretionary accounts. This bill overspends in discretionary items and I feel compelled to vote against it.

We went to a lot of trouble to pass a budget. The American people ought to be able to rely on it. It is all right to breach the budget if surpluses and recessions force costs up. But it is not all right to bust the budget on discretionary spending.

Mrs. SMITH of Nebraska. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. Mr. Speaker, I would like to ask the chairman or one of the committee members from Mississippi or Michigan a question. On page 45 of the Senate committee report we have an Office of Transportation. I notice they have been reduced, but now they are starting what they call a user charge, SLUC, standard level user charges.

My farmers in my district are having problems in warehousing and transportation. I was under the impression that this office was to be of service to rural communities, producers and farmers in general within the communities to service in a technical and research sense to help them out in transporting their products to and from given areas by rail or ship and so forth.

Now I see they have a user fee principle. Does the farmer or producer have to comply with this new procedure or could the gentleman explain this to the members?

Mr. WHITTEN. Mr. Speaker, if the gentleman will yield, we have had a terrific problem through the years because the General Services Administration serves as landlord for other Government agencies. I do not know when the law was passed or who caused it, but the General Services Administration just tells Federal agencies what the rent will be on the facilities that they occupy, and the agencies simply have to pay it. Treasury just withholds it before it comes to them.

We thought that was unfair because any vacant space GSA has, they just assign it to somebody and take the money from the agency without recompense.

In this bill, we set up a separate line item on these rental payments to GSA, and we put a limit on how much they can pay. Unless we do this, GSA can just tell the agency what they have to pay for office space and automatically take the funds. We have taken control of it so that we can watch it and see that they do not overbill agencies.

Mr. PURSELL. Well, Mr. Speaker, I just want to make sure that this does not preclude the opportunity to the farmer or rural community, such as in my area of Hillsdale or Jackson, Mich., and Lenawee County to utilize this service without having to pay some kind of user fee. It is not connected with getting service from this Office of Transportation. Is that clear in the gentleman's mind?

# □ 1145

Mr. WHITTEN. We have had to reinstate the transportation item from time to time, and I agree with the gentleman there. But this is not intended to restrict the Office of Transportation at all; it is supposed to save some money that GSA might have taken.

Mr. PURSELL. I thank the gentleman.

Mrs. SMITH of Nebraska. Mr. Speaker, I have no further requests for time, but I have been asked to engage the chairman in a brief colloquy.

We have language in the conference report pertaining to brucellosis indemnity payments. If the committee does not object to the proposed changes as submitted by USDA during the regular hearings, will the Department be allowed to proceed?

I yield to the gentleman from Missis-

sippi for a response.

Mr. WHITTEN. Mr. Speaker, may I respond to my colleague, a very valuable member of the committee and the ranking member of the Agriculture Subcommittee. Let me review the brucellosis program a little bit. The Department set out to abolish the program. We have tried to see that that is not done so we would not lose all the progress that we have made in recent years.

The Department's proposal was to fix a flat rate of indemnity for cattle without regard to whether they were very valuable breed cattle or just run of the mill cattle.

We felt as the gentlewoman would know, that we should at least have a hearing on their proposal and see what they had in mind. We just said, "Keep the status quo until we have a hearing and see what you mean to do and then we will consider what advice we might give you."

That might not be controlling, but they usually cooperate with us.

Mrs. SMITH of Nebraska. I thank the gentleman.

Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. Dan-NEMEYER).

# PARLIAMENTARY INQUIRY

Mr. DANNEMEYER. Mr. Speaker, before I consume that 1 minute, may I have a parliamentary inquiry?

The SPEAKER pro tempore. The parliamentary inquiry would be made as part of your 1 minute. All time is controlled.

Mr. DANNEMEYER. Then this is my request in the nature of a parliamentary inquiry.

If the funding level of this conference report is \$31.7 billion-plus, and the budget resolution passed by the House earlier this year listed as a maximum amount for this area of spending something a little below \$23 billion, my parliamentary inquiry is: If we have passed the budget resolution providing a level of spending for this category or function of the Federal budget, how do we have the ability now to consider a conference report that proposes to spend an amount substantially in excess of that figure? Where do we get that right?

Mr. WHITTEN. Mr. Speaker, will

the gentleman yield to me?

The SPEAKER pro tempore (Mr. Pease). No point of order was made against the conference report when it was brought up. If one had been raised, the Chair would have ruled at that time. A timely point of order was not made and, therefore, there is no ruling.

Mr. DANNEMEYER. Does the Speaker mean that if a Member had raised this in the way of a point of order when it was first brought up—

The SPEAKER pro tempore. If there had been a point of order raised on a timely basis, the Chair would have ruled on the point of order.

Mr. DANNEMEYER. Ruled which way?

The SPEAKER pro tempore. The Chair cannot engage in speculation.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield to me?

The SPEAKER pro tempore. The time of the gentleman from California (Mr. Dannemeyer) has expired.

Mr. WHITTEN. Mr. Speaker, I yield myself 1 minute.

Mr. Speaker, we have many people who insist that this budget ceiling is imposed on each department agency, and program. That is not true. The Appropriations Committee has an allocation to the overall spending of some \$487 billion. It is silly to believe the Budget Committee can control each department and agency through a target resolution they adopted in June without the benefit of hearings.

But the overall ceiling, we are well within it for the appropriations under our committee's overall 302 allocations. We do reserve in the committee the right to suballocate it as we see fit, and we did suballocate it.

When the President sent down the requests for the additional money, that was still within the overall ceiling. But the ceiling is on the Committee as a Whole and not department by department. So we had enough latitude to include these requests by the President. It may be over for the original allocation to this department, but we did not know that the President was going to request this.

But we are still within and under the ceiling imposed overall.

Mr. DANNEMEYER. Mr. Speaker, will the gentleman yield?

Mr. WHITTEN. I yield to the gentleman from California.

Mr. DANNEMEYER. I thank the gentleman for yielding.

Mr. Speaker, is the gentleman from Mississippi suggesting that additional money was requested by the President?

Mr. WHITTEN. Yes; and I said so earlier.

Mr. DANNEMEYER. If the chairman would yield further, that is an interesting statement because what can the President spend except that we appropriate?

Mr. WHITTEN. We believe in helping the President when we can. After all, the President made three separate requests, adding some \$8.7 billion to his own budget. If any of my colleagues cares to read the President's budget amendments, they can be found in House Documents 97-257, 97-262, and 97-266.

The SPEAKER pro tempore. The time of the gentleman from Mississippi (Mr. Whitten) has expired.

2 minutes to the gentleman from New York (Mr. McHugh).

Mr. McHUGH. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the conference report on the Agriculture appropriations bill for fiscal year 1983, and I urge my colleagues to support it. The conference report provides funds for a number of vital programs that sustain agriculture, conservation, rural development, research, nutrition, and many other important activities. This conference report represents a reasonable balance between consumer and producer needs, and the funds will help maintain the economic well-being of our rural areas. Although it was difficult to provide equitable and adequate support for all of these functions, I am pleased that we were able to do so within the 302 allocations.

I am also pleased that the conference has provided funding for the food stamp, child nutrition, and WIC programs on a full-year basis. However, I should note that the food stamp appropriation of \$10.8 billion, which is what the administration officially requested last week, will almost certainly be insufficient and a supplemental appropriation will be required.

This summer, after passage of the Reconciliation Act, USDA informed the appropriations committees that it estimated a need of \$10.9 billion for the food stamp program in fiscal year 1983. This was based on official OMB economic assumptions that unemployment for the fiscal year would average 8.7 percent. Since last summer—when the USDA prepared this estimate-unemployment has skyrocketed to 10.8 percent. In the last 3 months alone, food stamp participation has risen by 1 million persons in response to this rise in unemployment. It now seems clear that the \$10.9 billion estimate was too low.

Last week, the administration submitted an official budget estimate for \$10.8 billion—\$100 million lower than before, despite the increase in unemployment. The administration's justification for this new estimate was that \$10.8 billion is the CBO estimate.

Unfortunately, this seems to be another instance of less-than-honest budgeting by OMB. It is true that CBO did estimate food stamp needs at \$10.8 billion—but that was last summer, before the recent steep increases in unemployment. The CBO estimate was based on a projection that unemployemt would average 9.0 percent in fiscal year 1983, with unemployment reaching a peak of 9.5 percent in the first fiscal quarter and declining thereafter; 2 months of the first fiscal quarter have now passedand unemployment is far above 9.5 percent. For unemployment to average 9.5 percent for the quarter, it would

Mr. WHITTEN. Mr. Speaker, I yield have to drop to 7.3 percent in December.

CBO analysts have indicated that because of the high levels of unemployment, the \$10.8 billion estimate is no longer correct. When CBO issues its next set of budget estimates, the food stamp estimate will be in the \$11 to \$12 billion range. It is unfortunate that the administration chose to use an outdated estimate.

To avoid this type of situation in the future, the committee report to this appropriations bill requires that upon enactment, the Secretary must submit an estimate of the funds needed to fully the food stamp program in fiscal year 1983, together with a detailed description of the economic assumptions on which the estimate is based. In addition, the Secretary must report immediately to the Congress upon determining at any time that the estimate must be revised because of changes in economic or other conditions. The Appropriations Committee takes this directive-which appears in the committee report—quite seriously. As a member of the committee, I expect the Department to provide us with a revision of the \$10.8 billion estimate promptly.

In addition, the Department may not take any action to reduce benefits on the grounds that the \$10.8 billion estimate is too low. Congress has appropriated \$10.8 billion at this time because the administration submitted an official document stating that his was the full amount needed. The statement of managers indicates that the Appropriations Committees intend to provide additional funds for the food stamp program upon being notified that supplemental funds are needed to avoid benefit reductions. In past years, Congress has always provided needed supplemental funding for this program, and will certainly do so again. Any action by the administration to reduce benefits, rather than to allow the Congress ample time to provide supplemental funding, would be contrary to the intent of this act.

The \$10.8 billion should be sufficient to carry the program through August, so the Congress will be able to provide the needed amount of supplemental funding in the supplemental appropriations legislation next year.

WIC

For the WIC program, the conference report provides \$1.060 billion, the same level that was contained in the continuing resolution enacted at the beginning of October. The Department is required to make the \$1.060 billion, plus any carryover funds from fiscal year 1982, available to States in a timely manner so that these funds may be fully utilized in fiscal year 1983 to serve the maximum number of participants. The Department has provided \$265 million—one-quarter of the \$1.060 billion—for the first quarter of

the fiscal year. We expect the Department to issue additional \$265 million allocations promptly at the beginning of each of the three remaining quarters of the fiscal year, as well as to make allocations of carryover funds promptly as those funds become available. Finally, we expect the Department to conduct reallocations of fiscal year 1983 funds during fiscal year 1983 to the degree necessary to assure that available funds are used during fiscal year 1983 to the maximum extent fea-

I am pleased that in the advisory language in the statement of managers regarding the WIC food package, the conferees have urged that the nutritional integrity of the WIC food package be maintained.

Once again, Mr. Speaker, I urge my colleagues to support this conference report and these programs which are so important to our urban and rural communities.

Mr. WHITTEN. Mr. Speaker, I yield 2 minutes to the gentleman from Hawaii (Mr. Akaka), a member of the committee.

Mr. AKAKA. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the conference report, and I ask unanimous consent to revise and extend my remarks

Mr. Speaker, I want to thank Chairman Jamie Whitten for all his hard work on behalf of the American farmer. No one is better aware of the pressing needs of America's farmers than the gentleman from Mississippi nor has anyone in this House done more to help the ailing farms in our Nation than the chairman of our subcommittee. This bill is evidence of his concern and attention to the problems of agriculture.

This is a good bill, and deserves every Member's support. The funds in the Agriculture appropriations bill operate programs essential to our Nation's farmers and consumers. Without the programs contained in this bill, the current farm crisis will be far, far worse.

At a time when 12 million Americans are jobless, I am happy to see that the administration has agreed to support funding for vital domestic programs at a level sufficient for the full fiscal year. The nutrition programs in this bill are designed to assure a balanced and adequate diet for the elderly, for those on low incomes and for children who are considered to be a nutritional risk. These are the most vulnerable people in our society. Without the funding this bill contains, they will only be more susceptible to disease and illness.

The bill also provides essential levels of funding to combat the infestation and disease caused by insects and other pests. These pests destroy our farmer's crops and sicken and kill his animals at an alarming rate.

I am also happy to have the committee's support for funding of the Agricultural Cooperative Service in fiscal year 1983. For the most part, the amounts provided will continue programs of the Agricultural Cooperative Service at the previous year's level. To deny farmers and farmer cooperatives research, technical assistance and cooperative education, at a time when farm income is at its lowest point since the Great Depression, would only cause further unnecessary hardship for our farmers. The Department of Agriculture has testified that requests for technical assistance from the Agriculture Cooperative Service doubled between fiscal year 1980 and fiscal year 1981. This bill provides the assistance to meet this need.

Mr. Speaker, as a Member of the Agriculture Appropriations Subcommittee, and as a conferee on this bill, I am surprised at the response that has been generated by the conference agreement on the Senate amendment No. 69. In response to concerns raised by the Senate, the conferees included language in the statement of the managers to the effect that decisions regarding the composition of the WIC food package should be made on comprehensive scientific evidence. This would prevent the USDA from eliminating any food item based on a single component of that food.

Mr. Speaker, the conferees have expressed strong support for the WIC program. What has come to our attention is the attempt of the Food and Nutrition Service to limit foods in the WIC food package based upon a component of that food, when the best available scientific evidence indicates that the components they are attempting to eliminate from the package are safe for human consumption. The food components that the Food and Nutrition Service have targeted are chocolate for flavoring milk and sucrose and other sugars in breakfast cereals. This is being attempted despite the fact that sucrose and other sugars have been recognized as foods safe for human consumption for many years. Only last week the Food and Drug Administration reaffirmed the GRAS (generally recognized as safe) status of sucrose and other sugars.

One of the most successful of USDA's food distribution programs has been the supplemental feeding program for women, infants, and children introduced and adopted through the efforts of Hubert Humphrey in 1972. At that time, studies showed that numerous women, pregnant women and small children suffered from anemia because the needs of their bodies for iron were particularly great at that stage of their lives and growth. In the ensuing years, WIC has been successful in providing iron in their diets through the distribution of vouchers for the purchase of iron fortified breakfast cereals.

Some months ago, USDA came out with a regulation which has not been finalized, that would eliminate some of the cereals which had been available under WIC by limiting the per serving content of sucrose and other sugars.

In view of this and the knowledge possessed by the appropriate congressional committees and our conferees, we are not aware of any scientifically valid reasons for the Department's action. With FDA's action, it is difficult to believe that any such reason could be found. But even if USDA has some rationale, we would like them to consider the other characteristics of the WIC foods, particularly the cereals, which are critical to continued successes for the WIC program.

Given the solid improvements in the diets and health of the WIC participants and the lack of an adequate scientific basis for their action in limiting a food component that the FDA has recently reaffirmed as GRAS, we are advising the Department to require a specific scientific rationale for all changes in the food packages.

In closing, let me again urge my colleagues to lend their full support to this conference report. America's agri-

culture deserves no less.

Mr. MILLER of California. Mr. Speaker, it is the end of the Congress, so enter the special interest lobbyists who care more about selling their product than about the health and growth of America's mothers and infants.

WIC is a health and nutrition program for low-income pregnant women, infants, and children who have been medically certified to be at nutritional risk. The March of Dimes documented that those risks include birth defects, deafness, blindness, mental retardation and in to many cases, death. But the WIC program has been proven to cut infant mortality for its participants by one-third, and to reduce the incidence of low birth weight, the eighth leading cause of death in the United States.

Not only have we repeated evidence of the success of this program for its participants, but studies by the Harvard School of Public Health show that each \$1 spent on the prenatal component of WIC results in \$3 in short-term hospitalization costs. This 3:1 benefit ratio does not even take into account the long-term savings in reduced social services, health care, special education, and future dependency on disability payments.

Now, disregarding these successes, and seeing only a vehicle for their own product, special interest lobbyists are seeking to sue the WIC program to merchandise highly sugared cereals and chocolate milk. These special interest lobbyists offered no evidence

that their products would be beneficial to the high-risk mothers and infants who are the carefully selected target group for this program. Nor did these special interest lobbyists provide us information about the increased cost of the WIC food package as a result of including their high-sugar products. As the cost of the WIC food package increases, the numbers of women and children who can be served is reduced.

Today, we will be asked to approve the 1983 Agriculture appropriations conference report. Any interpretation that would indicate that the Department of Agriculture has to change regulations governing the WIC food package on the basis of the advisory language included in the statement of managers is inconsistent with the statutory requirement of the Child Nutrition Act as amended in 1978. This law requires the Secretary of Agriculture to set "appropriate levels" for sugar, fat and salt content of foods included in the WIC prescription food package.

The advisory language in the statement of managers is attempting to turn one of the Federal Government's most effective programs, the supple-mental feeding program for women, infants, and children (WIC) into a marketing device for special interest.

If USDA misconstrues this advisory language, this city will have a lot of happy, well-heeled lobbyists, but this will surely have country fewer healthy, well-fed mothers and infants. We cannot let special interests undermine the integrity of a successful program for vulnerable citizens.

• Mr. DASCHLE. Mr. Speaker, I would like to focus my remarks regarding the conference report on H.R. 7072, the Agriculture appropriations for fiscal year 1983 on two items-the limited resource loan program and FmHA deferral policy.

This is the first time that the limited resource loan program has been specifically mentioned in an appropriations bill. In the past this program, which is an earmark of funds within the FmHA operating and ownership loan programs for low income, limited resource family farmers, has been authorized in the FmHA loan reauthorization legislation.

This year the House passed an FmHA loan reauthorization bill (H.R. 5831) which contained a 25-percent earmark of FmHA operating and ownership loan money for the limited resource loan program. The Senate Agriculture Committee, in its reauthorization bill, set aside 15 percent of operating and ownership money for this same program.

However, the FmHA reauthorization bill has not, and appears it will not, get to the Senate floor this session of Congress. Because of that, and because of the clear sentiment in both Houses in support of the limited resource loan program, an amendment was attached to the fiscal year 1983 Agriculture appropriations bill on the Senate floor—the amendment earmarked 20 percent of the operating and ownership loan money for low income, limited resource farmers. The purpose of the amendment was to insure, in the temporary absence of an authorization, that the administration continue to operate this program.

Senate report language on the Agriculture appropriations bill reads:

The Committee remains concerned about the continued difficulty young persons are experiencing in getting started in farming. The Committee notes that current authority provides that not less than 20 percent of the funds provided for farm real estate and ownership loans shall be used for limited resource borrowers. This authority should not be interpreted as a cap but as a minimum level for limited resource loans. FmHA should place increased emphasis on assist ing new entrants to farming. To that end, Committee will expect FmHA to fully utilize the limited resource loan program to assist young persons getting started in farming. The Committee will expect to be kept informed on actions taken to comply with this directive. The Committee has added language which will continue the authority for limited resource loans in fiscal year 1983. . . . . As in the case of real estate loans, the Committee will expect FmHA to fully utilize the limited resource loan program to assist young persons getting started in farming.

The language in the conference report before us today, however, makes the use of the 20 percent of funds in the FmHA real estate and operating programs for low-income, limited resource farmers discretionary. The reason for this is that the conferees felt that an earmark of funds for this program would constitute authorizing language in an appropriations bill-while I understand and appreciate this jurisdictional problem, I hope that the administration will, in a recognition of congressional intent, continue the limited resource loan program. I am confident, furthermore, that early in the 98th Congress we will pass FmHA loan program reauthorization legislation which will contain a specific earmark of funds for this program.

On the matter of FmHA deferral policy, the conferees adopted language which refers to the current law regarding the Secretary's deferral authority, and goes on to say, "The conferees will expect the Secretary to make maximum use of his dicretion under all authorities available to him to avoid loan collection actions that would force out of business these family farmers." The Senate adopted language in the Agriculture appropriations bill which was identical to language in a bill introduced by myself and Congressman Dorgan. Our bill subsequently passed the House as part of H.R. 5831. While I welcome the language in this conference report urging the Secretary to more fully utilize his deferral authority, I intend to work next session to get signed into law the language contained in H.R. 5831—language which says that under certain conditions family size farmers are entitled to deferrals. The language says that furthermore, FmHA must notify borrowers of the existence of deferrals and other servicing remedies and of the limited resource loan program.

It is evident that FmHA does not, as a matter of course, inform loan applicants and borrowers of the existence of these programs. Farmers must know what their options are under the law and regulations, and must be able to make application for those options.

I am disappointed that the Senate leadership did not see fit to bring the FmHA reauthorization bill to the Senate floor this year, as that would have been a more appropriate vehicle to deal with the issue of deferrals and other credit issues.

I hope that in the next session of Congress we will pass and have signed into law a reauthorization bill which can more clearly deal with farm problems.

• Mr. BEDELL. Mr. Speaker, I rise in support of the conference report to accompany H.R. 7072, the Agriculture appropriations bill for fiscal year 1983. However, I wish to express my strong concern about the level of funding provided in the bill for the Agricultural Cooperative Service (ACS).

I believe that it is important that Members understand how the House and Senate arrived at the figure provided in the bill for ACS. I think that this explanation will make clear just how difficult it is to reduce the size of an entrenched Federal bureaucracy which is closely entwined with the in-

terest groups which it serves.

As many Members know, I have a practice of dropping in on Federal agencies without warning to find out how our bureauracy operates and how Federal tax dollars are spent. Usually on these visits I roam the halls of a department or agency and enter various offices at random. I ask the Government personnel in those offices what their jobs are, how they occupy their time, and so on.

Late in 1981 I paid just such a visit to USDA's Agricultural Cooperative Service. Over the course of about 1 week, I spent a total of nearly 2½ days questioning ACS officials about the role of their agency, its activities, its funding level, the utilization of its staff and other resources, and so on.

I came away from my personal review of this agency with the firm belief that this unit was overfunded and overstaffed.

The Agricultural Cooperative Service has served a very useful role in helping to organize new farmer cooperatives and providing assistance to young, struggling cooperatives. And I

have no doubt that its services will continue to be needed in helping new co-ops to get on their feet in the future.

However, I do not believe that the services of ACS will be needed at the same level that they have in the past. Farmers across the United States generally are served by strong cooperatives that provide essential assistance in marketing producers' crops and supplying them with needed inputs for their farming operations. In addition, organizations such as the Farm Credit System's Banks for Cooperatives and the National Council of Farmer Cooperatives have developed to where they can provide important technical, financial, and marketing assistance to the cooperatives, as well as serve important advocacy roles for the co-ops in Washington and elsewhere.

Consequently, after my in-depth investigation of the activities of ACS, I was pleased to note that the administration had proposed in its 1983 budget recommendation to the Congress that funding for the agency be reduced by about 25 percent from \$4.64 million in fiscal year 1982 to \$3.68 million in the current fiscal year. I made known my support for this reduction and proceeded to secure its adoption by this body.

However, I had scarcely completed my inspection of the ACS operation before lobbyists for those groups served by ACS began their phone calls and personal visits to my office in an attempt to head off my pursuit of this budget cut. All these lobbyists were well aware of my just completed tour of ACS and my interviews with agency officials. After making my case for the budget cuts to these interests served by ACS, few were in a position to disagree with my contention that indeed the agency could readily absorb a reduction in staff and resources.

I also made my case in a letter to the members of the Appropriations Subcommittee on Agriculture, Rural Development, and related agencies, and I am pleased to say that the subcommittee agreed to reduce funding for ACS by more than \$600,000 to just \$3,999,000. This reduced funding level was also adopted by the full Appropriations Committee and the House.

The Senate, on the other hand, approved \$5 million in funding for ACS in fiscal year 1983. And in conference, the conferees roughly split the difference in the House and Senate figures so that the final amount provided was \$4.63 million—exactly the same amount as ASC received last year.

So much for cutting Federal spending and reducing the size of the bureaucracy.

As I said at the outset, I believe this incident serves as a telling example of the difficulty we as policymakers face when we attempt to cut the budget.

There was not much money involved in this particular case—only thousands of dollars in a \$23 billion bill. But we face almost certain budget deficits of \$200 billion annually for the next few years, and our total annual Federal budget is well over \$700 billion. I hope that this one small example provides an indication, and a warning, of the difficulty we encounter as we take on a well entrenched bureaucracy with active and influential friends in the lobbying organizations which it serves, as we attempt to cut the budget.

I realize that for many Members I have only pointed out what is painfully obvious: Special interests with close ties to the bureaucracy tend to perpetuate the present level of Federal spending for their own cause, despite the nearly universal recognition that we need to cut the budget. But I simply offer this case as another example of the built-in momentum for Government spending, and urge continued diligence in our efforts to reverse this course and get a handle on

these record deficits.

Mr. WEISS. Mr. Speaker, I would like to commend the gentleman from Mississippi and his colleagues on the subcommittee for agreeing to appropriate full funding for the special supplemental food program for women, infants and children in the fiscal year 1983 agricultural appropriations bill. Certainly the program's track record demonstrates that WIC deserves no less

The WIC program supplements the diets of 2.2 million low-income pregnant and nursing women, infants, and children who are medically certified to be at nutritional risk. The program successfully integrates the distribution of supplemental foods with the provision of health care and nutrition education for program participants. Study after study, by USDA, Centers for Disease Control, universities, and publichealth departments, has found that WIC decreases infant mortality rates, the incidence of low-birth-weight babies, and the incidence of anemia. As a further testament to the programs effectveness, a Harvard study found that for every WIC dollar spent, up to \$3 is saved in hospitalization costs for low-birth-weight babies.

A major reason for WIC's success has been its adherence to nutritional standards and quality. The Education and Labor Committee, on which I serve. affirmed these standards by specifying in the 1978 WIC reauthorization that the food package contain supplemental foods that provide nutrients found to be lacking in the diets of the WIC participants. In addition, Public Law 95-627 clearly requires the Secretary "to assure that the fat, sugar, and salt content of the prescribed foods is appropriate.

In accordance with the statute and under the guidance of experts in the medical, dental, and nutrition communities, USDA has issued regulations which limit the amount of added sugar permitted in the WIC food package. This regulation, scheduled to be implemented at the end of this year, fulfills the mandate and intent of the WIC statute and contributes to the nutritional health of those who are served by the program.

I am concerned that the language in the appropriation bill's statement of managers conflicts with the prescriptions for the food package in the WIC statute. It appears to allow the inclusion of foods in the WIC package that contain inappropriately high levels of sugar, such as sugared cereals. Although the language in the statement of managers is only advisory, it may confuse what should be a clear directive to the administrators of the program.

For many years, the Congress has consistently stood behind the integrity of the WIC program. We cannot and should not tolerate a retreat from this commitment.

Mrs. SMITH of Nebraska. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. WHITTEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered. The SPEAKER pro tempore The question is on the conference report.

The question was taken; and the Speaker pro tempore. announced that the ayes appeared to have it.

Mr. DANNEMEYER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were-yeas 324, nays 73, not voting 36, as follows:

Mr. ATKINSON changed his vote from "yea" to "nay."

Mr. DECKARD changed his vote from "present" to "yea." Mr. MILLER of California changed his vote from "nay" to "yea."

So the conference report was agreed to

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

# PERSONAL EXPLANATION

Mr. MARRIOTT. Mr. Speaker, I rise for an item of personal explanation. Earlier today, I had a commitment to meet with the Secretary of Energy, Mr. Don Hodel, to discuss the implementation of the recently released EPA regulations governing the cleanup and long-term control of uranium ore tailings. This meeting prevented me from being present on the floor of the House during the vote on the conference report to the Agriculture appropriations bill for fiscal year 1983. With the Chair's permission, I would like the record to state that had been present for the vote on the conference report for H.R. 7072, the Agriculture appropriations bill for fiscal year 1983, I would have voted "aye."

# □ 1215

# AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 14: Page 11, line 18, strike out "\$321,506,000" and insert '\$321,439,000".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of

the Senate numbered 14 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "\$323,221,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 19: Page 17, line 15, after "basis" insert ": Provided further, That not less than \$66,000 of the funds contained in this appropriation shall be available for preparing and disseminating forecasts of farm sector receipts, production expenses, and net income indicators for crop year 1983 on a quarterly basis commencing prior to December 31, 1982".

# MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 19 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 34: Page 27, line 22, after "\$1,109,722,000" insert ", and for , and for an additional amount as authorized by section 521(c) of the Act as may be necessary to reimburse the fund to carry out a rental assistance program under section 521(a)(2) of the Housing Act of 1949, as amended".

# MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 34 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 37: Page 28, line 10, after "disasters" insert ": Provided, That not less than 20 per centum of the farm ownership loans nor less than 20 per centum of the operating loans insured, or made to be sold and insured, under this provision shall be for low-income limited resource borrowers; economic emergency loans under the Emergency Agricultural Credit Adjustment Act of 1978. \$600,000,000".

# MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 37 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": Provided, That 20 per centum of the farm ownership loans and 20 per centum of the operating loans insured, or made to be sold and insured, under this provision may be for low-income limited resource borrowers; guaranteed economic emergency loans under the Emergency Agri-cultural Credit Adjustment Act of 1978, \$600,000,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 45: Page 32, line 5, after "principal" insert ": Provided further, That as a condition of approval of insured electric loans during fiscal year 1983, borrowers shall obtain concurrent supplemental financing in accordance with the applicable criteria and ratios in effect as of July 15,

### MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 45 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 55: Page 43, line 3, after "allocated" insert ": Provided further, That if the funds available for Nutrition Education and Training grants authorized under section 19 of the Child Nutrition Act of 1966, as amended, require a ratable reduction in those grants, the minimum grant for each State shall be \$50,000".

# MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 55 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 56: Page 43, line 3, after "allocated" insert ": Provided further, That only final reimbursement claims for service of meals, supplements, and milk submitted to State agencies by eligible schools, summer camps, institutions, and service in-stitutions within 60 days following the claiming month shall be eligible for reimbursement from funds appropriated under this Act. States may receive program funds appropriated under this Act for meals, supplements, and milk served during any month only if the final program operations report for such month is submitted to the Department within 90 days following that month. Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary".

# MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 56 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 60: Page 43, line 25, after "\$32,600,000" insert ": Provided, That funds provided herein shall remain available until September 30, 1984".

MOTION OFFERED BY MR. WHITTEN Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 60 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 67: Page 52, line 17, after "Facilities;" insert "Agricultural Research Service, Buildings and Facilities;".

MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 67 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 70: Page 57, after line 2, insert:

#### AGRICULTURAL COMMODITY PRODUCTION ON HIGHLY ERODIBLE LAND

Sec. 626. (a) For purposes of this section-(1) the term "agricultural commodity" means an agricultural commodity normally produced by annual tilling of the soil, in-

cluding one-trip planters; and
(2) the term "highly erodible land" means land classified by the Soil Conservation Service of the Department of Agriculture as class IVe, VIe, VII, or VIII land under the Land Capability Classification System of the Soil Conservation Service as in effect on the date of enactment of this Act.

(b) Except as provided in subsection (c) and notwithstanding any other provision of law, no funds appropriated under this Act may be expended to provide to a person who produces an agricultural commodity on

highly erodible land-

(1) any type of price support assistance on such commodity made available under the Agricultural Act of 1949 (7 U.S.C. 1421 et seq.), the Commodity Credit Corporation Charter Act (15 U.S.C. 714 et seq.), or any

(2) a loan for the construction or purchase of a facility for the storage of such commodity made under section 4(h) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(h)):

(3) crop insurance for such commodity under the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.);

(4) a disaster payment for such commodity made under the Agricultural Act of 1949

(7 U.S.C. 1421 et seq.); or (5) a loan made, insured, or guaranteed under the Consolidated Farm and Rural Development Act (7 U.S.C. 1921 et seq.) or any other provision of law administered by the Farmers Home Administration, if the Secre tary of Agriculture determines that such loan will be used for a purpose which will contribute to excessive erosion of highly erodible land.

(c) Subsection (b) shall not apply to-

(1) any land which was cultivated by a person to produce any of the 1977 through 1982 crops of agricultural commodities;

(2) any agricultural commodity planted by person before the date of enactment of

(3) any agricultural commodity planted by person during a crop year beginning before such date:

(4) any loan described in subsection (b) made before such date; or

(5) any agricultural commodity produced using a conservation system which has been approved by a soil conservation district.

# MOTION OFFERED BY MR. WHITTEN

Mr. WHITTEN. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. WHITTEN moves that the House recede from its disagreement to the amendment of the Senate numbered 70 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

SEC. 625. Notwithstanding any other provision of this Act, appropriations under this Act to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, are \$10,466,057,000, and, as authorized by law, the Commodity Credit Corporation shall carry out an Export Credit Sales direct loan program of not more than \$500,000,000 in fiscal year 1983.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

# GENERAL LEAVE

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks, and that I be permitted to include tables, charts, and other extraneous material on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

# FEDERAL RULES OF CIVIL PRO-CEDURE AMENDMENTS ACT OF

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the bill (H.R. 7154) to amend the Federal Rules of Civil Procedure with respect to certain service of process by mail, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill. The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

Mr. McCLORY. Mr. Speaker, reserving the right to object, and I shall not object, I make this reservation in order that the gentleman from California (Mr. EDWARDS) may explain what he and I are doing here today.

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. McCLORY. I yield to the gentleman from California.

Mr. EDWARDS of California. Mr. Speaker, in July Mr. McCLory and I brought before the House a bill to delay the effective date of proposed changes in rule 4 of the Federal Rules of Civil Procedure, dealing with service of process. The Congress enacted that legislation and delayed the effective date so that we could cure certain problems in the proposed amendments to rule 4.

Since that time, Mr. McClory and I introduced a bill, H.R. 7154, that cures those problems. It was drafted in consultation with representatives of the Department of Justice, the Judicial Conference of the United States, and others.

The Department of Justice and the Judicial Conference have endorsed the bill and have urged its prompt enactment. Indeed, the Department of Justice has indicated that the changes occasioned by the bill will facilitate its collection of debts owed to the Government.

I have a letter from the Office of Legislative Affairs of the Department of Justice supporting the bill that I will submit for the RECORD. Also, I am submitting for the RECORD a sectionby-section analysis of the bill.

H.R. 7154 makes much needed changes in rule 4 of the Federal Kules of Civil Procedure and is supported by all interested parties. I urge my colleagues to support it.

U.S. DEPARTMENT OF JUSTICE, OFFICE OF LEGISLATIVE AFFAIRS Washington, D.C., December 10, 1982. Hon. Peter W. Rodino, Jr., Chairman, Committee on the Judiciary,

House of Representatives, Washington,

DEAR MR. CHAIRMAN: This is to proffer the views of the Department of Justice on H.R. 7154, the proposed Federal Rules of Civil Procedure Amendments Act of 1982. While the agenda is extremely tight and we appreciate that fact, we do reiterate that this Department strongly endorses the enactment of H.R. 7154. We would greatly appreciate your watching for any possible way to enact this legislation expeditiously.

H.R. 7154 would amend Rule 4 of the Federal Rules of Civil Procedure to relieve effectively the United States Marshals Service of the duty of routinely serving summonses and complaints for private parties in civil actions and would thus achieve a goal this Department has long sought. Experience has shown that the Marshals Service's increasing workload and limited budget require such major relief from the burdens imposed by its role as process-server in all civil actions.

The bill would also amend Rule 4 to permit certain classes of defendants to be served by first class mail with a notice and acknowledgment of receipt form enclosed. We have previously expressed a preference for the service-by-mail provisions of the pro-posed amendments to Rule 4 which the Supreme Court transmitted to Congress on April 28, 1982.

The amendments proposed by the Supreme Court would permit service by registered or certified mail, return receipt requested. We had regarded the Supreme Court proposal as the more efficient because it would not require an affirmative act of signing and mailing on the part of a defendant. Moreover, the Supreme Court proposal would permit the entry of a default judgment if the record contained a returned receipt showing acceptance by the defendant or a returned envelope showing refusal of the process by the defendant and subsequent service and notice by first class mail. However, critics of that system of mail service have argued that certified mail is not an effective method of providing actual notice to defendants of claims against them because signatures may be illegible or may not match the name of the defendant, or because it may be difficult to determine whether mail has been "unclaimed" or "refused," the latter providing the sole basis for a default judgment.

As you know, in light of these criticisms the Congress enacted Public Law 97-227 (H.R. 6663) postponing the effective date of the proposed amendments to Rule 4 until October 1, 1983, so as to facilitate further review of the problem. This Department opposed the delay in the effective date, primarily because the Supreme Court's proposed amendments also contained urgently needed provisions designed to relieve the United States Marshals of the burden of serving summonses and complaints in private civil actions. In our view, these necessary relief provisions are readily separable from the issues of service by certified mail and the propriety of default judgment after service by certified mail which the Congress felt warranted additional review.

During the floor consideration of H.R. 6863 Congressman Edwards and other proponents of the delayed effective date pledged to expedite the review of the proposed amendments to Rule 4, given the need to provide prompt relief for the Marshals Service in the service of process area. In this spirit Judiciary Committee staff consulted with representatives of this Department, the Judicial Conference, and others who had voiced concern about the proposed amendments.

H.R. 7154 is the product of those consultations and accommodated the concerns of the Department in a very workable and acceptable manner.

Accordingly, we are satisfied that the provisions of H.R. 7154 merit the support of all three branches of the Federal Government and everyone else who has a stake in the fair and efficient service of process in civil actions. We urge prompt consideration of H.R. 7154 by the Committee,

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program.

Sincerely.

ROBERT A. McConnell,
Assistant Attorney General.

H.R. 7154—Federal Rules of Civil PROCEDURE AMENDMENTS ACT OF 1982 BACKGROUND

The Federal Rules of Civil Procedure set forth the procedures to be followed in civil actions and proceedings in United States district courts. These rules are usually amended by a process established by 28 U.S.C. 2072, often referred to as the "Rules Enabling Act". The Rules Enabling Act provides that the Supreme Court can propose new rules of "practice and procedure" and amendments to existing rules by transmitting them to Congress after the start of a regular session but not later than May 1. The rules and amendments so proposed take effect 90 days after transmittal unless legislation to the contrary is enacted.

lation to the contrary is enacted.¹
On April 28, 1982, the Supreme Court transmitted to Congress several proposed amendments to the Federal Rules of Civil Procedure, the Federal Rules of Criminal Procedure (which govern criminal cases and proceedings in Federal courts), and the Rules and Forms Governing Proceedings in the United States District Courts under sections 2254 and 2255 of Title 28, United States Code (which govern habeas corpus proceedings). These admendments were to have taken effect on August 1, 1982.

The amendments to Rule 4 of the Federal Rules of Civil Procedure were intended primarily to relieve United States marshals of the burden of serving summonses and complaints in private civil actions. Appendix II, at 7 (Report of the Committee on Rules of Practice and Procedure), 16 (Advisory Committee Note). The Committee received numerous complaints that the changes not only failed to achieve that goal, but that in the process the changes saddled litigators with flawed mail service, deprived litigants of the use of effective local procedures for service, and created a time limit for service replete with ambiguitles that could only be resolved by costly litigation. See House Report No. 97-662, at 2-4 (1982).

In order to consider these criticisms, Congress enacted Public Law 97-227, postponing the effective date of the proposed amend-

¹The drafting of the rules and amendments is actually done by a committee of the Judicial Conference of the United States. In the case of the Federal Rules of Civil Procedure, the initial draft is prepared by the Advisory Committee on Civil Rules. The Advisory Committee's draft is then reviewed by the Committee on Rules of Practice and Procedure, which must give its approval to the draft. Any draft approved by that committee is forwarded to the Judicial Conference. If the Judicial Conference approves the draft, it forwards the draft to the Supreme Court. The Judicial Conference's role in the rule-making process is defined by 28 U.S.C. 331.

preme Court. The Judicial Conference's role in the rule-making process is defined by 28 U.S.C. 331.

For background information about how the Judicial Conference committees operate, see Wright, "Procedural Reform: Its Limitation and Its Future," 1 Ga. L. Rev. 563, 565-66 (1967) (civil rules); statement of United States District Judge Roszel C. Thomsen, Hearings on Proposed Amendments to the Federal Rules of Criminal Procedure Before the Subcommittee on Criminal Justice of the House Committee on the Judiciary, 93d Cong., 2d Sess. at 25 (1974) (criminal rules); statement of United States Circuit Judge J. Edward Lumbard, id. at 203 (criminal rules); J. Weinstein, Reform of Federal Court Rulemaking Procedure (1977); Weinstein, "Reform of Federal Rulemaking Procedures," 76 Colum. L. Rev., 905 (1976).

ments to Rule 4 until October 1, 1983.<sup>2</sup> Accordingly, in order to help shape the policy behind, and the form of, the proposed amendments, Congress must enact legislation before October 1, 1983.<sup>3</sup>

With that deadline and purpose in mind, consultations were held with representatives of the Judicial Conference, the Department of Justice, and others who had voiced concern about the proposed amendments. H.R. 7154 is the product of those consultations. The bill seeks to effectuate the policy of relieving the Marshals Service of the duty of routinely serving summonses and complaints. It provides a system found to be effective in California, and finally, it makes appropriate stylistic, grammatical, and other changes in Rule 4.

# NEED FOR THE LEGISLATION

#### 1. Current Rule 4

Rule 4 of the Federal Rules of Civil Procedure relates to the issuance and service of process. Subsection (c) authorizes service of process by personnel of the Marshals Service, by a person specially appointed by the Court, or "by a person authorized to serve process in an action brought in the courts of general jurisdiction of the state in which the district court is held or in which service is made." Subsection (d) describes how a summons and complaint must be served and designates those persons who must be served in cases involving specified categories of defendants. Mail service is not directly authorized. Subsection (d)(7), however, authorizes service under the law of the state in which the district court sits upon defendants described in subsections (d)(1) (certain individuals) and (d)(3) (organizations). Thus, if state law authorizes service by mail of a summons and complaint upon an individual or organization described in subsections (d) (1) or (3), then subsection (d)(7) authorizes service by mail for United States district courts in that state.4

# 2. Reducing the role of marshals

The Supreme Court's proposed modifications of Rule 4 were designed to alleviate the burden on the Marshals Service of serving summonses and complaints in private civil actions. Appendix II (Report of the Committee on Rules of Practice and Procedure) (Advisory Committee Note). While the Committee received no complaints about the goal of reducing the role of the Marshals Service, the Court's proposals simply failed to achieve that goal. See House Report No. 97-662, at 2-3 (1982).

The Court's proposed Rule 4(c)(2)(B) required the Marshals Service to serve summonses and complaints "pursuant to any statutory provision expressly providing for service by a United States Marshal or his

¹ In addition to amending Rule 4, we have previously recommended: (a) amendments to 28 U.S.C. § 569(b) redefining the Marshals traditional role by eliminating the statutory requirement that they serve subpoenas, as well as summonses and complaints, and; (b) amendments to 28 U.S.C. § 1921 changing the manner and level in which marshal fees are charged for serving private civil process. These legislative changes are embodied in Section 10 of S. 2567 and the Department's proposed fiscal year 1983 Appropriations Authorization bill. If, in the Committee's judgment, efforts to incorporate these suggested amendments in H.R. 7154 would in any way impede consideration of the bill during the few remaining legislative days in the 97th Congress, we would urge that they be separately considered early in the 98th Congress.

<sup>&</sup>lt;sup>2</sup> All of the other amendments, including all of the proposed amendments to the Federal Rules of Criminal Procedure and the Rules and Forms Governing Proceedings in the United States District Courts under sections 2254 and 2255 of Title 28, United States Code, took effect on August 1, 1982, as scheduled.

<sup>&</sup>lt;sup>3</sup>The President has urged Congress to act promptly. See President's Statement on Signing H.R. 6663 into Law, 18 Weekly Comp. of Pres. Doc. 982 (August 2, 1982).

<sup>4</sup> Where service of a summons is to be made upon a party who is neither an inhabitant of, nor found within, the state where the district court sits, subsection (e) authorizes service under a state statute or rule of court that provides for service upon such a party. This would authorize mail service if the state statute or rule of court provided for service by mail.

deputy." 5 Cne such statutory provision is 28 U.S.C. 56 (b), which compels marshals to "execute all lawful writs, process and orders issued under authority of the United States, including those of the courts . . .. (emphasis added). Thus, any party could have invoked 28 U.S.C. 569(b) to utilize a marshal for service of a summons and complaint, thereby thwarting the intent of the new subsection to limit the use of marshals. The Justice Department acknowledges that the proposed subsection did not accomplish its objectives.6

Had 28 U.S.C. 569(b) been inconsistent with proposed Rule 4(c)(2)(B), the latter would have nullified the former under 28 U.S.C. 2072, which provides that "All laws in conflict with such rules shall be of no further force or effect after such rules have taken effect." Since proposed Rule Since proposed 4(c)(2)(B) specifically referred to statutes such as 28 U.S.C. 569(b), however, the new subsection did not conflict with 28 U.S.C. 569(b) and did not, therefore, supersede it.

H.R. 7154 cures this problem and achieves the desired reduction in the role of the Marshals Service by authorizing marshals to serve summonses and complaints "on behalf of the United States". By so doing, H.R. 7154 eliminates the loophole in the Court's proposed language and still provides for service by marshals on behalf of the Gov-

# 3. Mail service

The Supreme Court's proposed subsection (d) (7) and (8) authorized, as an alternative to personal service, mail service of summonses and complaints on individuals and organizations described in subsection (d) (1) and (3), but only through registered or certified mail, restricted delivery. Critics of that system of mail service argued that registered and certified mail were not necessarily effective methods of providing actual notice to defendants of claims against them. This was so, they argued, because signatures may be illegible or may not match the name of the defendant, or because it may be difficult to determine whether mail has been "un-claimed" or "refused", the latter apparently providing the sole basis for a default judgment.8

5 The Court's proposal authorized service by the Marshals Service in other situations. This authority, however, was not seen as thwarting the underlying policy of limiting the use of marshals. See Appendix II, (Advisory Committee Note).

<sup>6</sup> Appendix I (letter of Assistant Attorney General Robert A. McConnell).

<sup>7</sup>The provisions of H.R. 7154 conflict with 28 U.S.C. 569(b) because the latter is a broader command to marshals to serve all federal court process. As a later statutory enactment, however, H.R. 7154 supersedes 28 U.S.C. 569(b), thereby achieving the goal of reducing the role of marshals.

\* Proposed Rule 4(d)(8) provided that "Service . . . shall not be the basis for the entry of a default or a judgment by default unless the record contains a return receipt showing acceptance by the defend-ant or a returned envelope showing refusal of the process by the defendant." This provision reflects a desire to preclude default judgments on unclaimed mail. See Appendix II (Report of the Committee on Rules of Practice and Procedure).

The interpretation of Rule 4(d)(8) to require a re-fusal of delivery in order to have a basis for a de-fault judgment, while undoubtedly the interpreta-tion intended and the interpretation that reaches the fairest result, may not be the only possible in-terpretation. Since a default judgment can be en-tered for defendant's failure to respond to the complaint once defendant has been served and the time to answer the complaint has run, it can be argued that a default judgment can be obtained where the mail was unclaimed because proposed subsection (j), which authorized dismissal of a complaint not H.R. 7154 provides for a system of service by mail similar to the system now used in California. See Cal. Civ. Pro. § 415.30 (West 1973). Service would be by ordinary mail with a notice and acknowledgment of receipt form enclosed. If the defendant re-turns the acknowledgment form to the sender within 20 days of mailing, the sender files the return and service is complete. If the acknowledgment is not returned within 20 days of mailing, then service must be effected through some other means provided for in the Rules.

This system of mail service avoids the notice problems created by the registered and certified mail procedures proposed by the Supreme Court. If the proper person receives the notice and returns the acknowledgment, service is complete. If the proper person does not receive the mailed form, or the proper person receives the notice but fails to return the acknowledgment form, another method of service authorized by law is required. In either instance, however, the defendant will receive actual notice of the claim. In order to encourage defendants to return the acknowledgment form, the court can order a defendant who does not return it to pay the costs of service unless the defendant can show good cause for the failure to return it.

# 4. The local option

The Court's proposed amendments to Rule 4 deleted the provision in current subsection (d)(7) that authorizes service of a summons and complaint upon individuals and organizations "in the manner prescribed by the law of the state in which the district court is held for the service of summons or other like process upon any such defendant in an action brought in the courts of general jurisdiction of that state." The Committee received a variety of complaints about the deletion of this provision. Those in favor of preserving the local option saw no reason to forego systems of service that had been successful in achieving effective notice.9

H.R. 7154 carries forward the policy of the current rule and permits a party to serve a summons and complaint upon individuals and organizations described in Rule 4(d) (1) and (3) in accordance with the law of the state in which the district court sits. Thus, the bill authorizes four methods of serving a summons and complaint on such defendants: (1) service by a nonparty adult (Rule 4(c)(2)(A)); (2) service by personnel of the Marshals Service, if the party qualifies, such as because the party is proceeding in forma pauperis (Rule 4(c)(2)(B)); (3) service in any manner authorized by the law of the state in which the district court is held (Rule 4(c)(2)(C)(i)); or (4) service by regular mail with a notice and acknowledgment of receipt form enclosed (Rule 4(c)(2)(C)(ii)).10

# 5. Time limits

Rule 4 does not currently provide a time limit within which service must be completed. Primarily because United States mar-

served within 120 days, provided that mail service would be deemed made "on the date on which the process was accepted, refused, or returned as unclaimed" (emphasis added).

shals currently effect service of process, no time restriction has been deemed necessary. Appendix II (Advisory Committee Note). Along with the proposed changes to subdivisions (c) and (d) to reduce the role of the Marshals Service, however, came new subdivision (j), requiring that service of a summons and complaint be made within 120 days of the filing of the complaint. If service were not accomplished within that time. proposed subdivision (j) required that the action "be dismissed as to that defendant without prejudice upon motion or upon the court's own initiative". Service by mail was deemed made for purposes of subdivision (j) 'as of the date on which the process was accepted, refused, or returned as un-claimed".11

H.R. 7154 adopts a policy of limiting the time to effect service. It provides that if a summons and complaint have not been served within 120 days of the filing of the complaint and the plaintiff fails to show good cause" for not completing service within that time, then the court must dismiss the action as to the unserved defend-ant. H.R. 7154 ensures that a plaintiff will be notified of an attempt to dismiss the action. If dismissal for failure to serve is raised by the court upon its own motion, the legislation requires that the court provide notice to the plaintiff. If dismissal is sought by someone else, Rule 5(a) of the Federal Rules of Civil Procedure requires that the motion be served upon the plaintiff.

Like proposed subsection (j), H.R. 7154 provides that a dismissal for failure to serve within 120 days shall be "without prejudice". Proposed subsection (j) was criticized by some for ambiguity because, it was argued, neither the text of subsection (j) nor the Advisory Committee Note indicated whether a dismissal without prejudice would toll a statute of limitation. See House Report 97-662, at 3-4 (1982). The problem would arise when a plaintiff files the complaint within the applicable statute of limitation period but does not effect service within 120 days. If the statute of limitation period expires during that period, and if the plaintiff's action is dismissed "without prejudice", can the plaintiff refile the complaint and maintain the action? The answer depends upon how the statute of limitation is tolled.12

<sup>11</sup>While return of the letter as unclaimed was deemed service for the purpose of determining whether the plaintiff's action could be dismissed, return of the letter as unclaimed was not service for the purpose of entry of a default judgment against the defendant. See note 8 supra.

12 The law governing the tolling of a statute of limitation depends upon the type of civil action involved. In a dversity action, state law governs tolling. Walker v. Armco Steel Corp., 446 U.S. 740: (1980). In Walker, plaintiff had filed his compiaint and thereby commenced the action under Rule 3 of the Federal Rules of Civil Procedure within the statutory period. He did not, however, serve the summons and complaint until after the statutory period had run. The Court held that state law (which required both filing and service within the statutory period) governed, barring plaintiff's

In the federal question action, the courts of appeals have generally held that Rule 3 governs, so that the filing of the complaint tolls a st that the filing of the complaint tolls a statute of limitation. United States v. Wahl, 583 F. 2d 285 (6th Cir. 1978); Windbrooke Dev. Co. v. Environmental Enterprises Inc. of Fla., 524 F. 2d 461 (5th Cir. 1975); Metropolitan Paving Co. v. International Union of Operating Engineers, 439 F.2d 300 (10th Cir. 1971); Moore Co. v. Sid Richardson Carbon & Gasoline Co., 347 F.2d 921 (8th Cir.), cert. denied, 383 U.S. 925, reh. denied, 384 U.S. 914 (1965); Hoffman v. Halden, 268 F.2d 280 (9th Cir. 1959). The

Proponents of the California system of mail service, in particular, saw no reason to supplant California's proven method of mail service with a certified mail service that they believed likely to result in default judgments without actual notice to defendants. See House Report No. 97-662, at 3

<sup>10</sup> The parties may, of course, stipulate to service, as is frequently done now.

If the law provides that the statute of limitation is tolled by filing and service of the complaint, then a dismissal under H.R. 7154 for failure to serve within the 120 days would, by the terms of the law controlling the tolling, bar the plaintiff from later maintaining the cause of action.13 If the law provides that the statute of limitation is tolled by filing alone, then the status of the plaintiff's cause of action turns upon the plaintiff's diligence. If the plaintiff has not been diligent, the court will dismiss the complaint for failure to serve within 120 days, and the plaintiff will be barred from later maintaining the cause of action because the statute of limitation has run. A dismissal without prejudice does not confer upon the plaintiff any rights that the plaintiff does not otherwise possess and leaves a plaintiff whose action has been dismissed in the same position as if the action had never been filed. If, on the other hand, the plaintiff has made reasonable efforts to effect service, then the plaintiff can move under Rule 6(b) to enlarge the time within which to serve or can oppose dismissal for failure to serve. A court would undoubtedly permit such a plaintiff additional time within which to effect service. Thus, a diligent plaintiff can preserve the cause of action. This result is consistent with the policy behind the time limit for service and with statutes of limitation, both of which are designed to encourage prompt movement of civil actions in the federal courts.

# 6. Conforming and clarifying subsections (d)(4) and (5)

Current subsections (d)(4) and (5) prescribe which persons must be served in cases where an action is brought against the United States or an officer or agency of the United States. Under subsection (d)(4), where the United States is the named defendant, service must be made as follows: (1) personal service upon the United States attorney, an assistant United States attorney, or a designated clerical employee of the United States attorney in the district in which the action is brought; (2) registered or certified mail service to the Attorney General of the United States in Washington, D.C.; and (3) registered or certified mail service to the appropriate officer or agency if the action attacks an order of that officer or agency but does not name the officer or agency as a defendant. Under subsection (d)(5), where an officer or agency of the United States is named as a defendant, service must be made as in subsection (d)(4), except that personal service upon the officer or agency involved is required.

The time limit for effecting service in H.R. 7154 would present significant difficulty to a plaintiff who has to arrange for personal service upon an officer or agency that may be thousands of miles away. There is little reason to require different types of service when the officer or agency is named as a party, and H.R. 7154 therefore conforms the manner of service under subsection (d)(5) to the manner of service under subsection (d)(4).

continued validity of this line of cases, however, must be questioned in light of the Walker case, even though the Court in that case expressly reserved judgment about federal question actions, see Walker v. Armco Steel Corp., 446 U.S. 741, 751 n.ll (1980).

# SECTION-BY-SECTION ANALYSIS SECTION 1

Section 1 provides that the short title of the bill is the "Federal Rules of Civil Procedure Amendments Act of 1982".

#### SECTION 2

Section 2 of the bill consists of 7 numbered paragraphs, each amending a different part of Rule 4 of the Federal Rules of Civil Procedure.

Paragraph (1) deletes the requirement in present Rule 4(a) that a summons be delivered for service to the marshal or other person authorized to serve it. As amended by the legislation, Rule 4(a) provides that the summons be delivered to "the plaintiff or the plaintiff's attorney, who shall be responsible for prompt service of the summons and complaint". This change effectuates the policy proposed by the Supreme Court. See Appendix II (Advisory Committee Note).

Paragraph (2) amends current Rule 4(c). which deals with the service of process. New Rule 4(c)(1) requires that all process, other than a subpoena or a summons and complaint, be served by the Marshals Service or by a person specially appointed for that purpose. Thus, the Marshals Service or persons specially appointed will continue to serve all process other than subpoenas and summonses and complaints, a policy identical to that proposed by the Supreme Court. See Appendix II (Report of the Judicial Conference Committee on Rules of Practice and Procedure). The service of subpoenas is governed by Rule 45,14 and the service of summonses and complaints is governed by new Rule 4(c)(2).

New Rule 4(c)(2)(A) sets forth the general rule that summonses and complaints shall be served by someone who is at least 18 years old and not a party to the action or proceeding. This is consistent with the Court's proposal. Appendix II (Advisory Committee Note). Subparagraphs (B) and (C) of new Rule 4(c)(2) set forth exceptions to this general rule.

Subparagraph (B) sets forth 3 exceptions to the general rule. First, subparagraph (B)(i) requires the Marshals Service (or someone specially appointed by the court) serve a summons and complaint on behalf of a party proceeding in forma pauperis or a seaman authorized to proceed under 28 U.S.C. 1916. This is identical to the Supreme Court's proposal. See Appendix II (text of proposed rule) (Advisory Committee Note). Second, subparagraph (B)(ii) requires the Marshals Service (or someone specially appointed by the court) to serve a summons and complaint on behalf of the United States or an officer or agency thereof. This achieves the desired reduction in the role of marshals, yet maintains the appropriate use of marshals to serve on behalf of the Government. Third, subparagraph B(iii) requires the Marshals Service (or someone specially appointed by the court) to serve a summons and complaint when the court orders such person to do so in order properly to effect service in that particular action. 15 This, except for nonsubstantive

<sup>14</sup> Rule 45(c) provides that "A subpoena may be served by the marshal, by his deputy, or by any other person who is not a party and is not less than 18 years of age."

changes in phrasing, is identical to the Supreme Court's proposal. See Appendix II (text of proposed rule) (Advisory Committee Note).

Subparagraph (C) of new Rule 4(c)(2) provides 2 exceptions to the general rule of service by a nonparty adult. These exceptions apply only when the summons and complaint is to be served upon persons described in Rule 4(d)(1) (certain individuals) or Rule 4(d)(3) (organizations). First, subparagraph (C)(i) permits service of a summons and complaint in a manner authorized by the law of the state in which the court sits. This restates the option to follow local law currently found in Rule 4(d)(7) and would authorize service by mail if the state law so allowed. The method of mail service in that instance would, of course, be the method permitted by state law.

Second, subparagraph (C)(ii) permits service of a summons and complaint by regular mail. The sender must send to the defendant, by first-class mail, postage prepaid, a copy of the summons and complaint, together with 2 copies of a notice and acknowledgment of receipt of summons and complaint form and a postage prepaid return envelope addressed to the sender. If a copy of the notice and acknowledgment form is not received by the sender within 20 days after the date of mailing, then service must be made under Rule 4(c)(2)(A) or (B) (i.e., by a nonparty adult or, if the person qualifies,17 by personnel of the Marshals Service or a person specially appointed by the court) in the manner prescribed by Rule 4(d)(1) or (3) (i.e., personal or substituted service).

New Rule 4(c)(2)(D) permits a court to penalize a person who avoids service by mail. It authorizes the court to order a person who does not return the notice and acknowledgment form within 20 days after mailing to pay the costs of service, unless that person can show good cause for failing to return the form. The purpose of this provision is to encourage the prompt return of the form so that the action can move forward without unnecessary delay. Fairness requires that a person who causes another additional and unnecessary expense in ef-

sons attempting to serve process. Federal judges undoubtedly will consider the risk of harm to private persons who would be making personal service when deciding whether to order the Marshals Service to make service under Rule 4(c)(2)(B)(iii).

16 The methods of service authorized by Rule 4(c)(2)(C) may be invoked by any person seeking to effect service. Thus, a nonparty adult who receives the summons and complaint for service under Rule 4(c)(1) may serve them personally or by mail in the manner authorized by Rule 4(c)(2)(C)(ii). Similarly, the Marshals Service may utilize the mail service authorized by Rule 4(c)(2)(C)(ii) when serving a summons and complaint under Rule 4(c)(2)(B)(i)(ii). When serving a summons and complaint under Rule 4(c)(2)(B)(iii), however, the Marshals Service must serve in the manner set forth in the court's order. If no particular manner of service is specified, then the Marshals Service may utilize Rule 4(c)(2)(C)(ii). It would not seem to be appropriate, however, for the Marshals Service to utilize Rule 4(c)(2)(C)(ii) in a situation where a previous attempt to serve by mail failed. Thus, it would not seem to be appropriate for the Marshals Service to attempt service by regular mail when serving a summons and complaint on behalf of a plaintiff ho is proceeding in forma pauperis if that plain tiff previously attempted unsuccessfully to serve the defendant by mail.

17 To obtain service by personnel of the Marshals Service or someone specially appointed by the court, a plaintiff who has unsuccessfully attempted mail service under Rule 4(c)(2)(C)(ii) must meet the conditions of Rule 4(c)(2)(B)—for example, the plaintiff must be proceeding in forma pauperis.

<sup>13</sup> The same result obtains even if service occurs within the 120 day period, if the service occurs after the statute of limitation has run.

<sup>18</sup> years of age."

18 Some litigators have voiced concern that there may be situations in which personal service by someone other than a member of the Marshals Service may present a risk of injury to the person attempting to make the service. For example, a hostile defendant may have a history of injuring per-

fecting service ought to reimburse the party who was forced to bear the additional expense.

Subparagraph (E) of Rule 4(c)(2) requires that the notice and acknowledgment form described in new Rule 4(c)(2)(C)(ii) be executed under oath or affirmation. This provision tracks the language of 28 U.S.C. 1746, which permits the use of unsworn declarations under penalty of perjury whenever an oath or affirmation is required. Statements made under penalty of perjury are subject to 18 U.S.C. 1621(2), which provides felony penalties for someone who "willfully subscribes as true any material matter which he does not believe to be true". The requirement that the form be executed under oath or affirmation is intended to encourage truthful submissions to the court, as the information contained in the form is important to the parties.18

New Rule 4(c)(3) authorizes the court freely to make special appointments to serve summonses and complaints under Rule 4(c)(2)(B) and all other process under Rule 4(c)(1). This carries forward the policy

of present Rule 4(c).

Paragraph (3) of section 2 of the bill makes a non-substantive change in the caption of Rule 4(d) in ordr to reflect more accurately the provisions of Rule 4(d). Paragraph (3) also deletes a provision on service of a summons and complaint pursuant to state law. This provision is redundant in view of new Rule 4(c)(2)(C)(i).

Paragraph (4) of section 2 of the bill conforms Rule 4(d)(5) to present Rule 4(d)(4). Rule 4(d)(5) is amended to provide that service upon a named defendant agency or officer of the United States shall be made by "sending" a copy of the summons and complaint "by registered or certified mail" to the defendant. Rule 4(d)(5) currently provides for service by "delivering" the copies to the defendant, but 28 U.S.C. 1391(e) authorizes delivery upon a defendant agency or officer outside of the district in which the action is brought by means of certified mail. Hence, the change is not a marked departure from current practice.

Paragraph (5) of section 2 of the bill amends the caption of Rule 4(e) in order to describe subdivision (e) more accurately.

Paragraph (6) of section 2 of the bill amends Rule 4(g), which deals with return of service. Present Rule 4(g) is not changed except to provide that, if service is made pursuant to the new system of mail service (Rule 4(c)(2)(C)(ii)), the plaintiff or the plaintiff's attorney must file with the court the signed acknowledgment form returned by the person served.

Paragraph (7) of section 2 of the bill adds new subsection (j) to provide a time limitation for the service of a summons and complaint. New Rule 4(j) retains the Supreme Court's requirement that a summons and complaint be served within 120 days of the filing of the complaint. See Appendix II (Advisory Committee Note). The plaintiff must be notified of an effort or intention to dismiss the action. This notification is mandated by subsection (i) if the dismissal is being raised on the court's own initiative and will be provided pursuant to Rule 5 (which requires service of motions upon the adverse party) if the dismissal is sought by someone else.20 The plaintiff may move under Rule 6(b) to enlarge the time period. See Appendix II, at Id. (Advisory Committee Note). If service is not made within the time period or enlarged time period, however, and if the plaintiff fails to show "good cause" for not completing service, then the court must dismiss the action as to the unserved defendant. The dismissal is "without prejudice". The term "without prejudice' means that the dismissal does not constitute an adjudication of the merits of the complaint. A dismissal "without prejudice" leaves a plaintiff whose action has been dismissed in the position in which that person would have been if the action had never been filed.

### SECTION 3

Section 3 of the bill amends the Appendix of Forms at the end of the Federal Rules of Civil Procedure by adding a new Form 18-A, "Notice and Acknowledgment for Service by Mail". This new form is required by new Rule 4(c)(2)(C)(ii), which requires that the notice and acknowledgment form used with service by regular mail conform substantially to Form 18-A

Form 18-A as set forth in section 3 of the bill is modeled upon a form used in California.21 It contains 2 parts. The first part is a notice to the person being served that tells that person that the enclosed summons and complaint is being served pursuant to Rule 4(c)(2)(C)(ii); advises that person to sign and date the acknowledgment form and indicate the authority to receive service if the person served is not the party to the action (e.g., the person served is an officer of the organization being served); and warns that failure to return the form to the sender within 20 days may result in the court ordering the party being served to pay the expenses involved in effecting service. The notice also warns that if the complaint is not responded to within 20 days, a default judgment can be entered against the party being served. The notice is dated under penalty of perjury by the plaintiff or the plaintiff's attorney.

The second part of the form contains the acknowledgment of receipt of the summons and complaint. The person served must declare on this part of the form, under penalty of perjury, the date and place of service and the person's authority to receive service.

# SECTION 4

Section 4 of the bill provides that the changes in Rule 4 made by H.R. 7154 will take effect 45 days after enactment, thereby giving the bench and bar, es well as other interested persons and organizations (such as the Marshals Service), an opportunity to prepare to implement the changes made by the legislation. The delayed effective date means that service of process issued before

the effective date will be made in accordance with current Rule 4. Accordingly, all process in the hands of the Marshals Service prior to the effective date will be served by the Marshals Service under the present

#### SECTION 5

Section 5 of the bill provides that the amendments to Rule 4 proposed by the Supreme Court (whose effective date was postponed by Public Law 97-227) shall not take effect. This is necessary because under Public Law 97-227 the proposed amendments will take effect on October 1, 1983.

### APPENDIX I

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AFFAIRS,
Washington, D.C., July 19, 1982.
Hon. Peter W. Rodino, Jr.,

Chairman, Committee on the Judiciary, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: It has been brought to our attention that a pending bill, H.R. 6663, would delay the effective date of recent amendments to Rule 4 of the Federal Rules of Civil Procedure from August 1, 1982 to October 1, 1983. For the reasons set forth below, we strongly oppose any extension of the effective date of amended Rule 4.

The primary purpose of the recent amendments to Rule 4 was to eliminate the use of the United States Marshals Service to serve process for private parties in civil actions. At least in part, a major impetus for the amendments was the Department of Justice itself, which had found that the Marshals Service's increasing workload and limited budget required major relief from the burdens imposed by its role as process-server in all civil actions. Accordingly, the Department requested, and the Judicial Conference and Supreme Court approved, amendments to Rule 4 which would alleviate the problems of the Marshals Service.

We believe that no useful purpose would be served by delaying the effective date of amended Rule 4. The Marshals Service and the Department's litigating units have made the necessary arrangements to implement the amended Rule. Moreover, the fourteenmonth delay sought by H.R. 6663 would greatly postpone much-needed relief for the Marshals Service. Accordingly, we believe that amended Rule 4 should be allowed to take effect on August 1, as planned.

In his statement accompanying the introduction of H.R. 6663, Representative Edwards raised the question whether amended Rule 4 could possibly take effect without a corresponding change in 28 U.S.C. § 569(b).

Pursuant to 28 U.S.C. 2072, the Supreme Court has the power to prescribe by general rules "the forms of process, writs, pleadings, and motions, and the practice and procedure of the district courts. \* \* \* Such rules shall not abridge, enlarge or modify any substantial right \* \* \*. All laws in conflict with such rules shall be of no further force or effect after such rules have taken effect \* \* \* " Prescribing the manner in which a defendant is to be notified that a suit has been instituted against him relates to the "practice and procedure of the district courts." Hanna v. Plumer, 380 U.S. 460, 464 (1964). Thus, it is clear that insofar as Rule 4, as amended, may conflict with 28 U.S.C. 569(b), Rule 4 applies and that this was the result intended by Congress in enacting 28 U.S.C. 2072.

nother

about
on the
endant in the complaint filed with the court) or,
in multi-party actions, another party to the action.
Of the endant failure to effect service is due to that person's evasion of service, a court should not dismiss because
the plaintiff has "good cause" for not completing

<sup>21</sup> See Cal. Civ. Pro. § 415.30 (West 1973).

<sup>&</sup>lt;sup>18</sup> For example, the sender must state the date of mailing on the form. If the form is not returned to the sender within 20 days of that date, then the plaintiff must serve the defendant in another manner and the defendant may be liable for the costs of such service. Thus, a defendant would suffer the consequences of a misstatement about the date of mailing.
<sup>19</sup> The 120 day period begins to run upon the

<sup>&</sup>lt;sup>18</sup> The 120 day period begins to run upon the filing of each complaint. Thus, where a defendant files a cross-claim against the plaintiff, the 120 day period begins to run upon the filing of the crosscomplaint, not upon the filing of the plaintiff's complaint initiating the action.

While a statutory change is not a necessary predicate to amending Rule 4, this Department reiterates its position that amending Rule 4 may not be enough to achieve the desired objective of reducing the role of the U.S. Marshals in serving private process. Rather than only amending Rule 4, we recommend: (a) amendments to 28 U.S.C. § 569(b) redefining the Marshals traditional role by eliminating the statutory requirement that they serve all civil process and; (b) amendments to 28 U.S.C. § 1921 changing the manner and level in which marshal fees are charged for serving private civil process. These legislative changes are embodied in Section 10 of S. 2567 and the Department's proposed Fiscal Year 1983 Appropriations Authorization bill. Thus, the proposed amendments to Rule 4 and 28 U.S.C. §§ 569(b) and 1921 can be seen as integral parts of a comprehensive solution to the problems associated with service of private process by the U.S. Marshals Service.

I trust our comments will be useful to the Committee in its consideration of H.R. 6663. Please do not hesitate to contact me with any questions or concerns you might have concerning the bill or the Department of Justice's comments on it.

The Office of Management and Budget has advised that there is no objection to the submission of this report from the standpoint of the Administration's program. Sincerely,

ROBERT A. McCONNELL, Assistant Attorney General.

97th Congress, 2d Session-House Document No. 97-173

EXCERPTS OF AMENDMENTS TO THE FEDERAL RULES OF CIVIL PROCEDURE

Communication from the Chief Justice of the United States transmitting amendments to the Federal Rules of Civil Procedure. pursuant to 28 U.S.C. 2072, together with an excerpt from the reports of the Judicial Conference of the United States containing the Advisory Committee notes.

April 29, 1982.-Referred to the Committee on the Judiciary and ordered to be printed.

SUPREME COURT OF THE UNITED STATES Washington, D.C., April 28, 1982. Hon. THOMAS P. O'NEILL,

Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: By direction of the Supreme Court of the United States, I have the honor to submit to the Congress amendments to the Federal Rules of Civil Procedure prescribed pursuant to Section 2072 of Title 28, United States Code;

Amendments to the Federal Rules of Criminal Procedure prescribed pursuant to Section 3771 and 3772 of Title 18, United States Code; and

Amendments to the Rules and Forms Governing Proceedings in the United States District Courts under Section 2254 and 2255 of Title 28, United States Code.

Accompanying these rules are excerpts from the Reports of the Judicial Conference of the United States containing the Advisory Committee notes which were submitted to the Court for its consideration pursuant to Section 331 of Title 28, United States

Respectfully, WARREN E. BURGER, Chief Justice. AMENDMENTS TO THE FEDERAL RULES OF CIVIL PROCEDURE

Ordered:

1. That the Federal Rules of Civil Procedure be, and they hereby are, amended by including therein amendments to Rule 4 as hereinafter set forth:

Rule 4. Process

(a) Summons: Issuance. Upon the filing of the complaint the clerk shall forthwith issue a summons and deliver it for service to the plaintiff or his attorney. Upon request of the plaintiff separate or additional summons shall issue against any defendants.

(c) By Whom Served:

(1) Service of a summons and complaint shall be made by any person who is not a party and is not less than 18 years of age except as provided in subdivision (c)(2) of

(2) At the request of a party, service of a summons and complaint shall be made by a United States marshal, by his deputy, or by some person specially appointed by the court for that purpose

(A) on behalf of a party authorized to proceed in forma pauperis pursuant to Title 28, U.S.C. § 1915 or of a seaman authorized to proceed under Title 28, U.S.C. § 1916,

(B) pursuant to any statutory provision expressly providing for service by a United

States marshal or his deputy, and
(C) pursuant to any order issued by the court stating that service in that particular action is required to be made by a United States marshal, deputy, or special appointee in order to guarantee that service is properly effected.

(3) Service of all other process shall be made by a United States marshal, by his deputy, or by some person specially appoint-

ed by the court for that purpose.

(4) The plaintiff or his attorney shall be responsible for making arrangements for prompt service. Special appointments to serve process shall be made freely.

Summons and Complaint: Personal Service and Service by Mail. The summons and complaint shall be served together. The plaintiff shall furnish the person making service with such copies as are necessary. Service shall be made as follows:

(7) For service upon a defendant of any class referred to in paragraph (1) or (3) of this subdivision of this rule, it is also sufficient if the summons and complaint are served in the manner prescribed by any statute of the United States or in the manner prescribed by the law of the state in which the district court is held for the service of summons or other like process upon any such defendant in an action brought in the courts of general jurisdiction of that state; except that a summons and complaint served by mail may be served only as authorized by and pursuant to the procedures set forth in paragraph (8) of this subdivision of this rule.

(8) Service of a summons and complaint upon a defendant of any class referred to in aragraph (1) or (3) of this subdivision of this rule may be made by the plaintiff or by any person authorized to serve process pursuant to Rule 4(c), including a United States marshal or his deputy, by registered or certified mail, return receipt requested and delivery restricted to the addressee. Service pursuant to this paragraph shall not be the basis for the entry of a default or a judgment by default unless the record contains a return receipt showing acceptance by the defendant or a returned envelope showing refusal of the process by the defendant. If delivery of the process is refused, the person serving the process, promptly upon the receipt of notice of such refusal, shall mail to the defendant by first class mail a copy of the summons and complaint and a notice that despite such refusal the case will proceed and that judgment by default will be rendered against him unless he appears to defend the suit. Any such default or judgment by default shall be set aside pursuant to Rule 5(c) or Rule 60(b) if the defendant demonstrates to the court that the return receipt was signed or delivery was refused by an unauthorized person.

(e) Same: Service Upon Party Not Inhabitant of or Found Within State. Whenever a statute of the United States or an order of court thereunder provides for service of a summons, a notice, or an order in lieu of summons upon a party not an inhabitant of or found within the state in which the dis-trict court is held, service may be made under the circumstances and in the manner prescribed by the statute or order, or, if there is no provision therein prescribing the manner of service, in a manner stated in this rule. Whenever a statute or rule of court of the state in which the district court is held provides (1) for service of a summons, a notice, or an order in lieu of summons upon a party not an inhabitant of or found within the state, or (2) for service upon or notice to him to appear and respond or defend in an action by reason of the attachment or garnishment or similar seizure of his property located within the state, service may in either case be made under the circumstances and in the manner prescribed in the statute or rule; except that service by mail must be made pursuant to the procedures set forth in paragraph (8) of subdivision (d) of this rule.

(g) Return. The person serving the process shall make proof of service thereof to the court promptly and in any event within the time during which the person served must respond to the process. If service is made by a person other than a United States marshal or his deputy, he shall make affidavit thereof. If service was by mail, the person serving process shall show in his proof of service the date and place of mailing, and attach a copy of the return receipt or returned envelope if and when received by him showing whether the mailing was accepted, refused, or otherwise returned. If the mailing was refused, the return shall also make proof of any further service mailed to the defendant pursuant to paragraph (8) of subdivision (d) of this rule. The return along with the receipt or envelope and any other proof shall be promptly filed by the clerk with the pleadings and become part of the record. Failure to make proof of service does not affect the validity of the service.

(j) Summons: Time Limit for Service. If service of the summons and complaint is not made upon a defendant within 120 days after the filing of the complaint, the action shall be dismissed as to that defendant without prejudice upon motion or upon the court's own initiative. If service is made by mail pursuant to Rule 4(d)(8), service shall be deemed to have been made for the purposes of this provision as of the date on which the process was accepted, refused, or returned as unclaimed. This subdivision shall not apply to service in a foreign coun-

try pursuant to Rule 4(i).

2. That the foregoing a 2. That the foregoing amendments to the Federal Rules of Civil Procedure shall take effect on August 1, 1982, and shall govern all civil proceedings thereafter commenced and, insofar as just and reasonable, all pro-

ceedings then pending.

3. That the Chief Justice be, and he hereby is, authorized to transmit to the Congress the foregoing amendments to the Federal Rules of Civil Procedure in accordance with the provisions of Section 2072 of Title 28, United States Code.

EXCERPT FROM THE REPORT OF THE JUDICIAL CONFERENCE COMMITTEE ON RULES OF PRAC-TICE AND PROCEDURE

To the Chief Justice of the United States, Chairman, and Members of the Judicial Conference of the United States:

#### FEDERAL RULES OF CIVIL PROCEDURE

A. The Advisory Committee on the Federal Rules of Civil Procedure has submitted to your Committee proposed amendments to Rule 4 of the Federal Rules of Civil Procedure pertaining to the service of process in a civil action. The proposed amendments to the rule are set out in Appendix A and are accompanied by an advisory committee note

explaining their purpose and intent.

The proposed amendments are designed to relieve the United States marshals of the duty of serving summonses and complaints in most civil actions in which the government is not a party. Any person who is not a party to the litigation and is not less than 18 years of age would be permitted to serve the summons and complaint. In addition, the amendments would permit service of summonses and complaints by registered or certified mail, return receipt requested and delivery restricted to the addressee. A default or default judgment could not be entered unless it appears of record that the defendant accepted or refused to accept service by mail.

At the request of a party, the United States marshals would continue to serve the summons and complaint: (1) on behalf of a party authorized to proceed in forma pau-peris 28 U.S.C. § 1915, or of a seaman authorized to proceed without the prepayment of costs, 28 U.S.C. § 1916; (2) when required by Federal statute; and (3) pursuant to a court order when necessary to guarantee effective service in a particular action. The marshals would continue to serve forms of process which require an enforcement presence, such as temporary restraining orders, injunctions, attachments, arrests and orders relating to judicial sales.

The proposed amendments to Rule 4 are occasioned by the reduction in appropriations available to the Marshal's Service and pending legislation to relieve marshals of the duty to serve the summons and com-plaint in private civil litigation. Appropriations have already been reduced and it appears that the proposed legislation will soon be enacted into law. For these reasons it is important that Rule 4 be amended prompt-

ly.
Your Committee recommends that the proposed amendments to Rule 4 be approved by the Conference and transmitted immediately to the Supreme Court for its consideration with the recommendation that the amendments be approved and transmitted to the Congress pursuant to

B. The Advisory Committee has conducted public hearings on the proposed amend-ments to the civil rules distributed to the bench and bar last June. The Committee has reviewed all comments received and will be submitting its proposals in final form at the June meeting of the Standing Commit-

MARCH 1982.

#### APPENDIX A

To the Committee on Rules of Practice and

I have the honor of submitting herewith our Committee's final draft of proposed amendments to Rule 4 of the Federal Rules of Civil Procedure and its Advisory Note, which recommend changes designed to relieve United States marshals of the duty of serving summonses and complaints in most federal civil litigation in which the government is not a party. Under the amendments the marshals would be obligated to serve such process only to the extent required by federal statute, court order, or where an enforcement presence is advisable, e.g., service of restraining orders, attachments, arrests and notices of judicial sales.

The draft amendments authorize service of a summons or complaint to be made by any non-party over 18 years of age, a procedure that has worked satisfactorily in a substantial number of other jurisdictions. Service must be made within 120 days after the filing of the complaint unless an enlargement of time is obtained by order of the court pursuant to Rule 6(b). Under the amendments special provisions authorizing service by certain facilities, such as sheriffs, state court officers or private process servers, would no longer be required, as long as the person making service is a non-party and over 18 years of age. A uniform and exclusive method of serving a summons and complaint by registered mail is also authorized by subdivision (d)(8).

A preliminary draft sent out by our Committee to the public in September 1981 provided that service of a summons and complaint, except where required to be made by a marshal or special appointee, must be made by a private process server registered with the clerk of the district court. The proposal met substantial opposition and was found inadvisable for the reason that, although it might assist in reducing some risks of fraud or inefficiency, the courts' assumption of responsibilities hitherto borne by the marshals' service posed numerous difficult administrative problems, including investigation into the qualifications and integrity of those seeking to act as professional process servers, regulation of their fees, and burdensome maintenance of records, which federal courts should not be required to assume. Accordingly our Committee recommends the simple procedure of authorizing service by any non-party adult.

We believe that the amended rule, if adopted, will relieve the marshals of a very large share of service duties which they are finding it difficult if not impossible to perform within present statutory budget and fee restrictions and that it is consistent with legislation on the subject now pending before the Congress.

Respectfully submitted.

WALTER R. MANSFIELD, Chairman, Advisory Committee on Federal Civil Rules.

JANUARY 15, 1982.

PROPOSED AMENDMENTS TO RULE 4 OF THE FEDERAL RULES OF CIVIL PROCEDURE® RULE 4. PROCESS

(a) Summons: Issuance. Upon the filing of the complaint the clerk shall forthwith issue a summons and deliver it for service to [the marshal or to any other person authorized by Rule 4(c) to serve it 1 the plaintiff or his attorney. Upon request of the plaintiff separate or additional summons shall issue against any defendants.

(c) By whom served.

(1) Service of [process] a summons and complaint shall be made by any person who is not a party and is not less than 18 years of age except as provided in subdivision (c)(2) of this rule.

(2) At the request of a party, service of a summons and complaint shall be made by a United States marshal, by his deputy, or by some person specially appointed by the court for that purpose-

(A) on behalf of a party authorized to proceed in forma pauperis pursuant to Title 28, U.S.C. § 1915 or of a seamen authorized to proceed under Title 28, U.S.C. § 1916,

(B) pursuant to any statutory provision expressly providing for service by a United States marshal or his deputy, and

(C) pursuant to any order issued by the court stating that service in that particular action is required to be made by a United States marshal, deputy, or special appointee in order to guarantee that service is properly effected. [, except that a subpoena may be served as provided in Rule 45. Special appointment to serve process shall be made

(3) Service of all other process may [also] shall be made by a [person authorized to serve process in an action brought in the courts of general jurisdiction of the state in which the district court is held or in which service is made United States marshal, by his deputy, or by some person specially appointed by the court for that purpose.

(4) The plaintiff or his attorney shall be responsible for making arrangements for prompt service. Special appointments to serve process shall be made freely.

(d) Summons and complaint: Personal service and service by mail. The summons and complaint shall be served together. The plaintiff shall furnish the person making service with such copies as are necessary. Service shall be made as follows:

(7) For service upon a defendant of any class referred to in paragraph (1) or (3) of this subdivision of this rule, it is also sufficient if the summons and complaint are served in the manner prescribed by any statute of the United States or in the manner prescribed by the law of the state in which the district court is held for the service of summons or other like process upon any such defendant in an action brought in the courts of general jurisdiction of that state; except that a summons and complaint served by mail may be served only as authorized by and pursuant to the procedures set forth in paragraph (8) of this subdivision of this rule.

(8) Service of a summons and complaint upon a defendant of any class referred to in paragraph (1) or (3) of this subdivision of this rule may be made by the plaintiff or by any person authorized to serve process pur-

<sup>\*</sup>New matter is in italic; matter to be omitted is in black brackets.

suant to Rule 4(c), including a United States marshal or his deputy, by registered or certified mail, return receipt requested and delivery restricted to the addressee. Service pursuant to this paragraph shall not be the basis for the entry of a default or a judgment by default unless the record contains a return receipt showing acceptance by the defendant or a returned envelope showing refusal of the process by the defendant. If delivery of the process is refused, the person serving the process, promptly upon the receipt of notice of such refusal, shall mail to the defendant by first class mail a copy of the summons and complaint and a notice that despite such refusal the case will proceed and that judgment by default will be rendered against him unless he appears to defend the suit. Any such default or judgment by default shall be set aside pursuant to Rule 55(c) or Rule 60(b) if the defendant demonstrates to the court that the return receipt was signed or delivery was refused by an unauthorized person.

(e) Same: Service upon party not inhabit-ant of or found within State. Whenever a statute of the United States or an order of court thereunder provides for service of a summons, [or of] a notice, or of an order in lieu of summons upon a party not an inhabitant of or found within the state in which the district court is held, service may be made under the circumstances and in the manner prescribed by the statute or order, or, if there is no provision therein prescribing the manner of service, in a manner stated in this rule. Whenever a statute or rule of court of the state in which the district court is held provides (1) for service of a summons, [or of] a notice, or of an order in lieu of summons upon a party not an inhabitant of or found within the state, or (2) for service upon or notice to him to appear and respond or defend in an action by reason of the attachment or garnishment or similar seizure of his property located within the state, service may in either case be made under the circumstances and in the manner prescribed in the statute or rule; except that service by mail must be made pursuant to the procedures set forth in paragraph (8) of subdivision (d) of this rule.

(g) Return. The person serving the process shall make proof of service thereof to the court promptly and in any event within the time during which the person served must respond to the process. If service is made by a person other than a United States marshal or his deputy, he shall make affidavit thereof. If service was by mail, the person serving process shall show in his proof of service the date and place of mailing, and attach a copy of the return receipt or returned envelope if and when received by him showing whether the mailing was accepted, refused, or otherwise returned. If the mailing was refused, the return shall also make proof of any further service mailed to the defendant pursuant to paragraph (8) of subdivision (d) of this rule. The return along with the receipt or envelope and any other proof shall be promptly filed by the clerk with the pleadings and become part of the record. Failure to make proof of service does not affect the validity of the service.

(j) Summons: Time limit for service. If service of the summons and complaint is not made upon a defendant within 120 days after the filing of the complaint, the action shall be dismissed as to that defendant without prejudice upon motion or upon the

court's own initiative. If service is made by mail pursuant to Rule 4(d)(8), service shall be deemed to have been made for the purposes of this provision as of the date on which the process was accepted, refused, or returned as unclaimed. This subdivision shall not apply to service in a foreign country pursuant to Rule 4(t).

# ADVISORY COMMITTEE NOTE

Subdivision (a). This amendment conforms this subdivision to the amendment to subdivision (c), and emphasizes the Committee's intent that methods of service other than by United States marshals should be

utilized whenever appropriate.

Subdivision (c). The purpose of this amendment is to reduce the burden on the United States Marshal Service of serving civil process in private litigation, without endangering the effective and efficient service of civil process. Service of summonses and complaints, which now comprise the bulk of service by a marshal, rarely require the presence of any enforcement officer. However, the alternative of restricting such service to a narrow group, such as registered professional process servers, would impose excessive administrative burdens on the court. The amendment therefore permits service to be made by any non-party adult, a procedure that has functioned successfully in a number of jurisdictions where it is presently authorized. See, e.g., Cal. Civ. Code § 414.10 (West); D.C.C.E. Superior Ct. § 414.10 (West); D.C.C.E. Superior Ct. Rules—Civil 4(c)(2); N.M. Stat. Ann. § 21-1-1 (Rule 4(e)(1)); N.Y. Civ. Prac. Law § 2103(a); N.D.R. Civ. P. 4(d)(1); Va. Code § 8.01-293(2); Wisc. R. Civ. P. 801.10(1); Wisc. Stat. Ann. § 801.10(1) (West). To the extent that other facilities for personal service of process (as distinguished from service by mail, see subdivision (d)(8) of this Rule, infra), such as sheriffs, court officers, or professional process servers, remain available, the amendment would not preclude their being used, provided the person making service is a non-party over 18 years of age.

In keeping with the policy of relieving marshals to the maximum extent possible of the duty of serving summonses and complaints, subdivision (c)(2) limits the cases in which marshals may be required to make such service to three categories: (1) in forma pauperis and seamen's suits, (2) cases in which service by a marshal is specifically mandated or authorized by statute, including service on behalf of the United States pursuant to Title 28, U.S.C. § 569(b), and (3) those limited number of instances in which the court, having been satisfied that service by a marshal or special appointee is necessary to assure that service will be effected, issues an order accordingly. Even in these three categories the plaintiff is expected first to seek service by private means when-ever feasible rather than impose the burden on the Marshals Service. Similarly, court orders directing service by marshal should not be issued unless they really are necessary. In short, the aim is to encourage use of methods that do not involve marshals.

Under paragraph (c)(3), forms of process which require an enforcement presence, such as temporary restraining orders, injunctions, attachments, arrets, and orders relating to judicial sales, shall be served by marshals, their deputies, and persons specially appointed by the court. This language continues the current practice of district courts and encourages the use of special appointees when an enforcement presence is not necessary or a marshal is not available.

Paragraph (c)(4) places responsibility on the plaintiff for arranging service by private process server, special appointee, or marshal. It also provides for courts to make special appointments under paragraphs (c)(2) and (3) freely.

Subdivision (d)(7). The amendment makes subdivision (d)(8) the exclusive procedure in federal courts for serving summonses and complaints by mail. This provision, however, deals only with the procedure for use of the mails for service and does not otherwise affect federal or state statutory authorizations for service of process.

Subdivision (d)(8). The proposed amendment authorizes the service of summonses and complaints by registered or certified mail upon individual defendants other than infants and incompetent persons and upon defendants that are business entities. Service upon defendants described in paragraphs (2), (4), (5) and (6) of this subdivision is not affected. Service that could be made pursuant to paragraph (c)(1) may be mailed by the plaintiff, his attorney, or any person over 18 years of age. When the marshal, his deputy, or a special appointee is called upon to make service upon an individual or business entity pursuant to one of the subparagraphs of paragraph (c)(2) including routine in forma pauperis and seamen's cases, such person may serve by mail except when personnal service is required by statute.

The proposed amendment is designed to permit mail service to be the basis for the entry of defaults and default judgments when actual notice reasonably can be expected to have occurred. Thus, if the defendant or a person authorized to accept process for him either has signed the return receipt or has refused to accept the process, a default could be entered. In the case of a refusal, additional notice must be sent to the defendant. It is important to note that because paragraph (d)(8) restricts delivery to the addressee, only the defendant or persons expressly authorized to accept for the defendant-for example, by letter-could sign the return receipt.

Subdivision (e). The added sentence simply makes clear that when service under this subdivision is made by mail, it shall be in the manner prescribed by subdivision (d)(8).

Subdivision (g). The proposed amendment specifies additional procedures for making proof of service of process, which are necessitated by the proposed amendment to subdivision (d)(8).

Subdivision (j). Rule 4, as it presently is drafted, provides no time limit for the service of summonses and complaints. As long as service was performed by marshals such a restriction was not necessary. However, the proposed gradual elimination of marshal service raises new concerns about timeliness. Thus, the proposed amendment requires service of process to be made within 120 days after filing the complaint. Unless the time is enlarged by the court pursuant to Rule 6(b), failure to meet this deadline will result in dismissal of the action without prejudice. This subdivision does not apply to attempted service in a foreign country pursuant to Rule 4(1).

Mr. McCLORY. Mr. Speaker, I thank the gentleman from California (Mr. Edwards), and I commend the gentleman on having worked out this compromise. I think it is a very reasonable compromise.

Mr. Speaker, I rise in support of the legislation being proposed by my good friend and colleague from California (Mr. EDWARDS). There is no opposition to H.R. 7154 from our side of the aisle. In addition, the bill has the support of the U.S. Judicial Conference, the Department of Justice, and the U.S. Marshals Service. I am not aware of any opposition to this legislation.

The bill, of which I am a cosponsor, amends the rules of civil procedure to provide that U.S. marshals will not ordinarily serve summonses and complaints in private civil suits. This bill presents a compromise between the Department of Justice and the Judicial Conference, and I urge my col-

leagues to support it.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the bill, as follows:

# H.R. 7154

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Rules of Civil Procedure Amendments Act of 1982".

SEC. 2. The Federal Rules of Civil Proce-

dure are amended as follows:

(1) Rule 4(a) of such Rules is amended by striking out "it for service to the marshal or to any other person authorized by Rule 4(c) to serve it" and inserting in lieu thereof 'the summons to the plaintiff or the plaintiff's attorney, who shall be responsible for prompt service of the summons and a copy of the complaint".

(2) Subsection (c) of Rule 4 of such Rules

is amended to read as follows:

(c) SERVICE.

"(1) Process, other than a subpoena or a summons and complaint, shall be served by a United States marshal or deputy United States marshal, or by a person specially appointed for that purpose.

"(2)(A) A summons and complaint shall, except as provided in subparagraphs (B) and (C) of this paragraph, be served by any person who is not a party and is not less

than 18 years of age.

"(B) A summons and complaint shall, at the request of the party seeking service or such party's attorney, be served by a United States marshal or deputy United States marshal, or by a person specially appointed by the court for that purpose, only-

'(i) on behalf of a party authorized to proceed in forma pauperis pursuant to Title 28, U.S.C. § 1915, or of a seaman authorized to proceed under Title 28, U.S.C. § 1916, "(ii) on behalf of the United States or an

officer or agency of the United States, or "(iii) pursuant to an order issued by the court stating that a United States marshal or deputy United States marshal, or a person specially appointed for that purpose, is required to serve the summons and complaint in order that service be properly effected in that particular action.

"(C) A summons and complaint may be served upon a defendant of any class referred to in paragraph (1) or (3) of subdivi-

sion (d) of this rule

"(i) pursuant to the law of the State in which the district court is held for the service of summons or other like process upon such defendant in an action brought in the courts of general jurisdiction of that State,

"(ii) by mailing a copy of the summons and of the complaint (by first-class mail, postage prepaid) to the person to be served, together with two copies of a notice and acknowledgment conforming substantially to form 18-A and a return envelope, postage prepaid, addressed to the sender. If no ac knowledgment of service under this subdivision of this rule is received by the sender within 20 days after the date of mailing, service of such summons and complaint shall be made under subparagraph (A) or (B) of this paragraph in the manner prescribed by subdivision (d)(1) or (d)(3).

"(D) Unless good cause is shown for not doing so the court shall order the payment of the costs of personal service by the person served if such person does not com-plete and return within 20 days after mailing, the notice and acknowledgment of re-

ceipt of summons.

"(E) The notice and acknowledgment of receipt of summons and complaint shall be executed under oath or affirmation.

"(3) The court shall freely make special appointments to serve summonses and complaints under paragraph (2)(B) of this sub-division of this rule and all other process under paragraph (1) of this subdivision of this rule.".

(3) Rule 4(d) of such Rules is amended-

(A) by striking out "Summons: Personal Service" and inserting "Summons and Com-PLAINT: PERSON TO BE SERVED" in lieu thereof: and

(B) by striking out paragraph 7.

(4) Rule 4(d)(5) of such Rules is amend-

(A) by striking out "delivering" and inserting "sending" in lieu thereof, and

(B) by inserting "by registered or certified

mail" after "complaint' (5) Rule 4(e) of such Rules is amended by striking out "SAME" and inserting "SUM-MONS" in lieu thereof.

(6) Subdivision (g) of Rule 4 of such Rules

is amended to read as follows:

"(g) RETURN. The person serving the process shall make proof of service thereof to the court promptly and in any event within the time during which the person served must respond to the process. If service is made by a person other than a United States marshal or deputy United States marshal, such person shall make affidavit thereof. If service is made under subdivision (c)(2)(C)(ii) of this rule, return shall be made by the sender's filing with the court the acknowledgment received pursuant to such subdivision. Failure to make proof of service does not affect the validity of the

(7) Rule 4 of such Rules is amended by

adding at the end the following:

"(j) SUMMONS: TIME LIMIT FOR SERVICE. If a service of the summons and complaint is not made upon a defendant within 120 days after the filing of the complaint and the party on whose behalf such service was re-quired cannot show good cause why such service was not made within that period, the action shall be dismissed as to that defendant without prejudice upon the court's own initiative with notice to such party or upon motion. This subdivision shall not apply to service in a foreign country pursuant to subdivision (i) of this rule."

SEC. 3. The Appendix of Forms at the end of the Federal Rules of Civil Procedure is amended by inserting after Form 18 the fol"FORM 18-A.—NOTICE AND ACKNOWLEDGMENT FOR SERVICE BY MAIL

"United States District Court for the Southern District of New York

"Civil Action, File Number

"A. B., Plaintiff v. "C. D., Defendant/ Notice and Acknowledgment of Receipt of Summons and Complaint

#### NOTICE

"To: (insert the name and address of the person to be served.)

"The enclosed summons and complaint re served pursuant to Rule 4(c)(2)(C)(ii) of the Federal Rules of Civil Procedure.

"You must complete the acknowledgment part of this form and return one copy of the completed form to the sender within 20 days.

You must sign and date the acknowledgment. If you are served on behalf of a corpo ration, unincorporated association (including a partnership), or other entity, you must indicate under your signature your relationship to that entity. If you are served on behalf of another person and you are authorized to receive process, you must indicate under your signature your authority.

"If you do not complete and return the form to the sender within 20 days, you (or the party on whose behalf you are being served) may be required to pay any expenses incurred in serving a summons and complaint in any other manner permitted

"If you do complete and return this form, you (or the party on whose behalf you are being served) must answer the complaint within 20 days. If you fail to do so, judgment by default will be taken against you for the relief demanded in the complaint

"I declare, under penalty of perjury, that this Notice and Acknowledgment of Receipt of Summons and Complaint was mailed on (insert date).

# Signature

# **Date of Signature**

# "ACKNOWLEDGMENT OF RECEIPT OF SUMMONS AND COMPLAINT

"I declare, under penalty of perjury, that I received a copy of the summons and of the complaint in the above-captioned manner at (insert address).

"Signature "Relationship Entity/Authority to Receive Service of Process

# Date of Signature".

SEC. 4. The amendments made by this Act shall take effect 45 days after the enactment of this Act.

SEC. 5. The amendments to the Federal Rules of Civil Procedure, the effective date of which was delayed by the Act entitled "An Act to delay the effective date of proposed amendments to rule 4 of the Federal Rules of Civil Procedure", approved August 2, 1982 (96 Stat. 246), shall not take effect.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motio to reconsider was laid on the table.

# GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore. there objection to the request of the gentleman from California?

There was no objection.

# FAIR PRACTICES IN AUTOMOTIVE PRODUCTS ACT

Mr. FLORIO. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H.R. 5133) to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr.

FLORIO).

The motion was agreed to.

# IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill, H.R. 5133, with Mr. PANETTA in the chair.

The Clerk read the title of the bill. The CHAIRMAN. When the Committee of the Whole rose on Friday, December 10, 1982, the bill was considered as having been read and open to amendment at any point.

Are there any further amendments

to the bill?

AMENDMENT OFFERED BY MR. BROWN OF OHIO

Mr. BROWN of Ohio, Mr. Chairman, I offer an amendment.

Mr. OTTINGER. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from New York (Mr. OTTINGER) reserves a point of order on the amendment.

The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. Brown of Ohio: Page 8, line 3, strike out "For" and insert in lieu thereof "Except as provided to subsection (b)".

Page 8, insert after the table before line

11, the following:

"(b) SPECIAL RULE.—(1) For each model year beginning after January 1, 1983, the minimum domestic content ratio for a vehicle manufacturer that began automobile production or assembly in the United States between January 1, 1980, and December 31, 1982, shall not be less than the applicable minimum content ratio specified in the following table:

# Model year 1984

Number of motor vehi-Minimum cles produced by the domestic manufacturer and sold content in the United States during such year: Not over 100,000 ...... 0 percent.

Model year 1984-Continued

Over 100,000 but not over The number. 900,000.

expressed as a percentage, determined by dividing the number of vehicles sold by 90,000.

Over 900,000 ...... 30 percent.

# Model year 1985

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:

Not over 100,000 .... Over 100,000 but not over 900,000.

Minimum domestic content ratio: 0 percent.

The number expressed as a percentage. determined by dividing the number of vehicles sold by 45,000.

Minimum

domestic

content

ratio:

Over 900,000 .....

60 percent.

# Model year 1986

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:

Not over 100,000 ..... Over 100,000 but not over 900,000.

0 percent. The number, expressed as a percentage, determined by dividing the number of vehicles sold by 30,000.

Over 900,000 ...... 90 percent.

# Model year 1987

Number of motor vehicles produced by the manufacturer and sold in the United States during such year:

Not over 100,000 ..... Over 100,000 but not over 900,000.

Minimum domestic content ratio:

0 percent.

The number, expressed as a percentage, determined by dividing the number of vehicles sold by 15,000.

Over 900,000 ...... 90 percent.

Each model year after model year 1987

Number of motor vehicles produced by the manufacturer and sold in the United States during such year: Not over 100,000 .....

Over 100,000 but not over 900,000.

domestic content ratio: ..... 0 percent.

Minimum

The ratio determined by the Secretary under Over 900,000 ...... 90 percent.

(2) The Secretary shall establish the minimum domestic content ratio for each model year after model year 1987 for vehicle man-ufacturers selling over 100,000 but not over 900,000 motor vehicles in the United States during such year. In establishing each such ratio, the Secretary shall take into account the extent to which changes in the technological and economic factors applicable to the production of motor vehicles in the United States have affected the carrying out of the purposes of this Act, but a ratio established under this paragraph for any model year may not be greater than 50 percent, nor less than the percentage achieved in model year 1987.

(3) If during any model year the level of the automobile production or assembly in the United States of a vehicle manufacturer falls below the production or assembly level of such manufacturer in the United States during the model year beginning after December 31, 1981, then subsection (a) shall

apply to such manufacturer.

Page 8, line 11, strike out "(b)" and insert "(c)".

Mr. BROWN of Ohio (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN, Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. The gentleman from Ohio (Mr. Brown) will be recognized for 5 minutes in support of his amendment.

The Chair will inquire, does the gentleman from New York (Mr. OTTINGER) continue to reserve his point of order on the amendment?

Mr. OTTINGER. No. Mr. Chairman, I will drop my reservation of a point of order.

Mr. O'NEILL. Mr. Chairman, will the gentleman yield?

Mr. BROWN of Ohio. I yield to the distinguished Speaker.

Mr. O'NEILL. Mr. Chairman, I thank the gentleman for yielding, and I would just like to make the following statement:

I appreciate the fact that there are a good number of amendments remain-ing on this bill. There is no further business when we get through with this bill, so whether it is 6, 8, 10, or 12 o'clock, it is the intent of the Chair to complete this piece of legislation. So it behooves the Members to think about that, and it is up to them to expedite the business of the day as they see fit. This will be the final piece of legislation for today.

Mr. BROWN of Ohio. Mr. Chairman, I thank the distinguished Speak-

Mr. DINGELL. Mr. Chairman, I reserve a point of order on the amendment.

The CHAIRMAN. The Chair understands that the gentleman from Michigan (Mr. DINGELL) reserves a point of order?

Mr. DINGELL. Yes, Mr. Chairman.

Mr. BROWN of Ohio. Mr. Chairman, I think the point of order is too late, is it not?

The CHAIRMAN. It is a reservation

of a point of order.

Mr. BROWN of Ohio. Mr. Chairman, may I ask, can a reservation of a point of order come at any time? I had yielded to the Speaker, and the debate had begun on the amendment.

The CHAIRMAN. The gentleman is correct. A point of order was reserved and then withdrawn, and the gentleman from Ohio (Mr. Brown) was recognized for 5 minutes on his amendment and had yielded. The point of order cannot be reserved at this time.

The gentleman from Ohio (Mr. Brown) is recognized for 5 minutes.

Mr. BROWN of Ohio. Mr. Chairman, among those who have introduced this bill and favor it, there are many aspirations for its accomplishment. Some of those include the idea that it will create jobs in this country.

Now, I am not in my amendment talking about jobs that we hope will materialize if this bill is passed. What I am talking about is not wishes but jobs that already exist, jobs that we stand to lose if this bill is not modified. That is why I am offering this amendment to lower the requirements for Honda of America and let it know that we not only appreciate the jobs that it provides here by building some of its automobiles in the United States but that we are not going to impede those efforts with guessing games over content requirements, and that we want to encourage it to increase its production in this country.

My amendment would modify the

ratios to provide ample room for unforeseen changes in the business environment and provide our foreign friends with room to grow and flourish with their production in this country.

Specifically, my amendment would provide that foreign investors who began production in the United States between January 1, 1980, and December 31, 1982, would have 2 additional years to meet the domestic content requirements of the Ottinger substitute.

During the first model years, 1984, 1985, and 1986, manufacturers would be required to meet one-third of the Ottinger domestic content requirement. In 1987, Honda would have to meet the second year requirements of the Ottinger bill. In the following year and every year thereafter, the requirements would be set by the Secretary of Transportation between 33 and 50 percent. Fifty percent is the last year requirement of the Ottinger bill.

# □ 1230

The Secretary of Transportation would make a determination whether it is more appropriate to have it be 33 or 50 percent because of the peculiar nature of the situation.

If we want to protect jobs for American autoworkers-and I believe every Member of this House wants to-telling Honda to pack it bags and build its cars elsewhere because it cannot meet the requirements put in the bill as it is now written is not the way to do that. I think we must address this problem.

Let us look at what this legislation is designed to do. It refers to the entire production and sales in this country of an automobile manufacturer. Honda is making at Marysville, Ohio, its Accord model, one of several models that are sold in this country.

If all of your models are made in this country, then obviously the legislation is applicable. But when only one model is made here that model must be mixed in with those models which come from elsewhere, and that means that Honda cannot meet the standards that are set even though their investment in Ohio for all production is \$250 million-more than they have invested in 20 years aggregate anyplace else outside of Japan.

It seems to me that that investment and the suppliers that have moved in to make things in the United States that go into that Accord automobile indicate a clear decision on the part of the most independent of the Japanese automobile manufacturers to build in America, to build part of their model line here and hopefully in the future years other parts of their model line.

But the Accord is the highest priced automobile in their line. If you will, it is comparable to the Cadillac or the Imperial in the Chrysler line, or the Continental in the Ford line.

The CHAIRMAN. The time of the gentleman from Ohio (Mr. Brown) has expired.

(By unanimous consent Mr. Brown of Ohio was allowed to proceed for 3 additional minutes.)

Mr. BROWN of Ohio. The result is that when you make that model here and then also mix with the other cars that come in that are lowerpriced cars from abroad, you cannot meet the requirement.

The Honda Accord, at the beginning of its production, will be about 50 percent American domestic content. It hopes to go to 65 percent within the next few years but it took them almost 3 years to acquire the land and build the plant they are now in. So the requirement for expansion to make other models here could not be met if the language of the present legislation is left as it is.

In essence, this legislation has the same effect as import quotas because it raises prices of both domestic and imported cars. In fact, since the voluntary restrictions began, the price of foreign cars has jumped \$1,900.

But this bill would have the added effect that it will put American autoworkers, as I said, out of their jobs, and those who are working directly for supplying the companies that came here to produce in the United States.

What we call for in this bill is that the first model year, 1984, the quota under the legislation would be 15.7 to 20 percent depending on the number of cars produced, and my legislation would provide for the domestic content to be 5.2 percent to 6.7 percent based on the sale of 470,000 to 600,000

In the next model year of 1985 it would be 33.3 percent to 40 percent under the present legislation.

I lower it to 11.1 percent to 13.3 percent for Honda on the basis of selling 500,000 to 600,000.

In the third model year of 1986, it would be 50 to 60 percent under the Ottinger amendment. I call for 16.6 percent to 20 percent under a scenario of 500,000 to 600,000 sales.

In the final year, model year 1987, it would be 50 percent under the lan-guage of the bill. We call for 33 percent under 500,000 cars sold by Honda and in the final year we call for 50 percent, as they do, except that we allow the possibility that the Secretary of Transportation might set a quota somewhere between 33 and 50 percent.

I do not think that is unreasonable. because what it does is focus Honda on the responsibility to meet the require-

ments in 5 years.

I cannot tell you what the impact on domestic manufacturers can be in this legislation because they did not testify very vigorously on the legislation. Most of them seemed to think that it was a poor idea.

As you know, some of their automobiles are manufactured in part abroad and brought back into this country for sale. Some of them are manufactured almost entirely abroad.

The people that will benefit under this legislation, however, are the small sales cars, the Subarus, those that do not sell much in the United States and therefore would fall outside of the purview of this legislation altogether and which are almost totally produced abroad.

Mr. OTTINGER. Mr. Chairman, I rise in opposition to the amendment.

I reluctantly oppose this amendment first because I love and admire the gentleman from Ohio who has served with great distinction on our committee and in this body. We will miss him greatly in the next Congress.

Second, because I recognize that Honda has established itself in the United States and recognized its responsibility to the U.S. economy and workers. That is something that I think we ought to encourage.

Indeed, this legislation is designed to encourage Honda and other foreign manufacturers to establish facilities 1 1 the United States and put American workers back to work.

The reason I have to oppose this legislation, however, is that it is special interest legislation that would just affect one motor company, the Honda Motor Co., and the legislation would have the effect of discriminating in favor of Honda against other foreign manufacturers like VW that established manufacturing in the United States earlier than Honda did, and against U.S. manufacturers who are under stringent restrictions with respect to the outsourcing of their manufacturers.

I will illustrate in a moment the degree to which that could take place.
Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gen-

tleman from Ohio.

Mr. BROWN of Ohio. I have full confidence in the gentleman's clear statement of what he intends as one of the objectives of this legislation, and that is to encourage foreign manufacturers to locate their plants in this country.

I have to say, however, that if the legislation does not accomplish that purpose, an amendment designed to accomplish that purpose can hardly be characterized fairly as special interest

legislation.

The amendment that I have proposed is designed specifically to try to accomplish the purpose the gentleman says is his purpose in the general legislation.

All I am trying to do is correct the fact that the gentleman's formula does not meet the objective and, in fact, will cause the closing of a plant now employing 2,000 of my constituents and the constituents of other Members from Ohio.

Therefore, I think it is the responsibility of both of us to try to accomplish the purification of the legisla-

tion.

Mr. OTTINGER. I appreciate the gentleman's good intent. I have no question that he intends as he ex-

presses.

But the effect of this legislation is to give the Honda Co., an advantage which other foreign manufacturers and all U.S. manufacturers would not enjoy. It does more than give Honda credit for having made an investment in Ohio in advance of the consideration of this legislation. What it does is to give the Honda Motor Co., a free ride in terms of domestic content requirement while all other companies,

comply with the provisions of the bill.

This competitive edge will take place over the next 3 to 5 years when the auto business will be most competitive as all companies will try to recover

both foreign and domestic, must

from the current auto recession.

Then, at the end of the 5-year period, the amendment would give Honda a permanent break as compared to other manufacturers, a permanent break of up to almost 40 percent in local content, equivalent to thousands of jobs for U.S. workers.

I suppose that concerns me as much as anything.

In our discussions with the gentleman from Ohio we said if we do anything to recognize Honda's commitment we ought to at least assure Honda meets the same standards as other automobile manufacturers at the end of the period that is being addressed.

While that has been done to some extent, giving the Secretary discretion to negotiate with Honda, there is a limitation on there of 50 percent whereas, for instance, VW will have to meet a standard of 70 percent.

Mr. BROWN of Ohio. Would the gentleman yield again? If the gentleman would like to amend this to include VW we would be delighted. VW is not located in my district. It is located in the district of the gentleman from Pennsylvania (Mr. Murtha), as I understand it.

We discussed the matter with his staff and they said they did not wish to participate in this amendment. So the amendment was drawn to address the problem created by Honda.

The gentleman from New York or the other gentleman from Pennsylvania or any other gentleman or gentlewoman on the floor is certainly free to amend the timeframe to include other manufacturers.

The CHAIRMAN. The time of the gentleman from New York (Mr. OTTINGER) has expired.

Mr. BROWN of Ohio. Mr. Chairman, I ask unanimous consent that the gentleman have 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

Mr. FRENZEL. Mr. Chairman, reserving the right to object, the distinguished gentleman from New York (Mr. Ottinger) has indicated that he wants to move this along. I am in no hurry as long as we discuss this thing. But I simply want to remind the gentleman of his challenge.

There may be other additional requests for time and I think both sides ought to have equal opportunity to discuss the issues.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio that the gentleman from New York (Mr. OTTINGER) have 2 additional minutes?

There was no objection.

The CHAIRMAN. The gentleman from New York Mr. (OTTINGER) is recognized for 2 additional minutes.

Mr. OTTINGER. There is just one other thing that I want to address and that is the gentleman said that Honda will pick up and leave a whole bunch of unemployed people in his district should this legislation pass.

I would like to say in my assessment of that is that it is a threat to try and defeat the legislation, which I can understand, but I think it is a totally idle threat.

The U.S. automobile market is by far the largest in the world. Honda and other foreign manufacturers now have huge investments in distribution and other facilities in the United States. They are not going to pick up and leave. I do not think the gentleman's fears are well founded though I understand his position.

If I were representing his district I would battle as hard to make sure that there was no risk involved as, in fact, he is doing.

If you look at some of the material Honda has prepared to show why it believes it cannot meet the requirements in the bill, it becomes clear exactly why this special waiver amendment should not be granted. In 1986, Honda plans to sell 600,000 cars in the United States. To be sure, 150,000 would be produced in Ohio with domestic content of 50 to 60 percent. But what about the other 450,000? This amendment would allow Honda to sell 450,000 vehicles in the United States with only a 3- to 5-percent domestic content. That will have a vast adverse impact on U.S. jobs.

In fact, under the terms of this amendment, Honda could sell up to 899,999 cars in the United States in model year 1986 with little more investment than Volkswagen has already made.

And how about the other companies that would have to meet the requirements in the bill and not have a special provision?

Chrysler, which in 1981 sold about 870,000 vehicles, would under the provisions of the bill have an 87-percent content ratio. If Honda sold that many cars, its requirement would be only 29 percent.

Volkswagen, which invested in the United States before Honda did, and in fact will produce 50,000 more cars than Honda at 70-percent domestic content—Honda will be only 50 to 60 percent—must meet a 35-percent content requirement. If Honda sells as many cars as VW in 1986, its requirement is only 13 percent.

And how about AMC/Renault? Even with the massive investment made by Renault in the United States—saving, in effect, AMC and thousands of U.S. jobs—they will be forced to meet a content ratio 50 percentage points higher than Honda would under this amendment.

This amendment would do more than give Honda Motor Co., credit for having invested in the United States. It would give away the store.

I urge yo to vote to defeat this amendment.

Mr. BROWN of Ohio. I would say to the gentleman that there are other foreign manufacturers who are at various stages of commitment in putting in factories in the United States. Without this kind of attention to the problem confronting Honda I am confident that they will not pursue that kind of investment and I am confident that the Honda operation at Marysville cannot be sustained with the kind of restrictions that are in the legislation now.

The problem is that the market issue here is what the legislation the gentleman has fathered focuses on, and that is all of the sales of the company. The production is for one of the cars in that line in this country, the Accord, and that is going to be up to 60- to 65-percent domestic made.

But when you bring in or average in the other sales in the line then you cannot meet that 50-percent requirement. You can continue to sell the Accord, of course, but you will be prohibited from selling the other automo-

My guess is that will not sustain a market for that manufacturer or any other manufacturer that wants to come in in the future.

Mr. OTTINGER. All they have to do to solve that problem is to start manufacturing in this country.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak in opposition to the amendment.

Mr. Chairman, I think we should strike a medal to the distinguished gentleman from Ohio (Mr. Brown) because he has by this amendment again identified exactly what is wrong with this bill.

He has not identified all of the things that are wrong with this bill but he has correctly identified one big one. The bill will prevent American jobs from being created and it may cause the loss of American jobs that are currently held.

The gentleman's amendment is very parochial. It takes care of one foreign automobile company operating in one State.

What about the companies that want to build, or who are building, in Tennessee, or who are considering building everywhere? Those people ought to have the same kind of protection. What they should have from us is a guarantee of their ability to make cars in a free and unrestrained economy in which they can compete with other makers.

#### □ 1245

The other statement the gentleman from Ohio made was that he did not know what the effect was on the domestic manufacturers. I suspect that most people on the Energy and Commerce Committee do not know either. The committee did not ask the domes-

tic manufacturers to come in and testi-

On the Ways and Means Committee we had hours of testimony from every domestic manufacturer save Chrysler, which had other problems at the moment. All of the manufacturers in this country, every one of them, said that this bill would have a deleterious effect on American jobs and would make their job selling domestically and internationally more difficult.

So, if you adopt the amendment offered by the gentleman from Ohio, you will simply save one little segment of our economy in our society. But, at the same time, you will condemn other American workers, especially those engaged in export-related jobs, to the possible loss of jobs.

Mr. Chairman, the bill is a wretched one. We have said that right along. This amendment proves it. Nothing proves it more clearly or more strongly than the amendment of the gentleman from Ohio. He has shown us exactly how many jobs will be lost in the city of Marysville, Ohio. Marysville, Ohio, is only one place in the country where they make cars. We will lose jobs everywhere.

I urge the defeat of the Brown amendment so that the bill will be left in its original pristine state. It's ugly intent will be better observed without amendments.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the distinguished sponsor of the amendment.

Mr. BROWN of Ohio. Mr. Chairman, I appreciate the gentleman's flattery, or so I took it, at the wisdom of the amendment.

Now I would appreciate the gentleman's support, because it seems to me that this bill, passed without the precedent of this amendment in it, makes very bad legislative history for future consideration by this Congress or the next.

Now, I think both the gentleman from Minnesota and I know—or at least I think I know; I am not sure what he knows—that this bill is very unlikely to become law in this Congress. But it may not be unlikely for serious consideration in the next. And I would hope that when people go back and look at it that we do not have a precedent of people at least on this side of the aisle voting against an amendment like this which clearly does try to address a problem in the basic legislation.

Mr. FRENZEL. I thank the gentleman for clarifying.

I would further say that when a leaky innertube has serveral hundred leaks and many cuts and slashes, you cannot improve it by putting a tiny patch on one of the holes in that innertube. This is a leaky vessel which should be allowed to sink to the bottom of the pond.

Mr. STRATTON. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as one of the original cosponors of this legislation, I find the position of my colleague, the gentle-man from New York (Mr. OTTINGER) who also opposed very vigorously a broader amendment along the same line as the amendment of the gentleman from Ohio (Mr. Brown) that I offered last week when we were discussing this legislation, very hard to understand. He seems to be opposing the basic thrust of this legislation, as I understand it, in fact that thrust was one of the reasons why I became a cosponsor, this basic purpose was illustrated in the paper this morning, a big full page ad, I think it was in the Washington Post. It had a big Datsun with a sign on it "made in the U.S.A." And the thrust of that full page ad, put in by the United Automobile Workers, was that this bill we were going to be deliberating today was going to create jobs for American automobile workers by helping to produce cars of Japanese design and other foreign design.

Yet the gentleman from New York (Mr. OTTINGER) is opposing, in opposing the amendment of the gentleman from Ohio, the very thing that the UAW says this legislation was designed to do. The gentleman from New York and the gentleman from New Jersey (Mr. Florio) were very bitterly opposed to the amendment that I offered which would have provided some flexibility so that this legislation would not prevent foreign companies from either moving in or, even worse, as the gentleman from Ohio has indicated, encouraging those that are already providing jobs for American workers to move back to Japan.

Somebody ought to get straight on this thing. Are we supporting the legislation that the automobile workers have recommended, or are we supporting the legislation of the gentleman from New York (Mr. Ottinger) who apparently is not interested in whether American workers go to work building foreign cars, or continue working, whether it is Hondas, Volkswagens, Toyotas, or Datsun trucks down in Tennessee.

It seems to me that we ought to get this matter cleared up. Because if every attempt to try to protect workers who are either presently employed by foreign automobile companies or are likely to be employed by foreign automobile companies, then this legislation is extremely misleading in comparison to the intent of the newspaper ad in the Washington Post.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. STRATTTON. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. I think we ought to look at the precedent of what this country did several years ago, before there was U.S. automobile manufacturing in other places in the world. Then we put Ford production in Britain and the European market, which helped strengthen the American manufacture and benefit the American consumer because it helped strengthen the company that made the cars and reduce the cost of products distributed in this country and helped lower the prices to consumers.

Now, in effect, if we are going to say to a foreign manufacture that you cannot even produce the cars in this country that you may wish to sell here, then we really are drawing that protectionist line very tightly around

this country.

I am confident that you will not see any foreign manufacturer try to put a plant in this country if this bill becomes law as is. What they will do, instead, is reduce the number of automobiles they are selling in the United States by some very tricky methodsestablishment of separate companies, for example-to keep under that 100,000-car limit so that they can sell those cars without restriction as to the content they have. This legislation, as drawn, has no limitation on content of cars that sell under 100,000 in the U.S. market.

Now, I have to say that I cannot tell you whether Volkswagen is going to be adversely affected by this bill or not. I cannot even tell you whether General Motors is going to be adversely affected by the legislation as it is drawn. What I am trying to do in my amendment is to accomplish what the gentleman from New York (Mr. OTTINGER) and the other makers of the bill say they want, and that is: If you are going to sell in the United States,

make in the United States.

Why we cannot have an amendment to try to accomplish that purpose is beyond me. I understand why the gentleman from Minnesota does not want it. He does not want anything in the way of improvement in this legislation because he opposes the bill under any circumstance. But the legislation is designed to send a message to foreign manufacturers who have invaded our market without being willing to manufacture their products in our market or let us sell in theirs. That message, without this amendment to allow manufacturing in the United States is going to be a very bad message, in my opinion.

Mr. STRATTON. I think the gentleman is making a very good comment. I cannot understand why the UAW would spend thousands of dollars for a full-page ad unless they really want jobs in foreign auto plants of companies who were either located here in the United States now or were likely to move in later on, such as Toyota.

Mr. BROYHILL. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I want to remind Members again, as we attempted to do last week, that this amendment does not make a bad bill any better. We would remind the Members of the tremendous workload that is going to be required in carrying out the mandates under this act, and that is of verifying the domestic content. That particular task is going to be burdensome, it is going to be most intrusive, and it is going to give enormous powers to the Government, to the Department of Transportation, to rummage through the books and records of not just the automobile manufacturers but the tens of thousands of suppliers to that industry. It is going to require the tracing of the sources of all materials, all component parts that go into an automobile.

Again, to repeat: This bill is not dealing with just the dozen or so automobile manufacturers, but the tens of thousands of firms, both large and small, that supply parts to the auto-

mobile industry.

These investigators would have to go in and take a look at production records, the purchasing records, the sales records. And we are talking about every one of the manufacturers and

suppliers to this industry.

The DOT, in short, would be empowered here to pry into these records. It is a program that would give enormous power to the Federal Government at a time when we have been trying our best to deregulate. The gentleman's amendment does nothing to cure that

Mr. Chairman, I would urge defeat

of this amendment.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, it greatly pains me to oppose this amendment, as it always pains me to oppose amendments offered by my old friend from Ohio. And before I begin my remarks-I will not yield to the gentleman at this time, because I want to say something nice about him and I do not want to be interrupted-I want to say that I served for a long time with the gentleman from Ohio. Our dads served together in this body. He is very dear to me and served as senior ranking minority member on the old Subcommittee on Energy and Power when I had the honor of being chairman of that subcommittee. I find him to be a man of rare ability, a wonderful friend, an absolutely savage opponent, and a thoroughly honorable and distinguished Member of this body. I am proud of our friendship, and for that reason I am all the more distressed that I must oppose this amendment.

The gentleman from Ohio puts forward an amendment which sounds rather good. I think the first question is: What does the amendment really

First of all, it confers, after model year 1987, by its clear language, discretion on the Secretary of Transportation to fix figures for content of Honda-manufactured automobiles between 40 percent and 50 percent, but not less than the levels achieved in model year 1987. That gives broad discretion which can have consequences that no one in this Chamber at this time can predict.

Now, why does Honda want this amendment?

First of all, it is a special rule for Honda, and I cannot blame Honda for being desirous of achieving that particular goal. Certainly were I to serve a district where Honda were established. I think I probably would be doing something very similar to that which the gentleman from Ohio is doing. But I would observe that any Member who represents a district where automobiles are manufactured by any other company must with great vigor oppose this proposal.

Now, let us look at what Honda would get under this particular proposal. Honda essentially gets a free ride in terms of domestic content requirement, while all other companies, both foreign and domestic, must comply with the provisions of the bill. This would give Honda a competitive edge over the next 3 to 5 years when the auto industry is going to be extremely competitive and when the industry and the country will be trying to recover from the current recession which most vigorously strikes at the auto industry. At the end of the 5 years. Honda would get a permanent break, as opposed to other manufacturers of up to 40 percent.

Now, this occurs by reason of some interesting circumstances. Honda proposes in 1986 to sell 600,000 cars in the United States, according to the figures that my good friend from Ohio has submitted to the Rules Committee and has made available to the House.

Now, admittedly 150,000 would be produced in Ohio, with a domestic content of 50 percent to 60 percent. That would be good. But the amendment would also allow Honda to sell another 450,000 vehicles in the United States, with only a 3 percent to 5 percent domestic content. This would clearly have an adverse effect upon U.S. jobs.

Now, to see the practical consequences of this amendment, let us address what would really happen. Honda could sell up to 899,000 cars in the United States in model year 1986 with little more investment than Volkswagen has already made in this country, and Volkswagen would be tied to a much higher domestic content standard than would Honda.

Let us look a little further and see what other companies would find themselves faced with under the amendment offered by my dear friend from Ohio.

Chrysler, what in 1981 sold 870,000 vehicles, under the provisions of this bill would have to have an 87-percent content ratio. If Honda sold that many cars—and it could sell that many cars and more—its requirement would be only 29 percent.

#### □ 1300

AMC Renault, after a massive investment made in this country saving in effect AMC and thousands of U.S. jobs, will be forced to meet a content ratio 50 percentage points higher than Honda would under the terms of this amendment.

Volkswagen, which invested in the United States before Honda, and, in fact, will produce 50,000 more cars in the United States than Honda at a 70-percent content level, must meet a 35-percent content requirement if it sells 350,000 cars. Honda will only have a 50- to 60-percent content level in the cars it produces.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. DINGELL) has expired.

(At the request of Mr. Brown of Ohio and by unanimous consent, Mr. DINGELL was allowed to proceed for 2 additional minutes.)

Mr. DINGELL. However, if Honda sells as many cars as Volkswagen in 1986 its requirement will only be 13 percent. I think this is a well-meaning amendment, but regrettably it is an unfair amendment and confers an unfair advantage on Honda.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I am delighted to yield to the gentleman from Ohio.

Mr. BROWN of Ohio. I thank the gentleman for yielding.

Mr. Chairman, the fact of the matter is that Honda now sells 350,000 of its cars, not its Accords, not the cars made in this country, 350,000 of all of its Hondas, down from 370,000, and its ambition is to go to 500,000 by 1988. That is not I think an excessive increase. Nor is it going to be possible for them to meet the requirements without getting to that amount of sales in this country.

Volkswagen now is under the margin as I understand it of the legislation as it is drawn. They would not qualify. And if the deutsche mark goes down, they will also not be able to meet the requirements of the legislation as drawn. That is not my problem. That is somebody else's problem.

Mr. DINGELL. I will observe Volkswagen does meet the requirements of the legislation, not only currently but according to the projections as I understand them.

Mr. BROWN of Ohio. The testimony by Volkswagen I think would not bear that out.

Mr. DINGELL. We have checked this out with care and that is our appreciation of the matter. I would also observe one thing. I think Honda is on the road toward becoming a good citizen. I think they can do so either under the bill as drawn or under the amendment. But I see no reason why the amendment should be drawn so as to confer the kind of advantage on Honda over struggling domestic producers, and which would have the unfair consequences to which I have alluded.

I do not believe that if this amendment is rejected that Honda will refuse to go forward because of the size and the desirability of the American automobile market.

Mr. GORE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I would just like to inquire of the minority—we have a lot of amendments to consider. I want to make sure they all get fair consideration.

Would the minority at this point consider a limitation on this amendment?

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the gentleman from Florida.

Mr. GIBBONS. I have not had a chance to even tell the Members about the Volkswagen testimony. I have it right here in the record.

Mr. OTTINGER. Mr. Chairman, could we get agreement to limit time on this amendment and all amendments thereto to 1:20 p.m.?

Mr. BROWN of Ohio. Mr. Chairman, is that a unanimous-consent request?

Mr. OTTINGER. Yes.

Mr. BROWN of Ohio. I object, Mr. Chairman.

Mr. GORE. Mr. Chairman, I would yield for the unanimous-consent request.

Mr. OTTINGER. Mr. Chairman, I ask unanimous consent that debate on this amendment and all amendments thereto end at 1:30.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. BROWN of Ohio. Mr. Chairman, reserving the right to object, I wonder if there are any Members in this Chamber at this point who contemplate offering an amendment to the amendment I have offered.

Mr. CHAIRMAN. The Chair has no knowledge.

Mr. OTTINGER. I have no knowledge of any.

Mr. BROWN of Ohio. The remaining 25 minutes would be on this amendment, correct?

The CHAIRMAN. Or any amendments thereto.

Mr. BROWN of Ohio. On this amendment?

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Tennessee (Mr. Gore).

Mr. GORE. Mr. Chairman, I rise in strong opposition to this amendment. I represent the district in Tennessee where the Nissan truck facility is being constructed and I fail to see why we should adopt an amendment to exempt Honda from the provisions of this bill and leave all of the other foreign manufacturers covered.

Now, if this is good legislation and the quotas that it mandates are reasonable and attainable, then we do not need this amendment to exempt the Honda plant in Marysville, Ohio, and we would not need an amendment to exempt the Nissan plant in Tennessee.

On the other hand, it seems to me this amendment makes clear that there exist very real problems with the legislation as a whole. I understand the motivations for the legislation, just as I understand the motivations for the amendment. But it is not a solution to the imbalance of the trade with Japan. Nor is it a solution to the basic problems facing the U.S. automobile industry.

So I would urge my colleagues to oppose this amendment and to oppose the bill.

Mr. BROWN of Ohio. Mr. Chairman, will the gentleman yield?

Mr. GORE. I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Chairman, I would like to explain to the gentleman as I tried to explain to the gentleman from Minnesota, my friend (Mr. Frenzel) who does not want this bill under any circumstances and therefore does not want it improved, that the passage of this bill into law is not going to occur in this session because the Senate will not address it and the President will not sign it. That is what I understand to be the case.

I think everybody within the sound of my voice understands that. But it is a very bad precedent for your friends as Nissan who are building the plant in the gentleman's area to see the House consider a bill that does not consider their circumstances, because I can tell the gentleman from Tennessee that they will not proceed with the construction of that plant if there is

no consideration for the prospect of being able to develop the market. The car made here, if it is of 100-percent domestic content, will not meet the content requirements of this legislation.

Mr. GORE. Reclaiming my time, because it is limited, I am uncomfortable proceeding on the assumption that what we do here has no meaning and will not reach any conclusive result. I believe we must always legislate as if we are passing a proposed law to be sent to the President.

I understand what the gentleman is saying, but I think that the gentleman's amendment just highlights the inequities that would result if it was adopted and if the bill was adopted.

Mr. BROWN of Ohio. And the amendment was proposed because I want to see this bill improved so that it is not a bad precedent for the future.

Mr. GORE. I would urge a "no" vote on the amendment.

The CHAIRMAN. Members standing at the time the unanimous-consent request was granted will be recognized for 40 seconds each.

(By unanimous consent, Mr. WALKER yielded his time to Mr. Brown of Ohio.)

Mr. BROWN of Ohio. Mr. Chairman, to be taken now or later?

The CHAIRMAN. The gentleman has the right to speak at the end.

Mr. BROWN of Ohio. I prefer to aggregate.

(By unanimous consent, Messrs. Convers, Ottinger, and Dingell yielded their time to Ms. Mikulski.)

The CHAIRMAN. The Chair recognizes the gentlewoman from Maryland (Ms. Mikulski).

Ms. MIKULSKI. Mr. Chairman, I rise in opposition to this amendment because it defeats the very purpose of this bill. No. 1, it discourages foreign manufacturers from locating in the United States and penalizes those who already have located in the United States by this sweetheart deal for Honda.

The gentleman from Michigan (Mr. DINGELL) has already very clearly outlined the statistics that show how Renault would be penalized, how Volkswagen would be penalized, and how domestic manufacturers would be penalized.

As I indicate, it would penalize those other foreign manufacturers who have located in the United States. Penalty that shows that this is a particular bill designed to help Honda is an amendment which includes a waiver that would go into effect in 1988 which would grant the Secretary of Transportation a waiver ability to exempt only Honda from the domestic content bill. And then they would, if they sold 899,000 cars, only have to have a 50-percent domestic content when all American manufacturers would have

to have an 89-percent content and all foreign relocatees would have 89 percent.

Now, if that is not a special interest amendment, I do not know what is.

We want to thank Honda for building here in the United States. We want to thank Volkswagen for coming to Pennsylvania. I hope that there is a Datsun that comes to my community called Dundalk. We would like to have that. If the gentleman wants to provide incentives for foreign manufacturers to locate here, then he should design legislation to do so.

This amendment would destroy the intent of the bill, would harm American manfacturers, and at the same time penalize those good-guy foreign manufacturers who have already relocated here.

For that reason, the amendment should be defeated and we should find other alternatives to encourage that type of investment here.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Stratton).

Mr. STRATTON. Mr. Chairman, I referred earlier in my remarks to an ad that appeared in the Washington Post this morning, "Made in the U.S.A., Datsun." And here is what it says:

Building cars in America means jobs. Content is not protectionism in disguise, it is jobs legislation. It would keep jobs here with U.S. automakers and it would create new jobs by encouraging foreign based firms to produce here. A content law would simply require some of those cars to be made here with American parts which would put thousands of Americans to work. We estimate a content law would save or create more than a million jobs by the time it is fully phased in

If the House, managers of this bill are not going to allow a company that is just beginning to build foreign cars in the United States and to employ some of these 1 million workers, how is this bill going to create all these jobs?

I think the attitude of the House managers of the bill is contrary to this particular advertisement expressing the view of the UAW.

#### □ 1315

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. ECKART).

Mr. ECKART. I thank the chair-

Mr. Chairman, I am not sure if this issue is following me or I am following it. I was in the State legislature in Columbus, Ohlo, when Honda was talking about opening a plant in our State. They had their hand out then and they have got it out again today with this amendment. They asked us to pass special tax breaks for them, tax breaks to deal with their inventories, to deal with the method and manner in which their property was going to

be valued for tax purposes. They saked for special appropriations and other considerations to facilitate their move. The Ohio taxpayers have already supported Honda's activities but now they are back again for more.

Today we find them again with their hand out with a sweetheart amendment that is only designed to further displace the competitive advantage that they may find themselves in dealing with other American auto companies which my colleague from Michigan (Mr. DINGELL) so eloquently stated.

This is truly a sweetheart amendment. I think it will place other American auto companies in a disadvantageous position.

Let us have all companies that deal in the automotive arena in this country play by the same rules, rules adopted by the American League, I might add, so that each of us who play on that baseball field know exactly what the rules are, and not, as this amendment envisions encouraging other companies to have an unfair competitive advantage and certainly not to have the same people back at the public through with their hands out once again.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania (Mr. Bailey).

Mr. BAILEY of Pennsylvania. Mr. Chairman, I rise in strong opposition to the amendment.

I think, Mr. Chairman, it is important to make note that the issue concerning Volkswagen and its requirements under this legislation are that it is very well covered. It comes within 15 percent of the minimum requirements.

I would invite Members to read the committee testimony before the Committee on Ways and Means, pages 345 and 346 respectively. Volkswagen is really addressing a potential product mix issue there. They have a Sterling Heights plant in Michigan that will turn out power trains hopefully providing parts which would bring them well within future compliance requirements. Thus this legislation would only encourage an investment in America kind of approach. Volkswagen is covered and in fact would be ecouraged by this bill to open that plant and to sell a product mix in this country that would include more American manufactured automobiles.

For that reason, I very strongly oppose the amendment and ask that all Members do likewise.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. Gibbons).

Mr. GIBBONS. Mr. Chairman, trying to patch up this bill is like trying to put a band-aid on a rattle-snake. There is not much way you can improve a rattlesnake and there is no way you can improve this bill.

It could stand one good amendment and that is to strike out the enacting clause, but I am not going to do that. I do not want to take up the time of the House.

If you will read the Volkswagen testimony on page 344, you will notice that the head of Volkswagen U.S.A. said, in effect, that he would not have come to this country if he had known this bill was pending. Then he went on to say:

For example, if the Deutsche mark were to strengthen against the dollar as it has in the past, we could very easily be out of compliance.

In other words, he would have to go out of business.

Then he goes on to say:

Suppose we sought to increase the demand for a particular model to a degree that would justify U.S. production. This would be done through imports until the volume reached the level where economies of scale would justify production—

And I must say in the United States. Yet, the bill would hold us to our current level of imports, thereby restricting our long-range goal of expanding U.S. production capacity.

The president of Volkswagen U.S.A. just says:

You know, we wouldn't have come had this turkey been hanging around, this rattlesnake been hanging around.

The same thing for Honda and the same thing for Datsun and the same thing for everybody else that knows what they are doing.

The CHAIRMAN. The time of the gentleman from Florida (Mr. Gibbons) has expired

(By unanimous consent, Mr. Broy-HILL yielded his time to Mr. Gibbons.)

The CHAIRMAN. The gentleman from Florida (Mr. Gibbons) is recognized for 1 additional minute.

Mr. GIBBONS. I have a detailed answer for the ad that the gentleman from New York (Mr. Stratton) and the gentleman from Michigan just read. It is preposterous. I am sorry they put Doug Fraser's name on it because it really slanders a very fine gentleman.

Every piece of that ad is fallacious. I have detailed annotations that I will put into the RECORD later if I ever get any time and go through it point by point on every point that is made on that ad and refute it.

The argument is specious and it does not deserve a fine label on it like Doug Fraser's name at the bottom. I do not know whether it was signed there or printed there, but it tends to rely upon that gentleman's great credibility, as I say, the smartest man in American autos.

It is a fallacious ad and a fallacious argument. If we can just get over this limitation of time on debate syndrome that seems to have taken over here and then have all the Members jump up at one time and take up the time, I will put it in the RECORD.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Chairman, I was reading from the same testimony and noted that the Volkswagen representative indicated that a currency fluctuation only half as large as that which has occurred in the last 2 years would knock them out of compliance. They are marginally in compliance now. So much the help we are giving Volkswagen. They do not want it and neither should you.

Volkswagen says that under this law it would not build new plants and will not be in a hurry to reemploy workers who are laid off now. That is about as damning an indictment of this bill as you can get from any individual company.

This amendment proves that this bill costs American jobs. Worse, it proves that the sponsors are some kind of cannibals because they are willing to knock out jobs in their own union, the United Autoworkers.

It is the most clear example that has been presented to this House yet of how this bill is going to hurt America.

I urge that the amendment be defeated and that the bill be defeated also.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. Brown) for 2 minutes.

Mr. BROWN of Ohio. I thank the

Mr. Chairman, I would like to quote also from the testimony of the hearings before the Subcommittee on Trade of the Committee on Ways and Means were in response to the question of the gentleman from Pennsylvania (Mr. Balley), Mr. Hutchinson had this to say:

It would have a very favorable impact were the plant to be opened. Unfortunately, we are in the position now that our plant in Pennsylvania is running at only between 40

and 60 percent of capacity.

Our management has in effect put the Sterling Heights facility in mothballs, because obviously if we cannot run one plant at capacity, we certainly cannot look to another. We do not see the demand for our product in the next year or so such that would justify pressing on with the Sterling Heights facility.

Now, that is the problem that we have. In spite of the legislation that is proposed here, the very companies that would like to locate in this country for their production are not very optimistic if this legislation is passed without some modification.

Nissan has made a similar investment to that of Honda in their light truck factory in Tennessee; but in their testimony Nissan seriously doubted whether it would have made the investment if local content laws has been on the books. That would have meant a loss or will mean a loss of 2,600 jobs in Tennessee.

Now, that is the reason we ought to at least make an effort to amend this

bill. It may become law, but probably will not become law in this session: but this will be a precedent certainly for what we will do in the future if this issue is addressed in the next Congress. We certainly ought to try to address the problem that the content requirements now in the bill present to somebody who is already here; namely Honda.

Now, the ad that was quoted by the gentleman from New York says:

We are already building VW's in Pennsylvania and Renaults in Wisconsin. And American workers soon will be building Hondas in Ohio and Nissans in Nashville.

They will never be building those Datsuns in Detroit or Dundee, or wherever that is, Barbara, if this legislation does not recognize that there is going to have to be some adjustment for companies that first build a plant for one car, and one model, rather than a plant for their full model line. They build a plant for one model and if they cannot make that go, they will never build that second plant for the other model lines, and that is what we are trying to address in this amendment.

I urge my colleagues, not simply because they are opposed to the whole piece of legislation or not simply because they do not see the merit for their own operation, not to vote against this amendment for that purpose.

Let us at least try to correct the legislation and then to vote as you will on the legislation.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. OTTINGER) to conclude debate.

Mr. OTTINGER. Mr. Chairman, I yield to the gentleman from Pennsylvania (Mr. Bailey).

Mr. BAILEY of Pennsylvania. Mr. Chairman, I thank the gentleman from New York.

I think it is very important that the Members not be confused, that the record on Volkswagen be explained completely.

The statement that was made before the Committee on Ways and Means by Mr. Hutchinson of Volkswagen of America was, of course, under instructions given him by the management of the company in Germany.

On page 345 of the testimony, we developed a colloquy after his statement, and I think it is very important for me to read a quotation to the committee. This is my question to Phil Hutchinson:

In short, what it means is that you are under, significantly under, about 15 percent when you look at the percentage relationship between 34 and 40 under the minimum requirement in the bill today. You don't dispute those figures, do you?

Mr. HUTCHIMSON. No. sir. The way that we figure our content, we have to average the content that we have in our U.S.-produced Rabbits that are built in your district. We

have about between 70 and 75 percent content in those vehicles, and we average that content with the cars that we import.

To go on to page 346 in the testimony, and I raised questions concerning that Sterling Heights, Mich., plant. The gentleman from Ohio (Mr. Pease) had joined in. I said, asking questions about the Sterling Heights plant, in response to Phil Hutchinson, I said:

You won't have to, if the gentleman will let me finish. I would be very happy to com-

plete it for you.

On that plant you and I had some private meetings when we discussed, if you remember, some of the issues surrounding the location of the plant.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. OTTINGER. Mr. Chairman, I ask unanimous consent that the gentleman may have 1 additional minute.

The CHAIRMAN. The unanimous consent request was to 1:30 and there

are 2 minutes remaining.

Mr. BROWN of Ohio. Mr. Chairman, the 2 minutes are not spoken for. is that correct?

The CHAIRMAN. That is correct. Mr. BROWN of Ohio. Then, Mr.

Chairman, it seems to me appropriate for the Chair to split the 2 minutes between the proponents and the opponents.

The CHAIRMAN. The time will be divided between the gentleman from Ohio and the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I yield the remaining time I have to the gentleman from Pennsylvania (Mr. BAILEY).

Mr. BAILEY of Pennsylvania. I went on to say:

Would you add to your response concerning that plant and when it comes into operation, any figures that you might have or any work that you might have on the domestic content impact that it would have on your fleet average?

Mr. Hutchinson. It would have a very favorable impact were the plant to be opened.

I will go back to the testimony offered by the gentleman from Florida. It is proof positive. This legislation would encourage Volkswagen to open that Sterling Heights plant, increasing the employment of U.S. workers. It would be very positive in that regard and I think it stands as excellent testimony to the need for this bill and the reason to defeat this amendment.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman from Pennsylvania.

I would say that the amendment, while well intentioned, would give a special advantage to the Honda Co. It would be discriminatory against U.S. companies and other companies, including foreign companies, that have already invested here.

I urge defeat of the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Ohio (Mr. BROWN).

Mr. BROWN of Ohio. Well, Mr. Chairman, I hate to take the time to read again what I read before, but I want to keep the gentleman from Pennsylvania (Mr. BAILEY) at least on the record correctly.

The line that followed what he just said was that, "Our management has in effect put the Sterling Heights fa-

cility in mothballs."

Now, that is the point of the whole issue, I think, whether or not we are going to have a piece of legislation that has unrealistic quotas set or whether or not we are going to try to address a problem that needs to be addressed.

It seems to me that there ought to be some message sent to some of our foreign competitors that they ought to compete fairly with us in this country and allow us to compete fairly with them abroad.

I frankly think that it might benefit Mr. Brock in some of his trade negotiations to see this Congress look seriously at domestic content legislation.

On the other hand, I subscribe along with that sentiment to Mr. Fraser's suggestion before the Joint Economic Committee that we ought to encourage foreign manufacturers to put their plants in this country to provide jobs.

What we have in this bill will absolutely discourage existing jobs in this

country.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentleman from Ohio (Mr. Brown).

The amendment was rejected.

### □ 1330

AMENDMENT OFFERED BY MR. DANNEMEYER Mr. DANNEMEYER. Mr. Chairman, offer an amendment.

Mr. OTTINGER. Mr. Chairman, I reserve a point of order.

The Clerk read as follows:

Amendment offered by Mr. DANNEMEYER: Page 3, strike out lines 3 through 8 and insert in lieu thereof the following: SECTION 1. SHORT TITLE

This Act may be cited as the "Smoot-Hawley Trade Barriers Act of 1982." SEC. 2. PURPOSE

The purpose of this Act is to reduce competition in the automobile industry, protect jobs in one industry to the detriment of jobs in other industries, and to increase the price of automobiles to consumers.

Mr. DANNEMEYER. Mr. Chairman, philosophers of all stripes throughout the history of our civilization have argued the question: What is the basic nature of man? Is it good or is it evil?

We are not here to argue that very profound question; but we are here today to argue the question of whether or not protectionism is good for a nation and the industries of this Nation, and is protectionism good for the commerce of the world?

This question also confounded one of the great English philosophers,

John Stuart Mill, who at one time in his life vacillated on the answer to this very profound question because in 1866 he indicated a modest amount of support for the concept of protectionism for the industries of a particular country. But then he changed his mind, and some 5 years later came out with this very profound statement:

I hold every form of what is called protection to be an employment of the powers of government to tax the many in the intention of promoting the pecuniary gains of a

I think his latter position was the correct one.

This question also has plagued people in positions of leadership in this country.

Back in 1930, the President of the United States, a man named Herbert Hoover, was asked by a Congress to sign a bill that has become infamous in American history called the Smoot-Hawley Tariff Act. Congress passed that bill in 1930 in order to give life to the desire of American agriculture to be protected from imports of foreign agricultural products.

President Hoover, in his wisdom, decided to sign this bill, and this is what he said in 1930:

There are certain industries which cannot now successfully compete with foreign products because of lower foreign wages and a lower cost of living abroad, and we pledge the next Republican Congress to an examination and, where necessary, a revision of these schedules to the end that the American labor in these industries may again command the home market, maintain its standard of living and may count upon steady employment in its accustomed field.

Well, what do you know? After the act was adopted in 1930, this is what happened to international trade in the world: Under the impact of higher tariffs and growing nontariff restrictions, world trade declined precipitously. Between 1929 and 1939, the value of world trade dropped from \$66.6 billion to \$26.3 billion, while total U.S. trade plunged from \$9.5 billion to only \$2.9 billion.

After the Smoot-Hawley Tariff Act was adopted in 1930, there was an outburst of tariff activity in other countries in the way of reprisal; extensive increases in duties were made almost immediately by Canada, Cuba, Mexico, France, Italy, and Spain.

During 1930, general tariff increases were announced by India, Peru, Argentina, Brazil, China, and Lithuania.

If we in this House want to assure that there will be a downturn in international trade in this world, we can adopt this legislation, and if that is our purpose and intent, then I think this amendment that has been offered by the gentleman from California is most apt because in 1982 we will have adopted a modern-era Smoot-Hawley Tariff Act, 52 years after the original. Mr. KEMP. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman

for yielding.

Mr. Chairman, I would like the gentleman to engage in a little more discussion with me about the implications raised by his aptly renaming this bill the Smoot-Hawley Tariff Act of 1982, so I would hope that we could get a little bit more time. I do not want to trespass on the desire of both sides of the aisle to move expeditiously, but I have been waiting a long time to get a chance, and I know the gentleman from California has.

The CHAIRMAN. The time of the gentleman from California (Mr. Dan-

NEMEYER) has expired.

(On request of Mr. Kemp and by unanimous consent, Mr. Dannemeyer was allowed to proceed for 4 additional minutes.)

Mr. KEMP. Mr. Chairman, will the gentleman yield further to me?

Mr. DANNEMEYER. I yield to the gentleman from New York.

Mr. KEMP. I thank the gentleman

for yielding further to me.

Mr. Chairman, there is no little irony in the fact that it was the Republican Party in 1928, led by its candidate Herbert Hoover, who built into its platform what became the Smoot-Hawley Tariff Act of 1930, which was a one-third, as I understand it, increase in tariffs, as the gentleman pointed out.

Interestingly, in that Congress after Hoover's election, and it was a Republican Congress, the debate over Smoot-Hawley was not unlike the debate over what we are going through today: There were amendments all over the lot; and the Smoot-Hawley bill was not going anywhere until the Northeastern Members of the Congress joined in and decided to do for the Northeastern manufacturing what the Republican Midwestern Members were trying

to do for agriculture.

If you go back and look at the stock market crash of 1929, there is an inextricable link, I believe, between the debate on the amendments as they came to the floor and were passed in 1929 and 1930, and the crash of the stock and equity values, forecasting the drop in world trade and the contraction of the economy, which followed. My friend, the gentleman from California, is doing the House a great service, indeed he is doing the people of the country a great service, by bringing this to their attention. I want to remind my colleague that the bill was signed in 1930 but its most important provisions were passed in October of 1929. Indeed, they passed at the very same time that the market crashed.

There are people, and I am one of them, who believe that the drop in equity value preceding the drop in trade was a response to the tremendous increase in tariffs not only on agriculture, but on manufacturing. Is it any coincidence that the stock market has dropped 30 points only yesterday and today?

I would say parenthetically that when the Congress passed the Smoot-Hawley Tariff Act, almost every reputable economist, every finance minister in the world, begged President Hoover not to sign the bill, and when he said he might not sign it, the stock market recovered about 80 percent of its value from October of 1929 and that crash, on into June of 1930, and then Hoover signed it and the stock market crash of June 1930 was almost as great as the stock market crash of 1929.

Within weeks, I would say to my friend, the gentleman from California, every single nation in Europe raised its tariffs to match the tariffs of the United States, and the world contraction resulted. We went into a terrible deficit, taxes were raised by President Hoover and the Congress, monetary policy tightened in response to the money panic, and we went into the terrible depression.

Why do I bring it up? To demonstrate by history that this is not a jobs bill; this is going to destroy jobs.

It is not easy for me to speak on this issue. But I think it is important that we establish some legislative history here because it is going to come back in the next Congress.

I represent an auto town, a steel town, Buffalo, N.Y. We have high unemployment. My heart goes out to the people who have had their lives and their families and their economic fortunes dislocated by the terrible economic consequences of high interest rates, high unemployment, and an economic downturn.

There is a depression in autos, as there is in steel and housing. But what caused it? Not international trade.

The CHAIRMAN. The time of the gentleman from California (Mr. Dannemeyer) has again expired.

(On request of Mr. Kemp and by unanimous consent, Mr. Dannemeyer was allowed to proceed for 2 additional minutes.)

Mr. KEMP. There is an absolute depression in those industries. But for this very reason, the answer is not to get into a zero sum war in trade against our partners which would spread the depression. I say "partners" advisedly, because some of them are not partners. We want fair trade, to be sure, and we should be working to that end. But the only cure for the auto industry and the steel industry and agriculture and small business is to increase the demand for autos, steel, grain, with expansion.

But by passing this bill, by not learning the lessons of history, by not lis-

tening to the gentleman from California, we put the country, the world, in grave danger. In the Republican Party, though some of its members are going to vote for this bill, most of us, I think, are wisely opposed to it because we learned our lessons from 1930. It is now many of the liberal Members of the Congress, and I do not say that pejoratively, but it is the liberal Members of the Congress who are in danger of abandoning their heritage and becoming protectionists.

If John F. Kennedy were here today, he would be opposed to the bill. It was Hoover who was in favor of it. The first and greatest round of tariff reductions came in the Kennedy administration. Kennedy created GATT, and we owe him our thanks. Trade expanded, we had foreign money at stable exchange rates, and that did more for automobiles, that did more for housing, and that did more for basic industry in the country than all of the

quick fixes in the world.

I think it would be a terrible mistake if the Congress took this action. I say it reluctantly because I know and I identify with all the people who are suffering, but I say it firmly, because we must reduce pain, not increase it. I just want to compliment the gentleman from California and compliment the gentleman from Florida who has, I think, given us a lesson by bringing up Smoot-Hawley, about what happens to the world when you start to wage the commerical equivalent of war. It's always the innocent who get hurt. It leads to the loss of jobs; it does not lead to the protection of jobs.

I compliment the gentleman from California for having the courage of his convictions.

The CHAIRMAN. The time of the gentleman from California (Mr. Dannemeyer) has again expired.

(On request of Mr. Gibbons and by uanimous consent, Mr. Dannemeyer was allowed to proceed for 2 additional minutes.)

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. DANNEMEYER. I yield to the gentleman from Florida.

Mr. GIBBONS. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from New York and the gentleman from California have pointed out very graphically what happened to this country the last time we made this serious mistake.

I would like to add a sequel to it because I was fortunate enough to live during that time.

Not only did our economy collapse, not only did all the countries around the world retaliate against us and their economies collapsed, all world trade collapsed. It was down to about one-tenth of what it had been within 2 years. Attempts to revive it failed be-

cause of economic nationalism in all of our countries.

We tried to get together shortly after that in the economic conference. That failed because we were all looking at our problems and not realizing that our problems were worldwide and not just limited to that.

At the same time, Germany collapsed economically; Japan went through a terrible time economically. Those countries turned very radical. They started practicing radical nationalism. We all know what happened from that; The rise of the Fascists in Europe and the rise of militarists in Japan.

Twenty million Russians died as a result of that. I cannot tell you how many Americans died as a result of it. In my college class, the decimation was about 30 percent dead, all as a result of a well-intended act that threw this country into a tailspin and threw the world into a tailspin. This is the same kind of thing.

I do not want to cut off debate, because I do not think there is a more important piece of legislation that this Congress has considered that affects our economy and affects world peace more than this particular piece of legislation.

This is a terrible indictment of the American system. It is aggression against the American consumer by us unilaterally telling them for a nonharmful product that he cannot spend his money on it. Never have we ever done that to Americans before. At least the Smoot-Hawley just put up economic barriers that you could jump over, you could get the price right; but this is a "You cannot have it, you stupid American taxpayers who earn less money than Members of Congress and have already paid your taxes, you cannot spend your money the way you want to.

#### □ 1345

How tyrannical can we be and how great are the consequences of this?

The CHAIRMAN. Does the gentleman from New York persist in his point of order?

Mr. OTTINGER. Mr. Chairman, I withdraw my point of order.
The CHAIRMAN. The Chair recog-

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Ottinger) for 5 minutes.

Mr. OTTINGER. Mr. Chairman, I rise in opposition to the amendment. I do not think this is a serious amendment. I understand it is a symbolic amendment, but the symbolism is wrong and it would be very detrimental to this body.

It is wrong because there is no tariff in this act. We do not prevent foreign manufacturers from selling here. All we do is say, "If you sell here, you have got to make a certain amount of the manufactures and parts here."

Second, it is unfortunate because if they were adopted, then the act would be interpreted as being a protectionist piece of legislation, which it is not.

The third point I would make is that war has already been declared, and indeed is being waged against the United States by Japan and European countries not only in automobiles, but in many other products. I do not know how we are going to roll that back, really going to get to the free trade which the opponents desire, unless it is made clear that Congress is going to stand up against the kind of barriers that have been placed against U.S. products. This is a step in the right direction, and I think will help us alleviate barriers to world trade rather than increase them.

Mr. DINGELL. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Chairman, I think my good friend, my colleague from California, offers an amendment, and I am sure he seeks to make a point, but it is very plain to me that the gentleman from California not only offers the amendment for a symbolic purpose, but that he in fact does not want the amendment to pass.

Now, why? First of all, he defines this as a Smoot-Hawley Barriers Act of 1982. Second, he sets forth a statement of purpose. Those two devices in the bill, if the amendment offered by the gentleman from California is adopted-and I am sure he offers it in the best good faith-will be used in interpreting how this bill will be administered by the agencies downtown. If the gentleman really wants to impose trade barriers and to have this interpreted as a bill which is going to cause a decline in trade, a decline in jobs, a decline in international business activity, adoption of this amendment is a splendid way to do it.

I listened also to some comments made about the number of countries that had immediately imposed barriers on U.S. trade when we passed Smoot-Hawley, and if you will read that same list, you will find that each and every one of those nations has preferential legislation with respect to automobile imports. We are worried about a trade war? We have a trade war. The trade war is waged against America, against American exports, against American goods, industry, and jobs inside our own boundaries.

Do not kid yourselves that this is going to hurt our trade. Believe that the legislation now before us will give our people an opportunity to negotiate away from these outrageous trade barriers, and do not, for the love of God, vote for some kind of amendment like this which is mischievous in purpose and whose consequences in terms of the administration of the legislation are incalculable.

I urge that this amendment be defeated.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr OTTINGER. I yield to the gentleman from Missouri.

Mr. SKELTON. I would like to say a word, Mr. Chairman, as a member of the Small Business Committee.

Mr. Chairman, we have heard today of the disastrous effect of foreign competition and, in some cases, unfair trade practices on our domestic automobile markets. It has been pointed out that these activities undermine some of our largest industries, such as the auto industry, the steel industry, and the glass industry, causing unemployment and causing damage to our economy and balance of trade.

What is mentioned less often, Mr. Chairman, is the impact that the destruction of our markets is having on small businesses. Over 10,000 small business contractors depend directly on the auto industry and related industries for their livelihood. Thousands more small businesses suffer because they are located in areas where the auto industry is a primary employer. These businesses, such as mom and pop grocerys, restaurants, clothing shops, are the first to feel the squeeze when unemployment increases in their area. The tragedy is that our small businesses close their doors faster than large businesses do as a result of these attacks. They do not have the credit resources and the financial depth to recover from even a short period of economic distress. The fallout from the invasion of our auto markets has contributed to the record number of small business bankruptcies that are occurring in the United States—the highest since the Great Depression. Unemployment is therefore increased; less cars and other consumer goods are purchased and the economic spiral gets worse and worse.

Mr. Chairman, I would not have come to the well today if I thought the downturn was the result of our inability to compete. I am still convinced that in fair and open trade, the United States auto industry or any other industry can hold their own in world competition. In this case, however, I think that ample evidence has been produced to show that our foreign competitors are jealously protecting their own markets while launching an all-out attack on ours. In the Small Business Committee, we have seen that they have even carried the fight to aftermarkets where foreign manufacturers bring pressure to bear on U.S. dealers to use foreign manufactured spare parts over those produced by small American manufacturers.

I must therefore, support H.R. 5133 as the best method available to protect our businesses, especially our small businesses from extinction. If fair trade with our trading partners has been made impossible as a result of

their actions and their decisions, then the only alternative left for us is to defend ourselves by these extraordinary means.

Mr. SCHUMER. Mr. Chairman, will

the gentleman yield?

Mr. OTTINGER. I yield to the gen-

tleman from New York.

Mr. SCHUMER. Mr. Chairman, I would like to ask the gentleman from New York and the gentleman from Michigan a question that has plagued me about this bill all along. Both the gentleman from New York and the gentleman from Michigan, both friends of mine who are much more knowledgeable about these things than I am, say that other countries have trade barriers, whether they be import restrictions or domestic content legislation.

I ask the gentlemen, if this legislation were to become law and those other countries were to drop all their trade barriers, would this legislation then be canceled? My point is that this legislation, as somebody has mentioned, fires a shot across the bow of Japan or any other country. What we need, therefore, is some kind of lever or some kind of criteria to say that if the Japanese reduce their trade barriers, we will reduce ours, or we will not impose the penalties outlined in this bill.

The CHAIRMAN. The time of the gentleman from New York has ex-

(At the request of Mr. SCHUMER and by unanimous consent, Mr. OTTINGER was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. My father used to have a saying to that kind of question. If my aunt wore pants, she would be my uncle. The answer is, yes, of course, if all the countries in the world dropped all their barriers against our products, we would not need this legislation. But, that is not the direction in which things are going. In point of fact, additional barriers are being placed by Europe, and we stand there, my good friend from Florida and the other opponents of this bill, and say that we should do nothing, we should just continue to espouse in the world body that we should have free trade. I think we will not get free trade that way. We will get increased discrimination, discrimination against the United **States** 

Mr. SCHUMER. If I might just respond to the gentleman from New York, I think there is a middle ground. There is a ground that can make this legislation do what so many people are intending it to do, and that is require other countries, particularly Japan, to reduce their trade barriers. As this bill stands now, it does not encourage free trade. It simply says that we must have domestic content even if other countries eliminate their trade barriers.

Mr. BROWN of Colorado. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield.

Mr. BROWN of Colorado. Mr. Chairman, I thank the gentleman for yielding. I thought the gentleman from Michigan made a very interesting point in indicating that this in many ways was a response to trade barriers that already exist. Let me ask the gentleman from New York, does this bill involve an exemption for countries that do not impose these kinds of barriers on our products?

Mr. OTTINGER. Well, it only applies to automobile companies in interstate commerce that sell more than 100,000 automobiles in the United States, and do not have the required domestic content.

Mr. BROWN of Colorado. Would not the gentleman agree that it is fair to say that this bill is not designed to respond to barriers in other countries, because all it does is, it applies to the products of other countries whether they have that kind of barriers or not? Is that a fair summary of the bill?

Mr. OTTINGER. What we are doing is saying that we are going to protect our markets in the same manner that every other country protects its markets.

Mr. FRENZEL Mr. Chairman, I move to strike the requisite number of words, and I want to speak in favor of the amendment.

Mr. Chairman, we have had some interesting debate on this particular amendment. I think this amendment, like its predecessors, has shed some more light on this particular bill.

I would comment first of all on the suggestion of the gentleman from Michigan that the gentleman from California really does not want his amendment to pass. I have discussed it with the gentleman from California, and I am going to do everything I can to see that we all have a chance to express ourselves, and I will wager that the gentleman from California will vote for his own amendment.

Someone also said that there was a foreign prejudice against U.S. car exports, but this bill does not deal with that at all. That point was made very ably by the gentleman from New York (Mr. SCHUMER) and the gentleman from Colorado (Mr. BROWN).

The fact is, this bill is not aimed at trying to get barriers abroad reduced. That is not the purpose of the bill. The whole background against which we are debating this bill, is that other countries are unfair. But this debate has shown there is nothing in this bill to cause anybody to reduce any barriers.

The purpose of this bill is to confine this country's market to itself; to make sure that no foreign parts can go into American cars. That will create our own export prejudice. That is,

American cars will be so high priced that they cannot sell abroad.

Had the Members been in our committee and listened to the testimony, they would have heard what the domestic producers told us. They would be knocked out of the world car market. That is exactly what Secretary Baldrige told us. Auto companies would not be able to compete.

Those barriers abroad are going to be self-erected by this bill. At the same time, the bill is going to cause the yen to go down. That will make it more difficult for American products to sell abroad.

We are shooting ourselves in both feet, and in other places, in this bill, and the trouble is, the people who are sponsoring this bill are doing it knowingly

Finally, I want to repond to one other statement made by the previous speaker. He said that he was for this bill in the name of small business. I would like to advise him that the largest small business organization in the United States, which many of us accept as a spokesman for small business, is very strongly against the bill.

I think what the Dannemeyer amendment does is point out, just like the three amendments that preceded it have done, what is wrong with this bill. It shows how it does not get at the problem, how it costs extra jobs, and raises prices on the American people unnecessarily.

In this case, the amendment does not change the bill at all. It simply describes it in honest, straightforward terms. So, if you believe in truth in advertising, if you do not believe in misleading and deceptive terms, I think you will want to vote for the amendment of the gentleman from California

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. FRENZEL. I yield to the distinguished gentleman from Florida (Mr. Gibbons).

Mr. GIBBONS. Mr. Chairman, I thank the gentleman for yielding.

You know, I have heard this argument so many times about the 31 countries that have local content restrictions against automobiles, and the source of that is a Ways and Means Committee staff study in 1980. I have it right here in my hand if anybody wants to examine it. They never quote the whole study, so let me read the names of these illustrious countries, great countries that have these automobile restrictions. They are all listed here. Members may be surprised when they read them.

Argentina; how many of you have ever driven an Argentine car? Australia; Australia has domestic content, and it has a mess for an automobile industry, very high prices, and even the Australians will not buy their own cars. Bolivia; ever driven a Bolivian car? Or a Chilean car, a Columbian car, a Greek car, an Indonesian car, a Malaysian car, a Moroccan car, a Nigerian car, or a Pakistani car, a Peruvian car, a Philippine car, or a Portuguese car? Have you ever seen any of them on any market, anywhere? Have you ever driven a Thai, a Turkish, Uruguayan, Venezuelan, Yugoslav car? I have read, and this list contains a list of all of the countries, yes or no, about their restrictions.

The CHAIRMAN. The time of the gentleman from Minnesota has ex-

(By unanimous consent, Mr. Frenzel was allowed to proceed for 1 additional minute)

Mr. GIBBONS. There is one thing it does not include. The United States has the highest truck tariff in the world. The United States has a quantitative restraint, which the Japanese agreed to, on cars coming into this country. You know, the only country this staff study shows that does not have any restraints—can you guess what it is? Can you guess what it is? Japan. You never heard of that in the UAW ad. You never heard the gentleman from Michigan, who quotes this as his source material, say that.

I am not here to defend Japan. This study is wrong. Japan does have restrictions against American cars, but the real problem is, no American manufacturer wants to really sell a car in Japan. Our cars even have the steering wheel on the wrong side. No Japanese is going to have to struggle across the seat to throw a yen in the toll box. That is the problem. You go and talk to these manufacturers.

#### □ 1400

The CHAIRMAN. The time of the gentleman from Florida (Mr. Gibbons) has expired.

(On request of Mr. Frenzel, and by unanimous consent, Mr. Gibbons was allowed to proceed for 1 additional minute.)

Mr. GIBBONS. Mr. Chairman, I am going to leave the room as soon as I say this, but it is because I am going to have to go someplace else, but I will be right back.

Mr. FRENZEL. The gentleman can testify on CBI.

Mr. GIBBONS. Mr. Chairman, I did not put up with just the prefunctory lobbyists who come in and want to testify on these bills; I asked the automobile manufacturers to send in their chief executive officers. Ford sent theirs in under protest, and General Motors sent theirs in under protest. The gentleman from Chrysler said, "I have got so many problems with the UAW I can't go anywhere."

I did not insist that he come in. But all the other chairmen of the U.S. manufacturers came in, including the U.S. subsidiaries of the foreign manufacturers, every one of them. They said, "We've got a real problem in the automobile business."

But this thing does not solve any problems; this just creates more problems for us. All of them are going to become more inefficient, and eventually this will drag the industry down. That is what this bill does.

If my good friends on the Commerce Committee had conducted full hearings—and they are capable of having full hearings—and had anything but a couple of witnesses there, they would have learned all of this.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, we have just heard a vital portion of this debate. The Members of this House know why Japan does not today place restrictions, at least overt restrictions on automobile imports. This bill is little more than an honest, typically American way of responding to unfair treatment. We know why Japan does not have open import limitations now.

As the chairman of the subcommittee, knows, because we had extensive testimony on it before the Trade Subcommittee, the Japanese for years in an outright way absolutely restricted the sale of any foreign automobiles in their country. You could not sell a foreign automobile in Japan, and you could not sell that automobile until their industry had completely dominated their domestic market. You simply could not bring a car into that country and sell it.

Do the Members want to know when that restriction came off? That restriction came off when very, very careful regulations were put in place, regulations concerning everything from investments to loans. You could not get any kind of equity in Japan to build a factory there to sell cars.

Do the Members want to know the most widely sold foreign automobile in Japan? It is a Volkswagen. They sell about 40,000 units. They have got to go through high water and floods—I would not say bribery and pressure or harassment or anything like that—in order to meet the requirements that Japan places upon them.

It is absurd and misleading to talk about that great Japanese automobile industry as if its history of restrictions against foreign manufacturers and importers did not exist. That is just not fair. In everything from steel products to cars, you did not have the ability in the past to go into that country and sell.

What the gentleman from New York and the gentleman from Michigan said is correct. This bill is nothing more than a political culmination long, long in the formation, in response to a long, long string of abuses. It is a bill that we should pass and do the Japanese

leaders a favor so that they can go to their constituents and say, "we have got to respond to our responsibilities as a modern trading nation and open markets and open our capital markets. We have got to go out there in our foreign markets and not use the government to finance exports," which is what they do, particularly long-term capital intensive projects. They have to make these changes so that there is some kind of investor confidence somewhere else in the world in capital goods, as opposed to having to face the requirements imposed upon world markets by Japan, Incorporated.

Mr. Chairman, the gentleman from New York is 100 percent correct, and I want to associate myself with his earlier remarks.

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Chairman, I appreciate the gentleman's yielding.

Let me observe that I do not think the floor of the House is an appropriate place to rewrite history, and even George Orwell in his most imaginative effort could not bring himself in any novel to say that the rise of nazism in World War II was caused by an act of Congress in the 1920's. I would hope that none of the Members would fall into such a trap as to believe that. It does great disservice to history.

Let me say to my good friends on the conservative side that I suspected they were probably about 12 to 15 years behind, but I did not know that they were in the 1920's. The economic circumstances that confront the United States and modern industrial nations of this world in the 1980's are substantially different from those in the 1920's and the 1930's. I would hope we could agree on that point.

Let me also say that our major Asiatic trading partner—and indeed we are partners, and we are friends; let me underline that—is Japan, but we must remember also that the standards by which we are judging them are based upon our own norms. They have different norms and economic models. Their economy, their philosophy, and their ethics are totally different from ours. They are totally different. If we measure a response to what they are doing on the basis of what we are doing, we are not looking at the real world; it is apples and oranges we are comparing. Not apples and apples.

They act in concert with a united effort in which their Government, their industries, their banks, and their labor unions make collective decisions based upon long and careful negotiations and conversations had around the tea table. They have a concensus economy popularly called Japan, Incorporated.

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. BAILEY) has expired.

(On request of Mr. TRAXLER, and by unanimous consent, Mr. Bailey of Pennsylvania was allowed to proceed for 2 additional minutes.)

Mr. TRAXLER. Mr. Chairman, will the gentleman yield further?

Mr. BAILEY of Pennsylvania. I yield to the gentleman from Michigan.

Mr. TRAXLER. Mr. Chairman, I appreciate the gentleman's yielding further.

Mr. Chairman, it is critical that we appreciate the fact that what we are talking about here is not some American companies competing with some other companies in another country. That is absurd. Anybody who believes that is an Alice in Wonderland.

In 1976 a decision was arrived at in Japan, this country that is our good friend, in which the Government, unions, banks, and all the auto companies agreed to expand their automobile production by 55 percent, with the consent of the banks and the authority of the Government, certain agreements having been reached that nobody would suffer economically as a result of that.

And the marketplace for that 100 percent increase in production, where was it going to be? In Japan? Of course not. In Europe? Of course not. It was going to be in the United States.

There is no way we are going to have some kind of fair trade among automotive products between the United States and Japan. They will not permit it, anymore than they will permit American beef to be sold in any quantity in Japan or tobacco to be sold, or our fruit or vegetables.

Did the Members read yesterday's article in the Wall Street Journal concerning the interview with the Prime Minister of Japan? It was incredible. We are going to talk to them from now to doomsday, and do we know what we are going to get? A lot of tea.

These are national decisions. The Japanese have to import raw materials and export a finished product to survive and to live. I understand that, and I think what we need is some fair trade understandings between us and our friends, not the system that currently exists and that suggests that we are dealing on the basis of equals with equal kinds of competing economic systems. I think that is the most naive concept that any Member of this Congress could make.

Mr. Chairman, I extend my deep appreciation to the gentleman from Pennsylvania (Mr. BAILEY) for yielding to me. I urge a yes vote on the bill.

Mr. STANTON of Ohio. Mr. Chairman, will the gentleman yield?

Mr. BAILEY of Pennsylvania. I yield to the gentleman from Ohio.

Mr. STANTON of Ohio. Mr. Chairman, I appreciate the gentleman's yielding, and I was so interested that I almost forgot what I was going to ask

The CHAIRMAN. The time of the gentleman from Pennsylvania (Mr. BAILEY) has expired.

Mr. STANTON of Ohio. Mr. Chairman, I will take my own time.

The CHAIRMAN. The gentleman will be recognized.

Mr. STANTON of Ohio. Mr. Chairman, I move to strike the necessary number of words.

Mr. OTTINGER. Mr. Chairman, will

the gentleman yield?

Mr. STANTON of Ohio. Mr. Chairman, I know that the gentleman is going to ask for limited debate, and I am not going to allow that, so I hope that he does not ask me to yield right now for a couple of minutes.

Mr. OTTINGER. Mr. Chairman, the gentleman will get his 5 minutes.

Mr. STANTON of Ohio. I know, but I want more than that. I will ask the gentleman to just sit down for a few minutes and relax.

Mr. Chairman, I will tell the gentleman why I am going to do that, because I was not here at the start of this debate. But the gentleman from Florida (Mr. GIBBONS) explained this, as he often has the opportunity to do. and when he was joined by the gentleman from Minnesota (Mr. FRENZEL), they started to make an argument and a point, and I think it behooves all of us, even if we disagree with them, to listen to their arguments because I think the two of them have put together a case against this bill that I believe one has to consider.

It is very hard for a Member like me, coming from northeastern Ohio, in the heart of the United Auto Workers area, to see their point of view politically, but I have always been consistent and have always felt that protectionist legislation of the type we are dealing with today is totally against the best interests of the citizens of the United States.

Several questions have not been asked. First, I listened to the gentleman explain why it was hard to sell American automobiles in Japan, and I basically think he is probably about three-quarters right. The problem we are addressing today is this: And I have not heard that addressed, why are Americans buying Japanese cars?

Mr. BAILEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. STANTON of Ohio. I will yield in a minute.

Mr. BAILEY of Pennsylvania. I would be happy to tell the gentleman. Mr. STANTON of Ohio. I happen to think it is because they think it is a better product. What does the gentle-

man think? What is his answer? Mr. BAILEY of Pennsylvania. I think if we sat down and compared

products, we would recognize that for number of years, particularly through model changes and response to OPEC impacts on buyer preference, with the fit and finish on Japanese automobiles, in conjunction with a very devalued yen, it made that a good consumer buy, and I think the gentleman makes an excellent point.

Mr. STANTON of Ohio. Mr. Chairman, I will not yield any further.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I wish the gentleman would be fair and let me complete my answer to his question.

The CHAIRMAN. The gentleman from Ohio (Mr. STANTON) retains his time.

Mr. STANTON of Ohio. Mr. Chairman, I thank the gentleman for his answer. I was also listening to him over there before, and I know the subcommittee chairman is anxious to move this bill along.

The answer is that either pricewise or for other reasons, they buy it because they think it is a better buy. There is nothing in the world that I particularly dislike more than a foreign-made automobile. My family for 77 years has been connected with the automobile business. My father quit high school to go to work for Henry Ford. He thought that next to the Pope, Henry Ford was the best man the world ever knew, and I think for some reasons, because he gave jobs to Americans, that he was right.

In the area where I live in this city, in the alcove where I live, there are 10 houses and there are 14 automobiles there in our little alcove in Georgetown. Twelve of the fourteen are foreign-made automobiles; the two that are not foreign made are mine.

I have taken the time to go around to these people and ask them, and they say, "if I could get an American car like this," and so forth. But I do not find this back in Ohio. We very rarely see a foreign-made car there. Maybe for the elite or something, it is there.

But the answer, wherever we are, is the same, that they think it is a better made car. Second, to my point, the answer really and truly to the gentleman from Michigan, who said we were naive to think that history had something to do with the problems we face today, I happen to be very naive, because the gentleman from Florida was absolutely correct.

It was correct not only in World War II, after the buildup since the Depression days of the 1930's but a great case can be made in World War I, where this general subject of protectionism has eroded and grown by leaps and bounds, and the next thing we know, we are selling less trade abroad.

We will see that this is a very, very important problem that we are addressing, and for that reason we should listen very carefully to the arguments that were so well put by the gentleman from Florida (Mr. Gibbons) and the gentleman from Minnesota (Mr. Frenzel).

Let me just allude to one final point, if I may. That is this: That as we address this system and as we look to the future, let us look more constructively and positively to the questions involved. Let us see if, as a country or a government, there is something we can do to help the auto industry or help the basic steel industry in creating the best products that we can build and give them the free opportunity to make products that the American people want to buy. I think that is the answer.

I think we would be constructive in looking toward that particular goal. I think that there is something we can do and a goal we can reach if we constructively look at this problem. But once we head down the protectionist route, I am very sorry to say that I do not think it is a correct answer.

Mr. Chairman, I appreciate the courtesy of the chairman of the subcommittee and thank him for this extra time. I also compliment him for bringing to our attention this all-important subject and giving us a chance to equally debate this subject, because there are obviously strong views on both sides.

#### □ 1415

Mr. SOLARZ. Mr. Chairman, I move to strike the requisite number of words.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. SOLARZ. I am happy to yield. Mr. OTTINGER. Mr. Chairman, I ask unanimous consent that all time on this amendment and all amendments thereto end in 10 minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. GRAMM. Mr. Chairman, I object.

The CHAIRMAN. Objection is heard.

Mr. SOLARZ. Mr. Chairman, during the debate on this bill last week and today a number of rather critical and, indeed, even one-sided comments have been made by Japan. So it seemed to me that, given the overriding importance of the relationship between the United States and Japan, not only for our two countries but for the peace and prosperity of the entire world, it might perhaps be beneficial to put this relationship in its proper perspective.

There can be little doubt that, in spite of the fact that the Japanese are increasing their defense spending at a faster rate than their domestic spending, in spite of the fact that they have the eighth largest army in the world, in spite of the fact that they are con-

tributing \$1 billion to the upkeep of American forces in Japan, in spite of the fact that they provide us with bases that are critically important in terms of our ability to protect our interests in the Western Pacific, that Japan can and should be spending substantially more on its own defense.

It is equally true that the Japanese market is far more restricted toward American exports to Japan than the American market is with respect to Japanese exports to the United States. And the American people clearly believe that fair trade is a condition for free trade.

I share the view of those who believe that Japan can and should be doing much more to open up its markets to the United States, not only because it is in our interests but also because it is in their interests as well.

At the same time, however, I think it is also important for us to recognize that over the course of the last several years the Japanese have been making progress toward the elimination of many of their trade barriers.

They have, for example, tariffs which are on the average as low as the tariffs in the United States and in the European Economic Community.

Between 1960 and 1980 they reduced the total number of their trade quotas from over 400 to just 27 today, 22 of which are agricultural.

In the course of the last year they have adopted a number of other trade reforms. Over 70 of them involve changes in product testing and custom procedures designed to reduce the nontariff barriers to trade that have occasioned so much criticism in the United States and abroad.

Perhaps most importantly, former Prime Minister Suzuki a few months ago pledged to use the influence of his office to encourage Japanese firms to buy foreign products. Potentially over time this may be the single most significant trade reform to which the Japanese have committed themselves.

Japanese have committed themselves.
Furthermore, I think it is important for us to recognize, amidst the orgy of criticism which we have directed against Japan for its restrictions against trade, that our hands are not exactly clean either.

The fact of the matter is we have prohibitions against the sale of Alaskan oil. We have a variety of Buy American acts in Federal and State legislation. We have, in effect, imposed restraints on Japan with respect to the export of Japanese automobiles.

We have quotas on textiles manufactured in Japan and elsewhere. There are restrictions on the export of color television sets to the United States.

Our trigger price mechanism with respect to steel was clearly also a violation of free trade principals.

I mention this litany of American violations of the principal of free trade simply to make the point that in the course of the criticisms we direct against Japan, and I share many of those concerns and I have expressed many of those criticisms myself, we ought not to be too self-righteous because we are guilty also of violating fundamental free and fair trade principals.

I have just written an article which appears in this month's issue of Foreign Policy magazine which goes into some detail about the kind of trade restrictions they have in Japan. We conducted hearings before my subcommittee on Asian and Pacific affairs on trade and defense problems in the United States-Japanese relationship.

We made it absolutely clear that on balance Japan does have greater restrictions against American exports than we have against Japanese exports and they ought to open up their markets more.

The CHAIRMAN. The time of the gentleman from New York (Mr. Solarz) has again expired.

(By unanimous consent Mr. Solarz was allowed to proceed for 1 additional minute.)

Mr. SOLARZ. But I want to make in conclusion one point to my colleagues who are on the floor at this moment. That is that there are a lot of very knowledgeable people who have studied the trade problems in the United States-Japanese relationship who have come to the conclusion that if the Japanese eliminated all of their nontariff barriers to trade and we eliminated all of our nontariff barriers to trade that the trade deficit, rather than diminishing, would actually increase.

I do not know whether that would happen. I would be prepared to take my chances. I think we ought to be moving in the direction of freer and fairer trade.

This legislation may be necessary as a temporary measure to protect a vitally important American industry. It clearly does violate principals of free trade but, hopefully, if it is adopted it will encourage the Japanese to recognize that they have to make greater progress in reducing their barriers to trade.

But let us understand that, as Mike Mansfield, our Ambassador to Japan, who is probably the most able American Ambassador anywhere in the world today, has said, this is our single most important bilateral relationship. If this bill is going to be adopted let it be adopted in a way which does not harm or impair our ability to preserve this critically important relationship with a country which has in fact cooperated with us in a number of very important areas.

The CHAIRMAN. The time of the gentleman from New York (Mr. Solarz) has again expired.

(By unanimous consent Mr. Solarz was allowed to proceed for 1 additional

minute.)

Mr. SOLARZ. Following the Soviet invasion of Afghanistan they boycotted the Moscow Olympics and adopted sanctions against the Soviet Union.

Following the Vietnamese invasion of Cambodia, Japan ceased providing aid to Hanoi.

During the hostage crisis in Iran they adopted sanctions against Iran even though many of the European countries did not.

Following the establishment of martial law in Poland they adopted sanctions against that country as well.

Between 1980 and 1984 they plan to double the level of their foreign aid

and at our request they are providing substantial amounts of foreign aid to Turkey, to Egypt and to Pakistan and other strategically important coun-

has to make more progress on defense and trade. But it is fundamentally a country which is friendly to the United States and upon whose friendship we depend not only for our own peace and prosperity but for the peace and prosperity but for the whole world, and I think we ought to keep this in mind as we consider this legis-Japan is a nation which does not do everything we want it to do and which

Mr. KEMP. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to compliment my friend from New York, Mr. Sozanz, for his very throughtful and quite courageous statement. He has reminded us, Mr. Chairman, that Japan is not an enemy of the United States. There are problems with Japan is not an enemy of the United States are those impediments—theirs or ours—that stand in the way of peace and friendship and trade and prosperity, not only of this country but, indeed, of the rest of the world.

The gentleman from California has done a service by bringing to the attention of the House, as has the gentleman from New York, what happended and what happens in the world when policy changes are made that cause economic contraction. So I thank the gentleman from New York. He also reminded us of another very important truth, which is that we do not live in a closed economy. We live in a global economy. Our jobs and our standard of living are not independent. I know this is shocking to some of my colleagues but we are interdependent. I know this is microscopic but think of a bottle of Coca-Cola sold in New Delhi, India. Part of that bottle of Coca-Cola soles to the shopkeeper.

regar plantation. Part of that price might go to New York, where the glass it is made. Part of that price might go to New York, where the glass it is made. Part of that price might go to the Atlanta, Ga., where the company is it is managed or to some other place. The microscopic impact is minuscule but magnified by millions and millions of times, the economic impact on our nives. Cutting out any single step in threatens the whole income.

In There is only one closed economy threatens the whole income.

There is only one closed economy and it is a global economy. It is desparately important that we think of the consequences of our actions.

Imagine the United States of America for just a moment as 50 States and imagine that in every State has its own currency, freely floating against the treet of the reset of the

We would be told to buy New or buy Ohio.

I want to say parenthetically that I buy American. I drive an American car. My wife drives an American car. My son's first car was a Jeep.

But for the sake of the American economy and American jobs I do not think we ought to legislate buy American. Because the less we trade with the rest of the world, the fewer goods and the fewer jobs we can afford. It is in the interest of the people I represent and of this country, of their industry and their work, that we must avoid tragic mistakes.

But I want to go back to my analogy

I Imagine the American economy, cut up into 50 States, each competing against the rest, everybody with their own currency, everybody changing the tagainst the rest, everybody changing the gazer his neighbor by changing to beggar his neighbor by changing the currency value and the tariff almost daily. Compare that with our unified American economy with a single currency, and you get some idea of what has happened to the efficiency of the world economy in the past 15 years, since the progressive deterioration of our monetary and trading systems. That is why the whole world is in a depressed condition today.

We are dealing for the first time in tour adult history with a world that is broken up into nation-states trying to beggar their neighbors by changing their tariff pollicles and their trade policles and their exchange rates and doing nothing other than competing in a zero sum, a negative sum, contest in which everybody gets hurt.

Think back to the time in which we had a world in which there was a single, honest and sound and stable currency for the world, the gold dollar, and stable exchange rates of trade and engage in commerce across of trade and engage in commerce across of the which protected everybody's right to trade and engage in commerce across of the protected everybody's right to trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across of the protected everybody's right to the trade and engage in commerce across the protected everybody's right to the trade and engage in commerce across the protected everybody's right to the protected everybody's right to the p

uncertainties and inefficiencies

e dealing with countries that were using their trade and their exchange rates to gain a temporary trade advantage. Yet, instead of talking about how we can put such a stable and prosperous system back together, we are debating of whether to destroy the stability and prosperity that remains.

I thought it was interesting that Douglas Frazer, the very respected leader of the United Auto Workers, in testimony on page 157, gives as much weight to monetary policy as he does to this bill. I think that is interesting.

I do not know if he would think about monetary policy the same way I would. But I think he has put his finger on another key problem—domestic monetary policy. There are three issues facing this Congress: jobs, jobs, and jobs. If we want to create the policy, more and tax policy.

In 1978, my friends, automobile sales in the Illited States of America were

In 1978, my friends, automobile sales in the United States of America were at 13 million plus. By 1979 they dropped by 38 percent. Today they are at an extremely depressed level.

What happened in 1979? We changed our monetary policy. Interest rates doubled.

The CHAIRMAN. The time of the gentleman from New York (Mr. Kenr)

has expired.

(By unanimous consent Mr. Krau was allowed to proceed for 2 additional

minutes.)

Mr. KEMP. Interest rates went into the stratosphere, the prime rate, consumer rates, mortgage rates. The depression in autos began with the stratospheric climb to the double digit interest rate problem that I think was precipitated by some of the monetary policies of 1978-79.

Housing went down the chutes in 1979. Housing starts were 2.2 million in 1978. They went eventually as low

Agriculture, steel, all of the key industries of this country declined. I am not trying to point the whole finger at just monetary policy—but I think Douglas Frazer has something when he says that monetary policy is a prescription for getting automobiles back on their feet.

If interest rates came down to single digit levels we would be selling automobiles again. Interest rates have come down since July and already housing is up 30 percent.

# □ 1430

Reforming monetary policy would do more for the automobile workers and the steel workers than all of these zero-some legislative initiatives that are being made here today.

In my heart I respect the gentleman from New York. I respect all of the proponents of the bill. We agree on the crying need to create jobs, to help

Americans who are struggling to keep their heads above water. I think we are making a mistake, though, if we think that this is not going to bring about retaliation. The gentleman says there is already retaliation. I agree. But tearing down somebody else's home is not going to help build the home that we all live in, the United States of America.

The last point is simply this: The great growth of trade in the 1960's, the great growth in trade since 1945, has been the result of our country working, as the gentleman from New York pointed out, with other nations to bring about an environment in which we can have trade and commerce and fair as well as free trade. I know it is not completely fair. We should work to make it fair. But we are not going to make if fair if we start dropping the equivalent of low-yield nuclear bombs on our trade partners. That would be a job-destroying mis-take. And I ask the House to turn down this legislation and support the amendment offered by the gentleman from California.

The CHAIRMAN. The time of the gentleman from New York (Mr. KEMP) has expired.

(On request of Mr. PRITCHARD and by unanimous consent, Mr. KEMP was allowed to proceed for 1 additional minute.)

Mr. PRITCHARD. Mr. Chairman, will the gentleman yield?

Mr. KEMP. I yield to the gentleman from Washington.

Mr. PRITCHARD. Mr. Chariman, I just want to commend this gentleman from New York and say that I am in agreement with what he stated. I would also like to commend my chairman of the Foreign Relations Subcommittee in whose hearings I participated.

What the gentleman said is correct. I think also the House ought to realize that this bill affects more than just Japan. All of the discussion hinges on Japan. And yet this bill is going to have an effect on countries all around the world. There is a problem. But this legislation is not the way to solve it.

I hope that this House will turn it down.

Mr. KEMP. I thank the gentleman for his comments.

Mr. Chairman, we should be working to break down those barriers, stabilizing exchange rates, creating an international environment for trade, reforming domestic policy to spur expansion, and I think all of us would do more for our auto and steel-workers that way than by passing this legislation.

Mr. GRAMM. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak on behalf of the amendment. Mr. Chairman, in committee and here on the floor today we have heard a lot of good arguments about a problem that exists between the United States and its trading partners.

The problem is one that exists because we have tried to promote free trade in general, though our colleague from New York has pointed out that our rhetoric is better than our performance, and some of our trading partners have clung to advantages that we gave them in the postwar era, creating clear disadvantages in many areas to expand trade of American goods abroad. This is especially true in the area of agriculture. And while I am totally in agreement that this problem exists-and the problem has been alluded to over and over-this bill in no way addresses that problem. In fact, this bill will compound that problem because this bill simply says "do not open up your markets to U.S. products," as we have heard over and over and over today. There is no vehicle in this bill to promote the openmarket objective. This bill says we are going to force you to produce a substantial amount of a significant product-automobiles, motor vehiclesthat are sold on the American market in the United States.

It seems to me, Mr. Chairman, that there are several points missed, and I would like to try to go through them very rapidly and make the points as clear as I can.

No. 1, this bill will not create a single job, even if no nation in the world reciprocates. If no nation in the world raises its trade barriers in response there will still be no net job impact.

Now, why do I say that? I say that because we are operating under flexible exchange rates. The values of the dollar on the world market relative to other currencies is set by supply and demand. So if we come in with a domestic content bill and we reduce the import of Japanese automobiles and we have them built here to the extent that they are produced, then there will be a strengthening of the value of the dollar because we are buying less abroad. But as the value of the dollar goes up, the competitiveness of American goods-one out of every 6 American jobs is in exports—will decline. So that for every United Auto Worker job that we save, even if no other nation initiates a trade war responding to our first salvo, there will be an American job in another industry that will be destroyed.

So this is not a job-creation bill. This is a job-transfer bill. And the problem is: Who are we taking jobs away from? We are taking jobs away from industries that are growing and that are competitive and that represent the future of our Nation in the 1980's and the 1990's, and we are giving jobs and protecting jobs in an industry which has not stayed competitive. And I am

not going to say the whole fault is with management or the whole fault is with the United Auto Workers. But the plain truth is that the American people have not been forced to buy these Japanese automobiles. They bought them because they were good automobiles and because they have competed and because they were given value at a given price.

But in transerring jobs we still do not preserve the jobs that we save by taking other American jobs away.

What has happened to the nations that have followed this route? What has happened in Britain with protectionism? What has happened in Britain is that as they have subsidized, as they have protected their heavy industry, the very problems that made them noncompetitive, to begin with, have not been solved. In fact, the problems have gotten more difficult.

Our trade problems in automobiles represent a means to a solution, not the problem in and of itself. It forces the unions, it forces management and it forces Government to change the rules of the game to make us competitive. If we take away the pressure to make difficult decisions, difficult decisions for presidents of labor unions, difficult decisions for the president of General Motors and difficult decisions for Members of Congress, I submit that those decisions will never be made; and we will be back here in 2 or 3 years with the same problems, without the jobs being protected in the automobile industry, but with the jobs having been destroyed in other industries.

We here today are speaking not just about any other nation. We are talking about the policy of the world's greatest economic power. What we do is going to affect the decisions of others. We cannot be the world leader and try to protect our industry from legitimate, or, in some cases, even illegitimate, competition. What we need if this problem persists is a reciprocal trade bill that says to our trading partners, "If you are going to discriminate against our products, then we will in turn discriminate against yours."

The CHAIRMAN. The time of the gentleman from Texas (Mr. Gramm) has expired.

(By unanimous consent, Mr. Gramm was allowed to proceed for 2 additional minutes.)

Mr. GRAMM. But this type legislation magnifies the problems we have. It transfers jobs from those industries that have been competitive, that have been responsible, to those that are not. And in the long run, it is self-defeating. I think it is imperative that we make it clear that this bill does not represent the policy of the Congress or the policy of the United States.

One final point. I am deeply concerned that a lot of people are voting

or are supporting this bill because they think it is sending a signal. Maybe a signal needs to be sent. But I am concerned that, when the bill comes back in the next session, people who are on record are going to have a hard time getting back across the river. And I wonder when Smoot-Hawley—since we are talking about that subject today, thanks to our colleague, the gentleman from California-was introduced, how many Members were simply trying to send a signal? How many Members thought the bill would never get out of committee, as was the case in the Commerce Committee? How many Members thought that they were simply pleasing some special interest back home and, in the process, they really contributed to the decline in world trade, the decline in prosperity, the decline in opportunity and freedom? I hope that is not the case here.

Mr. LENT. Mr. Chairman, will the

gentleman yield?

Mr. GRAMM. I yield to the gentle-

man from New York.

Mr. LENT. I thank my colleague for yielding, and I want to commend and congratulate the gentleman from Texas (Mr. GRAMM) on his statement, in which I heartily concur.

The gentleman made some excellent points about the loss of jobs that will result from the passage of this bill. I think the Congressional Budget Office fixed the number at something more than 104,000 American jobs which will

be lost. I wanted to point out to my colleagues that the American Association of Port Authorities is very much on record and has adopted a resolution opposing this bill. More than 98 percent of all of our international trade passes through our Nation's seaports, and our port industry, directly and indirectly, employs 1 million persons and generates some \$66 billion in dollar income.

The CHAIRMAN. The time of the gentleman from Texas (Mr. GRAMM)

has again expired.

(On request of Mr. LENT and by unanimous consent, Mr. Gramm was allowed to proceed for 1 additional

minute.)

Mr. LENT. If the gentleman will yield further, the trade repercussions of this bill will have a substantial impact on our ports. According to the American Association of Port Authorities-and I am going to put their resolution in the RECORD—this bill will jeopardize the more than 1 million port-related jobs, the more than \$30 billion contribution of U.S. ports to the GNP, and the investment made to port facilities, which is valued in excess of \$50 billion.

The Department of Transportation estimates that 7,600 to 11,600 direct jobs would be lost as a result of this bill, and somewhere between 53,000

and 81,000 indirect jobs would be put in jeopardy in 14 ports as a result of enactment of this bill.

In my home State of New York, a total ranging between 7700 and 11,700 jobs would be lost.

These would be jobs of longshoremen, truckers, railroad employees, distributors, barge crews ship suppliers, tugboat operators, custom brokers, nd others which would be hurt by this

Resolution of AAPA follows:

#### THE AMERICAN ASSOCIATION OF PORT AUTHORITIES

(A resolution opposing the enactment of H.R. 5133 and S. 2300, bills to impose domestic content requirements on auto importers and to restrict auto imports)

Whereas, the American Association of Port Authorities, founded in 1912, represents the public port authorities of the

bill.

United States; and
Whereas, these public port authorities
have provided the initiative in developing a superior port system for the United States, the shoreside cargo handling facilities and infrastructure of which is valued in excess of \$50 billion; and

Whereas, the Association recognizes that the United States is vitally dependent on the flow of international trade, both imports and exports, and that 98 percent of the volume of such trade moves via water carriage and is thus dependent on the port system: and

Whereas, the Association has, for many years, maintained a position supporting open international trade policies and continues to hold that barrier-free trade serves the best economic and national defense in-

terests of the United States; and

Whereas, the Association's U.S. Legislative Policy Council has carefully considered H.R. 5133 and S. 2300, proposed legislation which would impose domestic content requirements on importers of automobiles, and further, would serve to restrict the imports of automobiles, the Association now concludes:

- (1) Open trade policies have made a significant contribution to the prosperity of the United States and the nations of the world: and
- (2) Artificial barriers of commerce between nations impede national growth by reducing the challenge of competition which spurs productivity and innovation;
- (3) Domestic content requirements restrict the free flow of commerce, violate international trade agreements and tend to increase costs to consumers; and
- (4) The "Fair Practices in Automotive Products Act" (H.R. 5133 and S. 2300) introduced in the Congress would impose domestic content requirements on auto manufacturers which sell more than 100,000 vehicles in the United States; and
  (5) Such legislation would have the same

effect as mandated quotas, severely restrict-ing the number of auto imports into the

United States; and

(6) Independent studies have shown that one direct port job and seven indirect jobs in the port region are related to every 234 autos that cross U.S. docks, and that auto imports contribute hundreds of millions of dollars to the economy of the U.S. ports and

surrounding regions; and
(7) Pending domestic content legislation could invite retaliation against U.S. exports

and could engender adverse impacts upon U.S. ports; and

(8) The effect of this proposed legislation-and the trade war it could provokecould seriously jeopardize the more than 1 million port-related jobs in the United States, the more than \$30 billion contribution of U.S. ports to the GNP (1977 figure) and a significant portion of U.S. port facility investments made by the public port authorities.

Now, therefore, be it Resolved, That the American Association of Port Authorities opposes pending automobile domestic content legislation and will work for its defeat.

Ms. FERRARO. Mr. Chairman, I move to strike the requisite number of words.

Mr. OTTINGER. Mr. Chairman, will the gentlewoman yield,

Ms. FERRARO. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, we have been an hour and a half or better on an amendment which just changes the title. There are about 35 additional amendments. So I ask unanimous consent that debate on this amendment and all amendments thereto conclude at 2:50 p.m.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. The gentlewoman from New York (Ms. FERRARO) may continue with her 5 minutes, and then the Chair will recognize those Members who were standing at the time the unanimous-consent request was

Ms. FERRARO. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I support H.R. 5133, the Fair Practices Automotive Products Act of 1982.

Simply stated, what this bill is about is helping the U.S. auto industry. For the past 4 years, the industry has been sinking deeper and deeper into depression. Total sales are less than half their 1978 level and almost 1 million workers have lost their jobs, including 280,000 auto workers and another 670,000 workers in auto supply indus-

At the same time, sales of imported cars have been rising. Imports from Japan have increased by over 37 percent, and more than 1 of every 5 cars sold in the United States is Japanese built. Overall, imports make up 27 percent of the U.S. car market.

We can't continue to allow imports to take a larger share of our market, with the result of lost American jobs and an ever-worsening balance of trade deficit. Without strong, prompt measures to revive the domestic auto industry, overall economic recovery will remain beyond our reach. Traditionally we have always relied on a few basic industries, including autos and housing, to lead the economy to recovThe importance of the auto industry is easily demonstrated. Even in 1981, after 3 years of declining sales and layoffs, there were still amost 2.5 million people employed directly or indirectly in the industry. The additional economic activity generated by a healthy auto industry is just what is needed to pull the country out of this recession.

The bill before us will help create and maintain jobs in the auto industry. It will stop the exporting of jobs to Japan and will reduce outsourcing by domestic auto companies that transfers jobs from U.S. workers to low-wage Third World countries.

The bill takes a simple and direct approach. It simply requires that auto companies with more than 100,000 sales annually here build a certain percentage of those cars and trucks here. It doesn't establish quotas, or increase tariffs. It doesn't say, as other countries have said, "you can't sell here."

tries have said, "you can't sell here."

All it says is, if you're going to sell here, you have to build here. It says if an auto company is going to control a sizable share of the U.S. car market, that company will be required to locate production facilities here, and hire workers here, and buy auto parts here. It's a fair proposal, and the effect will be to create or preserve 1 million jobs that would otherwise be lost.

The United States has always led the world as a proponent of free trade. In an ideal world, free and open trade between all countries would be the rule.

But we do not live in an ideal world. As we have learned, you can't have free trade without fair trade. For years, we have refused, in the interests of promoting free trade, to erect protections for U.S. workers. Now we know we can't afford to be so idealistic. Other auto-producing nations, notably Japan and our major allies in Europe, have trade barriers on automobile imports which are much more stiff than those contained in this bill. We need to pass this bill to provide our own workers with some basic degree of job security. I strongly urge my colleagues, on behalf of the future of the American auto industry, to join me in supporting this bill.

Mr. BAILEY of Pennsylvania. Mr. Chairman, will the gentlewoman yield?

Ms. FERRARO. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. I thank the gentlewoman for yielding.

Mr. Chairman, there was a question asked earlier here concerning the reasons for this legislation. There is no desire to strike back at Japan. Many of the comments that were made in the well by the gentleman from New York concerning Japan are correct. The difficulty with their military defense, is a lack of apparent reslove as a result of the Second World War incidentally,

they have their northern islands, occupied by the Soviet Union, and will not resist there. But I must say that the Japanese effort, particularly in Southeast Asia, foreign policywise, is laudable and in fact I think they are doing some things that I wish that we would do.

We are talking about the reason for this bill and the reason is simply a matter of systems in conflict. You have an American system which has taught and preached and encouraged open, fair, and free trade. The gentleman from Texas was 100 percent correct. Many of the postwar policies of Japan were the result of our making. But the time has come for them to mature and respond. And, quite frankly, the reason why they are not is because they do not have an equal protection of the law clause and they do not have a one-man one-vote rule. Japanese leaders themselves will tell you that one of the greatest difficulties they have with their policy is a malapportioned legislative body that does not take into account some of the realities of modern life. So be it.

The question becomes whether or not this bill will have the effect of this really, does Japan or the world a favor. And I happen to believe that it does. If you sat down and looked at the reasons why our automobile industry, along with other capital-intensive industries are in trouble, conservatives in particular are met with a quandry. Some sort of a coherent, hopefully not even verging on the edge of planning, national industrial policy that will enable this Nation to compete should be examined. Right now the tax environment that a capital-intensive industry like automobiles has to contend with in this country places them at a great disadvantage when compared with the Japanese. The point is, though, that the Japanese have not done as much as they can do-and we had a discussion on this with USTR representatives just a few days ago-to help with these imbalances.

If there is going to be a world free trade model, the United States of America is going to have to assert her industrial, her economic, and political might. The truth in fact is that we are allowing ourselves to be used, and it is not serving our Nation well.

#### □ 1445

The gentleman from Texas I think presented some very balanced arguments. His conclusion was this bill does not achieve the desired results. I would say to him that if we could, when we wrote ERTA, sat down and responded to the needs of our utilities, to the needs of our basic industries; if we could now sit down and address in our Tax Code the kind of plant and equipment needs we have in basic industries the way they can in Canada or Japan, then we could look at a

world steel market and if our companies could not compete then we could not complain. Nontrade barriers are at the root of much of the current friction. This bill in conjunction with industrial policies that we either lack or other nations have, have led to a great deal of frustration. And I would say that this domestic content law is simply a political reaction on the part of American consumers and politicians and political actors and interest groups to abuse and assault from abroad. If free enterprise is to mean anything-the rule of the game must be equal or reasonably equal for all participants. Today they are not. We are being used in bad faith. We have a responsibility to respond.

The CHAIRMAN. Members standing at the time the unanimous-consent request was granted will be recognized for approximately 30 seconds each.

The Chair recognizes the gentleman from California (Mr. Pashayan).

(By unanimous consent, Mr. Frenzel, yielded his time to Mr. Pashayan.)

Mr. PASHAYAN. Mr. Chairman, I had a few more minutes of information to say here. But I will not consume more than the one minute. I appreciate the gentleman yielding his time.

Very briefly, Mr. Chairman, this bill is strictly a barrier bill. It vests no power to negotiate in the executive branch. My district has a lot of farmers who grow oranges who would love dearly to export more oranges to Japan. I am aware most keenly of the problems with that country with respect to our exportation.

What our response should be is a bill that gives the executive branch broad negotiating authority, perhaps to impose certain kinds of restrictions and barriers. But this bill does not do that. This bill simply by force of law requires that these barriers be imposed and vests no power to negotiate in our executive branch. It is too inflexible.

We should reject this bill by aiming the rifle, but not firing it.

(By unanimous consent, Mr. Coats yielded his time to Mr. Dannemeyer).

(By unanimous consent, Ms. Fer-RARO yielded her time to Mr. Seiber-LING).

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, what is at stake here is the amendment offered by the gentleman from California which would set out a statement of policy which would cause the legislation, if this amendment is adopted, to be interpreted in a fashion directly opposite what the gentleman or anybody else in the body wants.

The debate has been going on about how our trade policies have been working. This is not a trade bill. It is a jobs bill. It is before us because our trade policy has not worked and because the committees and the administration charged with giving us a trade policy have not acted properly.

(By unanimous consent, Mr. OTTIN-

GER yielded his time to Mr. DINGELL). Mr. DINGELL. And because neither the Congress nor the administration has done the things that are necessary to get us a trade policy.

Now, this country has now seen its basic industries so desperately eroded that there is depression in every industrial area. This is not a begger-thy neighbor proposal, and it will not involve or invite any kind of retaliation or retribution. That has long since been done to us.

Look at the restrictive trade practices of the Japanese and every other country in the world, and then understand why you have to do something to protect American jobs.

The CHAIRMAN. The Chair recognizes the gentleman from California

(Mr. Dannemeyer).

Mr. DANNEMEYER. Mr. Chairman, I think the editorial of yesterday in the New York Times and its headline aptly describes the bill as a job killer bill. I am quite serious about the amendment that I have offered, because I think it places in perspective what this legislation will do to the economy of this country and the economy of the world.

It has been said that if goods do not cross international boundaries, armies will. I think we should very soberly reflect on that assessment of history and learn from it. I ask the adoption of the

amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. DANNE-

The question was taken, and on a division (demanded by Mr. DANNEMEYER)

there were-ayes 11, noes 18.

Mr. DANNEMEYER. Mr. Chairman, demand a recorded vote, and pending that, I make the point of order that a quorum is not present. The CHAIRMAN.

Evidently

quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

#### □ 1500

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to rule XXIII, clause 2, further proceedings under the call shall be considered as vacated.

The Committee will resume its busi-

ness.

#### RECORDED VOTE

The CHAIRMAN. The pending business is the demand of the gentleman from California (Mr. DANNEMEYER) for a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 92, noes 301, answered "present" 3, not voting 37, as follows:

Mr. PARRIS changed his vote from "aye" to "no."

Mr. LUNDINE and Mr. CARNEY changed their votes from "no"

So the amendment was rejected. The result of the vote

nounced as above recorded.

AMENDMENT OFFERED BY MR. SCHUMER

Mr. SCHUMER. Mr. Chairman, I offer an amendment.

Mr. FLORIO. Mr. Chairman, I reserve a point of order.

Mr. FRENZEL. Mr. Chairman, I reserve a point of order.

Mr. DINGELL. Mr. Chairman, I reserve a point of order.

The Clerk read as follows:

Amendment offered by Mr. Schumer: Page 11, line 5, strike out "It" and insert in lieu thereof: "Except as provided in praragrapn (5), it".

Page 13, between lines 2 and 3, insert the

following:

(5) Paragraph (1) shall not apply with respect to any vehicle manufacturer of Japan with respect to any model year if the United States deficit in the balance of trade in automotive products with Japan for the four calendar quarters most closely corresponding to model year 1982 is not greater as a percentage of the deficit in goods and services with Japan (as calculated on the basis of the Balance of Goods and Services published by the Department of Commerce) for the four calendar quarters most closely corresponding to such model year than the percentage specified in the following table:

Automotive deficit as a percentage of goods and services deficit (percent)

Model year:	111111111
1984	74
1985	86
1986	104
1987 and each model year thereaf-	
	120

Mr. BROYHILL. Mr. Chairman, I

reserve a point of order.

The CHAIRMAN. The gentleman from New York (Mr. Schumer) is recognized for 5 minutes.

Mr. SCHUMER. Mr. Chairman, this amendment, which is entitled, "The Build It or Buy It Here Amendment," is an improvement of H.R. 5133.

I, like many Members in this House, are faced with a real dilemma on this bill. That dilemma is this: On the one hand, all of us see thousands and tens of thousands of autoworkers out of work. They are out of work for a variety of reasons, many having to do with the economy and general world trade situations, but certainly some have to do with the imports market. On the other hand, like many Members of this body, I am extremely reluctant to build walls, particularly when they are walls that will not present any real alternative to our trading partners because, as the debate on this bill has shown, when walls are built on one side, inevitably they are built on the other side, and the entire world suf-

The thrust of the debate, my friend from New York, my friend from Michigan, distinguished Members of this body and the gentleman from Pennsylvania, have explicitly said less than a half hour ago that the purpose of the bill is to send a lesson to the Japanese, to tell the Japanese and others that they must open up their markets. I think that the main flaw in this bill is that it does nothing to force the Japanese to reduce their trade barriers. This bill would apply equally to the Japanese or any other country whether or not they act to reduce or even eliminate completely their trade barriers.

Were the Japanese to admit our products into their country as freely as we admit theirs into ours, this bill would still be in effect as our distinguished majority leader said, it sends a shot across the bow, a warning. The problem is that the bill contains no real warning. My amendment, very simply, says this: It says that this bill will take effect unless the balance of trade deficit with Japan shrinks, and shrinks markedly—by 50 percent—over the next 4 years.

Those Members who are from agricultural areas, those who are from areas where there is strong timber, telecommunications, computer, and electronics industries that are now stifled because the Japanese market is closed to them, those Members who are from ports or places where international transportation and trade are important, should be supporting this amendment because this amendment, not the bill as it stands, says to the Japanese, "Open up your trade barriers or this bill takes effect."

The bill as written does not. I am a cosponsor of this bill, but feel that the amendment I am offering makes it better. It makes the bill better for those of us who are cosponsors and better for those who oppose it.

It changes the bill from the one which barriers provide no incentive for the reciprocal reduction of trade into a bill that is truly a lever for free trade.

Many Members have said to me on the floor that this bill will not get beyond the House, so they can vote for it even if they do not think it's a good idea. Everyone who has spoken has stated that the main value of the bill is its message. If we want that message to be clear, if we want that message to really say, "Open up, let us really have free trade," then this amendment should be adopted as part of H.R. 5133.

Mr. SIMON. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Illinois.

Mr. SIMON. Mr. Chairman, I want to commend the gentleman from New York. I think he has an excellent amendment here, because what this amendment does is, it puts an incentive there for the United States and Japan to enter into more meaningful negotiations, not only on autos, but for beef and a lot of other things that have an impact on many of us who are concerned about agricultural exports also. So, I am going to support the gentleman. I think it is an excellent amendment.

Mr. SCHUMER. I thank the gentleman from Illinois.

Mr. HARKIN. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Iowa. □ 1530

Mr. HARKIN. Mr. Chairman, I thank the gentleman for yielding.

I just want to join with my colleague, the gentleman from Illinois, in complimenting the gentleman from New York (Mr. Schumer) for offering this amendment. This really is the essence of what we are all about. This is what we want to do. We do not want to build walls and barriers.

The CHAIRMAN. The time of the gentleman from New York (Mr. Schumer) has expired.

Mr. HARKIN. Mr. Chairman, I ask unanimous consent that the gentleman from New York (Mr. SCHUMER) be allowed to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. BROYHILL. Mr. Chairman, reserving the right to object, I am going to insist on my point of order.

The CHAIRMAN. Does the gentleman object to additional time for the gentleman to complete his statement on the amendment?

Mr. BROYHILL. I do not object to that, Mr. Chairman.

The CHAIRMAN. The Chair will protect the gentleman's reservation on his point of order.

Mr. BROYHILL. Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. HARKIN. Mr. Chairman, will the gentleman yield further?

Mr. SCHUMER. I yield to the gentleman from Iowa.

Mr. HARKIN. Mr. Chairman, to continue, what the gentleman from New York is saying is, look, it is not so much that we want to build these walls. We would be happy if the Japanese would simply reduce the surpluses a little bit.

If they would just reduce their surpluses, it would mean that we could export a little bit more to them and put more of our people to work.

As the gentleman knows, I represent an agricultural area. They have erected barriers to certain agricultural products that we produce. If they would buy more, let me point out what our farmers would do. They would buy more tractors and more pickups made by those very same auto workers who are out of work today.

Mr. Chairman, I think the gentleman is proceeding with exactly the right method, and I think this is a great amendment.

Mr. SCHUMER. Mr. Chairman, I would just add a point before yielding to the gentleman from Pennsylvania, and that is that this bill requires very substantial reductions in Japan's trade barriers and an increase in imports by

Japan. This is not minor. The amendment would require that the balance of goods and services deficit with Japan be reduced.

Mr. FOGLIETTA. Mr. Chairman,

will the gentleman yield?

Mr. SCHUMER. I yield to the gen-

tleman from Pennsylvania.

Mr. FOGLIETTA. Mr. Chairman, I rise to commend the gentleman from New York (Mr. Schumer) for offering his amendment, and I rise in support of the amendment.

Mr. DICKS. Mr. Chairman, will the

gentleman yield?

Mr. SCHUMER. I yield to the gen-

tleman from Washington.

Mr. DICKS. Mr. Chairman, I want to compliment the gentleman from New York (Mr. Schumer).

I have the same reservations that he has expressed about this legislation, coming from an area that has a port. I think the more we can do to make this truly a bill that sends the Japanese a message that we want fairness in our trade relationships, the more supportive this legislation becomes, because all of us are aware that this bill is not going to be signed into law, but its value is in sending a constructive message. I think the gentleman has made a very important contribution.

Mr. SCHUMER. Mr. Chairman, I thank the gentleman from Washing-

ton (Mr. Dicks).

Mr. OTTINGER. Mr. Chairman, will

the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman for yielding.

As I understand it, the gentleman had two amendments?

Mr. SCHUMER. The gentleman is correct.

The CHAIRMAN. The time of the gentleman from New York (Mr. Schu-

MER) has expired. (On request of Mr. OTTINGER, and by unanimous consent, Mr. Schumer was

allowed to proceed for 1 additional minute.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, the gentleman's description on the floor would describe the amendment that I understand he did not offer, the one which has to do with the general balance of trade with Japan. The amendment that he did offer, as I understand it-and I would like to know if this is correct—only has to do with the balance of trade in automobiles.

Is this amendment restricted only to balance of trade in automobiles?

Mr. SCHUMER. Mr. Chairman, in answer to the gentleman, I had two amendments at the desk. The amendment that I have offered relates the trade deficit in automotive products to the overall deficit in goods and services, and would state that unless the overall deficit declines by 50 percent over 4 years, the penalties specified in the bill will take effect. Because the relationship between these two numbers is expressed as a percentage, the formula is keyed to the automobile balance of trade.

Mr. OTTINGER. Does it have an effect on overall trade?

Mr. SCHUMER. Well, anything does. H.R. 5133, without my amendment, has an effect on overall trade.

Mr. OTTINGER. No; I want to know if the formula the gentleman has advanced is tied solely to the automobile balance of trade or whether it is tied to the overall balance of trade?

Mr. SCHUMER. The formula I have adopted relates the automobile balance of trade in 1982 to the overall balance of trade in goods and services, and requires that the percentage obtained by dividing the former by the latter must increase. By fixing the numerator at the deficit in automobile trade in 1982, the bill thus requires that the balance-of-trade deficit in overall goods and services must decrease.

#### POINT OF ORDER

Mr. BROYHILL. Mr. Chairman, may I state my point of order?

The CHAIRMAN. The gentleman will state it.

Mr. BROYHILL. Mr. Chairman, make a point of order against the amendment offered by the gentleman from New York (Mr. SCHUMER) on the ground that it goes beyond the purposes of H.R. 5133 and is thus not germane.

The gentleman's amendment attempts to address trade matters that are not addressed by the bill before us. The bill that is before us seeks to address domestic car content require-

Specifically, Mr. Chairman, the gentleman's amendment would make the enforcement provisions of the bill contingent upon a determination of the balance of trade in automotive products versus the relative balance of payments of other goods and services, and when we bring in the other goods and services, I maintain that that goes far beyond the scope of the legislation.

It also places additional responsibilities on the Secretary of Transportation on trade issues which are not

within his authority.

In previous rulings, the Chairman of the Committee of the Whole House on the State of the Union has previously ruled that an amendment changing the statement of policy contained in a bill is not in order if its effect is to fundamentally change the purpose of the bill. That is found in Deschler's Precedents, chapter 28, section 4.16.

So, Mr. Chairman, I insist upon my point of order that the amendment goes beyond the purposes of H.R. 5133, that it is not germane and, therefore, is out of order.

Mr. FRENZEL. Mr. Chairman, may be heard on the point of order?

The CHAIRMAN. Does the gentleman from New York (Mr. SCHUMER) wish to respond to the point of order?

Mr. SCHUMER. Yes, Mr. Chairman, wish to respond, but I would first defer to the gentleman from North Carolina.

The CHAIRMAN. The gentleman from Minnesota (Mr. FRENZEL), then, is recognized pursuant to the point of order.

Mr. FRENZEL. Mr. Chairman, I support the point of order that has been claimed by the gentleman from North Carolina (Mr. Broyhill).

It is quite clear that the amendment has been redrawn in an attempt to fit our rule XVI, clause 7. That is the rule of germaneness. It is also quite clear, as demonstrated by the gentleman from North Carolina, that it does not succeed.

The bill that is before us, H.R. 5133, is a bill that refers only to domestic manufacture within the United States. The amendment offered by the gentleman from New York (Mr. SCHUMER) seeks to impose a regimen against exports based on a measure of automotive imports which is beyond all normal competence of the Secretary of Commerce, who is the only individual noted in H.R. 5133.

In addition, there would have to be a determination of the total scope of our balance of trade with the country of Japan. The denominator of the gentleman's faction is the total balance of trade between our country and Japan, and it goes far beyond the intent of the original bill, which deals with domestic manufacture, and gets into the whole field of trade, which is beyond the jurisdiction of the committee that is bringing us this bill.

Mr. Chairman, the point of order should be sustained. The amendment is clearly beyond the scope of the bill.

Mr. BAILEY of Pennsylvania. Mr. Chairman, may I be heard?

The CHAIRMAN. Does the gentleman from Pennsylvania (Mr. BAILEY) wish to be heard on the point of order?

Mr. BAILEY of Pennsylvania. Yes; very briefly, on the point of order, Mr. Chairman.

I think that the point made by the gentleman from Minnesota (Mr. Fren-ZEL) is correct. The jurisdiction in this bill lies in the Committee on Interstate and Foreign Commerce. We have talked about this bill in the context of trade because it has that effect.

The gentleman's amendment is a trade issue amendment, the jurisdiction of which would clearly lie in the Committee on Ways and Means, and the points raised by the two previous gentlemen are correct. Jurisdiction does not lie, and the point of order should lie.

#### □ 1540

The CHAIRMAN. Does the gentleman from New York wish to be heard

on the point of order?

Mr. SCHUMER. If I might respond to the point of order, Mr. Chairman, the amendment was drawn to relate to the narrow area of automobiles and automobile content as well as automobile trade. The bill before us deals with automobile trade.

Just to look at one point, page 4 deals with vehicles manufactured by a vehicle manufacturer in the United States and exported from the United

States. That is clause 1.

Clause 2 also deals with vehicles manufactured in the United States and exported from the United States.

Furthermore, what we were told in terms of germaneness was that what we had to deal with was automobiles and the fraction that we used deals with automobiles making it clearly germane.

The gentleman from North Carolithe gentleman from Minnesota, and the gentleman from Pennsylvania might have an argument if, this bill dealt with or this amendment specifically related to general trade. But it does not. It relates to automobile trade.

Furthermore, I might say the gentleman in objection to this have said this amendment has an effect on trade. So

does the bill. What is the debate we have been listening to for the last 2 hours? Authority for the issue of germaneness is not the effect that the amendment would have but specifically are the words of

the amendment germane to the bill. The bill deals with automobiles and automobile manufacturing. amendment deals with automobiles and automobile manufacturing, but here in this country and for export and, therefore, I would argue that the amendment is indeed germane.

The CHAIRMAN. Is there any further discussion on the point of order? Does the gentleman from Michigan

(Mr. DINGELL) wish to speak on the point of order?

Mr. DINGELL. Mr. Chairman, the germaneness rule is the purpose and the basis of the point of order.

First of all, the amendment must be germane to the bill. I would observe that there are a number of tests.

The first which has been referred to is the question of committee jurisdiction. Here we have an amendment which relates to trade, balance of trade, figures relative to trade, and a question relative to suspension of imports.

Clearly that kind of an amendment would have compelled this legislation to have been referred to the Commit-

tee on Ways and Means.

The bill was referred to the Committee on Energy and Commerce because it deals with Interstate Commerce.

The amendment must also be germane to the committee substitute. It fails again on the basis of this test.

The question then is: Does the amendment meet any of the other tests and I submit to the Chair that it does not.

The amendment does not relate as required under section 3 of title XXVIII of Deschler's, does not relate to the subject under consideration.

The subject under consideration relates to interstate commerce.

The amendment relates to international commerce. Clearly the subject matter is different and the amendment again fails.

There is yet another test and that is the fundamental purpose of the amendment test under section 5. Obviously again the fundamental purpose of the amendment must relate to the fundamental purpose of the proposi-

tion to which it is offered. The fundamental purpose of the committee substitute is to establish standards for the trade in interstate commerce of automobiles and automobile parts. Here it is clear that the amendment again relates to international trade and it requires a series of findings which are nowhere found wherein a series of calculations dependent on international trade and deficits, none of which are mentioned anywhere in the legislation.

Last of all, the amendment fails the requirements of section 6 of Deschler's wherein the test is does it accomplish the result of the basic legislation by the same or similar means. Here it is very clear that under the bill the evil to be dealt with is the difficulty with regard to jobs and it is dealt with through the interstate commerce powers of the Constitution and of the Congress.

The amendment would deal with the problem of international trade by relating automobile sales to international trade deficits of the United States, two very distinct and different matters.

For that reason, Mr. Chairman, I submit that the amendment is not germane to the bill and fails on grounds of germaneness.

Mr. SCHUMER. Mr. Chairman, may I be heard on the point of order?

The CHAIRMAN. Does the gentleman wish to respond?

Mr. SCHUMER. If I might respond to my distinguished, erudite colleague from Michigan, to say that the bill does not deal at all with, in the terms and the wording of the bill, and as I understand it, my brief years here have led me to understand that it is the words of the bill, not its effect or anything else that relates to germaneness

Let me keep reading words of the bill to show that the bill deals not just

with interstate commerce but with international commerce. Let me read page 4 where a vehicle is defined as manufactured by the vehicle manufacturer in the United States and exported from the United States by, or on behalf of, such manufacturer during that model year."

Page 4, line 6, " \* \* manufactured in the United States by any other person and purchased by the vehicle manufacturer and exported from the United States by, or on behalf of, such manufacturer during that model year, but only to the extent that the export value of such automotive products is not included in automotive products to which clause (i) applies."

Someone, by the way, must estimate the value of those products as well, as well as estimating value in my amendment.

Throughout the bill, those are just two clauses, but throughout the bill are arguments, words, discussions that relate not just to automobiles domestically within the United States but automobiles exported.

Furthermore, the bill is explicit. It sets different classifications for automobile parts that are manufactured within the United States as opposed to automobile parts that are manufactured outside of the United States.

To say that the bill only deals with what happens within the United States is incorrect. The bill deals with what happens within and without. Albeit related to automobiles, the amendment deals with what happens within and without but related to autos as well.

Therefore, I would ask the Chair for a ruling that this amendment is indeed germane. To say that it is not germane might really fly in the face of the entire debate we have been having for the last 21/2 hours and of last Friday.

The CHAIRMAN. Is there any further discussion on the point of order? Does the gentleman from Florida (Mr. Gibbons) wish to be heard on the point of order?

Mr. GIBBONS. Mr. Chairman, the Ways and Means Committee does not want any of this discussion to overcloud the fact that this bill affects revenue, that this bill is enforced through the tariff laws of the United States.

The Ways and Means Committee recognizes this bill for what it is. We should have had original jurisdiction of the bill. It should not have been only sequentially referred to us but for an accident of historic proportion.

I wanted the record to accurately reflect that because I do not want anybody to think that this bill was properly referred in the beginning.

Mr. DINGELL. Could we have regular order, with all respect to my friend? We are not talking about historical accidents.

The CHAIRMAN. The Chair is having regular order and the gentleman from Florida was speaking on the point of order.

Had the gentleman from Florida completed his statement?

Mr. GIBBONS. I am all through, Mr. Chairman.

Mr. OTTINGER. Mr. Chairman, may I speak on the point of order?

The CHAIRMAN. The gentleman from New York.

Mr. OTTINGER. The gentleman should not be allowed to do by indirection what he could not do directly. The denominator that is specified in this bill depends on the general trade percentage of deficit in goods and services with Japan generally. It has nothing to do with automobiles. That is clearly not only beyond the jurisidiction of this committee but also outside of the scope of the bill and, therefore, the point of order should be sustained.

#### □ 1550

Mr. FRENZEL. Mr. Chairman, may

The CHAIRMAN. (Mr. PANETTA). The Chair recognizes the gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Chairman, in "Jefferson's Manual and Rules of the House," by William Holmes Brown, it states, under rule XVI, that the fundamental purpose of an amendment must be germane to the fundamental purpose of the bill.

The fundamental purpose of the bill is described in the first page of the bill. And it says that the purpose is to encourage the production of automotive products in the United States.

The fundamental purpose of the Schumer amendment is quite different. Its fundamental purpose is to encourage behavior of exporters in another country.

The fundamental purpose of the bill and of the amendment of the gentleman have no relationship whatsoever.

The point of order should be sustained.

Mr. SCHUMER. Mr. Chairman, simply to respond, the fundamental purpose of my amendment is for me and for others to interpret. The fundamental purpose of this bill some might say is different. We all know that the ruling of germaneness relates to the wording of the bill and what the bill exactly relates to, what is germane and what is not germane.

I submit that this amendment is every bit as germane to this bill as so many rulings of germaneness throughout the House. Whether the sponsors of the bill—I must be doing something right, given that the sponsors and the opponents both want it ruled out of order and seem to be opposed to the legislation—agree with what would happen as a result of this bill is not an issue of

germaneness. What it is, is what the bill deals with and what the amendment deals with. I submit they deal with the same thing.

with the same thing.

The CHAIRMAN. (Mr. PANETTA).

The Chair is prepared to rule.

Under the general rule of germaneness, the test of an amendment is whether there is a relationship to the subject matter of the bill.

This bill requires a certain percentage of domestic content in the automobiles that are sold in this country.

The amendment provides that that requirement is not applicable during periods when the balance of trade in automotive products bears a certain relationship to overall trade; therefore, the amendment is confined to the subject of trade in automotive products and is not an unrelated contingency involving the overall balance of trade.

In Canon (VIII, 3029) an amendment delaying operation of a proposed enactment pending an ascertainment of a fact is germane when that fact to be ascertained relates solely to the subject matter of the bill.

In the opinion of the Chair, the amendment conditions the implementation of the domestic content requirement upon a certain test, a certain factual situation.

It relates to the general subject matter of the bill, imposes a germane condition, and, therefore, the point of order is overruled.

Mr. DINGELL. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I am sure the gentleman from New York offers the amendment in the best of good will and in an honest attempt to perfect the bill. Regrettably, there appear to be some drafting problems with the amendment offered by the gentleman from New York.

The bill attempts to deal with the subject of sales of automobiles in interstate commerce. The amendment would set up a formula upon whose action the provisions of the bill would be suspended. The amendment creates a ratio which attempts to see if there is an improvement in the balance of trade.

Now, the consequences of the ratio are very interesting. First of all, the numerator is equivalent to the deficit in United States-Japan automobile trade in production year 1982. The denominator is the deficit in goods and services in the year in question. Today the ratio would read like this: \$13 billion, which is the auto deficit in 1982 with Japan, over \$20 billion, the deficit in goods and services with Japan, which is the denominator.

Today this ratio is 65 percent.

Let us look now to the ratio in the future and see how it works. The numerator is always the 1982 auto deficit. So it is always \$13 billion. Now,

that means if the deficit of the United States with the Japanese shrinks, then the denominator shrinks and we wind up with a rather unique set of circumstances. By reason of the way that the amendment is drafted, it means that on the shrinking of deficit, it becomes likely that the import of Japanese autos and goods would be shut off.

Now, let us look and see what happens if the trade deficit in goods and services with Japan improves. Let us take the figure of a \$5 billion deficit with the Japanese in goods and services. The ratio then would be \$13 billion of \$5 billion. That is then 260 percent, which is greater than that specified in the table for any year.

As I read the amendment, it provides that a percentage exceeding that in the table means that the requirements of the bill do thus apply.

Therefore, it follows, from a reading of the amendment as drawn by my good friend, and the gentleman from New York, that the smaller the deficit in goods with the Japanese, the more likely we are to have the provisions of the legislation with regard to domestic content apply.

Therefore, this encourages the Japanese to increase their balance of trade in favor of the Japanese, which is precisely the opposite of the result that the gentleman from New York would have us believe is the purpose of the amendment.

So if you favor encouraging the Japanese to make every effort to increase their balance of trade in favor of themselves and to practice exclusionary tactics and dumping of goods in this country, then you should, at all costs, support the amendment. If you oppose that kind of direction, then, by all means, oppose the amendment.

I am sure the gentleman offered this in very good faith, and I am certain that he fully intends the consequences of the amendment. But I certainly cannot support it.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New York.

Mr. SCHUMER. The gentleman brings out a good point. And as somebody who is not inimical to his purposes, overall purposes in 5133, I accept the point as well taken. In fact, the gentleman from New York, speaking of himself, in his effort to make sure the amendment was germane, inserted a word that ought not to be inserted. The word is on line 5, "not."

I would ask unanimous consent— Mr. DINGELL. I thank the gentleman. I simply cannot yield further.

Without all respect, the time is mine, and I would advise the gentleman that I cannot yield any further.

The CHAIRMAN pro tempore. The time of the gentleman from Michigan (Mr. Dingell) has expired.

(On request of Mr. Frenzel and by unanimous consent, Mr. Dingell was allowed to proceed for 2 additional minutes.)

Mr. SCHUMER. Mr. Chairman, will the gentleman from Michigan yield?

Mr. DINGELL. I yield briefly to the gentleman to gainsay anything that I have said. Is my interpretation of the gentleman's amendment correct?

Mr. SCHUMER. I would say that I would ask unanimous consent right now to strike the word "not" from line 5, because the numerator and denominator is indeed in reverse, as the gentleman from New York has pointed out. I would ask unanimous consent—

Mr. DINGELL. With all respect to the gentleman, I object. And the reason I do so is that I would like to see the amendment so that we may then analyze it and know exactly what it is that the gentleman intends.

The CHAIRMAN pro tempore. Objection is heard.

Mr. SCHUMER. If the gentleman will yield—

Mr. DINGELL. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. DINGELL. Mr. Chairman, I yield back the balance of my time.

Mr. SCHUMER. Then I move an

The CHAIRMAN pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. Balley).

#### □ 1600

Mr. BAILEY of Pennsylvania. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, I will not take all my time because I know the gentleman from Arkansas has been waiting patiently.

I would hope that we do not support this amendment. I really do not think if the gentleman is successful in somehow modifying it, and with great deference to the intelligence and insight of the gentleman from Michigan, I applaud him on his catching this error—if the gentleman from New York does succeed in modifying the amendments, and I would encourage the opinion of the gentleman from Minnesota (Mr. Frenzel.)—if the gentleman from Minnesota (Mr. Frenzel.) would perhaps take the mike, I would be very grateful.

Mr. FRENZEL. I would be delighted.
Mr. BAILEY of Pennsylvania. The
gentleman in his analysis of this
amendment as I read it, if one looks at
the formula for the numerator and
the formula for the denominator in
light of projects on relative currency
values between the United States and
Japan, although I very much oppose
this amendment, given this formula
and looking at the gentleman's model

year computation, 1984, the automotive deficit, percentage of goods and services deficit, the relationship to the overall trade deficit, employs a figure of 74 percent, can the gentleman imagine the overall trade balance moving down—I am just curious—within the next 2 or 3 years?

Mr. FRENZEL. If the gentleman will yield, it is quite obvious that the gentleman from New York has a typo in his formula, and therefore it is a formula where the Japanese have an incentive to develop a greater surplus

and to give us a greater deficit.

But I would say further that the gentleman illustrates one of the problems with a table like this, because currency fluctuations could change the best intentioned table and knock it out of the box in a couple of days.

So if he is allowed to perfect his amendment, we will still not know what the amendment means because of currency fluctuations. The gentleman has made an excellent point.

Mr. BAILEY of Pennsylvania. I

thank the gentleman.

I hope that the Members of the House will recognize that the intentions of the amendment, the intentions of the gentleman are laudable, but as a practical matter I would hope we would understand the implications of the amendment, its weaknesses, and even should the gentleman succeed in having it changed, that we not support it

Mr. ALEXANDER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would advise the Chairman when the committee goes back into the full House that I will ask unanimous consent to include extraneous matter at this point in the Record.

Mr. Chairman, I rise in support of the domestic content bill which would impose trade restrictions on import of Japanese automobiles. This legislation has been called protectionist over and over and over again. And I shall point out that I am not a protectionist by nature. But let me be quite frank.

In endorsing this bill I am not voting for protection. I am voting for retaliation.

I do not want to mince words.

In 1980 the Japanese pursued an undeclared war on the American rice farmer, and they should be reminded of the laws of nature, that for every action there is an equal and opposite reaction.

To put that in plain English to our trading partners: If the Japanese or anyone else should strike at us, and at the economic welfare of our citizens, then we shall strike back.

Now, I regret that we have reached such a crisis point, but reach it, indeed, we have.

I would remind the Members of Congress specifically of the hostile action taken by Japan recently against the American farmer.

In 1980 the Japanese chose to dump about a million metric tons of rice on the open market, selling it to selected customers like Korea and Indonesia at prices far below the prevailing world market price.

Although this action was acquiesced in by the Carter administration, Japan thereby violated the solemn treaties that had been entered into between our Nation and theirs, including the MTN, GATT, and the subsidies code of the FAO.

An immediate and lasting consequence was a severe financial loss and a continuing hardship to the American rice farmer

The administration has confirmed to me that the deficiency payments paid by the American taxpayers as a result of this action exceed \$600 million, and the profits lost to the rice industry another \$600 million. Over a billion dollars the Japanese cost the American people because of their undeclared war on the American rice farmer.

And the disaster which afflicted farm prices as a result of this Japanese action was compounded later by another trade partner, Korea, when it agreed to purchase American rice by way of mitigation in order to offset some of this loss. But as of this date, Korea has yet to fulfill its solemn commitments to bring some measure of justice to these problems.

So it is not the Japanese alone that I seek to serve notice to tonight. It is all of our trading partners who should put us at a disadvantage—we should put them on notice, too, that we shall retailate.

Mr. Chairman, I would remind the Members of this body once again that I am a free trader by history and by instinct. I helped organize the Export Task Force, and for 4 years I have served as a member of the President's Export Council. But there comes a time when our own preferences and personal philosophies become secondary to our national interest, and to the interest of our constituents whom we serve. And I believe that the time is long overdue when Congress must say: Enough is enough. And we have the opportunity in this bill.

We should make it known that Congress, speaking for the American people, has a clear determination and a firm resolve to pursue not only the principles of free trade, but the reality of fair trade.

Mr. Speaker, I include the following documents which pertain to the lengthy negotiations we have conducted with the Japanese concerning our rice exports:

REPORT ON MEETING WITH PRIME MINISTER OHIRA.

Mr. ALEXANDER. Mr. Speaker, I had the pleasure this morning of having breakfast with and conferring with the Japanese Prime Minister Ohira. On this occasion I advised the Prime Minister that jobs in rice-

producing States, like Arkansas, are threatened by the Japanese policy of dumping rice onto the international market. I also advised the Prime Minister that representa-tives of the U.S. Government and Japanese Government have tentatively entered into an agreement which would compromise the principles of the General agreement on Tariffs and Trade, the multilateral trade negotiations and the FAO. I asked Prime Minister Ohira if he supported the principles that are enumerated in those three international agreements on free trade. I have asked for permission from the Japanese Embassy to include his remarks in the RECORD. Meanwhile I would advise my colleagues that if representatives from our Government and the Japanese Government can compromise international treaties on rice, they can also compromise those principles for steel, automobiles, electronics or any of the products that are produced in the numerous congressional district that are represented in this body.

The actions taken by the administration compromise the international trade principles presents an ominous sign for those of us who support international trade. The implications of compromising the international trade principles for one product such as rice could affect all industry that manufactures products for international trade.

During the 12 years I have served in Congress I have supported the policy of my Government to favor free trade and to oppose Government interventions that may distort the free world market. Most Americans have judged that protectionism usually rewards inefficiency at a high cost to taxpayers.

Despite the desire for free trade, representatives of the executive branches of the Governments of the United States and Japan have tentatively agreed to sanction the Japanese subsidized rice export policy. The Japanese rice policy provides a domes tic export subsidy to rice farmers of about \$1,000 per metric ton. The agreement sanctions that policy and calls for Japan to limit its exports of subsidized rice to an average of 400,000 metric tons per year over the period of 1980-83. It sets maximum annual exports to South Korea, Indonesia, and other countries.

The tentative agreement between the United States and Japan to sanction the Japanese rice-dumping policy may crack the foundation of international trade as enumerated by the GATT, MTN, and the FAO.

The Japanese rice export subsidy policy is

unfair for the following reasons:

First. Article XVI (3) of the General Agreement on Tariffs and Trade (GATT) prohibits subsidies resulting in a contracting party having "more than an equitable share of world export trade;"

Second. The United National Food and Agriculture Organization (FAO) principles for disposal of agricultural surpluses pro-vide that surpluses should be moved into consumption without harmful interference with the normal patterns of production and

international trade; and

Third. Section 301 of our Trade Act of 1974 proscribes the granting of subsidies on exports "to other foreign markets which have the effect of substantially reducing sales of other competitive U.S. products

\* \* \* in foreign markets."

In the Tokyo round of the multilateral trade negotiations, the United States and Japan—and a host of other countries—agreed to a Subsidies Code. This Code obligates its signatories to avoid export subsi-

dies on primary products that give them more than an equitable share of the world export trade in those products. Export subsidies on other items are banned altogether.

I do not believe there is much room for doubt that the Japanese rice subsidies violate the Subsidies Code. And yet our Government-in its first test of the codefailed to insist upon its legal rights. We allowed Japan to continue to dump rice into the world market, displacing our own sales and lowering our own export prices. We did not ask that the illegal subsidy program be abandoned.

Mr. Speaker, if we are willing to tolerate a subsidy on Japanese rice, I wonder what will be next. No doubt there are many agricultural commodities that our trading partners hold in surplus and which could be sold for export at cutrate price. It now seems not to be counter to the trade policies of this administration to allow other nations to dispose of surpluses in such a way.

The immediate problem is more likely to occur in the industrial sector. Our actionor our inaction-concerning subsidies on Japanese rice is a clear message to producers of steel. That message is that so long as export subsidies are large and audacious enough, U.S. efforts will be aimed at their containment, not their elimination.

Foreign steel manufacturers have been the targets of antidumping and countervailing duty petitions. They have been placed under the control of the trigger price mechanism. It has been the consistent and official policy of our Government that steel prices should reflect the legitimate cost of production with a reasonable allowance for profit. Foreign producers should not enjoy price advantages that stem not from their efficiency, but from the wealth and generosity of their Government.

Mr. Speaker, Japan has an enormous overcapacity for steel production. What would we do if the Japanese Government were to begin the massive resale of surplus steel production at a small fraction of first cost? And what would we do if export terms were better than any available commercially?

If the rice agreement is a precedent, we would treat Japan as if subsidies were a normal and proper technique in international trade. We would not flinch as American industry suffered from lowered U.S. prices and from displaced U.S. sales.

The argument is often made that export subsidies merely transfer economic hardships from the subsidizing state to the injured state. This is absolutely correct, and describes the effect of what the Japanese are doing. It is all the more reason why we must stand fast in our traditional free trade policies.

The United States cannot afford to stand idly by as we are pushed into the role of residual supplier of one commodity after another. American farmers, workers, and businesses largely supported the Codes emerging from the multilateral trade negotiations because of their conviction that a firm and fair set of rules helps all the players.

Mr. Speaker, there is no doubt in my mind that the U.S. rice industry has already been seriously injured by largescale dumping of Japanese rice. The addition to world supply has lowered prices and displaced U.S. sales. It will inevitably bring about a decline in U.S. production, with losses of revenue not only to farmers but to millers, transporters, and exporters.

Japan's own domestic policies are the cause of these injuries. It is said that Japan will hold rice stocks reaching over 7 million

metric tons later this year. By way of contrast, the entire world export trade in rice is only 11 million metric tons annually. Evidently the threat of illegal acts on a truly enormous scale has persuaded American negotiators that we must tolerate a little ille-

If this is the position of the U.S. Government, then our credibility next time a foreign surplus interferes with our trade will be low. The potential consequences of allowing the dumping of steel into third country markets-in terms of unemployment, our balance of payments, and our domestic economic health in general-require us now to avoid creating such a precedent.

Mr. Speaker, rice is grown in six States. It is among this country's most important agricultural exports. If our Government does not insist that international obligations be observed with respect to such a major com-modity, we will begin our descent leading to the total abandonment of all firm principles of international trade.

This is a matter that should be of concern to all Americans. It is not too late to reverse our course. The agreement of April 12, 1980, between the United States and Japan must be overhauled and must be made consistent with our traditional international commit-

Thank you. (C. R. Vol. 126, May 1, 1980).

Mr. Chairman, at the invitation of the former U.S. Trade Representative, Ambassador Reubin Askew, I accompanied our negotiators to Tokyo in April 1980 to discuss the problem of subsidized rice exports from Japan. Our delegation was led by the Under Secretary of Agriculture, Dale Hathaway, and included Tom Hughes and other personnel from the U.S. Department of Agriculture as well as the American Embassy in Tokyo. I take this opportunity to report to my colleagues on what happened at the rice meetings in Tokyo, and what it might portend for U.S. trade policy and the future of the United States-Japanese trading relationship.

The purpose of the meetings in Tokyo was to discuss the Japanese rice export problem-not to conclude an agreement that seriously undermines the competitive potential of the U.S. rice industry and weakens the fabric of the accords that were recently concluded in the Multilateral Trade Negotiations (MTN). Yet that is precisely what happened. The agreement concerning Japanese export subsidies concluded on April 12, 1980, while it does contain some useful aspects, ignores our vital interests and our established export trade policy and I will oppose its implementation administratively and in litigation which will be forth-

The U.S. rice industry filed a complaint against Japan's rice export subsidy policy on April 4, 1980, under section 301, of the Trade Act of 1974. In my opinion, this complaint was supported by the weight of available evidence and should have been vigorously pursued and resolved affirmatively in favor of the U.S. rice industry.

However, the matter was resolved by negotiation and settled among the parties when the Republic of Korea agreed to mitigate the damages to the American rice farmer as follows, to

THE KOREAN COMMITMENT TO PURCHASE U.S.

In April, 1980, the Rice Millers' Association (RMA) petitioned, under Section 301 of the Trade Act of 1974 as amended, for steps to be taken to halt the dumping of heavily subsidized rice by Japan to the Republic of Korea, a traditional cash market for U.S. rice. RMA contended that such sales were in violation of the Subsidies Code negotiated during the Tokyo Round of Multilateral Trade Negotiations, and that their results would be the displacement of sales of unsubsidized rice by the United States to Korea, along with a general lowering of world market prices.

As a result of RMA's submissions, the United States and Japan agreed that dumping of subsidized Japanese rice would be sharply limited, and in particular to Korea. The agreement allowed for these limits to be waived by the United States in the event

of a genuine food emergency.

In December of 1980, without clearly determining the existence of an actual food emergency or ascertaining whether United States rice was available for shipment to Korea, the previous U.S. Administration extended an exception to the U.S./Japan agreement, allowing Korea to purchase up to one million metric tons of subsidized Japanese rice. This request was acted upon in the face of a record 1980 U.S. rice crop. RMA protested vociferously, arguing that U.S. rice farmers would respond to the large Korean demand by planting an even bigger rice crop in the spring of 1981, to be marketed during the period August 1981-July 1982. RMA strongly contended that United States rice would be supplanted by Japanese rice at great cost to the U.S. rice farmer, and ultimately, to the U.S. Government. These protests went unheeded; 750,000 metric tons of subsidized rice were sold by Japan to Korea, to be shipped by August 31, 1981. The Japanese rice was not only heavily subsidized but was sold on concessional loan terms with only 2-3 percent interest rates.

Congressional expressions of concern led to February 26, 1981 hearings before the Cotton, Rice and Sugar Subcommittee of the House Committee on Agriculture. During those hearings, Administration witnesses from the Departments of State, Agriculture and the U.S. Trade Representative's Office indicated that the Government of Korea had committed itself in writing to mitigation of at least some of the injury caused to the United States by the emergency exception to import Japanese rice. The purpose of this commitment was to protect the opportunity of the United States to market its 1981 crop during the August 1981-July 1982 marketing year. The com-mitment was a pledge by the Government of Korea to buy 500,000 metric tons of Califor-

nia rice from the 1981 crop.

On January 22, 1982, the Republic of Korea issued a tender for 370,000 of those 500,000 metric tons. The tender called for bids to be taken on February 12, 1982. It provided for shipment between July and No-vember, 1982. It was therefore outside the terms of the commitment given by the Korean government, and cited as binding upon them by Administration officials during testimony at the February 26, 1981

congressional committee hearings. It has at all times been understood by the industry that shipment of this rice had to be accomplished by July 1982. In a February 2, 1981 meeting between high-level State Depart-ment officials and the Deputy Prime Minister of Korea, the terminal shipping date mentioned by the State Department was August 1982. It appears that the August 1982 date has now become the U.S. government position on when the commitment should be purchased and shipped. This is a significant concession on the part of the U.S. government.

In the wake of U.S. rice industry protests that the July-November 1982 shipment date was outside the terms of the commitment, the Korean government withdrew its tender, proposing to buy the 370,000 MT prior to August 1982 if it were permitted to store the purchased rice in California for eventual shipment to Korea as late as early 1983. This proposal too is unacceptable because it does not fulfill Korea's commitment and because of the unavailability of storage space in California. If shipment were delayed beyond August 1982 and large quantities of 1981 crop rice choke up available storage space, then California rice harvested during September/October 1982 would be displaced. If this occurs, USDA estimates that the cost to the U.S. Treasury for 1983 deficiency payments, loan forfeitures, and storage would range \$85-150 million. In addition, farmers' 1982/83 income would be adversely affected.

Already, the emergency exception granted to Korea has been a disaster for the industry and for the taxpayer. RMA estimates that, absent the exception, Korea would have purchased one million metric tons of American rice in 1981/82. These lost sales caused the market price to fall up to \$2 per hundredweight lower than it would otherwise have been, for a loss of \$370 million. Adding carrying charges, storage costs, and interest, it can be estimated that the los

the industry has already been \$400 million. And that is not all. Thirteen million hundredweights of 1981/82 California rice have been placed in the U.S. Government loan program, representing a potential net outlay of \$104 million, plus costs of carrying and storage. Deficiency payments for the 1981 crop would not have been necessary had the Korean exception not been granted. In addition, our farmers would not have been urged by USDA to reduce 1982 rice acreage by 15 percent, threatening a shortage of rice during the next years in the event of genuine food emergencies.

The Korean exception has already been a

catastrophe for the U.S. rice industry and for the U.S. Government. It is crucial that, in order to avoid even further injury, the U.S. Government now firmly insist that Korea adhere to the terms of its January, 1981 commitment: that is, to buy and ship 500,000 MT of 1981 California rice no later than August 31, 1982. In order for this to be accomplished the government of Korea must issue a tender and purchase the commitment within the next few weeks. Actual shipments must begin no later than April 1982.—The Rice Millers' Association.

The CHAIRMAN. The time of the gentleman from Arkansas (Mr. ALEX-ANDER) has expired.

(By unanimous consent, Mr. ALEXAN-DER was allowed to proceed for 2 additional minutes.)

Mr. ALEXANDER. Mr. Chairman, Japan and such other nations as offered against fair trade must understand that our patience as Americans is limited, and that, while we have a tradition for fair play, we expect our trading partners to play fair as well.

Now, there has been a lot of talk around here and across this Nation for several years. It is now time to put our votes together with our rhetoric and to say to the Japanese and to other trading partners that there is no doubt where this Congress stands.

Mr. COATS. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Indiana.

Mr. COATS. I thank the gentleman for yielding.

I wonder if the gentleman could clarify something for me. I received in my office a letter urging my opposition to this bill, and it was signed by the Rice Millers Association. How does that relate to what the gentleman was saying in terms of the Japanese stealing our rice markets?

Mr. ALEXANDER. The rice Millers are not rice farmers. I speak tonight for the rice farmers, the farmers who have paid the price for this undeclared war that has been imposed upon them by Japan.

Mr. FAZIO. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from California.

Mr. FAZIO. I thank the gentleman

for yielding.

Mr. Chairman, I would simply like to associate myself with the gentleman's remarks. We are from different parts of the country but we both share a concern for the future of the American rice industry and today that industry is in depression. It is in depression because of the dumping the Japanese Government engaged in several years ago. It has caused a glut in the world rice market that stretches out before us as far as we can see.

That glut is the result of subsidies gained by Japanese agricultural interests ever since World War II. We are used to thinking in terms of the Japanese industry as modern and productive, and yet in agriculture it is just the opposite.

American interests, particularly those on the west coast, those that deal in the Pacific basin, have been vastly limited by this protectionism of

the Japanese.

The CHAIRMAN pro tempore. (Mr. BARNARD). The time of the gentleman from Arkansas has again expired.

(At the request of Mr. Fazio and by unanimous consent, Mr. ALEXANDER was allowed to proceed for one additional minute.)

Mr. FAZIO. Mr. Chairman, if the gentleman will yield further, American interests have been vastly limited by the protectionism that the Japanese agricultural interests engage in with political Japanese life in the Diet.

We have seen a malapportioned Japanese legislative body continually protecting the interests of small farmers who vote in the interests of the majority government. As a result of that, a tremendous subsidy exists for overproduction in a number of crops; rice being one of the prime examples, but American farmers, citrus farmers and cattlemen look for new markets, look for opportunities. We have not had those opportunities.

The gentleman's point is well taken. If we are going to find the kind of free flow of trade that American agriculture needs, we are going to need more strength on behalf of American interests expressed through the State Department, our trade negotiator, and more understanding on the part of the Japanese that we have a real concern

in this country.

I appreciate the gentleman's remarks.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Wisconsin.

Mr. ROTH. Mr. Chairman, I thank the gentleman for yielding.

I think the gentleman made a very strong statement here, but I think it is one that had to be made.

I think we have to look at the facts, not only the rhetoric, as the gentleman has so well pointed out.

Twenty percent of all automobiles in this country come from Japan.

Ten to fifteen percent of all the steel in this country comes from Japan.

Twenty to thirty percent of all the TV sets come from Japan.

The CHAIRMAN pro tempore. The time of the gentleman from Arkansas

has again expired.

(At the request of Mr. ROTH, and by unanimous consent, Mr. ALEXANDER was allowed to proceed for 3 additional minutes.)

Mr. ROTH. Mr. Chairman, will the gentleman yield further?

Mr. ALEXANDER. I yield to the gentleman from Wisconsin.

Mr. ROTH. Ninety percent of all the motorcycles sold in this country come from Japan.

Fifty to sixty percent of all the radios come from Japan.

Over 30 percent of all the cameras come from Japan.

Over 50 percent of all the recording equipment comes from Japan.

Over 50 percent of all watches come from Japan.

Twenty percent of all the machine tools sold in this country come from Japan.

Now, we could go on and on with this litany; but I want to point out that nothing that is sold in Japanthat we sell in Japan—we cannot cap-ture their market, not 10 percent, no. Do you know what the highest is? It is 4½ percent in pharmaceutical products; yet Japan raised such a hue and cry when we got the 41/2 percent that we have never heard anything like it before.

Now, when Japan wanted to get into the money market here in this country, into banking, what did they do? They bought the First Bank of California. Automatically that gave them 100 branches. No American bank could do that.

When they wanted to get into high technology, Fujitsu bought Ampal and immediately they were into American technology. No American company

could do that in Japan.

When Japan wanted to get into American blood plasma, what did Green Cross do? They bought Alpha, the second largest blood collector in the United States. Now, no American company could do that in Japan.

I think it is about time that we not live in illusion and shimra, but live in the real world and see that these are

some of the facts.

Now, when I was at the North Atlantic Assembly the only thing I heard the Europeans say at the EEC was, "If we have high interest rates, it is you Americans who are at fault. If we have high unemployment, it is you Americans who are at fault."

When Mr. Block was at GATT, he told the French Minister, "You have got to do something because the American Congress will not stand for

this inequity."

Do you know what he told Mr. Block? He said, "The American Congress is not the center of the Uni-

Well, I think it is about time that we stand up and do something. We cannot keep going in the direction that we are today. We cannot keep being pushed around. That is why something like this is necessary.

I am not saying this is a good bill. I know it is not a good bill; but we have got to do something. We cannot just sit on our back haunches and take everything that is thrown at us.

The CHAIRMAN pro tempore. The time of the gentleman from Arkansas

has again expired.

(At the request of Mr. ROBERTS of Kansas, Mr. ALEXANDER was allowed to proceed for 2 additional minutes.)

Mr. ROBERTS of Kansas. Chairman, will the gentleman yield?
Mr. ALEXANDER. I yield to the

gentleman from Kansas.
Mr. ROBERTS of Kansas. Mr. Chairman, I appreciate the gentleman yielding and goodness knows I do not want to stand in the way of this rice wedding between the rice producers and the autoworkers; but I would point out that who takes the downside risk? I know the rice producer is having a very tough time, but who takes the downside risk if we send this message? Who is in the trenches?

I would point out that there are \$6.6 billion worth of exports last year to Japan and that is a stated fact. Among that, we have corngrowers who benefit from \$1.8 billion in exports.

We have soybean producers who benefit from \$1.1 billion in exports.

We have wheat producers, yes, wheat producers in my district, who share the concern of the gentleman's rice producers in his district. That is \$612 million.

If you plant this flag and send them a message in behalf of the United Auto Workers and in behalf of the rice producers, remember that you are planting a flag in the back of my producers as well. I do not think that is

I thank the gentleman for yielding. Mr. SCHUMER. Mr. Chairman, will the gentleman from Arkansas yield?

Mr. ALEXANDER. I yield to the

gentleman from New York.

Mr. SCHUMER. Mr. Chairman, I just ask for 1 minute simply to say that the gentleman from Wisconsin. the gentleman from Arkansas, and the gentleman from Kansas have all made eloquent arguments in favor of this amendment. If we want to increase our rice exports, if we want to help get our export industries back on the road, we should support this amend-ment. It will do no harm and it will a lots of good.

I appreciate their comments.

Mr. BAILEY of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. Mr. Chairman, I just want to comment to the gentleman from Wisconsin that if the Japanese prohibitions against \$19 a pound American beef alone were listed, that your grain sales would significantly and could significantly increase because the Japanese people want that protein. It takes a lot more grain to put that pound on the beef than it does to feed stomachs directly.

Mr. ROTH. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman.

Mr. ROTH. Mr. Chairman, I would be happy to respond to the gentleman.

No stockman in Dodge City, Kans., is not aware of the fact that it is \$19 a pound for beef or the fact that beef costs, what, five or six times what it does in this country. But how do you go about this to answer the problem. I will speak to that later. I just do not think this is the way.

The CHAIRMAN pro tempore. The time of the gentleman from Arkansas has again expired.

(By unanimous consent, Mr. ALEXAN-DER was allowed to proceed for 2 additional minutes.)

Mr. ENGLISH. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the gentleman from Oklahoma.

Mr. ENGLISH. Mr. Chairman, I think the real point that the gentleman from Arkansas is making is that this particular bill is not a bill to deal strictly with problems of the automobile workers. It is to deal with problems of all Americans, the farmer, the automobile worker, all other workers.

The question that we have before us is whether or not we are going to have free trade. Free trade is the issue. If other countries refuse to agree to a free trade policy, it is a question of what we are going to do about it.

I hope that the Japanese Government, the European governments, will get the message that free trade is the policy of the United States. We extend that policy and hope that all other countries will join with us; but if they refuse, the Government and the people of the United States refuse to be patsies. We are not going to take it any longer. We cannot afford it.

The question then is what steps the United States will take to retaliate.

I thank the gentleman.

Mr. ALEXANDER. Mr. Chairman, I thank the gentleman.

I support the amendment and I support the bill.

Mr. GIBBONS. Mr. Chairman, will the gentleman yield?

Mr. ALEXANDER. I yield to the

gentleman from Florida.

Mr. GIBBONS. Mr. Chairman, first of all, I would like to commend the gentleman in the well for his leader-

gentleman in the well for his leadership in the trade area and exports. He has done an excellent job.

I would hope, though, that the debate we have heard here on this subject would carry over to other things we do here in the Congress. I am not talking about any point that the gentleman in the well made.

We are faced with a mountain of butter, milk, and cheese, that we either have got to dump it in the ocean or sell it to the Russians. There is nothing else to do with it; so we are probably going to dump it on the world market and when we do, people in legislatures all around the world are going to be jumping up and down saying, "The Americans have destroyed the butter and cheese and milk market."

We are going to have done the same thing that the gentleman in the well complains about here. His point is well taken. We must watch this.

taken. We must watch this.

The CHAIRMAN pro tempore. The time of the gentleman from Arkansas has again expired.

(By unanimous consent, Mr. Alexanper was allowed to proceed for an additional 30 seconds.)

Mr. ALEXANDER. Mr. Chairman, I would conclude by responding to the remarks of the gentleman from Florida by saying that, of course we cannot dump our products on the world

market in violation of the solemn treaties we have enacted with our trading partners. The Japanese have violated those treaties, however, and they have violated those treaties by taking the hide out of the American rice farmer. I represent that rice farmer and I have had enough from the Japanese and I say: Retaliate.

#### □ 1620

AMENDMENT OFFERED BY MR. FOGLIETTA TO THE AMENDMENT OFFERED BY MR. SCHUMER

Mr. FOGLIETTA. Mr. Chairman, I offer an amendment to the amendment.

Mr. DINGELL. Mr. Chairman, I reserve a point of order.

The Clerk read as follows:

Amendment offered by Mr. FOGLIETTA to the amendment offered by Mr. SCHUMER: On line 5, strike out "not".

The CHAIRMAN pro tempore. Does the gentleman insist on his point of order?

Mr. DINGELL. No, I do not, Mr. Chairman.

The CHAIRMAN pro tempore. The gentleman from Pennsylvania (Mr. Foglietta) is recognized for 5 minutes in support of his amendment.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield?

Mr. FOGLIETTA. I yield to the gentleman from New York.

Mr. SCHUMER. I thank the gentle-

man for yielding.

Mr. Chairman, as was stated by the gentleman from Minnesota, this amendment simply corrects a typo in the amendment. The word "not" was incorrectly inserted and the ratio would have changed around. This amendment to my amendment gets at its intention and in the interest of saving time, I know that the gentleman from Michigan and the gentleman from Minnesota are far better at the parliamentary procedures than am I, but quite simply, I will just reintroduce the amendment again without the word "not" if this amendment is voted down and we will save plenty of time by simply letting the amendment, as intended, be debated.

I have very formidable opponents. I think they can debate the issue well on the merits.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield to me?

Mr. FOGLIETTA. I yield to the gentleman from Minnesota.

Mr. FRENZEL. I thank the gentleman for yielding.

Mr. Chairman, I think the gentleman should be allowed to perfect his amendment.

I must say the gentleman is doing very well. Although he says he is being outmaneuvered from a parliamentary standpoint, I notice he has won each skirmish so far, and congratulate him for his skillful work.

Mr. SCHUMER. Mr. Chairman, if the gentleman will yield further to

me, I thank the gentleman from Minnesota. His is a compliment I respect.

Mr. ALBOSTA. Mr. Chairman, will the gentleman yield?

Mr. FOGLIETTA. I yield to the gentleman from Michigan.

Mr. ALBOSTA. I thank the gentleman for yielding.

Mr. Chairman, I have gone over this amendment quite closely and I am quite familiar with the Japanese procedure of importing products from the United States or any other country.

Their procedure is that they have a domestic price set on the product there. For instance, a bushel of wheat that is bought here in the United States for \$5.50 delivered over to Japan would sell for \$9.40 roughly.

So we have not gained anything. The Japanese are buying wheat in this country below the cost of production to the American farmer. The American farmer is actually subsidizing the Japanese Government simply through the kinds of policies that domestic imports must go through in Japan.

Now, if that is the case, and it is, at \$5.50 to \$9.40, that whole spread is going into the general fund of the Japanese Government. The reason that we would have problems with this amendment is simply that when, and I hope pretty soon, the cost of wheat gets to a level where at least the American farmers break even, that we have taken care of that increase in goods and services to meet the qualifications of the gentleman's particular amendment.

So I do not see that this amendment is going to accomplish the type of goal that the gentleman thinks it will.

Soybeans is another product. I do not know exactly what the Japanese have, I would have to get those figures, but it is much, much higher. It is a set figure for Japanese soybeans grown in that country by Japanese farmers and all soybeans imported in there are going to have to be sold for processing at that particular time.

Mr. FOGLIETTA. I yield to the gentleman from New York (Mr. SCHU-MER).

Mr. SCHUMER. I thank the gentleman for yielding.

Mr. Chairman, the gentleman from Michigan, as well as some of the other gentlemen who are opposing this amendment, is exactly making my point.

My point is that if we want to use this bill as a lever to open up Japanese markets to our wheat and our soybeans and our rice and our computers and our airplanes and our electronics and our telecommunications products and our services, then the only thing to do is support this amendment and then perfect H.R. 5133.

What this amendment does is make the bill say what many of the sponsors say the bill is saying. Mr. ALBOSTA. Mr. Chairman, will the gentleman yield to me?

Mr. FOGLIETTA. I yield to the gentleman from Michigan.

Mr. ALBOSTA. I thank the gentleman for yielding.

Mr. Chairman, the main problem is that the Japanese have had this system in effect for a long time. They have never taken into consideration changing that. They want a strong agriculture in their country. I do not blame them for that. I do not think because they have a strong agricultural lobby that they are going to change their position.

So what is going to happen is that we are going to sit here for another period of time. The price of wheat has got to go up. The price of soybeans in this country has to go up. It is going to make up for that difference here.

Nothing, absolutely nothing, is going to change. The Japanese will have outsmarted us again.

Mr. SCHUMER. Mr. Chairman, will the gentleman yield further to me?

Mr. FOGLIETTA. I yield to the gentleman from New York.

Mr. SCHUMER. I thank the gentle-

man for yielding.

Mr. Chairman, let me make a point that I left out in my opening remarks, and I wish the gentleman from Michigan who had made this point would pay attention.

I agree with the gentleman. Not U.S. diplomats, not U.S. policy, not GATT, not anything else we have tried has been able or has forced the Japanese to open up their markets to us the way we have opened our markets to them.

Do you know what this amendment does? Guess who it makes the lobbyists in Japan to open up the Japanese markets?

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania (Mr. Foglietta) has expired.

(On the request of Mr. Schumer and by unanimous consent, Mr. Foglietta was allowed to proceed for 2 additional minutes.)

Mr. SCHUMER. Mr. Chairman, will the gentleman yield further to me?

Mr. FOGLIETTA. I yield to the gentleman from New York.

Mr. SCHUMER. I thank the gentleman for yielding.

Mr. Chairman, not Mr. Brock, not Mr. Schultz; do you know who it makes the lobbyists to open up our market to the goods you want to see sold to Japan? Datsun, Toyota, Honda, Subaru, and all the Japanese auto companies, because this bill says to them:

If you do not get your own Japanese markets opened up to American products, then American markets are closed to you.

It is this amendment that will finally open up Japan's markets to us; not H.R. 5133 alone.

Mr. NEAL. Mr. Chairman, will the gentleman yield to me?

Mr. FOGLIETTA. I yield to the gentleman from North Carolina.

Mr. NEAL. I thank the gentleman for yielding.

Mr. Chairman, as I listened to this debate, it seems to me the argument of those in favor of the bill has been over and over again that they want the Japanese markets open. It seems to me the gentleman has provided an amendment that would provide a potential for a lever that would do just that, and I would like to hear, if I could, from one of the proponents of the bill why they could possibly oppose this amendment, as amended?

Why would this not accomplish the goal? It does not necessarily accomplish the goal of requiring that automobiles be manufactured here, but I have not understood that to be the primary purpose of the bill anyway. The primary purpose of the bill is to open Japanese markets, if I am cor-

rect.
Mr. OTTINGER. Mr. Chairman, will

the gentleman yield to me?
Mr. FOGLIETTA. I yield to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

Mr. Chairman, the reason we oppose it, and I will elaborate on this more, is: First, it does nothing for auto workers or automobiles; 90 percent of the deficit in trade between the United States

and Japan is in automobiles.

Second, this makes it a Japan-only bill. There are many other manufacturers that will be discriminated against from other countries if Japan were let out from under this domestic content requirement. Japan would be let out and the provisions would still apply to all other countries.

The third thing is that it does nothing at all to restrain U.S. companies. It alleviates, if you can understand it, the entire restraint on the U.S. industry which increasingly has been building parts all over the world, not just in Japan.

I would like to say I agree with my colleague, the gentleman from New York, Mr. Solarz, that this bill is not a vendetta against Japan.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania (Mr. FOGLIETTA) has again expired.

(On request of Mr. OTTINGER and by unanimous consent, Mr. Foglietta was allowed to proceed for 2 additional minutes)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield further to me?

Mr. FOGLIETTA. I yield further to the gentleman from New York.

Mr. OTTINGER. I thank the gentleman for yielding.

This is not a vendetta against Japan. It is saying to all the countries in the world that have discriminated against us with respect to automobiles that they are going to have to start to give some fairness.

The last thing that bothers me about this is that Japan would have to do nothing if the economics of the world trade simply change and the U.S. dollar drops because our interest rate drops substantially relative to what happens in Japan. Without Japan doing a bloody thing, Japan would be excused from this bill.

It seems to me that is wrong. That is why I oppose the amendment.

Mr. NEAL. If the gentleman will yield further, I do not think that you would find a fluctuation in currency such that Japan would benefit in that fashion from a change in our currency.

#### □ 1630

What this amendment would do, if I understand it correctly, is it would help open Japanese markets to our products, which is what I have heard everyone that has argued in favor of this bill say they wanted to accomplish. Is that correct? Where am I wrong? Where am I hearing this wrong?

Mr. OTTINGER. The gentleman is right. That is one of our objectives, but one of our objectives is to put some 360,000 auto workers and those in related industries back to work.

Mr. NEAL. If those markets are open and we can sell those automobiles there, if we could sell the agricultural products, why could we not put some of those people to work manufacturing tractors and other devices in demand in world trade?

Mr. OTTINGER. It would have some effect. It has the concomitant effect, which I think is very damaging, of discriminating against other countries and discriminating against U.S. manufacturers in favor of Japan if, in fact, Japan qualifies under the amendment. Therefore, I think it is defective.

Mr. SCHUMER. Mr. Chairman, if the gentleman will yield further, the gentleman from New York's point is another argument in favor of this amendment.

The CHAIRMAN pro tempore. The time of the gentleman from Pennsylvania has expired.

Mr. SCHUMER. Mr. Chairman, I ask unanimous consent that the gentleman be permitted to proceed for 1 additional minute.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from New York?

Mr. FRENZEL. Mr. Chairman, reserving the right to object, we have got pending an amendment to which I think there is no objection. I wonder if we could dispose of that. It would be nice to get that over with, then we can discuss the amendment.

Mr. Chairman, I withdraw my reservation of objection.

there objection to the request of the gentleman from New York?

Mr. DINGELL. Mr. Chairman, I would like to be recognized on the

The CHAIRMAN pro tempore. On the perfecting amendment?

Mr. DINGELL. Yes, Mr. Chairman. The CHAIRMAN pro tempore. The gentleman from Pennsylvania is recognized for an additional 2 minutes.

Mr. DINGELL. Mr. Chairman, I want to be recognized on my own time. Mr. FOGLIETTA. Mr. Chairman, I ask unanimous consent to proceed for

an additional 2 minutes.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. OTTINGER. Mr. Chairman, I object.

The CHAIRMAN pro tempore. Objection is heard.

Mr. DINGELL, Mr. Chairman, I ask to be recognized in opposition to the amendment.

Mr. Chairman, I do not want my comments to be taken as being in any way hostile to the distinguished gentleman from Pennsylvania, who is a very valuable and able Member, or the gentleman from New York, who has my greatest respect, but we are now placed in the rather awkward position of seeking to perfect an amendment which has some problems. I have taken the time to try and analyze the amendment as it first was offered, and second as it is amended by the amendment offered by the gentleman from Pennsylvania.

First, let us take the amendment as it is amended by the amendment offered by the gentleman from Pennsylvania. The bill applies to autos which would be imported from every country in the world. The amendment, as amended by the gentleman from Pennsylvania, would apply only to Japan in terms of affording an escape clause. In other words, the Japanese could get out from under the requirements of the bill by meeting the test of the amendment, but that cannot happen with regard to the Germans, the British, the Italians, the French, or any of the other major auto-producing nations of the world. This would almost certainly trigger an attack on this country for violation of GATT and could very possibly trigger a broad wave of trade sanctions legitimately imposed on automobiles, agricultural products, and everything else exported by the United States, because we would then be discriminating against every other country in the world, for which they would legitimately and properly complain.

Now, with regard to the structure of the amendment, the bill applies only to each manufacturer, on a manufac-turer-by-manufacturer basis, and the manufacturer must act during the

The CHAIRMAN pro tempore. Is model year to assure that he meets a prescribed content level. The enforcement takes place, however, after the year is over. The penalty is a reduction of sales in interstate commerce under the formula which is prescribed in the

> The amendment gives, or seeks to give, some kind of a defense or a change in the enforcement requirements with regard to the contents permitted. It allows the domestic content requirement to, perhaps, be suspended. This, however, would not be determined until the model year is over, and once a somewhat lengthy period of proceedings has occurred. It is, therefore, impossible for the Japanese manufacturers to ascertain during the year that they are trying to meet a particular level of content. What the level of content is that they must comply with.

> That imposes appalling and impossible burdens on the Japanese and other auto manufacturers, including the automobile manufacturers from any country but Japan which cannot escape from the requirements of the

legislation.

There are further questions with regard to the amendment which have to be addressed at this time; that is, it is unclear who makes the decision or who determines whether, when or how the exemption which purports to be granted in the amendment is made available to the Japanese. This will surround the enforcement of the legislation with, I think, massive and remunerative litigation for the legal profession. One can be assured that it will afford great doubt as to the automobile manufacturers who will be affected, and very little assurance of protection to the automobile manufacturers of any country, or indeed to the automobile workers of this Nation.

Now, I believe that the gentleman from New York and the gentleman from Pennsylvania seek in extraordinary good faith to offer a good amendment, and it may very well be that they should be afforded permission to withdraw the amendment. I think that we find ourselves in the awkward position of being compelled piecemeal and hurly-burly to perfect an amendment which has a number of defects which come to light on the most casual inspection, and I believe that the amendment should therefore be rejected.

Mr. FRENZEL. Mr. Chairman, I move to strike the requisite number of words, and I rise to speak in favor of the gentleman's amendment.

Mr. Chairman, I do not want to use up unnecessary time. The gentleman from New York (Mr. SCHUMER) is simply seeking to perfect an amendment on which he made a typographical error.

It seems to me that it is wholly consistent with the traditions of this House and common courtesy that we

adopt the gentleman's amendment, and then discuss the effect of the amendment as perfected.

I yield back the balance of my time. Mr. LEVITAS. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. FOGLIETTA. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from Pennsylvania, obviously, if he seeks to have me yield to him.

Mr. FOGLIETTA. Mr. Chairman, I thank the gentleman.

Mr. Chairman, I ask unanimous consent that my amendment to the amendment be agreed to.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

Mr. LEVITAS. Mr. Chairman, re-serving the right to object, this is a parliamentary inquiry.

The CHAIRMAN pro tempore. The

gentleman will state it.

Mr. LEVITAS. Will the adoption of the gentleman's amendment by unanimous consent preclude my being recognized to speak in favor of his amendment?

The CHAIRMAN pro tempore. No, the gentleman does have his time.

Mr. LEVITAS. Mr. Chairman, withdraw my reservation of objection.

The CHAIRMAN pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The amendment to the amendment was agreed to.

#### □ 1640

#### PARLIAMENTARY INQUIRY

Mr. DINGELL. Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. DINGELL. Mr. Chairman, this refers to the amendment which was offered by the gentleman from Pennsylvania (Mr. Foglietta); we are not adopting by unanimous consent the main amendment, are we?

The CHAIRMAN. The gentleman is correct. The amendment offered by the gentleman from Pennsylvania (Mr. FOGLIETTA) was to the amendment offered by the gentleman from New York (Mr. SCHUMER). Only amendment has been agreed to.

The Chair recognizes the gentleman from Georgia (Mr. LEVITAS).

Mr. LEVITAS. Mr. Chairman, I think the purpose for which I sought recognition is even more amply illustrated by the events that have just occurred.

First of all, I rise in support of the amendment offered by the gentleman from Pennsylvania (Mr. Foglietta) and the amendment offered by the gentleman from New York (Mr. Schu-MER). I intend to vote in favor of the bill that is pending if we ever get around to voting for it, for the purpose of sending this well-known signal to not only our Japanese trading partners but to other trading partners around the world and Europe and elsewhere who believe in free trade but not fair trade, and for the purpose of letting it be known that the people of America and the U.S. Congress will not be played for fools forever and at the proper time we will take that action when necessary, if it becomes necessary, to insist on reciprocity, which is not a bad word, but is a good word.

But, Mr. Chairman, I would like to talk about something broader in this context. If what we are about this afternoon is to send that signal, why do we not just get on with it? What is this exercise we are engaged in in perfecting a bill that the Speaker of the House said is not going to be passed by the Congress?

The Speaker was quoted in the press today as saying that Congress will adjourn without passing domestic content legislation aimed at limiting auto imports. If we are not going to pass the bill but are just sending a signal, why do we not just dispense with all this activity? It has as much relevance to what Congress is doing as a high school debating society. We are kidding ourselves, we are wasting time and the taxpayers' money, and we are neglecting the things we ought to be doing.

Let us send a signal. I am ready to vote on the bill. But we are not serious in thinking we are perfecting a piece of legislation this afternoon. We are making a charade out of the legislative process.

Let us be serious about it. If what we want to do is send a signal, let us vote on the bill, send a signal, and let us do that by an overwhelming majority. We can let the people in France and Germany and Japan know that we are not going to take it next year and we are not going to stand for it.

Mr. HERTEL. Mr. Chairman, will

the gentleman yield?
Mr. LEVITAS. I yield to the gentleman from Michigan.

Mr. HERTEL. Mr. Chairman, I agree with the gentleman. Let us not lose the importance of these amendments. I would like to vote on the bill up or down right now without all of these amendments, for many of the reasons the gentleman stated.

We are trying to send a message, and many of the speakers have said that. But as to this particular amendment, we have seen a fatal flaw in it in the first instance, and since then we have heard the sponsors' questions and arguments against the amendment. The chairman of the Committee on Energy and Commerce has raised questions and arguments against the amendment, and yet we are going in the op-

posite direction all the sponsors, over 200 cosponsors, have been seeking.

Mr. Chairman, I would wonder, because of what the gentleman said before yielding to me, whether we might withdraw this amendment after this time in this session and proceed with the bill and move as quickly as we can.

Mr. LEVITAS. Mr. Chairman, let me reclaim my time.

I want to put the question very seriously to the gentleman from New York or the gentleman from Michigan or any other Member who supports this bill and, I assume, will vote for it. And I intend to vote for it for the reasons I have stated.

Do the gentlemen really believe this bill is going to pass both Houses of Congress and be signed into law? And if they do not believe that, why do we not get on with the vote on final passage and send the message in overwhelming numbers to our trading partners?

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from New York.

Mr. OTTINGER Mr. Chairman, I would be delighted to vote out this bill now by an overwhelming majority. I think the bill has a chance of passage because of the Senate rules, but I think if only the House passes it, it will have a significant effect.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. Levitas) has expired.

Mr. LEVITAS. Mr. Chairman, I ask unanimous consent that I may be permitted to proceed for 2 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia.

Mr. OTTINGER. Mr. Chairman, reserving the right to object, I will not object, but I would just like to take this time to advise the gentleman that we have spent almost 2 hours on this amendment. There are other amendments Members wish to offer, and therefore, at the conclusion of the gentleman's time, I will see if we can get unanimous consent on this amendment.

Mr. Chairman, I withdraw my reservation of objection.

The CHAIRMAN. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The CHAIRMAN. The gentleman from Georgia (Mr. Levitas) is recognized for 2 additional minutes.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. LEVITAS. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I say that if all that happens, if this House passes this bill

and does so by a substantial majority, I think it will have a real effect on Japan.

When Canada just recently took very tough actions with respect to Japanese imports of automobiles into its country, Japan, which refused to sign an agreement, suddenly signed an agreement, and I think this is the kind of action that we could expect.

Mr. LEVITAS. Mr. Chairman, let me reclaim my time.

Mr. Chairman, I agree with the gentleman, and that is the reason and indeed the only reason I intend to vote for this bill, and I think a significant majority of this House is going to do the same thing for the same purpose, and it will send that message. Then I think we will either see response by our trading partners or the next Congress is going to deal much more comprehensively with the question.

But I say, let us not make a charade out of the business of this House.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield on that point?

Mr. LEVITAS. I am happy to yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, the gentleman may think it is a charade, but I guarantee that every lobbyist for Datsun, for Honda, and Toyota is watching every word that we say and reading every item of this bill to insure that what we are saying is in fact a piece of foreign policy or whatever

Mr. LEVITAS. Mr. Chairman, let me reclaim my time.

I do not disagree with what the gentleman says, but the one thing that is going to be read, and most clearly, is the vote on final passage, and this rhetoric and these debating society tactics are not accomplishing anything. We are not perfecting a piece of legislation that is going to be enacted into law.

Mr. GLICKMAN. Mr. Chairman, will the gentleman yield once more?

Mr. LEVITAS. I yield to the gentleman from Kansas.

Mr. GLICKMAN. Mr. Chairman, I am just going to say that the amendment offered by the gentleman from New York (Mr. Schumer) does change this bill from a trade protectionist bill in some respects to a leverage in reciprocity bill, and there is a purpose in doing that.

Mr. LEVITAS. Mr. Chairman, I urge my colleagues to support the amendment offered by the gentleman from New York (Mr. Schumer), and then let us get on to the passage of the bill.

Mr. Chairman, I yield back the balance of my time.

Mr. OTTINGER. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto end at 5 o'clock.

to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was agreed to will be recognized for 45 seconds each.

The Chair recognizes the gentleman

from Indiana (Mr. Coats).

Mr. COATS. Mr. Chairman, the gentleman from New York (Mr. SCHUMER) has offered an intriguing amendment because what it says is that if we are truly interested in sending a message to Japan, then let us amend this bill so that a true message is sent. It causes those proponents of the bill to have to take a stand as to whether or not they are truly interested in having Japan reduce and remove it's trade barriers or whether they are merely interested in raising trade barriers to protect our domestic automobile industry, a situation that most agree ultimately will cost us jobs, even in the auto industry.

So I think each Member, before deciding whether or not to vote for this amendment, should ask himself or herself, what is it that we are trying to do today? Are we truly trying to send a signal? Are we truly trying to get Japan to lower its trade barriers, or are we simply trying to raise protectionist barriers that will harm our

entire economy?

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin

(Mr. ASPIN).

Mr. ASPIN. Mr. Chairman, I think the problem with the amendment offered by the gentleman from New York (Mr. Schumer) is essentially that he is trying to make it into a reciprocity bill when the purpose of the legislation in my mind was not essentially to be a reciprocity bill.

The problem is that it does not deal with the major problem in American manufacturing of automobiles and that is that American manufacturers foreign-sourcing, engines being made in Mexico, parts being made in Brazil.

The problem with the whole industry is that what we need is an industrial policy in this country and an industrial policy needs a trade policy as a very, very important component.

This amendment would make this bill into a reciprocity bill and that is not what we should be dealing with here.

The CHAIRMAN. The Chair recognizes the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Chairman, I think what we have done is finally gotten the issue of outsourcing on the table. As far as the United Auto Workers are concerned I think that is important. I think that is why this amendment ought to be considered, to probably the great consternation of the original

The CHAIRMAN. Is there objection sponsors of the bill. But I think it is important we focus on this.

> I yield the balance of my time to my friend from Minnesota (Mr. FRENZEL).

The CHAIRMAN. The Chair recognizes the gentleman from Kansas (Mr. GLICKMAN).

(Mr. GLICKMAN asked and was given permission to revise and extend his remarks.)

Mr. GLICKMAN. Mr. Chairman, I beg to disagree with my colleague from Wisconsin (Mr. ASPIN). I have been lobbied on this bill by many people on the basis that it is a reciprocity bill. That is, if we in fact pass this bill it will encourage other nations throughout the world to engage in much better trade relationships with

This is a trade bill and while I am not sure how I am going to vote on final passage this amendment makes it clear that we are expecting Japan to improve their trade balance to the United States or else they will not be met by the negative aspects of this

Thus I would urge an affirmative vote on the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Colorado (Mr. Brown).

Mr. BROWN of Colorado. Mr. Chairman, I rise in support of the amendment. It seems to me it provides an opportunity to encourage the proper kind of fair trade behavior on the part of the Japanese that can benefit both nations, not only in the sphere of trade but with regard to the rest of their relations.

I yield the balance of my time to the gentleman from Minnesota (Mr. Fren-

(By unanimous consent, Mr. Wolfe yielded his time to Mr. DINGELL.)

(By unanimous consent, Ms. Fer-RARO yielded her time to the gentleman from Michigan, Mr. Ford.)

The CHAIRMAN. The Chair recognizes the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Chairman, I rise in support of this amendment. I think as the gentleman from Kansas said a while ago that what we are trying to do is to promote reciprocity.

We also have to keep in mind that when we are talking about jobs, those of who do not have a direct interest in the automobile industry do have people in our districts whose jobs depend upon these imports, and most of those dealers are dealers of American automobiles. When you take imports away from those dealerships people are going to lose their jobs and this is the one thing we do not want to happen.

If we really want reciprocity, if we really want Japan to toe the line, this amendment is the way to go.

The CHAIRMAN. The Chair recognizes the gentleman from Louisiana (Mr. ROEMER).

Mr. ROEMER. I thank the Chairman and rise in support of the amendment by my good friend from New York.

As has been pointed out, this is an imperfect amendment but to an imperfect bill. It does not put clothes on the naked. It does not feed the hungry. But it takes this bill and makes it a reciprocity bill and sends a clear message, one that is worth sending.

In all of the haste of the debate we have forgotten to thank-and I would like to correct the omission—the integrity and the hard work of our colleague from New York for taking an imperfect bill and expanding its benefits from the benefit of a few to the collective benefit of us all. I thank the gentleman.

The CHAIRMAN. The Chair recognizes the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Chairman, it is instructive to me that none of the supporters of the amendment offered by the gentleman from New York (Mr. SCHUMER) have answered the criticism of the gentleman from Michigan, the distinguished chairman of the Energy and Commerce Committee, Mr. DIN-GELL, when he pointed out that manufacturers would be totally unable to plan from one moment to the next as to what that Japanese manufacturer, for example, was going to be confronted with in regard to standards, rules, American law as it applies to establishing a plant and content in automobiles in this country.

You cannot plan under the Schumer amendment. It is totally impossible and that is just one of the reasons why we should oppose the amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. FORD).

Mr. FORD of Michigan. The really sad part about this is that the gentleman from New York offers it in good faith. Frankly, I am no more sure that it will not, because I am unable to understand his explanation either on the floor or indirectly of how it will work, unless you can visualize a trade window that opens one year, closes the next, opens the next year and closes the next.

With an industry like the automobile industry, if you know even the most rudimentary things about its economics, this is insane.

The second thing it does that really has everybody focusing on the hole instead of the donut is that it singles out Japan and it applies only to trade with Japan.

That is not the problem in my Congressional district.

The problem in my congressional district is jobs that used to be in that district with General Motors, Ford, and Chrysler that are now in Mexico and Brazil and similar countries chasing cheap labor. Those jobs are what we would like to bring home.

So you create the mistaken impression that we in Michigan are out to ruin the Japanese at all costs. What we are interested in is jobs in the United States.

This is the most discriminatory approach we have seen. If we had in the original legislation proposed to aim this at Japan you would have heard the tremors throughout this country.

The amendment is dangerous and mischievous and must be defeated.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Chairman, I rise in opposition to the amendment. If we want to send a message to the Japanese I have suggested earlier we ought to use Western Union.

The trouble with this amendment is that it is highly discriminatory and applies to only one country. The French, for example, have very high export subsidies on many agricultural products and we are, of course, in competition with them, too.

Many other countries have closed markets, but this amendment ignores them. It takes us into a targeted reciprocity against a single country which cannot be justified in any way.

Unfortunately the amendment would require a \$4 billion decrease in the deficit of trade between the United States and Japan by 1984 and \$10 billion by 1987. That in unachievable.

If all Japanese markets were to be opened tomorrow there is no way that we could reduce the balance of trade deficit with Japan in that time. In the meantime you are going to force down the yen because of this redirection and you are never going to get any advantage. There will be no threat, no persuasion to Japan because Japan cannot make the achievement that you have asked them to make to be relieved of their duties.

The amendment should be defeated. The CHAIRMAN. The Chair recognizes the gentleman from Michigan (Mr. Dingell).

Mr. DINGELL. Mr. Chairman, I am sure that the offerers of the amendment as amended offer it in the best of good faith. They are good men and I respect them.

But if you want to send a message to Japan and the rest of the world you are going to send the wrong message. First of all, the only country that can get out from under the domestic content bill is the Japanese under this amendment. That is an enormously discriminatory proposal and would evoke immediate responses against the United States under GATT by every single one of our trading partners.

Second of all, it is unfair to our domestic producers because it says that regardless of our trade deficit they are still tied to this particular high United States content requirement while the Japanese can go back to low Japanese content and can thus achieve further advantages.

The next thing is it discriminates against our other trading partners, the British, the French, the Germans, the Dutch, the Italians, and all of the others who send us automobiles and automotive products because it affords them no relief whatsoever.

It is an extremely well meant but poorly thought out amendment, unworkable and dangerous, that will hurt American industry and outrage our trading partners.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Schumer).

#### □ 1700

Mr. SCHUMER. Mr. Chairman, again, I respect my colleagues on the other side, and I also have a great deal of sympathy and heartfelt grief for the tens of thousands of auto workers who are out of work. Unfortunately, the domestic content bill will not put them back to work. What will put them back to work is a reciprocity measure. The bill will be perfected if this amendment passes. It creates reciprocity. Every one of you from districts dependent on exports needs this amendment. The country as a whole needs this amendment. It does not discriminate. It is not unworkable. It is keyed to the structure of the bill. It is a good amendment. It will send the message to Japan that we want sent.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. OTTINGER) to conclude debate.

Mr. OTTINGER. Mr. Chairman, this amendment not only changes the character of the bill, it will do nothing for the 300,000 auto workers out of work or the 600,000 people in related industries who are out of work.

In response to what the gentleman from Texas (Mr. Kazen) said, those people's unemployment affects every area of our country and they are the leaders of the tremendous depression we have been having.

The purpose of this legislation is to see that we get some equity back and are able to rehire some of those autoworkers, put some of the rubberworkers, the glassworkers, the textileworkers back to work.

The amendment is discriminatory against Japan. It would work great mischief. It does nothing with respect to the U.S. automobile companies, and I urge its defeat.

• Mr. HARKIN. Mr. Chairman, I rise in support of the Schumer amendment. I feel that the amendment offered by the gentleman from New York, Mr. Schumer, is very logical.

Japan has been following a one-way street philosophy. They want our markets to be open but they erect artificial barriers to protect their markets from our products.

In agriculture especially, Japan has long maintained very stringent regulations which effectively block American farm products from being sold in Japan. Let us just take one agricultural product: beef exports. Quite frankly, Japan regulates beef imports through a quota system designed to protect their domestic producers. Moreover, the Japanese have developed a preference for grain-fed beef which is the key to expanding this market. For example, Japan's per capita beef consumption has risen steadily from 8 pounds in 1975 to 11 pounds in 1980.

There has ben one interesting development in this area which indicates the Japanese desire for this grain-fed beef, and that is the carry-on beef packs. These are purchased by Japanese business travelers and tourists in duty-free stores outside of mainland Japan. These carry-on packs cost the Japanese traveler about \$4 to \$5 per pound of beef, while retail beef prices in Japan have reached \$15 to \$20. The U.S. Meat Export Federation estimates that some 189 metric tons of U.S. beefsteak entered Japan in carry-on packs during 1980.

In addition to their restrictions on beef, the Japanese are also restricting the import of American pork and pork products. Japan controls the import of pork through a stablization price program. Furthermore, because of the Japanese concern for protecting its own domestic pork industry, it is not legal to promote U.S. pork in Japan. In other words, the U.S. Meat Export Federation Office in Tokyo cannot promote the consumption of U.S. pork but must promote the consumption of all pork.

Now think about this, what if we had regulations like that governing our imports. Toyota could not advertise Toyota cars; Datsun could not advertise their Datsun cars. They would simply have to advertise that cars are good—that you should buy a car. Perhaps they could say you should buy a small car or a car that gets so many miles to a gallon. But if we had that kind of a law in the United States that is the only way Toyota or Datsun could advertise.

To sum up my statement just in this regard, I would say that we have to take some actions in this country to assure that U.S. export products, such as beef and pork exported to Japan, will be given the same free-market treatment that their products receive here in the United States.

I believe the Schumer amendment would have that effect. Under the Schumer amendment, we are saying that if Japan reduces its barriers to our producers, thus reducing our trade in balance, then this domestic content bill would not apply. In this way, the Schumer amendment really promotes reciprocity.

Some have said the Schumer amendment is not perfect. Perhaps this is so, but I do not think the entire bill is perfect. What we are trying to do is to send a message to Japan. I believe the message ought to be one of reciprocity. The message ought to be one of saying to the Japanese that they must take down some of their trade barriers.

I believe that is the best way to go. I will state, however, that even if the Schumer amendment does not pass. I do intend to vote for the bill because I believe a message must be sent. I believe in free trade as much as anyone on the floor, but one cannot keep preaching free trade and let other countries take advantage of us. Again, that is why I believe the Schumer amendment is the best way to proceed.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. SCHUMER), as amended.

The question was taken; and the Chairman announced that the noes appeared to have it.

#### RECORDED VOTE

Mr. SCHUMER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote taken by electronic device, and there were-ayes 88, noes 310, not voting 35, as follows:

#### □ 1720

Messrs. PHILIP M. CRANE, WAL-GREN, LELAND, and FIELDS changed their votes from "aye" to "no."

Mr. BEDELL and Mrs. SMITH of Nebraska changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. OTTINGER. Mr. Chairman, I move to strike the last word.

I take this time to advise the Members what our intent is. The minority and ourselves have an agreement. There are two amendments from the minority. We are going to seek to limit time on those two amendments, after which we will seek to terminate the bill at a reasonable hour. We hope we can terminate all business on the bill before 7 o'clock.

Mr. FRENZEL. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Chairman, we have two amendments on this side, one from the gentleman from Indiana (Mr. COATS) and one from the gentlewoman from New Jersey (Mrs. Fen-WICK). I have one or two which I think can be dispatched rather quickly.

We on this side will agree to a limitation of time on those amendments only and the managers of the bill have graciously decided not to call for an overall limitation of time.

Now, there will be other volunteers who will have amendments. We will try to take them as quickly as possible, but we will appreciate the cooperation of each of the Members in letting some of these amendments get adequate debate without filibuster.

I think we should be able to finish by 7:30 perhaps, if we do not have an extraordinary number of orators.

I thank the gentleman for yielding. Mr. BROYHILL. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. I am glad to yield to my friend, the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, there are a number of amendments, of course, that have been printed in the RECORD to be offered by a number of Members. I have no intention of offering any amendments at this time, but I would hope that the gentleman from Indiana would be permitted to offer

his amendment. He has been waiting all day. The gentlelady from New Jersey also has an amendment she wishes to offer.

There are other amendments, but perhaps the other amendments may

not even be offered.

Mr. OTTINGER. It is my understanding that our arrangement is that we are not going to seek to cut anybody off, but we are going to try to limit debate on individual amendments.

Mr. BROYHILL. That is fine with

me.

Mr. OTTINGER. We will, hopefully, have restraint on the part of all our colleagues with respect to speaking on these amendments so that we can conclude the debate as early as possible.
Mr. ROUSSELOT. Mr. Chairman,

will the gentleman yield?

Mr. OTTINGER. I am glad to yield to the gentleman from California.

Mr. ROUSSELOT. Mr. Chairman, I appreciate my colleague yielding.

My understanding is that there are roughly 30 amendments at the desk. Is it the gentleman's intention at some point soon to try to bring to a conclusion all debate on all these amendments at one time?

Mr. BROYHILL. Mr. Chairman, would the gentleman yield for me to

answer that?

Mr. OTTINGER. I am glad to yield to the gentleman from North Carolina.

Mr. BROYHILL. Mr. Chairman, if I can respond to the gentleman from California, it is our understanding that the vast majority of those amend-ments may not be offered. They may be at the desk, but they may not be offered. There are only two or three

amendments that may be offered.

Mr. ROUSSELOT. Well, I appreciate my colleague's enlightened state-

I was still trying to get a statement from the managers of this operation.

Does the gentleman intend to limit debate at 7 o'clock regardless, is that

the intention?

Mr. OTTINGER. We do not intend to do so and the minority has indicated that if we do not do that, then they have only two or three amendments left to offer. We can limit time on those amendments and they will not offer the amendments that are printed in the RECORD, so we will not have to stay up all night.

Mr. ROUSSELOT. Mr. Chairman, I thank the gentleman for his wonder-

ful position.

AMENDMENT OFFERED BY MR. COATS

Mr. COATS. Mr. Chairman, I offer an amendment.

Mr. OTTINGER. Mr. Chairman, I reserve a point of order on the amend-

The Clerk read as follows:

Amendment offered by Mr. Coars: Page 15, after line 2, insert the following new section:

SEC. 8. SECRETARY OF AGRICULTURE REPORTS.

Within one year after the date of enactment of this Act, the Secretary of Agriculture shall undertake an investigation, and submit to Congress a written report regarding the impacts of this Act upon the exportations of agricultural commodities from the United States.

Renumber the succeeding sections accord-

Mr. COATS. Mr. Chairman, this amendment would require the Secretary of Agriculture within 1 year of the date of enactment of this act to undertake an investigation of its impact upon the exportation of farm commodities in the United States. We have heard a great deal of discussion today about the impact that this bill would have on agriculture and our agricultural exports.

In his letter to Congress dated December 8, 1982, Secretary Block warned that passage of this bill may have severe consequences for American agriculture. Secretary Block pointed out that 2 of every 5 acres of crops grown and nearly one-fourth of all farm cash receipts are from export sales. He also warned that retaliation could be expected, particularly from the European Community and Japan, which together bought \$18 billion of U.S. agricultural exports in 1981, over 42 percent of our total farm exports in that year.

Let me repeat that figure, \$18 billion of U.S. farm sales in 1981 were to Japan and the European Community.

Japan alone imported \$6.6 billion worth of U.S. agricultural exports.

The U.S. exports nearly two-thirds of its production of wheat to Japan and Japan is the largest wheat export market after the U.S.S.R. and China.

#### □ 1730

One-half of the production of soybeans and soybean products in this country goes to Japan. One-half of all

soybean products.

These adverse consequences have been recognized by the U.S. farm community. I have received, as has every Member, a mailgram listing 18 national farm organizations opposed to this bill for the reasons that I have just stated. Listen to some of their conclu-

The American Soybean Association says H.R. 5133 "would do more to destroy world trade than any action since the Smoot-Hawley Act."

Mr. DINGELL. Mr. Chairman, will

the gentleman yield?

Mr. COATS. The American Farm Bureau Federation has said this bill "would invite retaliation and American agriculture would be seriously injured."

Mr. DINGELL. Mr. Chairman, will

the gentleman yield to me?

Mr. COATS. I will be happy to yield

to the gentleman in a moment.
Mr. DINGELL. Mr. Chairman, want to tell the gentleman that I find the amendment acceptable.

Mr. COATS. I would like to finish my statement, if I could, and had promised to yield to others also.

Mr. DINGELL. Mr. Chairman, if the gentleman would just yield, I would like to say to the gentleman that I would be happy to accept the amendment.

Mr. COATS. There has been some dispute on both sides as to whether it should be accepted.

Mr. Chairman, this amendment requires that the Secretary of Agriculture conduct an investigation and submit a report to Congress on the impact of H.R. 5133 on the export of agricultural commodities. This must all be done within 1 year.

I would like to accept this amendment, but I am concerned that someone might construe it to be entirely biased toward agriculture and that the Secretary is not required to insure that the investigation and report be balanced, that it will consider the purpose of the bill, that it will examine the state of trade and other barriers to U.S. exports, including those covered by this bill and agricultural exports, and that it will be prepared with public input. With that understanding, I could accept it.

Mr. DINGELL. There is no dispute on this side.

Mr. COATS. Mr. Chairman, I appreciate my chairman's cooperation.

Jack Parson, the president of the National Corn Growers Association, warned that H.R. 5133 "would simply open the door for retaliation by countries that are valuable export markets for the U.S. agricultural commodities."

Finally, Robert Hampton, speaking for the National Council of Farmers' Cooperatives, is convinced that this bill "could lead to the critical destruction of world trade and a devastating decline in our export markets, with tremendous damage to our national interests."

Mr. Chairman allow me to list for the Members, the 10 largest States exporting farm commodities in this country. California leads the nation with \$13.9 billion of exports, followed by Iowa with over \$10 billion of exports, Texas, Illinois, Minnestoa, Nebraska, Kansas, Wisconsin, Indiana, and North Carolina, with Missouri a close eleventh. Those States combined have exports approaching \$100 billion. Members representing those States should weigh the impact of this bill on the agricultural exports of those States.

Agricultural products are an important part of our world trade. It is important that we weigh the consequences of this.

Therefore, my amendment asks the Secretary of Agriculture to report within 1 year the impact of this on export market.

gentleman yield to me?

Mr. COATS. I yield to the gentleman from Nebraska.

Mr. DAUB. I thank the gentleman for yielding.

Mr. Chairman, I want to rise in support of the gentleman's amendment. The assessment of the impact of this kind of legislation, should it pass, for agriculture is extremely important.

I commend the gentleman on his effort. His crafting of the language is

perfect. I would support it.

I rise in opposition to this well-intentioned but badly flawed proposal to address the unemployment situation in our Nation's automobile industry. Unemployment is our Nation's No. 1 problem and this Congress should devote itself to finding ways to reduce it. The way to reduce unemployment in the automobile industry as well as others is to bring down interest rates. If interest rates were lowered, Americans would have more money to buy autos and other goods and manufacturers would have more money to invest in new plants.

Unfortunately, for Congress to reduce unemployment by bringing down interest rates requires that it take a fine scalpel to Federal spending and reduce those areas where the benefit acquired is less important than the disadvantage created by the deficit spending required to finance it. This would mean that Congress would have to acknowledge to the American people that much of what it did for them was not in their long-term inter-

Instead of facing these hard truths. this Congress is spending its final days debating a proposal that is little more than a sleight of hand attempt to divert attention from the real problems facing this country by legislating false cures to the Nations's economic ailments.

For the first time I can recall I find myself rising to embrace the editorial posture of the Washington Post which has taken a very levelheaded attitude toward this legislation as have most commentators who are not seeking to

mislead a potential voter.

The Post describes this bill as "doubly bad legislation \* \* \* not only is it wrong in principle, but as a practical matter its effect will be precisely the opposite of its sponsor's intention. It will preserve fewer jobs than it de-

strovs.

The Post points out that Ambassador Brock has correctly stated that most of the new jobs that have opened up in domestic manufacturing in recent years are in the export industries. In addition to these manufacturing jobs we have a \$40 billion export market for our agricultural goods overseas that the farmers in my State depend on for markets. Were this measure to pass, we would hear a very

Mr. DAUB. Mr. Chairman, will the loud shot in a trade war that this country would certainly lose in the long run.

> We need to concentrate on our exports, not devise schemes that will result in even greater protectionism overseas than exists already. We have unfair relations with many of our trading partners and this Congress is absolutely correct in demanding that the administration argue forcefully with our partners for better treatment and should argument fail, we should consider well-reasoned efforts to deal with restrictions.

> I believe the Members would do well to heed the warning that the Reagan administration, the Washington Post, and those in between have to offer. This is a "vote for a low-growth economy. It is an attempt to shore up the less competitive industries at the expense of the most competitive. It is a vote for the kind of industrial policy that gives priority to the status quo with continuing high unemployment, inflation, and stagnant incomes.'

> I urge my colleagues to reject this measure.

> Mrs. MARTIN of Illinois. Mr. Chairman, will the gentleman yield to me?

> Mr. COATS. I yield to the gentlewoman from Illinois.

> Mrs. MARTIN of Illinois. I thank the gentleman for yielding.

> Mr. Chairman, certainly finding out figures I think is acceptable, and I would support that, although considering what our allies have already done to our agricultural markets, I am not sure I would agree with everything the gentleman said in terms of the domestic content bill.

> Mr. COATS. Mr. Chairman, in reply to the gentlewoman from Illinois, whom I greatly respect, this does not imply there are not situations which we need to correct.

The CHAIRMAN. The time of the gentleman from Indiana (Mr. Coats) has expired.

(By unanimous consent, Mr. Coats was allowed to proceed for 1 additional

Mr. COATS. Mr. Chairman, I requested the additional time in order to respond to the gentlewoman from Illinois (Mrs. Martin).

I agree with her that there are situations we need to correct with some of our trading partners, but we should not ignore the fact that \$18 billion of agricultural commodities, were exported last year to the European Community and to Japan, and that Japan alone imports \$6.6 billion worth of agricultural products in the United States.

We must bear that in mind. We do have some areas we need to improve. I believe we can improve on those areas, but let us not deny these markets which we have already established.

The CHAIRMAN, Does the gentleman from New York (Mr. OTTINGER) continue to reserve his point of order?

Mr. OTTINGER. Mr. Chairman, I withdraw the reservation of the point of order and say that we will accept the amendment.

Mr. BROYHILL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I would call this amendment the amendment that would call for the assessment that the damage that this bill would do to a most important segment of our economy, and that is the agricultural econo-

I happen to have several letters. Here is one letter from the president of the National Grange in which he says, and I quote:

We are increasingly concerned that growing use of trade-distorting practices such as export subsidies, the threat of major new import-restricting measures which could seriously disrupt world trade systems, H.R. 5133, the automotive content bill, repsystems. resents such a threat.

He continues with this sentence:

We urge you to take all possible steps in opposition to H.R. 5133.

The president of the National Grange, among other farm leaders, is very concerned about the impact that this bill is going to have upon the farm economy.

The gentleman from Indiana offers an amendment to instruct the Secretary of Agriculture to assess, to investigate and to submit to Congress written reports regarding those impacts and the ravages that this bill will have on the farm economy.

Mr. ROBERTS of Kansas. Mr. Chairman, will the gentleman yield?

Mr. BROYHILL. I yield at this time to the gentleman from Kansas.

Mr. ROBERTS of Kansas. I thank the gentleman for yielding.

Mr. Chairman, I can assure the chairman that I do not intend to take the full time, but I think there is a possible allegory here.

One of the things that we have heard in regard to this bill is that not only are we interested in jobs but we want to send a message to Japan in regard to our farm exports. The wheat producer in France now gets \$5.20 for his product. The wheat producer in Dodge City, Kans., gets \$3.50, approximately. The French actually subsidize their wheat producers approximately \$1.90.

So to send a message to France, I think it is obvious that enough is enough; we should do like my colleague from Arkansas said, the "Retaliation Two-Step." We should send them a message. We should have a domestic content bill here saying that all wine consumed in the United States must come from a domestic producer. That makes just as much sense as this entire bill.

The real purpose of this bill is not to encourage farm exports, not to send a message to Japan, but it is to wave the United Auto Workers banner in terms of symbolism. The gentleman from

Georgia is correct.

But suppose it would pass; Who would have this downside risk? Who would pay the price? I submit to you it is the people on the receiving end of that \$6.6 billion that we had in exports to Japan just this last year. If we let this critter out of the pen, we are going to have miles of fence to put up.

The damage assessment is terribly difficult to appreciate. That is why I support the amendment offered by my colleague from Indiana and urge the

defeat of this bill.

Like the fat person said when he crawled through the barbed wire fence: "One more point and I am

through."

We heard an interview referred to by my colleague from Michigan about the Premier of Japan, Mr. Yasuhiro Nakasone, in the Wall Street Journal. I urge my colleagues to read this inter-

view in full.

What would my colleagues do if, in fact, our country were dependent for food supplies to the tune of 47 percent. Well, we are trying to work this out on a step-by-step reasonable basis. We can send them a message. First, we can be a reliable supplier and end the practice of using the farmer with embargoes. We can do it with dairy products if we want. We can do it with the new payment-in-kind program that is envisioned by the Secretary of Agriculture and apply it to export payment in kind. We can do it with expansion of blended export credit, but this is the wrong way to accomplish our goals.

I submit to my colleagues that this is a bad bill. I submit to my colleagues that the amendment offered by my colleagues, the gentleman from Indiana, is a good amendment, to a bad

bill.

Mr. BEREUTER. Mr. Chairman, I rise in support of the amendment offered by my distinguished colleague from Indiana (Mr. Coats) which would require the Secretary of Agriculture to undertake an investigation and submit a report to Congress on the impact of this act upon the exportation of agricultural commodities from the United States. It makes some improvement in an otherwise terrible bill.

The importance of our export markets to American agriculture cannot

be understated.

America began exporting agricultural products more than 350 years ago with the sale of tobacco to the English. According to statistics gathered by the U.S. Department of Agriculture's Foreign Agriculture Service, our Nation now exports more agricultural products than any other country in the world. More than 150 nations receive U.S. agricultural products. We

account for four-fifths of the sovbeans moving in world markets, two-thirds of the feed grains traded, two-fifths of the wheat and cotton and one-fifth of the tobacco and rice sold between nations. Earnings for our sales abroad of agricultural products have added more than \$10 billion to our trade surplus account each year since 1974. In contrast, our nonagricultural trade balance reversed from a \$958 million surplus in 1970 to a \$50 billion deficit just 10 years later. Over the same period, the farmers and ranchers of this Nation have performed in exemplary fashion, boosting the agricultural trade surplus from \$1.3 billion in 1970 to an amazing \$23.2 billion just 10 years later.

The importance of these foreign markets to the individual farmer—as well as to the Nation as a whole—cannot be underestimated. Presently two-fifths of our cropland produces commodities for foreign sales—or approximately 138 million acres. Moreover, one-fourth of the cash receipts earned by our farmers and ranchers comes from that vital trade. Expanded markets encourage production efficiencies which inure to the farmer's own benefit as well as to the American consumer.

It seems almost unbelievable that in the 1930's, average yearly exports were only \$765 million. That figure rose steadily to \$2.416 billion in the 1940's, \$3.603 billion in the 1950's, and \$5.735 billion in the 1960's. Average yearly sales then skyrocketed to \$18.370 billion in the decade of the 1970's.

Everyone—consumers, farmers, ranchers, workers—benefits from a healthy agricultural export program. Multiple values of the export effort

can be readily cited.

Although we exported more than \$40 billion of agricultural products during fiscal year 1980, the U.S. Department of Agriculture estimated that such trade generated twice that amount of activity in the domestic economy and accounted for roughly 1 million jobs. In 1979, almost half a million people were employed on the farm and approximately 680,000 in jobs related to the assembling, processing and distribution of agricultural products to be exported. USDA statistics for 1979 tied 60,000 food processing, 300,000 trade and transportation, 120,000 manufacturing and 50,000 other jobs in the economy to our agricultural export effort.

Given the critical contribution which exports make to the farm economy, we must not act hastily in enacting this legislation without at least minimal concern about its impact upon the agricultural sector. Passage of H.R. 5133 raises the certain prospect of retaliation by foreign countries. Thus, we should have information which allows Congress to reevalu-

ate the benefits of the domestic content requirement to the United States—benefits if any. I therefore strongly urge adoption of the Coats amendment to this bill.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Indiana (Mr. Coats).

The amendment was agreed to.

Mr. GRAMM. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I had offered an amendment in committee, a so-called reciprocity amendment, that sought to give the President selective powers to waive the provisions of this bill with regard to auto imports from countries that had undertaken a reduction of quotas, tariffs, and trade barriers. This amendment failed in committee on a vote of 20 to 21.

I had sent out, with my colleague, the gentleman from New York (Mr. Lent), a "Dear Colleague" letter asking for support on that amendment, and some interest was expressed.

I felt, Mr. Chairman, that I should rise and explain why I will not be offering that amendment here tonight. The amendment does improve the bill, in my opinion, but in all honesty, the improvement is largely cosmetic.

#### □ 1740

It does not change the basic nature of this bill, nor would the adoption of that amendment change my basic opposition to the bill. My concern, after discussing it with our colleague from Florida, our colleague from Minnesota, and our colleague from North Carolina, is that by improving the bill cosmetically, but only marginally in terms of substance, the amendment might induce some of our colleagues to vote for this bill. My concern is not that the bill will become law this year. My concern is that if we cast a vote tonight as a protest or to send a signal, if we come back next year on a real at-tempt to adopt the bill, many Members will have trouble getting back across the river. I do not want to contribute to anybody voting for what I believe is surely one of the worst bills we have considered since I have been in the Congress.

I therefore am strongly opposed to this bill, and will not undertake to improve it in any way.

Mr. WAXMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I rise in opposition to H.R. 5133. I do so with some sadness, for I know many unemployed Americans believe the bill can provide jobs. The unemployment rate will soon pass 11 percent—action is needed now. But this legislation is not a cure. I could support the bill if it would create jobs, benefit consumers, or revitalize the

economy. I am convinced it will do none of these things.

The bill's supporters point to the creation or protection of 800,000 jobs. I wish this were so. But other estimates, including a CBO study, indicate the legislation would result in a net loss of perhaps 150,000 jobs. Our economic and foreign policy cannot be created in a vacuum. For every job this bill creates in the automobile industry, at least one job will be lost in another sector.

How do consumers fare under this legislation? Will this bill result in lower prices and better quality automobiles? The answer is clearly "No." We are only considering this legislation because imports have cut into the domestic manufacturer's market. This happened not because Americans like buying "Japanese," or because domestic cars have too much pollution control equipment. It happened because the American auto industry was outmarketed and because management was too slow in responding to changes in consumer demands and needs. For too long our models emphasized big engines, when consumers wanted fuel efficiency. When consumers sought quality and impressive repair records, they found them in imports and changed their buying preferences. When the Christian Science Monitor conducted a survey on why Americans were not buying American cars, one responded summarized the prevailing feeling by saying: "The American consumer, however patriotic, wants top quality for top dollar. Currently, the trust and evidence rests with the imports."

My colleagues have spoken so eloquently about the suffering millions of unemployed Americans are feeling. I share their conviction that we need to address and end this tragedy. But we cannot erase our problems by eliminating competition. We cannot solve our economic problems through isolationism or protectionism. Our society and economy is premised and works on concepts of free trade. This system of competition has brought many benefits, and is the foundation of our economic growth. The consumer benefits when competition gives him a choice. Our society benefits because competition leads to improved efficiency and quality, as well as lower prices. Protectionism denies our American consumers the benefits that a free market competition would bring. It does a disservice to the auto industry because it signals the message that they do not need to improve their product and their efficiency. The message to our unemployed workers should not be one of fear, resignation, and a rejection of our free trade system. The message should be of hope combined with a program emphasizing our strengths—strong competition and an open market. This legislation offers a

desperate solution that in turn will be no solution but an aggravation of the economic problems our Nation faces.

AMENDMENT OFFERED BY MRS. FENWICK
Mrs. FENWICK. Mr. Chairman, I
offer an amendment.

Mr. OTTINGER. Mr. Chairman, I reserve a point of order on the amendment.

The Clerk read as follows:

Amendment offered by Mrs. FENWICK: Page 14, after line 11, intert the following new section:

SEC. 7. RELATION TO TREATIES, CONVENTIONS, AND AGREEMENTS.

Notwithstanding any other provision of this Act, nothing in this Act shall be deemed to supersede the terms or conditions of any treaty, international convention, or agreement on tariffs and trade which is in existence on the date of enactment of this Act and to which the United States is a party.

Renumber the succeeding sections accordingly.

Mrs. FENWICK. Mr. Chairman, I yield to my colleague, the gentleman from Texas (Mr. Fields).

Mr. FIELDS. Mr. Chairman, I thank the gentlewoman. I rise in strong opposition to the Fair Practices in Automotive Products Act because of the negative impact it would have on the State of Texas, the Port of Houston, and the metropolitan area of Houston.

Mr. Chairman, I have listened to this debate closely and I do sympathize with those U.S. auto workers who are currently unemployed.

While everyone in this body would like to provide gainful employment for each and every one of these workers, I believe this legislation proposes a solution which is totally unacceptable.

During the debate on this legislation, the proponents of this bill have argued that it will create jobs for their constituents. I am here to tell you that this bill will not create any jobs for my constituents but will, in fact, jeopardize continued employment for thousands of Houstonians.

The Port of Houston, which is located entirely within my district, leads our Nation in foreign imports received with automobiles ranking third in terms of financial value.

However, this figure alone does not tell us either the whole or the human side of this story. It alone does not tell us that the Port of Houston provides directly or indirectly jobs for over 160,000 Texans and that it provides over \$3 billion to our State's economy.

In fact, at a time, when general cargo is down by over 20 percent at the port, auto imports have increased by over 4 percent and with that increase new jobs have been created for additional Houstonians.

In addition, the Port of Houston has recently received the results of a study commissioned in 1981 which concludes that "auto imports have the greatest economic impact on a few ton basis of

any imported commodity into the port."

In short, auto imports, provide jobs and livelihood for thousands of Americans living in Houston who are employed in the transportation, unloading distribution, advertising, and sale of these cars.

These are Americans who pay their taxes, who work hard for a living, who believe in the free enterprise system and who now face the prospect, through no fault of their own, of having their jobs eliminated in order to create other jobs for other Americans in places like Michigan, Indiana, and Ohio.

Mr. Chairman, we must not consider this legislation with a myopic view nor should we proceed without considering the consequences of our actions. According to the Congressional Budget Office, this legislation will create 38,000 jobs in the U.S. auto industry by destroying and eliminating 104,000 jobs in other sectors of our economy. How can we justify this as a bill to put people back to work when, in fact, the net effect will be a loss of 66,000 American jobs?

The price of this legislation is simply too high. The cure is worse than the disease and I urge my colleagues in the name of fairness and equity for all Americans to reject this misguided and ill-advised bill.

Finally, Mr. Chairman, I would like to send a loud and clear message to our foreign trading partners. While I may not be able to support this bill, I believe the time has come for our products going abroad to be treated in the same manner that we afford imports entering this country. I strongly believe in reciprocal trading relationships and urge our trading partners, Japan in particular, to immediately eliminate their numerous and burdensome nontariff barriers. If not, then these nations run the risk of losing the opportunity to trade in our market.

Unless these barriers are quickly eliminated, I will, in the future, find it increasingly difficult to oppose protectionist legislation.

I believe very sincerely that it is in the best interest of every nation to follow a uniform set of trade laws. However, it is not free trade and it is not fair trade if we Americans play by the rules and our foreign competitors do not.

Thank you, Mr. Chairman.

Mrs. FENWICK. Mr. Chairman, I am not going to take 5 minutes. I think the Members all know why I am speaking.

This amendment seeks to have our Nation honor its obligations, and I do not think there is a Member of this House who does not know how important that is. We are either going to proceed in this world on the basis of dog eat dog and "save me, save me," or

we are going to try to have an orderly world of law and justice under law.

Now, let me just read to the Members very briefly what we are doing here. This is why Mike Mansfield said it is the most blatant breaking of a treaty, article 3, paragraph 5, of this agreement, which says:

No contracting party shall establish or maintain legislation \* \* \* which requires, directly or indirectly, that any specified amount or proportion of any product which is the subject of the regulation must be supplied from domestic sources.

It is perfectly clear. Now, I deeply sympathize with the remarks of my colleagues. They are passionately and from the heart advocating the interests of their constituents. What could be more proper? Who else is going to do it? But, what we are faced with as a body, all of us together, 435 in this House, are the national interests and our position in the world. I do not think we can tramp around declaring war, and that is what we are doing. We heard it here this afternoon, passionately declaring war. What kind of a world are we making? Are we really going to say that anytime it pinches we will not try to go to court, so to speak, but we strike out? That is not the way a great Nation behaves.

I have been very much impressed with the speeches here today; the gentleman from Florida, as always, and the gentleman we just heard, the gentleman from California—one of the best speeches this afternoon. It is a broad view, and that is what we have got to take. We are not moving in a world where we can do little things and nobody cares what we do.

We have got to take this Congress seriously. We cannot pass bills that are just the product of emotion and passion. We have got to have a sense of responsibility toward the Constitution of the United States, toward the obligations of our country.

I hope the Members will just let me say for just a moment, that my father was born in Kentucky and brought up in Minnesota, and his father was a general in the Civil War.

#### □ 1750

I can remember what his father taught him and what he taught me—a man's word should be as good as his bond. A man's word does not need a penalty clause in order to live up to it, and neither does a nation's.

When we have a system that we could somehow negotiate a range and bring it to a conclusion, a fair and just conclusion, that is what we ought to use, not war, not force, and not the power of this enormous market, because we export as well as import, and we must begin to pay attention to what we promised to do.

Mr. Chairman, I am not going to take any more of the time of this body. I did not expect to speak so long, and I thank the Members for their kindness.

The CHAIRMAN. The Chair will inquire, does the gentleman from New York (Mr. OTTINGER) insist on his point of order?

Mr. OTTINGER. No. Mr. Chairman. I withdraw my point of order.

Mr. MOFFETT. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, first of all, I think that the gentlewoman from New Jersey (Mrs. Fenwick), as usual, offers her amendment in good faith, and yet one of the main reasons for this bill is because many of us feel that we are being unfairly treated by other countries that are violating all sorts of treaties. Those Members who support the bill are not out there looking for treaties to violate.

I guess that part of what we are saying is best summed up by a story that somebody told me about some Japanese businessmen who came to America for the first time. They had never been here before. They were very prosperous. They got off the plane at Kennedy, and they came into New York. The cab dropped them off at Times Square. Those of us who come from the Northeast and are familar with New York City know what shopping bag ladies are, and there was a shopping bag lady huddled on a cold day before a storefront, and these fellows got out of the car. They had never seen this sight before, and they tapped this woman and they asked, "could you tell us where the Sony Building is?"

She woke up and she looked up at them and said, "the Sony Building? You guys didn't have any trouble finding Pearl Harbor. Find it yourself."

Part of what we are saying is, "find it yourselves." We have got to be a little tough here.

What the amendment offered by the gentlewoman from New Jersey does is it pierces the heart of what we are trying to do with this bill. Of course, it is imperfect. But how many of us, particularly from the Northeast, dwell on free trade? I cannot speak for Iowa, where maybe our friends are right. Maybe wheat trade is top thing on people's minds in Iowa or Nebraska, where maybe they really do believe in totally free trade and leaving the current situation the way it is.

But I can tell the Members, being from the Northeast—and I am sure it is true with the gentleman from Michigan (Mr. DINGELL) and others—that we have sat in too many coffeeshops and delicatessens across the table from auto workers who are out of work and without anything to tell them what we think should be done. I am not going to be here, and so I am not saying this for myself, but those Members of Congress, Republican and Democrat, from those kinds of dis-

tricts can no longer sit in those coffeeshops and talk to guys who have been thrown out on the street without offering some alternatives. There is just no more time for that. So this is an imperfect instrument to try to speak to their plight.

I had the manufacturer of a major component that implements automobile engines in my area-he is a conservative Republican, by the waytake me aside and whisper in my ear a few months ago, "Congressman," he said, "the major automobile manufacturers in America have thrown in the towel on American workers. General Motors is shipping the manufacture of its engines to Mexico and Brazil at record rates." If we are going to throw in the towel on American workers, let us at least admit it. Let us come into the well and let us go back home and look them in the eye and say, "we are throwing in the towel on you folks. We just don't believe you can make these things anymore."

Let us not be dishonest with these people any longer. If we do not know of anything to say to them and we really believe we are in this transition to new tech-high tech industries and other new industries and these people are going to fall by the wayside, let us be honest and tell them that. I do not believe that is true. I do not believe a majority of the Members of the House on either side of the aisle believe it is true, and therefore, we must come up with some alternatives.

So, Mr. Chairman, we have an imperfect but important alternative and approach here that I know, coming from the district I have been privileged to serve for 8 years, is welcomed by the vast majority of the people there.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. MOFFETT. I yield to my friend, the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, I join with the gentleman from Connecticut (Mr. Moffett) in opposition to this amendment offered by the gentlewoman from New Jersey (Mrs. Fenwick).

There is adequate machinery that is available. There is no guide in this amendment as to how we interpret whether there is any agreement that has been violated, but if it should be interpreted that there is a violation, there is machinery in GATT for resolving that.

And I am just wondering if Japan, with all its nontrade barriers, is going to try to assert a GATT claim against us.

France froze a share of its market at 3 percent in 1978, and last year they cut that back to 2½ percent.

The CHAIRMAN. The time of the gentleman from Connecticut (Mr. MOFFETT) has expired.

(On request of Mr. OTTINGER, and by unanimous consent, Mr. MOFFETT was allowed to proceed for 2 additional minutes.)

Mr. OTTINGER. Mr. Chairman, will the gentleman yield further?

Mr. MOFFETT. I yield to the gentleman from New York.

Mr. OTTINGER. Mr. Chairman, Italy, with car sales of 900,000, does not permit more than 2,200 autos a year from Japan. Nissan, in response, now is entering into a joint venture with Alfa Romeo to produce cars in Italy. That, it seems to me, is a much more drastic provision than what we provide.

England has limited Japanese participation in its market to 10 or 11 percent. We are the only country that does not. Really, we are "Uncle Sucker."

While I sympathize 100 percent with the gentlewoman's intent, I would like to say to her that the ideal she seeks can only be reached on a reciprocal basis. We cannot have all the other major trading companies in the world putting on these drastic measures and the United States say, "Well, we are going to be Mr. Good Guy. We will watch our entire automobile industry disappear, we will watch while our jobs disappear, and we will do nothing about it."

So, Mr. Chairman, the gentleman's point is very well taken.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. OTTINGER. The gentleman from Connecticut (Mr. Moffett) has the time.

Mr. MOFFETT. I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. Mr. Chairman, I do not like to hear about my good intent. I am talking commonsense, and the prudence and common sense of the farmers of this country back me up. I am not talking just intent, although, for heavens sake, we ought to have some intent down here.

Everything we heard this afternoon in the arguments for and against this bill, particularly for this bill, have shown the weakenesses of it. Are we going to go on and on in our national life propping up one industry after another when it does not work and putting more legislation of this kind?

It is not going to be just cars. It is not going to be just cars and steel and textiles and shoes and a hundred other things.

Mr. Chairman, we are starting down a very dangerous garden path, and we ought to do what we think is right and sensible.

Mr. MOFFETT. Mr. Chairman, if I may reclaim my time, I know the gentlewoman form New Jersey is doing what she thinks is right, and what I am saying and what many of us are saying is that the current situation is not acceptable any longer unless we

are willing to say that we are throwing in the towel on factory workers who work on automobiles and automobile components.

Mr. Chairman, I think that many of us who vote for this legislation are saying we are not willing to do that. We are not willing to throw in the towel on these workers.

Mr. GIBBONS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I do not know how we keep missing the target so much. We are not even talking about reality here. The gentlewoman from New Jersey (Mrs. Fenwick) has offered a good amendment.

We should not be known as "Uncle Welsher" in the world. How can we sit here and say, when we solemnly entered into international agreements, that we are unilaterally not even going back to the conference table but are unilaterally just going to disown them?

This builds no confidence in anybody. Let us now talk about the issue here. The automobile industry is in terrible transition. I feel very sorry for the Members of Congress who represent those areas and who have a lot of unemployed workers. Certainly it is difficult to look them in the face and tell them, "you know, when your industry is restructured, it is not going to be a low-skilled, labor-intensive, highly paid industry when it gets through, because if it is, nobody is going to buy your cars unless they are forced to."

And America is going to be poorer and jobs are going to be transferred to this industry, and other competitive industries in a free America are going to suffer. That is the answer.

Since 1978 domestic consumption of automobiles has dropped by 4.5 million units, and the increase in imports has been one-tenth of that. That is all that has happened in this country. We have just priced ourselves out of the market with our American cars.

#### □ 1800

They have not been good cars. They have not been properly designed by and large and they are just too expensive and Americans just are not buying them.

Now, the interest rates are too high and there are lots of other reasons, but American Consumers are just not buying them.

The consumer can still make up his mind and he can still do what he wants to. Eventually his old wreck will wear out and he will have to buy a car but he is not going to buy near as many, so the whole industry is going to go down.

One of the most telling things in the testimony we took of some 856 pages was the testimony of the dealers who sell automobiles. They deal with the

factory and they deal with the public. They testified 12,000 strong that they oppose this bill. These were dealers that sell nothing but American-made cars and they testified that when they first heard of this bill they thought it was a bonanza. Then they got to thinking about it and looking at the bill and they began to realize that all that was going to happen was that the price of American cars was just going to go up and up and up and they would lose sales.

These are good, hardheaded main street American business people, people that know how to make a buck, who have had to really hussle through thick and through thin. These are not idealist. These are not the SAM GIBBONSES and the MILICENT FENWICKS. No. These are real, practical people.

If we have to have a solution, as the gentleman from Connecticut says, let us not get a solution that hurts us.

The great weight of testimony by all of the disinterested people in this argument is that this transfers some jobs perhaps from some other segment of the American economy to the auto industry and at great cost, \$100,000 per job. You could just give four or five of them \$20,000 or \$25,000 and say "Take off and go see the world or maybe go down to Florida or someplace else" if you are going to do that. It would be cheaper and probably help everybody.

Second, we talk about retaliation in agriculture. We hear so much about that in debate here and so much of it is not germane but let me tell you we have a surplus in capital goods sales. Let us get off agriculture for a while because I think that point is conceded. Agriculture can and will get hurt by this legislation.

In capital goods sales we have a surplus of \$36.2 billion. These are manufactured goods. These are goods that are made by the UAW and the IAM and all of the other labor unions.

Our whole deficit in autos is not that much. Do not think other nations will not retaliate against us in our capital goods area. You may say, "Oh, they cannot retaliate against food because we are the only people in the world that produce soybeans." You have a lot to learn about agriculture if you think that is so.

The CHAIRMAN. The time of the gentleman from Florida (Mr. Gibbons) has expired.

(By unanimous consent Mr. Gibbons was allowed to proceed for 1 additional minute.)

Mr. GIBBONS. I want to talk to all of the Members here. This bill is going to be voted on soon. This bill stands a real good chance of passing and a lot of people are going to vote for it because they think it does not mean anything and it will not go anywhere in the other body.

Let me tell you: the other body is holding hearings starting tomorrow on this bill. If you know how the other body works, and I know how it works, they can mark this legislation up and it can be on the President's desk by Saturday or Sunday. That is just the way it can work.

This is not a free ride. This is not a free ride for anybody in the American economy, for the agricultural people or for those people who represent industries that produce a surplus in capital goods. These are the goods that really count. These are manufactured goods.

Of the \$36 billion a year that is a surplus, we produced \$72 billion for export. We exported \$72 billion worth of capital goods last year, so we are competitive.

The CHAIRMAN. The time of the gentleman from Florida (Mr. Gibbons) has again expired.

(By unanimous consent Mr. Gibbons was allowed to proceed for 1 additional minute.)

Mr. GIBBONS. These are areas in which we are highly competitive. We are going to transfer jobs out of these competitive industries and put them over into a noncompetitive industry, an industry that has to be restructured. Everybody admits that.

While we are seeking a solution let us not hurt America. Let us not hurt American jobs. That is what this narrow, selfish legislation does. It hurts American jobs. It is going to take jobs away from Americans by the thousands in agriculture, in other manufacturing jobs, just because a few lobbyists came in and promised this bill was not going anywhere and this is just a little old message to the Japanese

It is far more serious than that. I would suggest we vote for the gentle-woman's amendment and we vote down this legislation.

Mr. BAILEY of Pennsylvania. Mr. Chairman, this debate should not include consistent references to the plight of our basic industries, in particular our automobile industry, as if their difficulties were self-inflicted. The industry is not at fault and is not the cause of our present plight. The industry did not cause the capital shortage from which they suffer. A poor, unrealistic, and outdated tax code here in the United States is the greatest reason for this problem. The industry did not cause the OPEC price increases that dramatically effected a change in consumer preferences. A lack of energy policy in our country has exacerbated this difficulty-not our workers or our industrial leaders. The industry and our workers are not responsible for blatantly anti-American and generally discriminatory industrial policies abroad. Our Government, which has exported capital and technology as perhaps a legitimate foreign policy pursuit in the past and now lacks the resolve to challenge some of these anti-free-enterprise practices—is responsible for the victimization of the American economy. Our companies and our workers are not. This legislation only seeks to make these unknown aspects of modern international life apparent.

Mr. WHITTEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I have listened to the debate on television. I was in a meeting and could not leave. I would like to straighten out two or three things here that need it badly.

In the first place, when we sell on the world market at competitive prices it is not dumping. We have a whole lot of folks that like to think so. The international organizations like for us to hold an umbrella over what we are offering in world trade so that they can sell it right under it and deliver from somewhere else.

This is an old story. It took 3 years to break this practice during Secretary Benson's time back in 1955 and 1956.

Let me explain to you. I have met with the Chancellor of the Exchequer of England, the head of the European Common Market, and others on this matter. I am not saying that I have heard all of the arguments. I have not heard all of the debate. I just want you to realize this, that the world price is the world price.

The world is crying for food. And we sell guns to 125 countries because the leaders prefer guns and military equipment. The best way you can sell something—the only way to sell something is lay it on the counter for sale. Then the folks within a country that need it will start trying to help you get it into their country.

May I say I spent 3 years working at this. I traveled around the world meeting with agricultural attachés and we finally won out, and got the Department of Agriculture to sell competitively.

To handle this we have the Commodity Credit Corporation, which is a revolving fund. That is what it is, a \$25 billion corporation.

Your committee brought this in and we have a small revolving fund because the other had fallen into disuse to where nobody realized that is what the Commodity Credit Corporation was.

Now let me repeat again: The world price is the world price and everybody knows it is.

We handle the high cost in the United States by putting a high price here. In other countries they tax their people. So when they sell they are selling because they call that the price all of the time and they are trying to call our supported price, the world price.

Then we get competitive and they yell "dumping."

It is not dumping at all. Every county in the world sells what it has and does not need for what it will bring. You cannot sell it for more than it will bring.

As a boy I worked in a country store. One example I learned still applies to international finance. Who wants to buy from a wholesaler if you do not know whether he is going to have what you need or not? What do we gain when we grudgingly tell the Russians that we will let you have just enough for 1 year?

I am just telling you now that we are being told that by the big American corporations who are also international. The biggest advantage we have over the Russians in the world, is our ability to produce food. What does the world need? Food. We have it and what do we do? We store it? The rest of the world reads where we will not even let it go out at competitive prices.

Now as I said earlier, when we considered the agricultural appropriation bill, we are going to have to go for this "payment in kind." Why? Because the American farmer is in such straits for that capital, or any money, that he needs in order to make a crop next year. He owes \$200 billion now, most of it at 15 to 20 percent interest. His debts are such that he is going to have to have any help he can get. But if you start paying in kind and keep it up you are putting all your trade out of business—chemicals, seed, supplies, farm equipment and the people behind the farming businesses.

I want you to realize that we need again to use the Commodity Credit Corporation like it was intended. We need to offer what we have in surplus and not keep it from the rest of the world. We need to make some friends again.

#### □ 1810

Mr. OTTINGER. Mr. Chairman, I ask unanimous consent that all debate on this amendment and all amendments thereto terminate at 6:15.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

Mr. WALKER. Reserving the right to object, Mr. Chairman, I was going to move to strike the last word here for a couple of minutes. It seems to me we are going to get a time limitation on that.

Mr. OTTINGER. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New York.

Mr. OTTINGER. The gentleman may have his 5 minutes. The longer we go, somebody else gets inspired to get up. We have been on this amendment for some time now. Everybody would like to get home. I will not interfere with the gentleman's 5 minutes.

Mr. WALKER. All right.

The CHAIRMAN. Does the gentleman from New York withhold on his unanimous-consent request?

Mr. OTTINGER. No. Mr. Chairman. Mr. WALKER. Mr. Chairman, reserving the right to object—

The CHAIRMAN. Does the gentleman from New York include the 5 minutes for the gentleman from Pennsylvania?

Mr. OTTINGER. Mr. Chairman, I will include in the unanimous-consent request the gentleman from Pennsylvania (Mr. Walker).

The CHAIRMAN. The Chair understands the unanimous-consent request is that time will expire at 6:20, with 5 minutes for the gentleman from Pennsylvania, the remaining 5 minutes to be divided among those standing.

Mr. OTTINGER. Mr. Chairman, I have to add the 5 minutes, 6:20.

The CHAIRMAN. If the gentleman wishes to protect the 5 minutes, that means 6:20.

Mr. OTTINGER. All right.

Mr. WALKER. Mr. Chairman, I withdraw my reservation of objection. The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

The CHAIRMAN. Members standing at the time the unanimous-consent request was granted will be recognized for 1 minute each. The gentleman from Pennsylvania (Mr. WALKER) will be recognized for 5 minutes.

The Chair recognizes the gentleman from Pennsylvania (Mr. WALKER).

Mr. Chairman, I have sat here now for a couple of days listening to the debate on this bill. I really had not intended to get into the debate. Except as I have listened it has bothered me to hear the proponents of the bill come to the well and make what I think are some very damaging statements over a period of time.

I have heard Members come here and say to their friends who are also for the bill, "We don't have to be embarrassed about voting for this bill, there is nothing embarrassing about voting for it, this is a good bill, there is no reason to be embarrassed."

I never heard that really used in terms of a bill before this.

I also have heard this bill described by its proponents as an imperfect vehicle, as all kinds of other things that say to me that they really have real questions about the content of what it is they have brought to the floor.

And then we are being asked here in the last minutes of a session to enact something which is probably a bad bill even under the best of circumstances. And now in the last few minutes we have heard it argued that the United States ought to look at even reneging on its treaty agreements in order to move forward with this legislation, because that is all that I understand the gentlewoman from New Jersey has

said in her amendment, is that we ought to live up to our treaty obligations.

It really bothers me that we would come here and we would say that with this imperfect vehicle brought to us at the last minute we are simply going to throw treaty obligations to the wind as well.

It really makes me wonder who it is that is going to vote for this bill and why they are going to vote for it.

Let me suggest a reason, a reason that I have not heard suggested up until now in this debate. Let me suggest that it is a reason that has been given to us on other bills when business related legislation has come to the floor, and that reason is pure and simple, campaign contributions, PAC contributions. Because I suggest to my colleagues that there are not going to be very many Members who vote against this bill who got big money from the UAW. And I would suggest to my colleagues an awful lot of people who are going to vote for this bill got big money from the UAW, and that the reason we are here late in the session thinking about passing this imperfect vehicle is because that big money was dumped into a campaign just a few weeks ago and that we have got ourselves one major kind of political payoff taking place on this floor.

I think that is wrong. And I think it would be particularly wrong to go ahead and adopt an amendment or not adopt an amendment that says that we ought to at least within the context of what we are doing live up to

our treaty obligations.

So I thank the gentlewoman from New Jersey for focusing some attention on a place that needed to be focussed in this bill. I hope her amendment will be adopted. I think we should think about what we are doing here, because what we are doing here looks to me to be a pretty shabby affair.

The CHAIRMAN. The Chair recognizes the gentleman from California

(Mr. DANNEMEYER).

Mr. DANNEMEYER. Mr. Chairman, I do not blame the UAW for coming to the floor with this bill. Their workers in this country earn, for wage and fringe benefits, about \$17.55 an hour. In Japan it is \$7.74. This comparison says the American automobile worker has priced himself out of the market. If they can get this law passed to protect their jobs, you have to take off your hat to them.

But speaking on behalf of consumers of this country, we would be making a

very big mistake.

Another feature. It takes about 111 hours in Japan to produce a subcompact car and 200 hours in this country. We have been outhustled by our competitors in this instance, and the answer is not legislation to protect this disparity in the law of this country,

but the answer is for the market forces of competition and increased investment to improve productivity so that we can show the people of this world that we are truly competitors.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan

(Mr. DINGELL).

Mr. DINGELL. Mr. Chairman, it is pretty well settled in the law that treaties may be dealt with by the Congress. I am not aware of what this savings clause would relate to in terms of treaties. But there are many treaties this country has. I am not able to say which are involved. I am also able to say that many of them have terms which are ambiguous.

I do not believe this amendment by the gentlelady from New Jersey is needed, primarily because it is vague and ambiguous. It is, I believe, innocous. It does not, for example, change the present provisions of GATT (article XXIII) which provides an apparatus for determining whether or not conflicts exist. Those procedures are quite useful and allow the United States to make counter challenges relative to the challenging nation's barriers to U.S. exports.

Because the amendment does not change those provisions and does not provide new authority to "gut" this bill, I normally would not object to it. But I still think it is not needed and would urge that it be rejected.

The CHAIRMAN. The Chair recognizes the gentleman from Minnesota (Mr. Frenzel).

Mr. FRENZEL. Mr. Chairman, I rise

in support of the Fenwick amendment. While some participants in this debate indicated that it was a well-intended amendment and that it was simply something that we could tuttut, it is certainly not that kind of an amendment.

The Fenwick amendment is an utterly rational amendment which points out another glaring flaw in the bill before us; that is, that the bill violates treaties and agreements and resolutions and promises that this country has made all around the world.

And those who vote against the Fenwick amendment, and vote for this bill will be guilty of violating all those

solemn promises.

This amendment is serious. I am proud of the gentlewoman from New Jersey. She will be with us only a short time in the future. I think her amendment is typical of the kind of thoughtful analysis and reasoned approach that she has brought to this House. I congratulate her on making the amendment and tell her that we will miss her.

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina (Mr. Broyhill).

Mr. BROYHILL. Mr. Chairman, I hope that the Members are back in

their offices, wherever they may be, listening to this debate. It has not been the purpose of the opponents of this legislation to carry on endless debate, but to have adequate time to point out the defects of this bill.

This is restrictive trade legislation. It will not create jobs. It will cost jobs.

The Congressional Budget Office said this bill would reduce U.S. national income and redistribute the smaller amount of income in favor of those who benefit from this restriction. I say that is not fair. The opponents of the bill agree that it will result in retaliation, will cost jobs, and it will cost jobs in other industries where the wages are much smaller than in the auto industries.

The proponents of this bill talk about reciprocity. But there is not one provision in this bill that refers to reciprocity. It is a slam-the-door-on-imports bill. This is not the answer to a problem within our automobile industry which we all recognize to be extremely serious. We should commit ourselves here and now to the careful consideration of reasonable alternatives.

The CHAIRMAN. The Chair recognizes the gentleman from New York (Mr. Ottinger) for 1 minute to conclude debate.

#### □ 1820

Mr. OTTINGER. Mr. Chairman, it is quite clear that the other countries of the world that are major automotive manufacturers have much more stringent restrictions than we do. There have been no GATT assertions against them.

We believe this meets the treaty obligations of the various treaties, particularly the GATT treaty. Thirty-one countries already have automobile content restrictions without any treaty violations being asserted against them.

I urge defeat of the amendment.

Mrs. FENWICK. Mr. Chairman, prompted by some statements that were made on the House floor during debate, I would like to offer clarification: The intention of my amendment is that the United States not violate our international agreements, treaties, and conventions. As I read during my statement on the House floor, it is clear that the provisions of this bill do in fact violate article III, paragraph 5 of the General Agreement on Tariffs and Trade, and it is my intention in offering this amendment, to preclude and prohibit any such violation.

None of the remarks made during debate referred to any other interpretation of my amendment and none should later be suggested. Not only does this bill violate our Friendship, Commerce, and Navigation Treaty with Japan which states in article XVI, paragraph 1:

Products of either Party shall be accorded, within the territories of the other Party,

national treatment and most favored-nation treatment in all matters affecting internal taxation, sale, dsitribution, storage and use.

It is my intention to preclude and prohibit this or any similar violation of this or any other treaty of friendship, commerce, and navigation, and any other treaty, international convention, or agreement on tariffs and trade to which the United States is a party on the date of enactment of this act.

To the extent that any section(s) of this act violate(s) any such agreement, treaty, or convention, it is rendered inoperable by my amendment.

The CHAIRMAN. All time has expired.

The question is on the amendment offered by the gentlewoman from New Jersey (Mrs. Fenwick).

The question was taken; and on a division (demanded by Mr. Frenzel) there were—ayes 17, noes 10.

#### RECORDED VOTE

Mr. OTTINGER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 195, noes 194, not voting 44, as follows:

□ 1830

Mrs. KENNELLY and Mrs. BOUQUARD changed their votes from "aye" to "no."

Mr. EMERSON and Mr. PICKLE changed their votes from "no" to

"aye."

So the amendment was agreed to.
The result of the vote was announced as above recorded.

#### □ 1840

Mr. GLICKMAN. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I yield to the gentle-

man from Texas (Mr. Frost).

Mr. FROST. Mr. Chairman, I am a strong supporter of this legislation but have waited until now to speak on behalf of it. I have listened as attentively as possible to the debate and I will have to say that I am disappointed to hear the bill's opponents so freely invoke free trade arguments against it.

Mr. Chairman, if there is anything we have learned here today it is that free trade does not now govern the commercial relations between nations. To the extent that free trade influences those relations, it certainly does not extend to the Japan-to-America automobile trade.

Our domestic automobile market is being saturated with cars built in Japan and subsidized by the Japanese Government. This is not free trade and the bill should not stand or fall on the basis of a concept that no longer exists in the international economy.

What this bill does represent is reciprocity, and I submit that on that basis, it asks no more of Japan than Japan and our European allies now ask of U.S. manufacturers seeking to penetrate their markets.

Those of my colleagues with defense contractors in their districts should be aware of the domestic content clauses that are built into the contracts between our NATO partners and U.S. contractors. For example, the F-16 is built by General Dynamics in Fort Worth, Tex. It is sold to the Netherlands, Denmark, Norway, and Belgium under a coproduction arrangement. These countries will not buy the F-16 unless some of its components are produced domestically and the plane is assembled domestically.

And since this discussion centers around our relations with Japan, my colleagues should be aware of a 1980 contract between McDonnell Douglas and Japan for over 120 F-15's. Approximately 55 percent of the component manufacturing is done by Mitsubishi in Japan and all final assembly will be done in Japan.

Mr. Chairman, I predict that any American company that tries to compete for the next-generation plane sale to Japan will have to offer a local production arrangement or it will not gain entry into Japan's market.

The reason why Japan insists on these clauses as the price for doing business is very simple and should be familiar to everyone following this debate. Japan wants to protect its job market. Japan wants to develop a domestic aerospace industry and it does not want another nation saturating its market with foreign products.

Mr. Chairman, Japan is demanding nothing more than any self-respecting industrial power would demand to protect its manufacturing base. The only difference is that Japan is not the target of a predatory trading policy by one of its partners. The United States is such a target, and we must not shrink from taking the steps needed to restore our trade balance.

I strongly urge my colleagues to vote in favor of this very important piece of

legislation.
Mr. SEIBERLING, Mr. Chairman.

will the gentleman yield?
Mr. GLICKMAN. I yield to the gen-

tleman from Ohio.

#### PERSONAL EXPLANATION

Mr. SEIBERLING. Mr. Chairman, I wish to have the Record show that while I got here too late to vote, had I voted on the amendment just agreed to, I would have voted "no."

Mr. GLICKMAN. Mr. Chairman, this is a very difficult proposition for a lot of us, realizing that our districts are dependent upon exports, and at the same time realizing the enormous level of unemployment not only in the auto industry, but in so many different industries. I have gone from pro to con, and I think maybe I will vote for it because it will send a signal.

I was listening on the floor, and I heard the words of our chief deputy whip, Mr. Alexander, and he used the word "retaliation." That really hit me. I decided that if in fact this bill is retalitation, it is tantamount to nothing more than the start of the largest trade war we have ever faced in America. While we are being victimized by inconsistent policies with respect to the Japanese and the European Economic Community, in my judgment over the long term this bill will hurt America, not help it.

My district is the largest producer of airplanes in the United States. I come from the State of Kansas, which is the largest wheat producer in the United States. My district lives on exports. We survive on exports, and we will die as a result of a lack of exports. I cannot help but feel that this bill is nothing more than a symbol that will try to aim at retaliating against Japan or retaliating against the European Economic Community. It is going to hurt my machinists at Boeing. It is going to hurt my farmers and cost them jobs in the long term.

I think that is bad for America. We face the highest unemployment since the Depression. I feel for the auto workers. I feel for people all over

America who are unemployed, but I would argue that if we have to be protectionist, let us do so in a positive way. Let us fund the Eximbank the way the Europeans do it, and provide affirmative assistance to our industries. But, let us not put up trade barriers couched in an indirect bill that came out of the Commerce Committee that is really nothing more than a major trade bill aimed at retaliation, knocking the heck out of the Japanese and the West Germans and everybody else.

Everybody acknowledges that this bill is not a very good bill. I keep hearing the word "symbolism" and "retaliation." I think to myself, I have got to look at each one of these bills as if they are going to pass. This bill could pass. It could go to the Senate in this time of high unemployment, and it could go to the President. Who knows what the President might do?

I would just say one thing: This world is very close to a worldwide depression in terms of the international banking community, in terms of all the Third World nations in the world. in terms of the solvency of the United States of America itself. If we start a major war, albeit for good reasons, to put our auto workers back to work. I am telling the Members that we will all live to regret it; the workers in Wichita, the workers in Detroit, the workers throughout America. So, I would urge the Members to think about this: No matter what kind of a signal it sends, over the long term it has got to be a very bad signal for America.

I urge defeat of the bill.

Mr. FRENZEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the gentleman from North Carolina and myself have about 36 unrequited amendments at the desk. We have determined that we believe the House would like to come to a vote on this matter, and it is our intention not to offer those amendments.

I yield to the distinguished gentleman from North Carolina (Mr. Broy-HILL).

Mr. BROYHILL. Mr. Chairman, I thank the gentleman for yielding. I do hope that the Members have been listening to this debate. It is not our purpose as opponents of this bill to carry on endless debate. All we wanted to do was to have some time to point out the defects of this bill; its unworkability, and its unfairness.

We are urging the Members to vote no on this bill and not to set these precedents that are contained therein.

Mr. FRENZEL. Mr. Chairman, we have tried to show through this debate that this bill will cause a loss of jobs, a 150,000 net loss, according to CBO; that we will lose exports, that we will lose world competitiveness,

that this bill will cause an extended recession; that it will penalize U.S. manufacturing jobs; that it will penalize high tech growth industries and jobs; that it will penalize stevedoring jobs; that it will penalize agricultural producers; that it will penalize consumers by driving up the cost of cars from \$330 to \$1,500, depending on whose analysis one likes.

We have tried to show that it violates treaties and pledges and resolutions. We have tried to indicate to the Members that it is a mean-spirited protectionist bill when what is really needed is some sort of reciprocity power in the hands of the executive to negotiate for all of us.

Mr. Chairman, we do not want to prolong this debate unnecessarily, and we hope that we are nearing a final decision.

Of all the amendments I have placed in the RECORD, two should have been offered except for the shortage of time.

The first is the Michel amendment, placed in the Record by the distingished minority leader from Illinois. It would give the Secretary authority to waive the act if the act would impede achievement of the purposes of the Humphrey-Hawkins Act. Obviously this bill would impede the achievement of both the chief purposes of Humphrey-Hawkins, employment and inflation. The CBO says it will cause a net loss of jobs and a huge increase in the price of cars.

The only people who would vote against this Michel amendment would be those who do not believe in Humphrey-Hawkins objectives or who believe every economic analysis we have received is wrong. It is another amendment which shows the terrible flaws in H.R. 5133.

My own reciprocity bill, H.R. 6773, also points out the fact that H.R. 5133 is purely protectionist. Under our rules, I could not offer it as a substitute. However, it is an honest attempt to provide the Executive with tools so we can negotiate more effectively for reasonable market access abroad.

It stands in stark contrast to the mean-spirited protectionist domestic content content bill. Should domestic content ever come before this body again, which now appears likely, I will find a way to offer all my amendments and to secure record notes on items. But, for now, my Christmas present to my colleagues will be an early adjourment tonight.

#### □ 1850

Mr. GIBBONS. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I will be very brief.
The House has recently adopted the
Fenwick amendment. The Members
who argue against the Fenwick
amendment say that we are not violating any agreement or any treaty.

We are probably going to have a separate vote on this amendment, and a lot of arms are going to be twisted trying to get Members to change their position. I think it is important to concentrate on the Fenwick amendment right now.

One of the responsibilities of being American is that we have got to lead. We cannot lead unless we are willing to set an example for decency and honesty. If we make an agreement, we ought to keep it or we ought to go back to the bargaining table and say that we would like to abrogate it. But certainly in this Congress on a piece of legislation that is all fouled up, we should not willy-nilly act in this way.

I really do not know offhand of any damage that the Fenwick amendment does to this bill, but certainly we should not mark ourselves as people who do not keep a bargain that we fairly entered into. I do not know that we would be violating anything with the Fenwick amendment, but just to turn down the Fenwick amendment once it had been adopted, I think, would put a stigma not only on this legislation but on this Congress and certainly on our country.

So, Mr. Chairman, I ask the Members, please, to stick with the Fenwick amendment.

Mr. HERTEL. Mr. Chairman, I move to strike the last word.

Mr. Chairman, the 3½-year crisis in the U.S. auto industry has taken an awesome toll. Unless we adopt a policy that deals with realities of auto trade and investment, the deterioration of the auto industry, which impacts so heavily on allied industries, will continue at an intolerable rate—even if U.S. auto sales revive.

The United States can no longer afford to have a passive trade and industrial policy toward the industry when all other major auto-producing nations are promoting their industries, pushing their exports, and preventing increases in imports. The Fair Practices in Automotive Products Act, H.R. 5133 is designed to defend our industry in light of the practices prevailing around the world.

This bill provides a more than adequate phase-in period for foreign companies to make the necessary investments here to maintain their market shares. As a result, U.S. consumers would continue to have the range of product offerings they desire. And, because U.S. companies would continue to face stiff competition, there should be little increase in U.S. car prices.

Because of the urgency of the situation and the limited time in the Legislative Calendar, action on H.R. 5133 becomes more vital to an improved economic climate sustained by increased employment in the auto and related industries.

There are numerous myths which surround the causes for the deteriorat-

ing state of the auto industry in this country. There has been much criticism of the American labor force in this debate; accusations of high costs and low productivity. I think that it is vitally important that this body listen to some figures from the 1982 Japan and international comparison study by the Keizai Koho Center, at the Japan Institute for Social and Economic Affairs.

The annual earning and tax benefit position of a typical worker in a major company, calculated according to the average annual exchange rate of the International Monetary Fund, shows the gross annual earnings of a typical worker in the United States to be \$14,949. The typical Japanese worker's annual gross earnings are \$16,960. Of the 11 major United States trading partners, the typical American worker ranks eighth.

Furthermore, in comparative levels of labor productivity, the typical American worker outproduces every other worker in major countries.

I think we do our workers a grave disservice by underestimating the skills and ability of our people.

Our auto policy is out of step with the rest of the world. Other major auto-producing nations are actively promoting exports, preventing increases in imports, and financially assisting their home-based producers. To continue our passive trade and industrial nonpolicy in such a hostile global environment means that, even when auto sales recover, U.S. production will fall behind the pace.

H.R. 5133 would prevent further catastrophic erosion of auto production and employment in the world's largest auto market. It would curb the alarming rise in foreign sourcing by U.S. companies while inducing foreign-based companies to invest here. Because of the magnitude of the industry and the ripple effect on suppliers, the bill would create or preserve over a million additional jobs in the U.S. economy by 1990.

Those who oppose the domestic content bill raise red flags of possible trade wars. I must respectfully disagree with these Members of Congress because there we are already in a trade war and our Nation has suffered more serious losses than any sneak attack in any conventional war. It is burying our heads in the sand to believe that worldwide economic upturn will improve the economic conditions in the auto industry. To do nothing about the tragic condition of one of our fundamental industries, is to raise a white flag of surrender. We soon will be economically conquered and our people will be paying their tax dollars in tribute for the defense of foreign markets which are now exploiting them.

Mr. SEIBERLING. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I am one of the cosponsors of this bill, but some of the things that have been said during this debate have troubled me a great deal.

I do not want to see retaliation against the Japanese. I think most of us have great respect and admiration for the Japanese. They are one of our most important allies. They are people who have risen from the ashes of war through their own talents and hard work. We need to learn some things from the Japanese.

That is not really the issue here. The issue here is whether the American people and the Congress are going to take the steps necessary to see that we survive as a major industrial power. It is inconceivable to me that we can be a major industrial or military power if we allow our automobile industry to go down the drain.

What are we going to do in the event of a war? Have our tanks made in Japan and bring them across the ocean? Have our steel made in Brazil?

Those are some very basic questions which this Government and this Congress are not answering. There are some other basic questions.

Do we want to become a colonialized nation exporting agricultural products and raw materials and timber, or do we intend to remain in the forefront of the industrial world, including hightechnology industry?

There are some very serious issues here. I detect on both sides of this debate by our colleagues some genuine concerns that we all share, and I think the argument is mainly over means rather than ends.

However, I am sorry to say that an administration that does not want the Government to have any role at all and wants the marketplace to do everything cannot possibly confront this problem, in competition with a country like Japan, where the government and industry work closely together in an effort to see that their nation meets its economic targets and priorities. We do not have any comparable mechanism for developing national economic targets, and, of course, no targets either.

Mr. TRAXLER. Mr. Chairman, will the gentleman yield?

Mr. SEIBERLING. I am happy to yield to the gentleman from Michigan.

Mr. TRAXLER. On that point, Mr. Chairman, let me say that currently in Japan the issue of automobiles is behind them. They know that Korea and Taiwan and other South Asian countries can outproduce them at cheaper costs then they can. They are now in the process of the next wave, and let me say to my good friend, the gentleman from California, that that is computers and robotics. Their government is spending a billion dollars in research to develop the computers and

robotics that will beat ours because of the combined efforts of their government, their industry, their banks, and their unions.

Mr. Chairman, if we do not know that, then we deserve what is going to happen to us.

Mr. SEIBERLING. Mr. Chairman, I will reclaim my time.

Let me say some constructive things here, because there have been some destructive things put out on the floor and I hope we do not end on that note.

A country which has as its means of fighting inflation only the elevation of interest rates to astronomical levels cannot effectively compete with a country whose interest rates are maintained at half our level, so that industry can borrow whatever capital it needs at a competitive price.

A country which does not provide workers with job security and a share of the profits, so that they have an incentive to help their employers become more productive, cannot compete effectively with a country that provides its workers with those kinds of incentives.

I could go on and on. There are bills in this Congress to encourage such worker incentives, to encourage worker retraining, et cetera. These are all things that the Japanese are doing and we are not doing. I mention these merely to illustrate that there are long-range problems which we are not addressing because we do not have a comprehensive industrial strategy.

I would also note that a nation that, year after year, pours \$200 billion and more into military spending—as both the United States and the Soviet Union are doing—cannot compete effectively with another great industrial power, Japan, that devotes virturally all of its capital and human resources to modernizing its plants, training its workers, and developing products that have economic value in the consumer markets of the world.

#### □ 1900

Somebody said to me the other day, "Is this bill not just a Band-Aid?" I said, "Yes, it is a Band-Aid, and, in the long run unless we have a competitive auto industry or any other industry, it is not going to survive. But when you are bleeding you had better have a Band-Aid because if you bleed to death you are not going to live to the long run. Our first aim must be to survive in the short run."

While this is not a perfect bill and we all know it is not going to become law in this year, I think, it serves a tremendous purpose if it forces every one of us, including the administration and the American people, to start thinking about this problem of whether we intend to survive as an industrial power, which industries are essential, and how to keep them alive and well.

• Mr. MURTHA. Mr. Chairman, I want to point out some facts which indicate the stakes involved in H.R. 5133.

U.S. jobs: Approximately 2.4 million jobs in this country are related to auto production directly or indirectly. The industry provides critical support for other key industries, particularly in steel, rubber, glass, aluminum and even high-technology areas of robotics, computer-aided design and computer-controlled equipment. Without Government action, however, U.S. auto-related employment is projected to fall to half that required to supply the domestic auto market by 1990. Enactment of H.R. 5133 would create or preserve more than 600,000 jobs by 1986 and more than 1.3 million by 1990.

Transfer payments and taxes: The potential loss of more than 1.3 million jobs would cost the Federal Treasury an estimated \$25 billion annually in increased transfer payments and in lost tax revenues.

Balance of trade: The United States-Japan trade deficit in automobiles has grown to \$47 billion over the last 5 years—\$13 billion last year alone thus putting an intolerable strain on the dollar. The Japanese, meanwhile, have kept the yen undervalued by at least 25 percent, bolstering burgeoning exports.

Preserving our internal markets: No advanced nation willingly surrenders crucial internal markets to imported goods. Yet absent enactment of content legislation, imports will account for 40 percent of the U.S. market in cars and light trucks by 1990, according to Merrill Lynch Economics.

Because of the high proportions of minorities employed by the auto industry, they have a particularly important stake in this bill. Of the 270,000 workers now laid off from the Big Three, AMC, and VW, at least 100,000 are minorities and women. As a result, implementation of affirmative action hiring and training programs have stalled pending the recall of those laid off.

#### IMPLEMENTATION OF H.R. 5133

A sliding scale would determine the ratio of domestic content required. A company with annual vehicle sales exceeding 900,000 units would be required to achieve a domestic content ratio of 90 percent; a company with sales of 200,000 would need only 20 percent domestic content, and so forth.

The rules can be met: GM, Ford, Chrysler, VW and AMC-Renault currently have sufficient domestic production and supplies to exceed their content ratios for model 1986 and beyond. Honda can meet its ratio utilizing its new U.S. car assembly plant and boosting its purchases of domestic parts as VW has done. Toyota, Nissan,

Toyo Kogyo, and Mitsubishi, would need—finally—to implement plans for production and purchase of parts here. Other companies with sales below 100,000 will not be affected.

#### IMPACT ON COMPETITION AND PRICE

Competition would be fairer under domestic content legislation as foreign and U.S. manufacturers vied to give U.S. buyers the best in technology, service, quality, and price under the same rules.

Prices would be relatively unaffected by content legislation contrary to what some critics have claimed.

#### THE PRINCIPLE BEHIND H.R. 5133

The United States is alone among major industrial nations in permitting its domestic markets to be overrun by imports in key sectors. No fewer than 31 countries now enforce some kind of content legislation; others use quotas, tariffs, and so forth. The content principle is based on elementary fairness: sell as much as you want here, but let some of the people who buy it build it as well.

#### HOW H.R. 5133 WOULD WORK

The rules of H.R. 5133 are designed to assure a healthy and competitive domestic auto industry. The bill takes into account the fact that a few giant vehicle manufacturers decide where production takes place to supply the U.S. market. Their strategic decisions determine the livelihood of hundreds of thousands of American workers.

The bill imposes obligations only on companies with sales exceeding 100,000. Ten auto companies have that many sales in the United States today: GM, Ford, Chrysler, Nissan, Toyota, Honda, VW, Toyo Kogyo, AMC, and Mitsubishi. The bill provides for a 1-year grace period, after which the requirements are to be phased in by thirds in each of the next 3 years.

A company's local content requirement depends on the level of its sales. A company's content requirement is based on a smooth scale that starts at 100,001, then rises until 900,000, where it levels off. From model year 1986 onward, the content percentage, up to a maximum of 90 percent, is derived by dividing sales by 10,000. Thus, sales of 355,000 entail a 35.5-percent requirement; sales of 500,000 entail 50 percent.

The content ratio of a company is based on its sales, exports, and imports of original equipment automotive parts and vehicles. Its imports less its exports equal its net imports. The local content percentage is derived by taking 100 percent and then subtracting a company's net imports as a percentage of its sales. For example, a company would have 90-percent local content if its net imports represent 10 percent of its U.S. sales. It has 40-percent local content when net imports are 60 percent of sales.

GATT, RETALIATION, AND U.S. EXPORTS

Some critics of H.R. 5133 argue that retaliation against U.S. exports would nullify the gains to the auto industry. The assumption that massive retaliation from Japan is likely cannot be supported by a careful analysis of auto policies around the world, the political context of the GATT, and Japan's trade patterns.

Japan has never brought a GATT complaint, much less retaliated, against the dozens of countries which restrict Japanese auto exports much more stringently than H.R. 5133. Indeed, to achieve or maintain their market presence, Japanese auto companies have invested in many of those countries.

The GATT procedures require that Japan first meet with the United States to try to iron out difficulties before a formal complaint is filed. If Japan were to file a formal complaint, the United States could file countercharges against the auto policies of Japan and many other GATT members in Europe, Australia, Latin America, and Indonesia.

An analogous situation occurred after the United States enacted Domestic International Sales Corporation (DSC) legislation giving special tax breaks to exporters in 1971. At that time, several European countries lodged complaints with the GATT. The United States countercharged against policies of those countries and argued that, if the DISC did violate the GATT, those countries were also violating the GATT with comparable measures. In effect, the United States defended the DISC as necessary for U.S. exporters to compete fairly on the world market because other countries were subsidizing their exports. Several years later, a GATT panel ruled that both the DISC and the foreign rules did violate the GATT. Since that time, the other countries have not changed their practices, nor has the United States modified the DISC to conform to the GATT.

Likewise, the Fair Practices in Automotive Products Act is a modest defensive measure; the quotas, content rules, and export requirements of other countries are generally far more severe than this legislation.

As a practical matter, Japan has a very limited capacity to take action against the United States even if it were to go to the GATT and prevail. If Japan could win a GATT ruling against U.S. auto content legislation, the United States could win rulings against the auto policies of most other auto-producing countries. Even if that point should be reached, it would not be in Japan's interest to take action against U.S. exports.

Japan buys from the United States only what it cannot make for itself: raw materials and products using technology it does not yet have. For many

of these products, the United States is Japan's predominant supplier; and for those imports for which Japan does have alternative sources, those source countries have auto policies far more restrictive to Japanese auto imports than the proposed U.S. legislation: Australia, Argentina, Brazil, Indonesia for foodstuffs and raw materials; European countries for manufactured goods. Japan could retaliate against modest U.S. auto content legislation only by buying less from us and more from countries with auto policies which limit their exports even more severely than would H.R. 5133.

### EFFECT OF DOMESTIC CONTENT LAW ON AUTO PRICES

The domestic content law would have a very limited effect on prices of U.S. cars because it does not reduce competition in the U.S. market.

Based on extreme assumptions, the CBO predicted that the original H.R. 5133 would boost car prices 6 percent. They assumed that H.R. 5133 would function as a quota bill, reducing competition by shutting imports out. Instead, H.R. 5133 is an investment bill, which will cause foreign car companies to put plants here in order to maintain access to the U.S. market. Therefore, competition in the United States will be stiffer, and the increase in car prices far less than CBO concludes.

A widely publicized study by Harbridge House has predicted very large price increases. That study, financed by the import dealers' association, combines a distortion of the experience of the last year with unfounded projections about the future. Since restraints on Japanese car exports to the United States began in early 1981, lists prices of U.S. cars have risen at a 5- to 6-percent rate—less than the Nation's inflation average. Moreover large and expanded rebate programs have meant effective price increases of even less. Price increases for this fall's models show continued moderation.

The public incorrectly perceives that car prices have been rising rapidly because of sticker shock. People go several years between buying a car and are surprised at the increase in prices since their last purchase. In fact, auto prices have been rising at a lower rate than overall inflation for several years. Prices for new cars have been less than the overall price index for the last 4½ years. Contrary to the critics of the Japanese export restraint, new car prices have continued lower than average inflation since they took effect in April 1981.

U.S. PRODUCTION OF NEW CARS THREATENED BY DISTORTED EXCHANGE RATES AND BORDER TAXES

The United States will lose at least 700,000 auto-related jobs-particularly in production of smaller cars-if the U.S. Government does not require local production by all major auto companies selling in this market. Because the auto industry has long lead times, the companies must often decide where to source parts or vehicles 2 or 3 years before production and shipments begin. Thus, today's decisions to obtain new parts or vehicles abroad may not show up as imports and lost U.S. jobs until 1984 or later.

A number of factors subject to Government policy are now swaying auto companies-both foreign and domestic-against U.S. automotive production. Among the key factors have been skewed exchange rates particularly of the dollar and yen, the border tax adjustment rules, and activist auto policies among foreign governments.

Distorted exchange rates, particularly the undervaluation of the ven relative to the dollar, represent a substantial barrier to companies deciding whether to invest in the United States. The ven now stands at over 250 to the dollar but many experts believe that, for trade purposes, it should not exceed 200. With the dollar's yen value now 25 percent above its proper value, when a company now compares production costs between the two countries, it finds U.S. production costing 25 percent more than it should relative to Japanese production.

Extremely tight U.S. monetary policy accounts in major part for the overvalued dollar. Record high real interest rates here have raised demand for dollars to invest here. In addition, by slowing growth here and abroad. our tight monetary policy has shaken world confidence and created new demand for the dollar as a "safe

haven" investment.

In addition, the Japanese Government has been derelict in not taking the necessary measures to shore up the value of the yen. While they may not be intervening in exchange markets to bid down the yen's value, that is not satisfactory. Japan should be convincingly intervening in the exchange markets to bid up the yen. In addition, the Japanese Government should raise the yen's value by encouraging greater investment in Japan and putting stiffer restrictions on capital outflows from Japan. Unfortunately, they are reluctant to take such measures because most of their growth in

output over the last 2 years has come from expanding their net exports.

The international rules for border tax adjustment are also biased against U.S. production. Those rules allow indirect taxes-on which Japan and European countries tend to rely-to be rebated on exports and charged on imports. The United States relies more on direct taxes which are neither rebated for our exports nor charged on competing imports. This means that auto imports from Japan bear few taxes in either Japan or the United States, but U.S. exports to Japan face substantial taxes in both places. The theoretical economic argument that this distortion will be offset by a lower U.S. exchange rate is clearly nonsensical today.

With its passive policy toward the auto industry, the United States inevitably has growing net imports. All other major auto-producing centers-Japan, Europe, and Brazil-have adopted a combination of policies that assure net auto exports. These other countries have vigorously promoted their local production and exports by subsidies, favorable credit terms, stiff import restrictions, and export requirements.

U.S. production of new cars and trucks, including their parts, now represents only three quarters of the value of automotive sales in our market. We now have net imports equivalent to a quarter of our new vehicle sales. If the U.S. Government fails to take action, that ratio can be expected to fall to one-half by 1990 or sooner.

#### JOBS IMPACT OF CONTENT

If the domestic auto content bill is enacted during the 1983 model year, by 1986 the United States stands to gain 637,000 jobs. Of these, 150,000 would be in the auto industry itselfmainly at new Toyota and Nissan plants and retained "Big Three" plants—and 487,000 in other industries. By 1990, the law would create or preserve 1,386,000 jobs that would otherwise be lost. Of those, the auto companies would provide 213,000 more jobs, suppliers to the auto companies would have 503,000 more jobs, and the ripple effect throughout the rest of the economy would create an additional 670,000 jobs.

	1986	1990
Core auto jobs Directly auto related jobs Other spinoff U.S. jobs	150,000 354,000 133,000	213,000 503,000 670,000
Total	637,000	1,386,000

Basis for figures: Without content requirements, the import share of the U.S. car and light truck market will rise from 28 percent in 1982 to 35 percent in 1986 and 40 percent in 1990; with content, it would stay at 28 percent. Without content, the U.S. content of domestic-based companies' vehicles will fall from 95 percent today to 85 percent in 1986 and 80 percent in 1990; with content, it would only be able to fall to 90 percent. Without local content requirements, vehicles sold here by foreign-based producers will average less than 20 percent U.S. content; with content, they will average 51 percent.1 Each auto job supports 2.36 direct auto related jobs.2 Each auto job is associated with 3.25 other U.S. jobs in 1986 and 5.5 other jobs in 1990.3

AUTO CONTENT AND EQUAL OPPORTUNITY

The auto crisis, the effects of which will recede only if significant direct foreign automotive investment is required by law, has been particularly disastrous for women and minority workers.

Many of the plant closings have occurred in areas with heavy concentrations of blacks and Hispanics. Women too have been hard hit. Of the 30 largest auto plant shutdowns since 1980, all but a handful have occurred either in frostbelt cities or on the two coasts. Confidential company data, much of it compiled for EEOC requirements, show that women, blacks, and Hispanics have paid heavily.

Auto has always employed a high relative proportion of minority workers and women. While minorities constituted about 11.2 percent of U.S. workers, they held about 22.4 percent of U.S. auto jobs in 1978-79. Blacks alone were 9.3 percent of the U.S. work force, but 19.2 percent in auto. The decline in auto employment from 1978 to 1982 has cut minorities' share of auto employment to about 20 percent and blacks' share to under 18 percent.

Since minorities have held about twice the share of auto jobs as their share of all U.S. jobs, the auto slump has hit them twice as hard.

In 1978-79, women held 15.8 percent of U.S. auto jobs; today, with layoffs outpacing affirmative action, the figure is 15.5 percent. In blue-collar auto jobs, women's share has fallen from 14 percent in 1978-79 to 13.5 percent in 1982.

The auto industry, whose contracts with the UAW insure equal pay for equal work and which provide decent incomes to all auto workers, has been a large source of minority income in

<sup>1 (</sup>a) Without law: Renault/AMC at 70 percent U.S. content, VW at 40 percent, Honda at 31 per-cent, Nissan/Fuji at 13 percent, and all other im-ports at 6 percent, based on 1981 sales level; (b) with law: Nissan/Fuji at 74 percent U.S. content, Toyota at 71 percent, Renault/AMC at 70 percent, VW at 40 percent, Honda at 37 percent, Toyo Kogyo at 25 percent, Mitsubishi at 15 percent, and all other imports at 6 percent, based on 1981 sales

<sup>\*</sup>Source: "BIS 1919 Employment Requirements Table," Oct. 23, 1981. \*Source: U.S. Congressional Budget Office, "The Fair Practices in Automotive Product Act: An Economic Assessment," August 1982.

the United States Auto jobs are good jobs; we are proud of that. They allow autoworkers to enjoy a decent, reasonable standard of living. Nearly all auto workers-be they white men or Hispanic women-earn between \$9 and \$13 an hour. There are very few jobs in the U.S. economy in which minority and female workers earn as much, even though something like half of white males earn as much or more.

Not only does contraction in auto cost women and minorities a disproportionate share of jobs, therefore, but also of income. Each time a woman loses an auto job, female national income falls by as much as if more than three women in average occupations became unemployed. For male minority workers, auto job loss is more than twice as costly as average

minority unemployment.

In its analysis of the potential impact of a Chrysler bankruptcy, DOT estimated that the loss of income by just the 38,000 minority workers employed by Chrysler in 1979 would have reduced national black income a full 1 percent.

#### U.S. AUTO INDUSTRY SHOWS HIGH PRODUCTIVITY GROWTH

Productivity growth in the auto industry has proceeded at a healthy 3.2 percent clip since the late 1950's, substantially higher than the 2.7-percent rate attained by the entire manufacturing sector. This is in spite of the all too frequently cyclical downturns suffered by auto.

Even as the current slump deepened, the motor vehicle and parts industry was able to show a 4.7-percent increase in productivity from 1980 to 1981. That remarkable performance attests to the competence of the work force as well as to the robust spending in capital equipment by the domestic auto companies.

#### CAPITAL SPENDING IN AUTO, TRUCK, AND PARTS MANUFACTURING

CLAIMS THAT U.S. AUTO INDUSTRY PRODUCTIVI-TY LAGS WOEFULLY BEHIND JAPAN'S ARE GREATLY EXAGGERATED

The Japanese Productivity Center 4 has recently issued a study on comparative labor productivity between the United States and Japan. The study estimates that Japan's auto industry has finally pulled ahead of the United States holding a slight-1 percentlead in productivity in 1980. In 1979. the United States was ahead of Japan by 11 percent.

These figures seriously call into question some U.S. studies which show Japan holding a tremendous productivity edge vis-a-vis the United States. productivity Moreover, changes depend strongly on utilization of capacity. The Japanese gains from 1979 to 1980 must therefore be put in the proper perspective: First, extremely favorable conditions in Japan, where there was a 15-percent increase in production, coupled with, second, the massive auto crisis in the United States where unit output plunged 30 percent.

#### QUALITY, SAFETY, AND INSURANCE COSTS: MYTHS AND REALITIES

Quality: Everyone talks about fit and finish, where the Japanese excel. But there is more to quality than that. In fact, both VW and Honda have attested to better quality at their U.S. operations than for identical products built in Europe or Japan. Jim McLernon, former head of Volkswagen of America, says that VW's built in Pennsylvania are superior to the ones built in Germany. Honda officials say that 90 percent of their Japanese motorcycle output could go to the dealer directly from the production line; the corresponding portion of their Belgian output was 85 percent and for the U.S. output it was 95 percent.

Honda has begun to assemble Accords in Ohio, and they are not worried about whether Americans can do the job right. The following remarks were made by Hideo Sigiura, executive vice president of Honda, at the Automotive News World Congress in De-

troit on August 25, 1982:

Our motorcycle plant started operation in September 1979. It is not just an assembly facility, as it is equipped with facilities for component production, welding, painting, and plastic injection. It also has welding robots. The quality of the U.S.-made motorcycles is reputed to be equal to, or better than, the quality of those manufactured in Japan, to the complete satisfaction of our dealers and customers. Through this experience, we are convinced that the automobiles which we are about to start manufacturing in the United States will fully achieve satis factory quality standards. The workforce at the plant has proven itself to be as diligent and as hard-working as one could expect anywhere in the world, and I, as a member of Honda's management, am totally satisfied with them.

Safety: According to both NHTSA crash data and Insurance Institute statistics on injury and collision claims, U.S.-made cars by and large are far safer than imports, especially than Japanese-made subcompacts.

NHTSA's crash tests of 1981 models found that, among small cars, the imports were on average far more dangerous in terms of predicted head and chest injuries than domestics.

The Insurance Institute for Highway Safety found that all 19 of the models with the best 1978-80 injury claim experience were domestics, while 14 of the 17 models with the worst injury claim record were imports, 13 of them Japanese.

Insurance costs: As a result, insurance premiums are beginning to reflect American cars' higher safety and lower cost of repair following accidents. State Farm has cut rates on 23 larger, domestic cars and levied surcharges against drivers of 23 small, mainly imported cars, including all Japanese subcompacts plus Audi and BMW.

#### INTERNATIONAL AUTO EARNINGS COMPARISONS: MYTHS AND REALITIES

U.S. auto workers-when they are working-earn a good living; we make no apology for that. But a lot of what we hear about them making \$20 an hour or about how the auto crisis would end if autoworkers were paid at Japanese-level wages is nonsense.

First of all, hourly labor costs, expressed in dollars, depend on exchange rates. So even though U.S. autoworkers' real incomes fell in 1981 and Japanese incomes rose, the gap between them widened because each yen bought fewer dollars.

Second, U.S. autoworkers do not earn \$20 an hour. Hourly pay before taxes averages about \$12 at Ford and GM, and about \$9.50 at Chrysler. The rest is the cost of benefits. Most of that comes in two areas which in Japan and most other advanced industrial countries are largely paid for by Government: Health insurance and pensions. Moreover, hourly U.S. costs for these are inflated by the auto slump: Benefits of active, laid off, and retired workers are borne by fewer active workers at the job fewer hours a year.

If the United States had a national health insurance program and a West German-style public pension program, U.S. auto hourly labor costs would fall by as much as \$5. If laid-off workers were recalled and all worked full time, they would fall nearly \$2 an hour.

In addition, reported Japanese auto labor costs of about \$12 an hour—\$9 in wages and \$3 in benefits—understate the reality, due to how certain company-subsidized benefits; for example, housing, recreational facilities, transportation, are valued.

As a country, Japan is less productive than the United States. People in virtually all walks of life have lower pay in Japan than their counterparts in the United States. Yet, some have argued that, because their products compete with Japanese, American autoworkers should accept Japaneselevel wages. Where does that logic With the recent devaluation, some Mexican autoworkers receive little more than one-tenth of American auto workers. With modern telecommunications, engineers in Pakistan are designing U.S. bridges. Should American bridge engineers get paid at the Pakistani pay scale?

COSTS OF A FREE TRADE POLICY IN AUTO

U.S. auto communities now have depression-level rates of unemployment. High unemployment will continue, even if sales recover. The companies will be raising productivity to compete. Cars will continue to get smaller to satisfy demands for fuel efficiency. With these inexorable pressures reducing employment, the Nation must carefully weigh the costs of unbridled auto imports.

Every time an additional imported car, truck, engine, or transmission displaces U.S. production, there are costs as well as potential benefits to society. The benefits—price and engineering competition, and consumer choice—are generally recognized. The costs more often remain hidden, never linked explicitly to particular policies. But these costs are huge, and we believe they overwhelm the benefits of unrestricted access to the world's largest auto market.

Since 1978, fully 1 million U.S. workers have lost their jobs due to the auto crisis, over 300,000 in the auto companies alone. Meanwhile, the Japanese share of the market has doubled. If nothing is done, half the jobs involved in making the cars and trucks sold here will be lost to the United States—one-quarter already have been.

The Congressional Budget Office estimates that each percentage point of unemployment costs the Federal Treasury \$25 billion. Since the million jobs lost to the auto crisis raise the overall unemployment rate by about 1 full point, CBO's figure is a fair measure of the annual Federal revenue cost of the auto slump. Since the content law saves 1 million-plus jobs by 1990, it should be fattening the Treasury by a like amount at that time.

But the Federal budgetary impact is just the start. One must also consider State and local government losses, the loss of dignity and self-esteem of workers unable to find employment, the cost of unused skills, increased crime, alcoholism, illness, family breakup, and premature death.

• Mr. RATCHFORD. Mr. Chairman, I rise today in support of H.R. 5133, the Fair Practices in Automotive Products Act. This bill is an investment bill-an investment in jobs-an investment in the future vitality of our domestic automobile industry and in the economic future of our Nation. At a time when more than 12 million Americans are without jobs and U.S. auto production is the lowest in 24 years, this bill will go a long way in putting America back to work as well as help utilize a portion of the Nation's idle industrial capacity. Approximately 2.4 million jobs in this country are directly dependent on the auto industry including some 13,000 in my district. The continued survival of jobs in other key industries such as steel, rubber, glass, metal fasteners, aluminum, and robotics, depend heavily on the health and well-being of the domestic auto industry. These primary and secondary auto suppliers account for some \$30.2 million worth of business each year in my district supplying Chrysler alone.

This bill is an investment incentive act, which would require that cars sold in the United States contain a gradually increasing percentage of Americanmade parts depending on the number of cars sold here. This bill is not designed to bar competition from the foreign automakers, rather, it is designed to encourage these firms to build plants where their markets are. Since 1978, the market share of autos sold by the Japanese manufacturers increased from 12.1 percent to some 27 percent. This increase in market share has been a major factor in the layoff of 270,000 workers, some 34 percent of all those employed in the auto industry, in the last 5 years.

Many of my colleagues in this House oppose this bill on the grounds of "free trade." I think this issue at hand it not "free trade" but "fair trade." Some 31 nations have local content requirements. The Japanese maintain onerous tariffs on U.S. goods exported to Japan. These tariffs make U.S. goods overly expensive and restrict the market for U.S. imports in many areas including agriculture, refined copper, airline operations, insurance and financial services, and computer software. We simply cannot allow this deplorable series of unfair trade restrictions to continue at the expense of the American economy and the American worker. This bill will send a necessary message to our trading partners, especially the Japanese, that America de-

mands fair and reciprocal trade.

In closing, I believe that this bill creates an opportunity for manufacturers of all nations to sell and produce cars here in the United States and thereby employing U.S. labor and providing a multiplier effect on production and jobs in services in our economy. This bill precedes from notions of fundamental fairness, conformity with norms of international law, and with much-needed preservation of employment for American workers. I urge its

Mr. ERLENBORN. Mr. Chairman, the autombile industry is in trouble, and hundreds of thousands of autowokers are idle. I submit, however, that the domestic content bill (H.R. 5133) is not a solution; it will not create jobs or breathe new life in our domestic auto industry. Instead, it will mean higher costs to consumers, add a notch or two to inflation, increase unemployment, and invite trade retaliation. Therefore, I urge my colleagues to vote against this legislation.

"Buy America" is a slogan with a good ring to it. We are proud of our products and they are usually the best available. For 101 reasons, however,

they are sometimes also costlier than those made in other countries. Studies show that domestic content legislation will push up the price of a new car by at least \$527 and perhaps as much as \$3,000.

Other studies show that every \$20,000-a-year autoworker who might be reemployed will cost consumers between \$60,000 and \$100,000; some estimates claim the cost would be even higher. If consumers are willing to pay the price and not hold onto their cars, as they have been doing, perhaps 38,000 jobs will open up in the auto industry with enactment of H.R. 5133. That's what the Congressional Budget Office says.

CBO also says this job gain in the auto industry will be offset by the elimination of some 104,000 jobs in other industries. That translates into a net loss of 66,000 jobs. The American International Automobile Dealers Association predicts H.R. 5133 would close a minimum of 2,000 import dealerships, resulting in unemployment for 80,000 workers.

The League of Women Voters describes this bill as inflationary, restrictive trade legislation that would invite retaliatory trade measures on the part of countries that export to the United States. If that happens, and I am convinced it would, the Department of Commerce states the likely results would be the loss of 25,000 jobs for every \$1 billion we lose in exports.

In sum, consumers, workers in the auto industry, and workers in other industries would pay a stiff price for enactment of this legislation to benefit a comparatively small segment of the auto industry. H.R. 5133 should be voted down.

 Mr. DERWINSKI. I intend to vote against passage of H.R. 5133 because of the serious adverse impact it would have on our international trade.

Enactment of this legislation would be a violation of our obligations under the General Agreement on Tariffs and Trade. During the recent GATT ministerial meeting in Geneva, the member nations, including the United States, agreed to try and eliminate future trade restrictions. Furthermore, nations which would be affected by the domestic content bill specifically protested it.

Therefore, if we pass this measure, we can expect retaliation, the impact of which would certainly exceed any potential benefits to our domestic automobile industry.

The voluntary export restraints being observed by the Japanese Government are effectively working, in my judgment, and it would be a mistake to damage this arrangement by passing H.R. 5133.

Free trade is beneficial to American jobs and to the American consumer. Trade restrictions such as the domes-

tic content bill are clearly detrimental to American jobs and American con-

• Mr. ROSTENKOWSKI. Mr. Chairman, I will vote "no" on H.R. 5133, the so-called domestic content bill. There are several reasons for my decision for this vote. First and foremost, H.R. 5133 is deeply flawed legislation. It will not—repeat, will not—put American auto workers back to work. Frankly, there is cause for serious concern that the bill will cost jobs by accelerating foreign trade barriers against U.S.

On the other hand, I am very concerned by the past and more recent actions of our so-called trading partners. Many of my colleagues look at H.R. 5133, which will not be taken up in the Senate, as a message to the Japanese and the European Community. Well, to me "sending a message" means that the message is clear and will be delivered. H.R. 5133 is a garbled message that will not be delivered.

My vote does not limit my flexibility on the trade issue. While I am inclined to favor free and fair trade, I do not see this view shared by many of our trading partners. As a result, I see increasing signs of protectionist sentiment in the House and Senate.

My vote is a strong indication of the high priority that the trade issue will have in the 98th Congress. I hope that more constructive action by our trading partners to open up their markets and increase manufacture of their products in the United States will lessen the protectionist sentiment in the Congress. If not, trade legislation next year will not have the same fate as H.R. 5133.

• Mr. HEFTEL. Mr. Chairman, this Nation is currently confronted with a frighteningly deep recession which is being exacerbated by our unfavorable trade balance. The failure of the Reagan administration to address this situation has resulted in the emergence of bills, such as the local content bill before us today, calling on us to take some form of action to get America back on track.

Thus, we must now cast a difficult vote on this matter of great significance: the domestic content bill. Let me say from the outset that although I have some reservations and concerns regarding this bill, I will support it as I feel it sends a message to our trading partners, particularly Japan, that efforts must be made to moderate the distinct trade imbalances that exist between our nations.

Most of us would agree that this bill is far from perfect. It would decidedly alter U.S. trade policy, raising the specter of protectionism against open international trade. At the same time, it is not certain that the number of American jobs created by the bill would exceed the number of jobs that would be lost in export-related indus-

tries as a result of foreign retaliation. Thus the domestic content bill leaves many questions unanswered.

In light of this, we must not view this bill as a panacea. The deep-rooted problems of our ailing automobile industry and indeed of our entire economy will not be solved by merely insulating ourselves from foreign compettion. We must seek long-term answers to the problems of lagging productivity and quality control that plague our industries if we are to produce American cars that will be competitive in the international marketplace.

As imperfect as this bill is, however, it is time that something be done to alleviate the burden that subsidized foreign imports have placed on our economy. We must send a clear message to our trading partners, and especially to Japan, of our intent. They must be told that the United States will not stand by and watch its automobile industry be weakened by subsidized imports while our products are unable to penetrate foreign trade barriers.

The inability of the Reagan administration to negotiate substantial trade concessions with Japan and its unwillingness to address the problems that current trade practices have created for our domestic economy have left the responsibility for action on the shoulders of Congress. We have heard more than enough talk on this issue. It is time now for substantive action. This bill must be our way of telling Japan unequivocally that either they act now to moderate the trade imbalances between us or we will have to take action which they will find much less desirable.

• Mr. STARK. Mr. Chairman, I am a cosponsor of H.R. 5133.

Japan has required U.S. firms to invest in Japan as a condition for doing business in that country. They have required that patents be turned over to them as a condition of operating in that lucrative market. It is time that some of their abuses of the past be redressed—and that is what this bill does. It requires them to place job-creating parts orders or assembly plants in the United States—just as they have done to countless U.S. firms.

But, Mr. Chairman, I support the amendment by the gentleman from Ohio (Mr. Brown) on behalf of the Honda Motor Co. As the reports of the United States-Japan Task Force of the Ways and Means Committee have repeatedly made clear, the trade crisis with Japan has been largely an auto trade crisis, and it could have been avoided if Japan had seen the wisdom of placing auto investments in this country. The reports of the task force-named for our colleague from Oklahoma, Mr. Jones-have heen warning Japan since 1978 that it must do more to place investment here.

This bill finally puts some teeth into those warnings. But Honda responded to the warnings. They started a motorcycle plant in Ohio, and it was clear from the beginning that that plant would become an auto-producing plant as well.

This bill is a giant stick to force jobproducing investment. But it should also be a carrot to reward those who responded early and creatively.

This bill may not be approved by Congress. If it passes the Congress, it may or may not be signed by the President. Thus it is important that we give a signal to the Japanese that we not only expect jcb-creating investment in this country, but that we will reward those who have shown the courage and wisdom to already make investments. To adopt this amendment will provide a carrot that may prove as helpful as the stick contained in the rest of the bill. It will also set an example for other Japanese industries who should be investing here.

• Mr. WIRTH. Mr. Chairman, in a world economy that is coming to depend increasingly on international trade, I remain committed to the ideal of free and open global markets. Free trade is without a doubt the best policy, and I have opposed past attempts to erect trade barriers around the United States.

Today, however we are faced with behavior by our trading partners that in no way represents free trade. The governments of Western Europe and Japan have placed severe restrictions on imports. Trade agreements reached through years of negotiation are being violated. The structure of free trade around the world is being threatened by a rising tide of protectionism.

For example, most auto-producing nations other than the United States have established trade restrictions which limit auto imports to a very small share of their domestic auto markets, using both tariff and nontariff barriers. The United States, reflecting its free trade principles, has placed virtually no restriction on foreign car manufacturers' access to the U.S. market. As a result, imported car sales, which represented 15.3 percent of total U.S. car sales in 1970, accounted for 27.3 percent of all cars sold in the United States in 1981. This import share is projected to rise to between 35 and 40 percent by 1990.

Until the early 1970's, Japan imposed a high auto import tariff which facilitated the development of a strong domestic auto industry. While it currently has no auto import tariff, Japan uses a variety of nontariff restrictions to keep its auto market closed to imports. After all required payments for processing, licensing, approval and transportation, a U.S. car that sells for \$6,500 here would cost \$13,000 in Japan.

With 1 out of 6 jobs in the U.S. economy reliant on international trade, the

protectionist policies of our trading partners would be harmful in the best of times. But with our Nation in the grip of the worst economic slump since the Great Depression, our deteriorating trade position is clearly unacceptable, and requires a response.

Our trade negotiators have not pursued, nor has the administration proposed the necessary reforms to address this problem. The United States can and should be doing more to reduce barriers to U.S. exports, and actively enforce the rights of U.S. firms according to internationally agreed-upon procedures after exhausting all other avenues to remove discrimination. In addition, the United States must aggressively negotiate to achieve an agreement to drastically reduce the export subsidy programs of other countries.

As a result of our inattention to trade reforms, the sectors of our economy most sensitive to trade, like the automobile industry, are on the brink of collapse. Employment in the U.S. auto industry has dropped nearly 28 percent since 1978, for a total loss of nearly 1 million jobs. The United States has a \$16 billion trade deficit with Japan—\$13 billion of which is attributable to imports of Japanese cars.

H.R. 5133, which would require that automobiles sold in the United States contain a certain percentage of domestic parts and labor, is an important signal to our trade negotiators and the administration. It is a signal that the Congress demands that our trading partners adhere to the spirit as well as the letter of our trade agreements, because we will not allow industries to suffer further from foreign protectionism masquerading as free trade.

The recently concluded General Agreement on Tariffs and Trade (GATT) ministerial conference in Geneva came to no resolution of the problems that threaten our international economy. The passage of this bill at this time is a message that we must recognize the seriousness of these problems, and the disastrous effect they are having on American industries and workers.

• Mr. FORD of Michigan. Mr. Chairman, I rise in strong support of H.R. 5133, the Fair Practices in Automotive Products Act, also known as the local content bill. H.R. 5133 is the most important piece of economic legislation this Congress has considered or will consider. Without passage of this bill, there will be no help for America's greatest industry and the millions of men and women who work in it, because no one in our Government has offered a constructive alternative.

Why should we pass this legislation? There are many reasons:

First, the U.S. auto industry is plunged in a depression that has already lasted 4 years, cost 1 million jobs, destroyed the economy of scores

of communities and cost the U.S. Government hundreds of billions of dollars. Sales are at their lowest levels since 1961.

Second, at the same time U.S. sales and production have dropped, Japanese imports have skyrocketed. Between 1978 and 1981, Japanese car imports rose 37 percent. Japan's share of our auto market is now 23 percent, and total imports are over 30 percent.

Third, economists predict that the import share will climb as high as 35.8 percent to 65 percent of the U.S. market by 1990. (Chase Econometrics predicts 35.8 percent, Merrill Lynch predicts 40 percent, the National Academy of Engineering says 65 percent is possible.)

Fourth, even U.S. companies are beginning to import vehicles and parts. Without H.R. 5133, the imported content of domestically produced cars could be 30 percent by 1985 and 39 percent by 1990. GM has built 10 plants in Mexico on the U.S. border since 1979. AMC, Ford, and Chrysler all operate cheap labor border factories in Mexico.

Fifth, auto imports cost U.S. taxpayers billions of dollars. The combination of lost taxes—which would otherwise be paid by U.S. manufacturers and workers—and the various costs of unemployment insurance, welfare and food stamps for unemployed U.S. workers add up to \$2,500 for each import, \$6 billion a year.

Sixth, the content bill would create or preserve more than 700,000 jobs in the auto and related industries. The total, economywide impact would be more than 1 million jobs.

Many people, including the editorial writers for the major papers in my part of Michigan, are worried that H.R. 5133 will set off a trade war and cost Americans more jobs than it creates. The Japanese have not threatened retaliation; this worry has been given validity by the Reagan administration, which opposes local content laws without offering any alternative. In addition, the Congressional Budget Office has predicted massive retaliation against U.S. exports by Europe and Japan, even though no European auto manufacturer will be adversely affected by the content requirements in H.R. 5133.

What is the truth? For the following reasons, I believe the notion of Japanese retaliation is a red herring:

First, Japan has never filed a complaint under the General Agreement on Tariffs and Trade, even though every other nation severely restricts Japanese auto imports.

France has frozen Japan's share of its market at 2½ percent. (Japan's share of the U.S. market is 23 percent.)

Germany has frozen Japan's share of its market at 10 percent.

Italy permits only 2,200 Japanese imports a year.

Britain banned Japanese auto imports for 5 months and forced Honda to assemble cars in Britain.

Second. Japan buys from the United States only what it cannot produce itself. To retaliate, Japan must turn elsewhere for the lumber, minerals, grain and other agricultural products they import from us. But where would they turn?

Alternative grain and mineral exporters—Australia, Argentina, Brazil, and Indonesia—all have content laws.

Alternative manufacturers of computers and high-tech goods—France, Britain and other Western European countries—all have tough import restrictions.

Third. The Japanese do not have clean hands. Japan requires local production of aircraft it buys from Lockheed and McDonnell Douglas and is forcing Boeing to source production of its 767 in Japan.

Fourth. Rather than retaliate, Japan will respond. Two Japanese auto companies (Nissan and Honda) have already built manufacturing plants in the United States. When the United Kingdom banned auto imports from Japan, Honda responded by locating its assembly operation in England. Japan will not give up the biggest, most lucrative auto market in the world.

H.R. 5133 will lead to productive investment in the United States. Construction workers, transportation workers, the steel, glass, rubber, textile, basic metals, and electrical industries-all will benefit from this legislation when the Japanese auto companies shift their capital investment to the United States. The positive jobs impact of this legislation will be enormous. If even half as many jobs are created by H.R. 5133 as the UAW predicts, it would be the greatest economic achievement of the Federal Government in the last 5 years.

It is true that the Congressional Budget Office disputes the UAW's estimates. But examine the flaws in CBO's analysis. CBO's conclusions are based on five totally unrealistic assumptions.

First. The import share of the market will fall from where it stands today even if the bill is not passed.

CBO based its projections on a comparison of the U.S. economy in 1990 with a content law and without. CBO assumed that without a content law, the import share of our market would be 25 percent, a figure lower than their current share. By contrast, Merrill Lynch Economics predicts a 40-percent import share in 1990 without a content law.

This assumption falsely cuts the bill's job saving potential in half.

Second. U.S. companies' foreign sourcing would not be affected by H.R. 5133.

CBO ignores all jobs saved by preventing U.S. producers from outsourcing parts production and from importing Japanese vehicles in joint ventures. Each of the Big Three currently has plans which would bring their content below 90 percent by 1990, at the cost of thousands of U.S. jobs.

Third. Japanese companies will not increase their investment in the United States.

CBO assumes that Toyota and Datsun would give up their current market share—576,491 and 464,805 units, respectively—and fall below the 100,000 unit threshold.

This does not square with the experience of other foreign manufacturers—Honda, VW, and Renault—who have made substantial investments in U.S. facilities.

The Japanese companies have dealer networks, huge marketing investments, and years of experience in the United States. They will not walk away from the world's largest, most profitable auto market.

Jobs will be created in construction, manufacturing, assembly, in the parts and supplier industries, in transportation, and so forth. These will more than make up for jobs lost by importers and dockworkers.

Fourth. The United States will suffer massive, worldwide retaliation.

CBO assumes that European contries and Japan will refuse our agricultural and industrial exports, at the cost of 104,000 jobs. As I explained earlier, this is nothing but raw, unsupportable speculation. When CBO alternately assumed no retaliation, it concluded that the effects of the bill would be positive.

Fifth. CBO predicts H.R. 5133 would

raise car prices by 6 percent.

Because they predict the Japanese will abandon the United States, reducing competition and removing one-half million cars from the market, CBO believes prices would be inflated artifically.

In fact, there will be plenty of competition, and prices will not rise artificially. Recent experience is instructive. Since Japanese imports were capped "voluntarily" early in 1981, prices have increased at a rate less than one-half the inflation rate: 3 versus 6 percent.

Mr. Chairman, I believe that CBO's analysis of this legislation rivals their bright predictions of the success of Mr. Reagan's so-called economic recovery program early last year as the worst job of economic forecasting ever performed by a Federal agency. If CBO had been right, we would not need legislation like H.R. 5133 today.

In closing, I would like to remind my colleagues that, although H.R. 5133 will affect the major Japanese auto

companies most directly, its restrictions apply equally to the major U.S. auto producers. H.R. 5133 is not a bill to protect badly managed multinational corporations. It is a bill to protect American workers at a time of depression-level unemployment, to protect communities all around the country from disastrous plant closings, and to protect a dangerously shrinking American industrial base. As the attached story from the New York Times vividly industrial base. As the attached story from the New York Times vividly demonstrates, the threat to American jobs does not come solely from Japan. It comes from multinational investment decisions which ignore human and social costs in search of cheap wages. H.R. 5133 will put this Congress on record, clearly and forcefully, as putting people first.

I urge you to support H.R. 5133.

The story follows:

(From the New York Times, July 25, 1982)
U.S. Auto Makers Using More Mexico
Plants

#### (By Iver Peterson)

Nogales, Mexico, July 18.—Detroit's automobile companies, like other American manufacturers, are setting up an increasing number of plants in border towns like this one where American-made materials are assembled into finished products by inexpensive Mexican labor.

The goods assembled in these plants, which the Mexicans call maquilas, are then brought back to the United States under special low tariff rates.

As the United States recession has deepened and some 10 million Americans, including a quarter million auto workers, have lost their jobs, the number of employees in the maquilas grew to 128,000 by June 1981 from 91,000 in 1979, a 40 percent increase. The number of plants, meanwhile, grew from 459 to 604, according to the Commerce Department's latest figures.

Calculators, clothing, suitcases, sunglasses and a host of other items requiring hand assembly flow from the plants back into the United States, with automotive components and subassemblies a growing part of the total.

General Motors opened its first border plant in Cludad Juárez in 1979, and began hiring for its 10th one, there and elsewhere, a few weeks ago. It now employs about 5,300 Mexican workers. They assemble wiring harnesses, motor magnets, turn signal stalks and numerous other auto components.

Ford, making interior trim, employs 180 at its plant in Cludad Juárez. Chrysler, assembling wire harnesses, also has an 800-employee operation there.

And American Motors, through its subsidiary, Coleman Products Inc., joined Caterpillar Tractor, Samsonite luggage and Foster Grant sunglasses, among others, here in Nogales last March when it hired its first crew of young Mexican workers to cut and wrap wiring harnesses.

American labor unions have attacked these operations as "runaway plants" that are no less exporters of United States jobs than the foreign imports that American corporations have appealed to Washington to curtail

"There was no great need for them to cut the corner on the dollar as long as times were good," said Rex Hardesty, the AFL-CIO's Washington spokesman. "But they make a grab for the coolle wages as soon as things get tight and it becomes cost-effective for them to do so."

But the corporations contributing to the boom in maquilas, an untranslatable term whose root is Spanish for "machine," argue that American labor costs are out of line with world competition, that many Americans will not perform the tedious, unskilled handwork to which the maquilas are limited by law, and that the Mexican plants provide an outlet for American materials while aiding Mexico's economy.

"We have observed over the past five years that the cost of our products were becoming less competitive in the world market," said James Tolley, a spokesman for American Motors, expressing a view similar to that of other auto makers. "We therefore established a strategy to continue to operate U.S. plants, but to expand in Mexico to average our cost downward."

#### REPUSAL TO DISCLOSE WAGES

American Motors refused to disclose the wage rates at its plant here, terming the information a "proprietary" secret. But employees of Coleman Products de Mexico, interviewed on their lunch break at the Parque Industrial a few miles south of here, said they received 2,400 Mexican pesos, about \$50, for a 48-hour week, which works out to slightly more than \$1.04 an hour.

American Motors also refused to disclose pay levels at its two Coleman Products plants in the United States, in Coleman, Wis., and Iron River, Mich. Both plants, in small, rural towns, have twice rejected affiliation the United Automobile Workers, whose members in manufacturing jobs earn upward of \$12 an hour and whose benefits push the total hourly labor to add another \$8 an hour to that.

Company officials insisted that the Mexican plant did not take United States jobs because its two plants there were operating at capacity.

The maquilas operate under strict regulations on both sides of the border. The Mexican Government allows the United States company to import, tax-free, the machinery and raw material needed to perform the work provided that the finished product and everything else, including the machinery and even packing crates, is eventually reexported to the United States.

United States tariff regulations, meanwhile, exempt these imported products from all duties except for the value of the Mexican labor added to it. In 1978, the last year for which the Commerce Department has assembled the figures, this amounted to \$12.7 billion.

Mexico is the main location for such operations by United States companies, but the system also operates extensively elsewhere, including the Caribbean, where Americanwoven and cut fabrics are sewn into clothes.

The legislative principles behind the duty exemptions for all but the value of labor added outside the country date from the 18th century in United States tariff law. They hold that materials whose production has already been taxed at its origins in the United States should not be subject to new levies upon being brought back after assembly or finishing abroad.

Mexico encourages the plants because they reduce this country's enormous pool of surplus labor at minimal but decent wages by local standards.

The CHAIRMAN. The question is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule. the Committee rises.

Accordingly the Committee rose; and the Speaker pro tempore (Mr. WRIGHT) having assumed the chair, Mr. PANETTA, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 5133) to establish domestic content requirements for motor vehicles sold in the United States, and for other purposes, pursuant to House Resolution 622, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER pro tempore. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment

The amendment was agreed to.

The SPEAKER pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

#### MOTION TO RECOMMIT OFFERED BY MR. BROYHILL

Mr. BROYHILL. Mr. Speaker. I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. BROYHILL, I am, Mr. Speaker. The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. BROYHILL moves to recommit the bill, H.R. 5133, to the Committee on Energy and Commerce and the Committee on Ways and

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit. The motion to recommit was reject-

The SPEAKER pro tempore. The question is on the passage of the bill. The question was taken; and the Speaker pro tempore announced that

the ayes appeared to have it. Mr. FRENZEL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device and there were-yeas 215, nays 188, not voting 30, as follows:

Alexander Badham Beard Blanchard Bolling Brown (CA) Brown (OH) Burton, John Clausen Coyne, James

Pursell Daschle Rhodes Emery Schroeder Findley Schulze Forsythe Shuster Goldwater Stokes Hagedorn Tauke Yates LeBoutillier Voung (AK) Zeferett

The Clerk announced the following pairs:

On this vote:

Mr. Blanchard for, with Mr. Tauke against

Mr. Alexander for, with Mr. Badham against.

Mr. Stokes for, with Mr. Clausen against. Mr. John L. Burton for, with Mr. Beard

Mr. SCHEUER changed his vote from "nay" to "yea."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

#### GENERAL LEAVE

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the bill just passed.

The SPEAKER pro tempore. (Mr. BREAUX). Is there objection to the request of the gentleman from New REPORT ON RESOLUTION PRO-YORK? VIDING FOR CONSIDERATION

There was no objection.

Mr. OTTINGER. Mr. Speaker, I ask unanimous consent that all Members may revise and extend their remarks and include extraneous materials at the point where their remarks appear in the debate.

The SPEAKER pro tempore. there objection to the request of the gentleman from New York?

There was no objection.

# REPORT ON REPORT OF COM-MITTEE ON PUBLIC WORKS AND TRANSPORTATION

Mr. Howard, from the Committee on Public Works and Transportation, submitted a privileged report (Rept. No. 97-968) on the Report of the Committee on Public Works and Transportation, together with additional views, minority views, and additional minority views, on the congressional proceedings against Anne M. Gorsuch, Administrator, U.S. Environmental Protection Agency, for withholding subpenaed documents relating to theComprehensive Environmental Response. Compensation, and Liability Act of 1980, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PRO-VIDING FOR CONSIDERATION H.R. 7397, CARIBBEAN BASIN ECONOMIC RECOVERY ACT

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 97-969) on the resolution (H. Res. 629) providing for the consideration of the bill (H.R. 7397) to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin region, which was referred to the House Calendar and ordered to be reprinted.

REPORT ON RESOLUTION PROVIDING FOR THE CONSIDER-AT!ON OF H.R. 3191, MODIFICA-TION OF NORTH AMERICAN CONVENTION TAXES AND TAX RULES

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 97-970) on the resolution (H. Res. 630) providing for the consideration of the bill (H.R. 3191) to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions which was referred to the House Calendar and ordered to be printed.

OF S. 1965, DESIGNATING CER-TAIN AREAS IN MISSOURI AS COMPONENTS OF NATIONAL PRESERVATION WILDERNESS SYSTEM

Mr. PEPPER, from the Committee on Rules, submitted a privileged report (Rept. No. 97-971) on the resolution (H. Res. 631) providing for the consideration of the Senate bill (S. 1965) to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System, which was referred to the House Calendar and ordered to be printed.

#### LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I ask for this 1 minute for the purpose of receiving the legislative schedule for tomorrow and hopefully as much of the balance of the week as possible.

Mr. WRIGHT. Mr. Speaker, will the gentleman from Mississippi (Mr. LOTT), the acting minority leader, yield?

Mr. LOTT. I yield to the gentleman

from Texas.

Mr. WRIGHT. I thank the gentleman for yielding.

We plan to come in at 10 o'clock tomorrow, our legislative business for

today having been finished.

We have four conference committee reports. The District of Columbia Appropriations; the Transportation Appropriations, the Futures Trading Act of 1982; and the Maritime Authorizations.

In addition to that, there is a modified 1 hour rule on the Mark Twain National Forest in Missouri, otherwise known as the Irish Wilderness bill.

A modified rule 1 hour of debate on Paddy Creek Wilderness in Missouri.

And a modified rule with 1 hour of debate on Modifications of North American Convention Tax Rules.

Then we hope to take up the Immigration Reform Act, H.R. 7357. As the gentleman knows, that is a modified rule allowing 5 hours of general debate. We would expect to do the rule and general debate only tomorrow. Members need to be aware that the EPA Contempt of Congress question can be considered at any time. That is a highly privileged matter. I am informed that the gentleman from New Jersey, the chairman of the Public Works Committee, may expect to seek recognition for the purposes of bringing that up early tomorrow. So that is at the discretion of the gentleman from New Jersey, the chairman of the Committee on Public Works and Transportation, and the chair who would recognize him for that priviledged motion

Conference reports of course may be brought up at any time. While we do not have any reason to expect the conference report necessarily tomorrow on the continuing appropriation, hope springs eternal, and we may continue to hope if it does not come tomorrow, then perhaps the following day, and if not then perhaps the following day. But eventually we will get to that.

Mr. LOTT. If I could get clarification. Did I understand the distinguished majority leader properly when he said we would have the rule and debate and votes on the Paddy Creek, the Irish Wilderness, and the Love

Mr. WRIGHT. I think the answer to the gentleman's question is yes, though I am looking for the Love Boat

Mr. LOTT. That was No. 7. That is the tax deduction feature.

Mr. WRIGHT. I am sorry, I cannot find it. If the gentleman desires to refer to one of these bills by that terminology, I shall not quarrel with him.

Mr. LOTT But the gentleman does expect to take up those three to completion, one way or the other.

Mr. WRIGHT. Yes; we hope to do that.

We do not expect to complete the Immigration tomorrow.

Mr. LOTT. Just the rule and general debate.

Mr. WRIGHT. That is correct. Any further program to be announced later. The Caribbean Basin Initiative bill has been granted a rule by the Rules Committee, and that will come to us probably on Friday, but we will have to see.

Mr. LOTT. I thank the gentleman.

#### □ 1930

#### FORTY YEARS AGAINST THE TIDE

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, on the evening of November 17, 1982, the Honorable Carl T. Curtis received the 20th Annual Distinguished Nebraskan Award bestowed by the Nebraska Society of Washington, D.C. To most Ne-braskans, Senator Curtis' award was long overdue.

Carl T. Curtis served in the Congress from January 3, 1939, to January 3, 1979, which is longer than any other Nebraskan has ever served in the Congress or in any statewide elected office.

Over a period of 30 years, Senator Curtis introduced an amendment to the Constitution to compel a balanced Federal budget and provide a pay-asyou-go basis.

In 1956, the Senator brought about the appointment of a commission on industrial uses of agricultural surpluses. This gave the first important emphasis to gasohol. He authored the law which exempts motor fuel containing 10 percent or more of alcohol from the Federal gasoline tax.

Senator Curtis introduced the resolution for a survey of the Missouri River. This led to the authorization of the Army Engineers-Bureau of Reclamation plan of 1944 for the Missouri River and its tributaries—also known as the Pick-Sloan Plan. Under this plan 20 dams and 8 irrigation districts have been built in Nebraska, plus bank improvements and local protective works for which Senator Curtis was the chief sponsor or a cosponsor. This development has added greatly to Nebraska's recreation and fishing opportunities.

The Senator is the author of the Individual Retirement Act. In 1974 Congress passed and President Richard M. Nixon signed the act which contained the Curtis Individual Retirement Act, which has become known as IRA.

The investigation and the report of the Curtis Subcommittee on Social Security in 1953 and 1954 was the first alert of the impending financial problems of the system. He became a leading authority on social security. His was a battle to make social security financially sound and responsible.

Numerous provisions of our tax law bear his imprint, such as making soil conservation expenses tax deductible, capital gains treatment for livestock, benefits for education and charity, the meat import law, industrial development bonds, gasohol, IRA, and the 1976 Federal estate tax reduction—the first in four decades.

A researcher of the Curtis files estimated that this office handled more than 17,000 individual cases for Nebraskans who had problems in Washington.

Senator Curtis is the author of "To Remind," a daily devotional book currently being published. He is now writing a book entitled, "40 Years Against the Tide," which is the history of the development of the welfare state from the viewpoint of one who opposed it.

As a Member of Congress from the State of Nebraska, I am proud to know Senator Curtis as both a mentor and a friend. His distinguished service to Nebraska and to America has been an inspiration to all of us who aspire to elected political office.

Today, I want to pay tribute to Senator Curtis and to his lovely wife, Mildred, as they plan to return to their native State for retirement.

### FORTY YEARS AGAINST THE TIDE

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, I wish to associate myself with the remarks of the gentleman from Nebraska on the Honorable Carl T. Curtis.

#### GORSUCH CONTEMPT CITATION

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, on Friday, December 10, 1982, the Committee on Public Works and Transportation approved a resolution recommending that the Administrator of the Environmental Protection Agency be found in contempt of Congress for failure to produce documents subpenaed on November 22, 1982, by the committee's Subcommittee on Investigations and Oversight. The November 22 subpena was issued in connection with the subcommittee's investigation into the contamination of the Nation's water resources by hazardous chemical wastes.

A number of members of the committee, including myself, were not able to support the committee's recommendation because it was not the product of careful, independent congressional deliberation.

It is my understanding that the committee will file its report today and that this matter could come up on the House floor shortly. Therefore, in order that Members be as informed as possible under the circumstances, I am inserting in the Record a copy of the minority views which accompanied the committee report, as well as a copy of attachment A, Legal Opinion of the Attorney General; and attachment B, DOJ Memorandum Responding to the Legal Memorandum of the General Counsel of the Clerk of the House.

MINORITY VIEWS OF REPRESENTATIVES CLAUSEN, SNYDER, HAMMERSCHMIDT, GOLDWATER, HAGEDORN, STANGELAND, CLINGER, GINGRICH, SOLOMON, HOLLENBECK, DECKARD, GRISHAM, JEFFRIES, FIELDS, SHAW, MCEWEN, WOLF AND ATKINSON

The undersigned Members of the Committee on Public Works and Transportation are unable to support the recommendation contained in the foregoing Report that the Administrator of the Environmental Protection Agency, Anne M. Gorsuch, be cited for contempt of Congress for failure to produce documents subpoenaed on November 22, 1982, by the Committee's Subcommittee on Investigations and Oversight in connection with its investigation into the contamination of the Nation's water resources by hazardous chemical wastes.

At the outset, we want to emphasize our strong support for the Subcommittee's efforts to review and study the effectiveness of the Superfund law and the manner in which it is being implemented by the Environmental Protection Agency. The Subcommental Protection Agency.

mittee's inquiry, in our view, is extremely important and most appropriate to assure that the Superfund law is working and being administered to the fullest intent of the Congress.

We also support, as a general matter, the efforts of the Subcommittee to gain access to EPA's enforcement related files. Congress cannot legislate wisely or effectively in the absence of information respecting the conditions which the legislation is intended to affect or change. For this reason, Congress has the power to compel the production of information needed for the efficient exercise of the legislative function.

While we support the concept of requiring EPA to produce documents necessary for the Subcommittee's investigation, we cannot support the Committee's hasty and ill-conceived action in recommending that Administrator Gorsuch be found in contempt of Congress for falling to produce all of the documents subpoenaed by the Subcommittee on November 22, 1982.

Our principal reason for not supporting the Committee's recommendation is that it is not the product of careful, independent Congressional deliberation. Instead, the resolution was called up with only two days notice to the Full Committee. This procedure did not give Members a chance to adequately study the issues or to fully explore options for resolving the dispute.

We believe that this unfortunate confrontation was unnecessary and could have been avoided. We had presumed all along that the Committee was interested in obtaining the documents in question, rather than to find Administrator Gorsuch in contempt of Congress.

In determining the wisdom and propriety of citing the EPA Administrator for contempt, we believe that a number of factors should be considered.

1. The power of Congress to find someone in contempt is an extraordinary power, and should not be used without clear reason to do so.

It is important to understand the full effect of citing the EPA Administrator for contempt. If the House cites Ms. Gorsuch for contempt, the appropriate U.S. attorney is required by statute (2 U.S.C. 194) to bring the matter before the grand jury for its action. Ultimately, Ms. Gorsuch could be subject to a criminal fine of not less than \$100 nor more than \$1000 and imprisonment for not less than one month nor more than 12 months.

This is an extremely serious matter, and one which should have received careful consideration. Yet the Full Committee was given only two days notice of the meeting. This simply was not sufficient time for the Members of the Full Committee who are not on the Investigations and Oversight Subcommittee to review the facts of this case, or to research the extremely complex issues and precedents involved.

Furthermore, the Full Committee meeting itself was brief, and efforts to offer alternatives or to discuss the implications of the proposed actions were given short shrift. In fact, the Ranking Minority Member of the Committee was not even allowed to finish his opening statement. In addition, a motion to postpone the final vote until Wednesday, December 15th, so that members could have time to study the issues, was rejected solely along party lines.

2. The Committee's action fails to recognize that EPA has agreed to turn over to the Subcommittee a substantial amount of information. Administrator Gorsuch agreed to

provide approximately three-quarters of a million pages of enforcement file documents for the Investigations and Oversight Subcommittee, relative to 160 hazardous waste sites, including all technical and factual data and much confidential material. Neither she nor any other official of the Administration has contested the Subcommittee's authority to request and receive information relative to its oversight and investigatory tasks.

3. The Committee's action fails to recognize that the President directed Ms. Gorsuch to withhold the documents. With respect to the documents at issue, the Administrator been specifically directed, by order of the President of the United States, dated November 30, 1982, that "sensitive documents found in open law enforcement files should not be made available to Congress" on the grounds that "dissemination of such documents outside the Executive Branch would impair . . . [the President's] solemn responsibility to enforce the law."

The President's decision and order to the Administrator of the Environmental Protection Agency was based upon the legal opinion of the highest ranking legal officer of the United States Government, an opinion and order which the Administrator has no

standing to reject.

4. The Committee did not exhaust all means of resolving the dispute before resorting to the contempt citation. We are convinced that this dispute could have been avoided if the Committee had not rushed into the contempt proceeding but instead had taken the time to consider all alternative ways to resolve the problem. This can be best illustrated by a few examples.

First, prior to the Full Committee meeting, White House officials asked to meet the Full Committee Chairman and Ranking Minority Member. The meeting

was not held.

Second, White House officials offered to show the Chairman and Ranking Minority Member a sampling of the withheld documents so that they could better understand the Administration's position matter. This overture was rejected. on

Third, a compromise proposal was offered which would have given the U.S. District court in the District of Columbia the jurisdiction to determine the validity of the Subcommittee's subpoena. White House offi-cials indicated that the Administration would not only support this legislation but would work in the House and Senate to enact it during the lame duck session. This proposal was rejected.

And fourth, the Administration, in responding to a compromise proposal made by the Subcommittee Chairman, offered a counter proposal in a leter dated December 9, 1982. No formal response was made to the Administration's proposal prior to the Full Committee meeting to cite Ms. Gorsuch for

contempt.

5. The legal issues involved in this matter are extremely complex and should have been analyzed more carefully. Members of the Committee did not have sufficient time, in our view, to review the competing arguments and to form an independent judgment on the merits of the issue.

Stated simply, the Subcommittee Chairman seems to be of the view that the Subcommittee has a right to all of EPA's records and that staff should be given complete access to EPA's files, including the right to copy any documents it wants. It is alleged that the Legal Memorandum dated December 8, 1982 from the General Counsel to the Clerk supports this position. A copy of this memorandum is included in the Majority Report.

The Administration, on the other hand, disputes that Congress has an automatic right to each and every document in EPA's files. The Attorney General of the United States has taken the position that it is not in the public interest for sensitive documents found in open law enforcement files to be given to Congress or its committees except in extraodinary circumstances.

(A copy of the Attorney General's opinion is attached (Attachment A). Also attached is a copy of a DOJ legal memorandum responding to the Legal Memorandum of the General Counsel to the Clerk of the House (Attachment B) and a DOJ memorandum outlining the history of Presidential invocations of executive privilege vis-a-vis Congress (Attachment C)).

The cases construing executive privilege are very limited and no controlling judicial precedent exists governing attempts by a committee of Congress to obtain materials from the Executive Branch. That is, the Supreme Court has yet to be called upon to resolve the question of the respective rights of the Executive and Legislative Branches in regard to a claim of privilege as a defense to compulsory legislative process for documents residing within the Executive

In our view, these conflicting legal opinions should have been more carefully analyzed before the Committee proceeded to cite an executive Branch official for con-

6. The Committee's action fails to adequately consider EPA's contention that ongoing enforcement cases might be jeopardized. While we are in agreement that the Congress has a legitimate right to information which it needs to carry out its oversight and investigative responsibilities, we are concerned over EPA's allegation that disclosure of certain files might jeopardize ongoing enforcement actions. The issue is certain documents in open law enforcement files. They are at the stage where EPA and or the Justice Department are developing cases for prosecution, or are actually in the enforcement process by U.S. attorneys. What the Committee is saying-by going forward with the contempt resolution-is that these documents, despite their sensitive nature and despite the fact that criminal prosecutions could be jeopardized, must be made available to the staff of this Committee, the Members of this Committee and—by the Rules of the House—to all House Members. We are not sure that we are prepared to go this far at this time. The issue is far more complex than it seems on the surface, and we have not had sufficient time nor information to form a judgment. We do believe that the Committee should have availed itself of the Administration's offer to look at some of the documents so that we could better evaluate EPA's claim with respect to these documents.

7. The Committee's action fails to recognize certain potential problems with respect to enforcement of the subpoena issued on November 22, 1982. If the House cites Ms. Gorsuch for contempt, the matter will be turned over to the U.S. attorney for criminal prosecution. It is, therefore, relevant to consider potential problems that might come up with respect to the subpoena.

First, the subpoena is extremely broad, and this could become an important factor in a criminal prosecution for failure to comply. The subpoena requests that virtually all documents created since December 11. 1980, petaining to 160 hazardous waste sites be turned over to the Subcommittee. EPA has estimated that would require the location, segregation, duplication and shipping of more than 787,000 pages of documents.

Second, EPA has stated that the subpoena is technically defective. Since the Agency has so far only issued an interim priority list, not Under Section 105(8) (B), the subpoena does not apply to any documents in the possession or custody of EPA. No sites have been listed under section 105(8) (B).

Third, we are concerned the Committee has not yet reviewed the material which Ms. Gorsuch was prepared to turn over to the Subcommittee. According to EPA, she withheld only a small fraction of the total documents demanded by the Subcommittee; moreover, no factual or technicial materials are being withheld from Congress-only enforcement strategy such as analyses of strengths and weaknesses of the Govern-ment's case. It seems to us that the Committee's case would be much stronger if we reviewed the materials which EPA did provide us before we conclude that there is a compelling need for us to have access to the remaining documents.

In conclusion, we have serious reservations about the wisdom and propriety of the Committee's recommendation to cite the Administrator of the Environmental Protection Agency, Anne M. Gorsuch, for con-tempt of Congress. We are, therefore, unable to support the Committee's recom-mendation at this time.

Our principal reason for not supporting the contempt citation is that we feel that this matter was rushed through the Committee without adequate time to study the complex legal and factual issues involved. Stated simply, a number of us feel that we do not have sufficient information to make a reasoned decision.

We also believe that this confrontation was unnecessary and could have been avoided had more time been taken at the Full Committee to evaluate various alternatives and options.

And finally, we note that this approach, that is, bringing criminal charges against Ms. Gorsuch, will not necessarily result in the documents being made available to the Committee. We believe that the Commit-tee's focus should have been to obtain the documents in question, rather than concentrating on citing Administrator Gorsuch in contempt of Congress.

#### [Attachment A]

OFFICE OF THE ATTORNEY GENERAL Washington, D.C., November 30, 1982. Hon. ELLIOTT H. LEVITAS,

Chairman, Subcommittee on Investigations and Oversight, Committee on Public Works and Transportation, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I have had occasion to reiterate, in the attached letter to Chairman Dingell of the Subcommittee on Oversight and Investigations of the House Committee on Energy and Commerce, the historic position of the Executive Branch that it is not in the public interest for sensitive documents found in open law enforcement files to be given to Congress or its committees except in extraordinary circumstances. I am aware that your Subcommittee has issued to Administrator Gorsuch of the Environmental Protection Agency ("EPA") a subpoena apparently seeking copies of some 787,000 documents found in open law enforcement files related to approximately 160 hazardous waste sites located throughout the United States. At least 23 and probably more documents covered in your Subcommittee's subpoena are of that class covered by my letter to Chairman Dingell, since they reflect prosecutorial strategy and other internal deliberations regarding prosecution of the particular cases involved.

Because the principles articulated in the attached letter to Chairman Dingell are fully applicable to some of the documents arguably within the scope of your Subcommittee's subpoena, I believe it appropriate to provide you with a copy of that letter at this time. Because neither I nor my staff have previously communicated directly with you on this particular matter, I would also like to express my hope that, after you have had the benefit of my views on this issue, set in their historical perspective, you will no longer seek to compel production of this class of documents from the Administrator. Should you wish to discuss this matter further prior to the Subcommittee's scheduled December 2 hearing, I would ask that you contact Assistant Attorney General McConnell of my Office of Legislative Affairs at your convenience.

I would also add that I am confident that the legislative needs of your Subcommittee can be met without the production by the Administrator of sensitive documents in open law enforcement files. That is certainly the lesson that history teaches, and I be-lieve you will agree that it is incumbent on both of our Branches to avoid constitutional confrontations so long as the needs and prerogatives of each Branch can be harmo-

Sincerely, WILLIAM FRENCH SMITH, Attorney General.

OFFICE OF THE ATTORNEY GENERAL Washington, D.C. November 30, 1982. Hon. JOHN D. DINGELL,

Chairman, Subcommittee on Oversight and Investigations, Committee on Energy and Commerce, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: This letter responds to your letter to me of November 8, 1982, in which you, on behalf of the Subcommittee on Oversight and Investigations of the Committee on Energy and Commerce of the House of Representatives, continue to seek to compel the production to your Subcommittee of copies of sensitive open law enforcement investigative files (referred to herein for convenience simply as "law enforcement files") of the Environmental Protection Agency ("EPA"). Demands for other EPA files, including similar law enforcement files, have also been made by the Subcommittee on Investigations and Oversight of the Public Works and Transportation Committee of the House of Representatives.

Since the issues raised by these demands and others like them are important ones to two separate and independent Branches of our Nation's Government, I shall reiterate at some length in this letter the longstanding position of the Executive Branch with respect to such matters. I do so with the knowledge and concurrence of the Presi-

As the President announced in a memorandum to the Heads of all Executive Departments and Agencies on November 4, 1982, "[t]he policy of this Administration is to comply with Congressional requests for information to the fullest extent consistent with the constitutional and statutory obliga-

of the Executive Branch. [E]xecutive privilege will be asserted only in the most compelling circumstances, only after careful review demonstrates that assertion of the privilege is necessary." Nevertheless, it has been the policy of the Executive Branch throughout this Nation's history generally to decline to provide committees of Congress with access to or copies of law enforcement files except in the most extraordinary circumstances. Attorney General Robert Jackson, subsequently a Justice of the Supreme Court, restated this position to Congress over forty years ago:

"It is the position of [the] Department [of Justicel, restated now with the approval of and at the direction of the President, that all investigative reports are confidential documents of the executive department of the Government, to aid in the duty laid upon the President by the Constitution to 'take care that the laws be faithfully executed, and that congressional or public access to them would not be in the public interest.

"Disclosure of the reports could not do otherwise than seriously prejudice law en-forcement. Counsel for a defendant or prospective defendant, could have no greater help than to know how much or how little information the Government has, and what witnesses or sources of information it can rely upon. This is exactly what these reports are intended to contain.

This policy does not extend to all material contained in investigative files. Depending upon the nature of the specific files and the type of investigation involved, much of the information contained in such files may and is routinely shared with Congress in response to a proper request. Indeed, in response to your Subcommittee's request considerable quantities of documents and factual data have been provided to you. The EPA estimates that approximately 40,000 documents have been made available for your Subcommittee and its staff to examine relative to the three hazardous waste sites in which you have expressed an interest. The only documents which have been withheld are those which are sensitive memoranda or notes by EPA attorneys and investigators reflecting enforcement strategy, legal analysis, lists of potential witnesses, settlement considerations and similar materials the disclosure of which might adversely affect a pending enforcement action, overall enforcement policy, or the rights of individuals.

I continue to believe, as have my predecessors, that unrestricted dissemination of law enforcement files would prejudice the cause of effective law enforcement and, because the reasons for the policy of confidentiality are as sound and fundamental to the administration of justice today as they were forty years ago, I see no reason to depart from the consistent position of previous presidents and attorneys general. As articulated by former Deputy Assistant Attorney General Thomas E. Kauper over a decade ago:

"The Executive cannot effectively investigate if Congress is, in a sense, a partner in the investigation. If a congressional committee is fully apprised of all details of an investigation as the investigation proceeds, there is a substantial danger that congressional pressures will influence the course of the investigation."

Other objections to the disclosure of law enforcement files include the potential damage to proper law enforcement which would be caused by the revelation of sensitive techniques, methods or strategy, con-cern over the safety of confidential informants and the chilling effect on sources of information if the contents of files are widely disseminated, sensitivity to the rights of innocent individuals who may be identified in law enforcement files but who may not be guilty of any violation of law, and well-founded fears that the perception of the integrity, impartiality and fairness of the law enforcement process as a whole will be damaged if sensitive material is distributed beyond those persons necessarily involved in the investigation and prosecution process. Our policy is premised in part on the fact that the Constitution vests in the President and his subordinates the responsibility to "take care that the Laws be faithfully executed". The courts have repeatedly held that "the Executive Branch has exclusive authority and absolute discretion to decide whether to prosecute a case . . . ." Un States v. Nixon, 418 U.S. 683, 693 (1974).

The policy which I reiterate here was first expressed by President Washington and has been reaffirmed by or on behalf of most of our Presidents, including Presidents Jefferson, Jackson, Lincoln, Theodore Roosevelt, Franklin Roosevelt, and Eisenhower, I am aware of no President who has departed from this policy regarding the general confidentiality of law enforcement files.

I also agree with Attorney General Jackson's view that promises of confidentiality by a congressional committee or subcommittee do not remove the basis for the policy of nondisclosure of law enforcement files. As Attorney General Jackson observed in writing to Congressman Carl Vinso, then Chairman of the House Committee on Naval Affairs, in 1941:

"I am not unmindful of your conditional suggestion that your counsel will keep this information 'inviolate until such time as the committee determines its disposition.' have no doubt that this pledge would be kept and that you would weigh every consideration before making any matter public. Unfortunately, however a policy cannot be made anew because of personal confidence of the Attorney General in the integrity and good faith of a particular committee chairman. We cannot be put in the position of discriminating between committees or of attempting to judge between them, and their individual members, each of whom has access to information once placed in the hands of the committee.

Attorney Deputy Assistant Attorney General Kauper articulated additional considerations in explaining why congressional assurances of confidentiality could not overcome concern over the integrity enforcement files:

"[S]uch assurances have not led to a relaxation of the general principle that open investigative files will not be supplied to Congress, for several reasons. First, to the extent the principle rests on the prevention of direct congressional influence upon investigations in progress, dissemination to the Congress, not by it, is the critical factor. Second, there is the always present concern, often factually justified, with 'leaks.' Third, members of Congress may comment or publicly draw conclusions from such documents, without in fact disclosing their contents.

It has never been the position of the Executive Branch that providing copies of law enforcement files to congressional commit-tees necessarily will result in the docu-ments' being made public. We are confident that your Subcommittee and other congressional committees would guard such docu-ments carefully. Nor do I mean to imply that any particular committee would neces-

sarily "leak" documents improperly although, as you know, that phenomenon has occasionally occurred. Concern over potential public distribution of the documents is only a part of the basis for the Executive's position. At bottom, the President has a responsibility vested in him by the Constitution to protect the confidentiality of certain documents which he cannot delegate to the

Legislative Branch.
With regard to the assurance of confidential treatment contained in your November 8, 1982 letter, I am sensitive to Rule XI, cl. 2, § 706c of the Rules of the House of Representatives, which provides that "[a]ll committee hearings, records, data, charts, and files . . . shall be the property of the House and all Members of the House shall have access thereto. . . "In order to avoid the requirements of this rule regarding access to documents by all Members of the House, your November 8 letter offers to receive these documents in "executive session" pursuant to Rule XI, cl. 2, § 712. It is apparently on the basis of § 712 that your November 8 letter states that providing these materials to your Subcommittee is not equivalent to making the documents "public." But, as is evident from your accurate rendition of § 712, the only protection given such materials by that section and your understanding of it is that they shall not be made public, in your own words, "without the consent of the Subcommittee."

Notwithstanding the sincerity of your view that § 712 provides adequate protection to the Executive Branch, I am unable to accept and therefore must reject the concept that an assurance that documents would not be made public "without the consent of the Subcommittee" is sufficient to provide the Executive the protection to which he is constitutionally entitled. While congressional committee may disagree with the President's judgment as regards the need to protect the confidentiality of any particular documents, neither a con-gressional committee nor the House (or Senate, as the case may be) has the right under the Constitution to receive such disputed documents from the Executive and sit in final judgment as to whether it is in the public interest for such documents to be made public.1 To the extent that a congressional committee believes that a presidential determination not to disseminate documents may be improper, the House of Congress involved or some appropriate unit thereof may seek judicial review (see Senate Select Committee v. Nixon, 498 F.2d 725

1 Your November 8 letter points out that in my opinion of October 13, 1981 to the President, a pas-sage from the Court's opinion in *United States* v. Nixon, 418 U.S. 683 (1974), was quoted in which the word "public" as it appears in the Court's opinion was inadvertently omitted. That is correct, but the was indicted by on the significance you have attributed to it is not. The omission of the word "public" was a technical error made in the transcription of the final typewritten version of the opinion. This error will be corrected by inclusion of the word "public" in the official printed version of that opinion. However, the omission of that word was not material to the funda-mental points contained in the opinion. The reasoning contained therein remains the same. As the discussion in the text of this letter makes clear, I am unable to accept your argument that the provi-sion of documents to Congress is not, for purposes of the President's Executive Privilege, functionally and legally equivalent to making the documents public, because the power to make the documents public shifts from the Executive to a unit of Congress. Thus, for these purposes the result under United States v. Nixon would be identical even if the Court had itself not used the word "public" in the relevant passage.

(D.C. Cir. 1974)), but it is not entitled to be put in a position unilaterally to make such a determination. The President's privilege is effectively and legally rendered a nullity once the decision as to whether "public" release would be in the public interest passes from his hands to a subcommittee of Congress. It is not up to a congressional subcommittee but to the courts ultimately "'to say what the law is' with respect to the claim of ge presented in [any particular] United States v. Nixon, 418 U.S. at privilege 705, quoting Marbury v. Madison, 1 Cranch 137, 177 (1803).

I am unaware of a single judicial authority establishing the proposition which you have expounded that the power properly lies only with Congress to determine whether law enforcement files might be distributed publicly, and I am compelled to reject it categorically. The crucial point is not that your Subcommittee, or any other subcommittee, might wisely decide not to make public sensitive information contained in law enforcement files. Rather, it is that the President has the constitutional responsibility to take care that the laws are faithfully executed; if the President believes that certain types of information in law enforcement files are sufficiently sensitive that they should be kept confidential, it is the President's constitutionally required obliga-

tion to make that determination.2

These principles will not be employed to shield documents which contain evidence of criminal or unethical conduct by agency officials from proper review. However, no claims have been advanced that this is the case with the files at issue here. As you know, your staff has examined many of the documents which lie at the heart of this dispute to confirm that they have been properly characterized. These arrangements were made in the hope that that process would aid in resolving this dispute. Furthermore, I understand that you have not accepted Assistant Attorney General McConnell's offer to have the documents at issue made available to the Members of your Subcommittee at the offices of your Subcommittee for an inspection under conditions which would not have required the production of copies and which, in this one instance, would not have irreparably injured our concerns over the integrity of the law enforcement process. Your apparent rejection of that offer would appear to leave no room for further compromise of our differences on this matter

In closing, I emphasize that we have carefully reexamined the consistent position of the Executive Branch on this subject and we must reaffirm our commitment to it. We believe that this policy is necessary to the President's responsible fulfillment of his constitutional obligations and is not in any way an intrusion on the constitutional duties of Congress. I hope you will appreciate the historical perspective from which these views are now communicated to you and that this assertion of a fundamental right by the Executive will not, as it should not, impair the ongoing and constructive relationship that our two respective Branches must enjoy in order for each of us to fulfill

our different but equally important responsibilities under our Constitution.

Sincerely,

WILLIAM FRENCH SMITH, Attorney General.

U.S. DEPARTMENT OF JUSTICE. OFFICE OF LEGAL COUNSEL, Re Response to Legal Memorandum of the

General Counsel to the Clerk of the House of Representatives Regarding Executive Privilege.

MEMORANDUM FOR THE ATTORNEY GENERAL

On December 8, 1982, the General Counsel to the Clerk of the House of Representatives transmitted to Chairman Levitas of the Subcommittee on Investigation and Oversight of the House Committee on Public Works and Transportation a memo-randum (attached) (hereafter "General randum (attached) (hereafter Counsel Memorandum") responding to your November 30, 1982 letter to Chairman Dingell of the Subcommittee on Oversight and Investigation of the House Committee on Energy and Commerce dealing with the assertion of Executive Privilege over documents found in open law enforcement files. This memorandum will discuss the more substantial inaccuracies and mischar-acterizations in the General Counsel Memorandum. We will not in this memorandum attempt to restate or reconsider the analysis in your November 30 letter to Chairman Dingell, because the General Counsel Memorandum does not suggest the need to

Before responding to the specific points raised by the General Counsel Memorandum, certain general observations are in order. First, although the General Counsel Memorandum relies on or cites to 13 separate court decisions in support of the various propositions asserted, not a single one of those authorities deals with an assertion of Executive Privilege by the President in response to a subpoena issued by a congressional committee or even a claim of Executive Privilege against a Judicial Branch Subpoena. For some reason not disclosed in the General Counsel Memorandum, it does not even mention the major judicial authorities which do treat the subject of Executive Privilege. Thus, as is often our experience in these situations, the legal argument put forward by a congressional entity to counter the Executive's legal position on this issue fails to grapple with the extant judicial authority that is either directly in point, e.g., Senate Select Committee on Presidential Campaign Activities v. Nixon, 498 F.2d 725 (1974), or is highly relevant to the issues at hand, e.g., United States v. Nixon, 418 U.S. 683 (1974). Although such cases are relatively few in our jurisprudence, any responsible attempt to address the profoundly impor-tant issues presented by a confrontation such as the present one between the two coequal Branches must confront and attempt to apply available precedent.

Second, the main thrust of the General Counsel Memorandum consists of an explanation and defense of the constitutional basis for Congress' power to investigate generally and to investigate the Executive Branch specifically. Neither your letter of November 30, 1982 to Chairman Dingell, your opinion to the President of October 13, 1981 on the subject of Executive Privilege, nor any of the authorities authored in the Executive Branch upon which those documents rely have questioned in any way that Congress may appropriately empower its

It was these principles that were embodied in Assistant Attorney General McConnell's letters of October 18 and 25, 1982 to you. Under these princi-ples, your criticism of Mr. McConnell's statements made in those letters must be rejected. Mr. McCon-nell's statements represent an institutional viewpoint that does not, and cannot, depend upon the personalities involved. I regret that you chose to take his observations personally.

committees to investigate the Executive Branch's conduct of its duties and responsibilities. The challenge and responsibility in situations involving competing interests and obligations of the two coequal Branches is to attempt, to the extent possible, to balance the competing interests of the two Branches. The General Counsel Memorandum neither recognizes the Executive's constitutional prerogative nor attempts to balance the competing interests. Hence, because the General Counsel Memorandum essentially asserts the existence of general congressional powers which the Executive has not disputed, ignores the relevant legal authorities in favor of decisions largely irrelevant to the present dispute, and does not seriously address the need of the two Branches to accommodate the interests of the other, there is very little in the General Counsel Memorandum to which a response can be made.

Third, the General Counsel Memorandum contains no discussions of, and reflects no appreciation for, the principle of separation of powers which is fundamental to our Constitution and, of course, to the most basic understanding of the concept of Executive Privilege.1 The General Counsel Memorandum proceeds from the unstated premise that congressional power to investigate and to demand and receive documents in the possession of the Executive Branch is unlimited,2 irrespective of claims by the Executive that release of certain information by the Executive Branch to the Legislative Branch would impair the President's constitutional obligation to "take care that the Laws be faithfully executed." Art. II, Section 3. The Framers of our Constitution regarded the combination of the powers of government as "the very definition of tyranny." The Federalist, No. 47 (Madison). They were particularly concerned about the threat of combining the power to legislate and the power to execute the law. They agreed with Montesque that "there can be no liberty" "when the legislative and executive powers are united in the same person or

Furthermore, because the legislative power was so great, "where the legislative power is exercised by an assembly, which is inspired by a supposed influence over the people, with an intrepid confidence in its own strength; which is sufficiently numerous to feel all the passions which actuate a multitude, yet not so numerous as to be incapable of pursuing the objects of its passions, by means which reasons prescribe; it is against the enterprising ambition of this department that the people ought to indulge all their jealousy and exhaust all their precautions."—The Federalist, No. 48 (Madison).

Without some recognition of these principles, including the concept that there are limits on the power of the Legislative Branch and that there are functions which were deliberately vested in the Executive Branch and placed beyond the reach of the Legislative Branch, it is not possible to present an objective analysis of Executive

Privilege or its application to particular circumstances.3

These deficiencies in the General Counsel Memorandum can, we believe, be easily traced to the historical attitude of congressional counsel in these clashes between the two political Branches over access to documents. For example, counsel for the Senate Select Committee on Presidential Campaign Activities (the "Watergate" Committee) argued to the Court of Appeals in Senate Select Committee on Presidential Campaign Activities v. Nixon, supra, that the district court below had no authority to balance the competing interests of the Executive and Congress once that court had rejected the Executive's claim of an absolute privilege. But, as the Court of Appeals pointed out in its opinion, a prior decision of that same court, Nixon v. Sirica, 487 F.2d 700 (D.C. Cir. 1973), had already squarely rejected the proposition that either the Executive or Legislative Branches has any absolute rights in this area or that either could sit in final judgment of the rights implicated in any particular disputes. 498 F.2d at 729. Our point here is simple but important: because the General Counsel Memorandum makes no serious attempt to weigh the competing interests of the two Branches in the context of the present facts and circumstances, it is largely beside the point. What follows are specific rejoinders to points made in the General Counsel Memorandum which we believe to warrant comment.

#### 1. Characterization of the Executive's position

The General Counsel Memorandum mischaracterizes your position on two important points and proceeds, using the rhetorical "straw man" device, to refute positions which you have not asserted.

The General Counsel Memorandum states that your position is "that the information is beyond the reach of congressional subpoena power because it is 'sensitive' material in 'law enforcement files . . . ,'" (p. 1) and that your premise is that "Congress cannot subpoena material in law enforcement files." (p. 2) However, your position is much more limited—that the information at issue here is of a peculiar and special nature such that its disclosure would impair the President's ability to enforce the law and that such information need not be disclosed by the Executive absent extraordinary circumstances.

The only interest which has been asserted by the Legislature in seeing the material in such sensitive segments of files is identified in the General Counsel Memorandum as a 'right to see how the laws it passes are being administered and enforced, and whether those charged with responsibility [for enforcement] are adequately and properly performing their responsibility." (p. 3) The authority relied upon by the General Counsel Memorandum on this McGrain v. Daugherty, 273 U.S. 135 (1926), involved a subpoena issued to the brother of a former Attorney General. Nowhere in that case did the Supreme Court suggest that the subpoena power exercised in that by a congressional committee could have been used to obtain production of documents in open law enforcement files. Furthermore, the Court was careful to point out that the congressional investigation then underway for which the subpoena had been issued was based upon highly specific alleged acts of criminal misconduct and malfeasance in office by the former Attorney General. Id. at 150-52. Thus, not only did McGrain not involve a subpoena directed to the Executive, a characteristic, as noted above, common to all the judicial authority relied upon by the General Counsel Memorandum, but it involved a factual situation which arguably could constitute the kind of extraordinary circumstance contemplated by your opinion to the President of October 13, 1981 and your letter to Chairman Din-

gell of November 30, 1982.4 Next, the General Counsel Memorandum mischaracterizes and then rejects your position that the Committee's offer to receive the information in "executive session" does not eliminate the Executive Branch's constitutional concerns and that release under such circumstances effectively destroys the President's privilege. The General Counsel Memorandum states that your view of 'executive session proceedings . . . is nevertheless disturbing because it is based on a complete misunderstanding of the constitu-

tional basis for Congress' authority to re-ceive 'secret' information." (p. 1). Three responses to this segment of the General Counsel Memorandum come to mind. First, nowhere does the Memorandum challenge your position that once the documents are provided to a Committee, the President in fact and in law loses control to the extent that the Committee has, from that time forward, the unilateral right to make any use of the documents it sees fit to make. Instead, the Memorandum seems to view the issue as whether the power of the Committee to receive documents in executive session provides a "legal basis for pro-viding that information." The question is not, of course, whether there is or is not a legal basis for the President's deciding to provide this type of information to Congress certain circumstances. It is, rather, whether there is any legal entitlement in a Committee to receive such information if the President decides that it would be inconsistent with his constitutional responsibilities to furnish it in the specific circumstances surrounding a particular Committee request or subpoena. The General Counsel Memorandum seems to proceed from the proposition that, because Congress is constitutionally permitted to keep a secret, three separate but related non sequiturs follow:
(a) Congress and its staff will keep secret that which it is entitled to keep secret;5 (b)

<sup>&</sup>lt;sup>5</sup>The General Counsel Memorandum discusses the enumerated power of the Legislative Branch under the Constitution to maintain necessary secrecy. The Memorandum simply ignores that "the protection of the confidentiality of Presidential communications has similar constitutional underpin-United States v. Nixon, supra, 418 U.S. at

<sup>&#</sup>x27;The General Counsel Memorandum at 3 observes that your letter to Chairman Dingell of November 30, 1982 "does not discuss the congressional reach of investigatory power established by McGrain, and he does not distinguish it from the situation here." As indicated above, the legal point decided by McGrain-the enforceability of a congressional subpoena against a private person in the context of an investigation of alleged corruption in the Department of Justice-does not address the additional issues presented by a congressional suboena for documents in the Executive Branch. In addition, the facts in McGrain supporting the investigation are so obviously different from those present in the instant case that there is little need to draw a comparison. The Legislative Branch understandably and continuously quotes from McGrain because that decision expansively de-scribes Congress's investigative powers. However, the case is not otherwise germane to the present dispute.

During the December 2, 1982 hearing by the Investigations and Oversight Subcommittee of the

<sup>1 &</sup>quot;The privilege is fundamental to the operation of Government and inextricably rooted in the seps ration of powers under the Constitution. States v. Nixon, supra, 418 U.S. at 708.

<sup>2</sup> On December 3, 1982 the Chairman of the Subcommittee on Oversight and Investigations of the House Committee on Energy and Commerce stated that Members of Congress "have the power under the law to receive each and every item of information in the hands of the government. . . ." marks by Chairman Dingell, Transcript, p. 162.

Congress is constitutionally entitled to all information in the possession of the Executive because it has the power to keep the information secret; and (c) the President has not lost control of the information because Congress has the power to keep it secret. None of these conclusions follow from the premise—a premise which you have never disputed in the first place.

Second, the General Counsel Memorandum suggests that the ability of Congress to keep documents received in executive session "secret" and the courts' recognition of that ability in the context of information sought from private parties somehow is relevant to the instant dispute. All that can be said from this suggestion is that it is consistent with the overall thrust of the General Counsel Memorandum, which is that the President is to be treated for these purposes not as the head of a coequal Branch but,

rather, as a private person.6

Third, the General Counsel Memorandum appears to suggest that the fact that material over which the President could assert privilege is often turned over to Congress establishes an unrestricted right in Congress to receive all information in the possession of the Executive Branch over the objection of the President. The argument is nothing less that an assertion that the customary at titude of the Executive Branch in attempting to accommodate requests for information by Congress and to avoid needless friction between the two Branches has effectively destroyed Executive Privilege itself. The proposition is, of course, absurd and its assertion as a serious proposition is particularly frivolous in light of the history of refusal by the Executive to furnish documents in open law enforcement files.

#### 2. The scope of Attorney General Jackson's 1941 letter to Chairman Vinson

At several points, the General Counsel Memorandum, (see pp. 3 and 10), suggests that your reliance on Attorney General Jackson's letter to Chairman Vinson, 40 Op. A.G. 45 (1941), is misplaced because, according to the General Counsel Memorandum, that opinion was limited to "nondisclosure of the FBI's criminal investigative files." Thus, the Memorandum states that application of the 1941 letter to the present situation represents "an enormous extension of secrecy." (p. 3) The General Counsel's reading of that 1941 letter is patently erroneous.

ing of that 1941 letter is patently erroneous. The word "criminal" does not appear a single time in the 1941 letter. The specific request for information to which Attorney General Jackson responded covered investigations of both "alleged violations of law" and investigations to gather "intelligence" information, the latter decidedly non-criminal and the former not qualified by the word criminal and not necessarily confined to criminal matters. 41 Op. A.G. at 50. Furthermore, Attorney General Jackson's letter was in response not only to Chairman Vinson's letter but to two other letters raising a very general and pervasive problem. Finally, and of particular significance given the tortured reading of Attorney General Jackson's letter by the General Counsel Memorandum, every example of prior Presidential refusals to provide documents in investigative files to Congress relied upon by Attorney General Jackson involved cases implicating the federal antitrust laws under which, historically, civil rather than criminal prosecution would have been the usual course of action.

It does not seem conceivable or credible to assert any doubt regarding the breadth of Attorney General Jackson's statement regarding the historic position of the Executive on this matter. Examples abound. Attorney General Jackson did not attempt to cite every instance. Nor did your letter of November 30, 1982 to Congressman Dingell. Another example which neither you nor Attorney General Jackson mentioned, and which is overlooked by the General Counsel Memorandum in an effort arbitrarily to narrow the scope of Attorney General Jackson's opinion, is President Truman's letter to Congressman Frank L. Chelf in March of 1952. Congressman Chelf, as Chairman of a Special Subcommittee of the Judiciary, had demanded a wide range of documents from various Executive Branch Departments including, among others, a list of all cases re-ferred to the Department of Justice or the U.S. Attorneys for either criminal or civil action . . . within the last six years . (emphasis added), in which action had been declined, the case had been returned or where the case had been pending in the Department for more than one year. President Truman rejected the request, declaring, inter alia, that while the investigative functions of Congress were important, the Constitution vested the executive power in the President and imposed on him the duty to see that the laws were faithfully executed and that "Congressional power should be exerted only in a fashion that is consistent with the proper discharge of the Constitutional responsibilities of the Executive Branch."

Another example is Attorney General Brownell's Order No. 116-56 issued on May 15, 1956. In that order, which specifically addressed requests for documents by congressional committees and which specifically covered both civil and criminal cases, the Attorney General distinguished only between open and closed cases. The order applied to all cases over which the Department of Justice had enforcement responsibility and, with regard to open cases, the policy was quite simple: "If the request Iof a congressional committeel concerns an open case, i.e., one which litigation or administrative action is pending or contemplated, the file may not be made available. . . ."

Finally, we would observe that the limitation placed on access by Congress to document in open investigative files by Attorneys General Jackson and Brownell, by President Truman, and by the other Presidents and Attorney Generals which were mentioned in Attorney General Jackson's opinion are, if anything, far greater than the policy adopted by President Reagan in his November 30, 1982 Memorandum to Administrator Gorsuch. Under both the Jackson and Brownell views, for example, congressional committees were to receive no documents found in open investigative files in criminal or civil actions; under current policy much effort will be expended by Executive personnel to segregate out from these files only sensitive, deliberative documents that meet the criteria set out in your November 30, 1982 letter to Chairman Din-Thus, it is plain that the assertion of the General Counsel Memorandum that the current policy is an "enormous extension of secrecy" is not only unsupported by any references in that Memorandum to authorities or specific historic facts, it is flatly contrary to the facts. The policy of this Administration is *less* restrictive than its predecessors.

### 3. The rights of potential targets of investigations

The General Counsel Memorandum strives at great length to establish the proposition that the constitutional rights of potential targets of enforcement actions will not be endangered unacceptably by the documents being made available to congressional committees. It is, of course, not surprising that the courts have been generally reluctant to reverse the convictions of criminal defendants because of pre-trial publicity generated by congressional inquiry into specific cases. That reluctance, however, in no way establishes the proposition implicit in the General Counsel Memorandum that a Nation constitutionally committed to fair and impartial administration of criminal and civil justice would or should tolerate trial by congressional committee. While this basic protection to innocent persons was not stressed as a major rationale for your November 30, 1982 position, it was articulated as one of the factors and was predicated not just on constitutional considerations, but on basic notions of fairness and decency. The General Counsel Memorandum seems to suggest that if a subsequent conviction would not be overturned on constitutional grounds, these considerations somehow vanish. That clearly does not seem to be the case, and most importantly, the argument seems to ignore completely the rights of innocent persons against whom no charges are ever brought.

#### 4. The committee's purpose

The General Counsel Memorandum states that the Subcommittee, in subpoenating the documents, "seeks not to influence individual enforcement decisions, but rather to review the integrity and effectiveness of EPA's enforcement program and to evaluate the adequacy of existing law." (p. 6) We assume that the General Counsel Memorandum would necessarily have to assume such good faith on the part of the Subcommittee. Your articulation of the basis for the invocation of executive privilege similarly assumes such good faith not only by this Subcommittee, but by any congressional committee seeking Executive Branch documents. However, any policy in this area must assume, as Attorney General Jackson's 1941 Opinion did assume, the possibility of misuse along with proper use of sensitive information and, if the information is very important to a pending or developing case, it should not be disseminated beyond those directly involved in the enforcement process. It is theoretically possible that parties seeking access to documents or parties who might obtain access to documents sought by others might have relationships with potential defendants (in this case, generators of the chemicals in the hazardous waste sites). In such a situation, faith in the integrity of the process might subsequently turn out to have been misplaced and the damage would not be limited to a particular enforcement action, but to the integrity of law enforcement as a whole. Hence, if the tactical materials will not make a critical contribution to the legislative process and are primarily useful to law enforcement officials (and the potential defendant), proper attention to the faithful execution of the law requires that the circle of access to the open law en-

House Public Works and Transportation Committee, Congressman Roemer, addressing the Subcommittee's staff, declared: "I will tell you as one member of this Subcommittee, we ought to do and encourage you to do everything possible not just to amass the information, but to turn it over to the public. . . ." p. 38.

public. ... "p. 38.

Or, perhaps, as put by Congressman Roe at the December 2 hearing "there obviously is a breach between ourselves, the governing body of the Nation, and the Executive Branch." p. 90.

forcement file be kept as narrow as possible. The General Counsel Memorandum misses this and the following two additional crucial

First, the Legislative Branch was not empowered by the Constitution to participate directly and intimately in the enforcement of the law. Cf. Buckley v. Valeo, 424 U.S. 1, 138-43 (1976).

Second, and related to the first point, nowhere in the General Counsel Memorandum is there any explanation as to why access to open law enforcement files is necessary in order for the committee to perform its legitimate legislative duties. It is true that because of the relatively recent enactment of CERCLA, there are probably only a small number of closed cases the files of which could probably be made available to the committee as a way of the commit-tee's studying the manner in which CERCLA is being implemented by the Executive. But until the committee can establish that its access to the files in closed cases coupled with the many other means by which it may inquire into this issue, including the testimony of high EPA officials regarding overall EPA strategy, methods and objectives, then there is no reason, as a matter of policy, let alone law, why the committee should have sensitive material turned over to it. As the Court of Appeals for the District of Columbia summarized the test, a test which the Subcommittee has simply not attempted to meet: "The sufficiency of the Committee's showing must depend solely on whether the subpoenaed evidence is demonstrably critical to the responsible fulfillment of the Committee's functions." Senate Select Committee v. Nixon, supra, 498 F.2d at 731 (emphasis added).

#### Conclusion

Because your prior analyses of this subject have fully recognized the legitimate in-terests of the Legislative Branch to investigate and oversee the execution of the law by the Executive Branch, the almost total focus on the rights of Congress in this matter by the General Counsel Memorandum adds virtually nothing to the present debate. Because the documents in issue which would be turned over to the Subcommittee become totally subject to the control of the Subcommittee, the Memorandum's discussion of the Subcommittee's power to maintain their confidentiality is beside the point. The underlying premise of the argument is that Congress has the unilateral power to determine whether the release of Executive Branch documents is, or is not, in the public interest. That theory is nothing more than an abnegation of the doctrine of Executive Privilege. The President cannot retain a privilege while turning over to Congress the decision whether it should be exercised. Finally, the attempt of the General Counsel Memorandum to portray your position, and that of the President, as an "ex-tension of secrecy" is not only contrary to demonstrated historical fact but fails to recognize that the current policy is far more accommodating of the interests of Congress than has been past Executive policy as illustrated by the positions of Attorneys General Jackson and Brownell.

THEODORE B. OLSON,
Assistant Attorney General,
Office of Legal Counsel.

#### CONSERVATIVE OR LIBERAL

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Texas (Mr. Collins) is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, as I finish my eight terms of service in Congress, I look back upon the way I have been described as a conservative Member. Many people use the broad terms "conservative" or "liberal," to define a Congressman's position as he votes his record in Washington. A conservative is one who votes for a balanced budget, less Government spending, fewer Government regulations, a larger national defense, equality for all with less regulations, and complete freedom in religion. A conservative believes Congress should meet 4 months out of the year and go home to work and hear constituents for 8 months. A conservative basically wants to have a representative Federal Government with decentralized powers to the States and local governments.

A liberal is one who believes in providing more revenue for welfare needs, less defense spending, expanding Government service through deficit financing, broader human resources and welfare programs, more detailed regulations for industry, and definitive religious limits. A liberal believes Congress should be in continual session for 12 months, and basically wants to have a very strong, powerful centralized government.

The press views liberals in these terms. The press says liberals are modern and up to date, pragmatic, compassionate, warmhearted, alert, understanding, intelligent, creative, innovative, and progressive with new legislation.

A conservative, as the press describes them, live in the Neanderthal age, dinosaur brain, narrowminded, square, bigoted, nut, selfish, predictable, cold, lacks vision, old fashioned, idealistic, moralistic, thinskinned, loudmouthed, reactionary, and abrasive with no heart for the common man.

I have served for 8 terms in Congress, during this 13-term stretch the liberal Democrats have controlled and dominated our House. One must realize the press is not as objective as they sometimes see themselves.

We realize that the press likes to see innovative and creative legislation because it gives them more stories about which to write. The press wants to see Congress in continual session because they are limited on news stories when we are home. New ideas to provide Government benefits, so people get something free, is what sells newspapers.

As a conservative, I hope that Congress realizes the financial pressure that deficit budgets place on our country causing inflation and higher interest rates. America need conservatives to follow the spirit of George Washington, Abraham Lincoln, and Ronald Reagan.

I remember when I was young, a liberal was someone who was generous in giving away his own money. But today a liberal is one who is generous in spending the Government's money.

My dad was a paradox. In politics he was opposed to Government deficit spending, so folks called him conservative. But he gave away everything he had, so universities and hospitals called him liberal.

Why was my dad against deficit finances? You see, he grew up in poverty. Now he never considered it poverty, because I asked him one time about poverty as a boy, and he got red in the face. He was furious. He told me he never lived in poverty.

When my grandmother died, grand-dad could not take care of his two boys so he put the two of them, ages 7 and 9, out to live with their uncle. The kinsfolks welcomed them and shared everything. Dad slept on a pallet on the floor. He worked everyday on the farm as soon as he got home from school. But they had love in the family, and he grew up with pride and self respect. My dad was poor but honest, and he knew how to work hard. So he voted conservative and in the church house he was known as a liberal.

I have been in continual hearings where liberal members are objecting to phone rates going up. Liberals object to electricity rates going up. Liberals object to natural gas going up. Ask yourself, why do we have a higher cost of living? This year, 1982, the Federal Government will borrow \$210 billion beyond its income. The liberals voted this big Government spending. Now the poor of America have to pay the price of not having a balanced budget in Congress.

I came here to Congress eight terms ago as a conservative. I leave more firmly dedicated to being a conservative. America has more Government than we need, America has more regulations than the people want, and America has more taxes than the people can afford to pay. Down in Texas we still firmly believe in God and family and country.

#### □ 1940

Mr. BETHUNE. Mr. Speaker, will the gentleman yield to me?

Mr. COLLINS of Texas. I will be glad to yield to my friend, the gentleman from Arkansas.

Mr. EETHUNE. I thank the gentleman for yielding.

Mr. Speaker, I just want to say this may be the last occasion that I would have to say to the gentleman that I have listened carefully to the remarks that he has made over the 4 years that I have been here. He certainly is one of the most dynamic speakers in the House, in my view.

Some may not agree with that statement because the gentleman does not gesticulate or speak as loudly as others, but I think the thing that impresses me is the sincerity with which the gentleman has always spoken in the well of the House.

I have never been surprised by what he has said because he has a set of fundamental principles that guide him and I always know just exactly where he is going to wind up on a particular issue.

This House is going to miss the gentleman from Texas and I hope that we will see a lot of him in the next few years because, Jim, you are a tonic for all of us, because you are so plain-spoken and the things that you say ring true and I know that the people out there who listen to this on television, to these House proceedings, can relate to what you say because you say it in a way that they would say it in the coffee shops, nothing fancy, just plain, but I think you are right.

We are going to miss the gentleman

Mr. COLLINS of Texas. Mr. Speaker, I want to thank the distinguished gentleman from Arkansas, for whom I have the most respect and who has such a great, tremendous future here in the House.

I want to tell the gentleman that his folks up in Arkansas, I know them, they may not be the richest folks; as they say, they are poor but honest, but they are the salt of the Earth and believe in that fundamental that makes America great: Those of us who believe in God, family, and country. The gentleman represents them the very best.

Mr. Speaker, I appreciate everything the gentleman said.

## FURTHER MESSAGE FROM THE SENATE

A further message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5447) entitled "An act to extend the Commodity Exchange Act, and for other purposes."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7072) entitled "An act making appropriations for Agriculture, rural development, and related agencies programs for the fiscal year ending September 30, 1983, and for other purposes."

The message also announced that the Senate agree to the amendments of the House of Representatives to the amendments of the Senate numbered 14, 37, and 70 to the above-entitled

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 3103. An act to amend section 1304(e) of title 5, United States Code.

### TRIBUTE TO MRS. HARRY S. TRUMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. Skelton) is recognized for 60 minutes.

Mr. SKELTON. Mr. Speaker, all Americans were saddened on October 18, 1982, to learn of the death of one of our Nation's most beloved citizens, former First Lady Bess Truman. I have asked that the House of Representatives pause in it deliberations and set aside this time so that all Members may have the opportunity, on behalf of themselves and their constituents, to pay tribute to Mrs. Truman.

Mrs. Truman was born Elizabeth Virginia Wallace on February 13, 1885, in Independence, Mo. As a child and young woman, she excelled in sports and in school. At age 6, she met a classmate, Harry S. Truman, and she was the only girl he ever courted. They were married in a simple ceremony in the Trinity Episcopal Church in Independence on June 28, 1919, following President Truman's return from Army service in World War I. They made their home in Mrs. Truman's family home in Independence. This familiar white, Victorian house remained the Truman home throughout their years in Washington, and following President Truman's retirement from public office. It is this house that Mrs. Truman, in a gesture typical of her, generously bequeathed to the American people.

There can be no question that the Truman marriage was a true partnership. In his years in public office, President Truman faced many chaldifficult decisions. and Though the final word was always his, President Truman routinely consulted the woman he affectionately referred to as "the Boss" on these matters. He respected her keen mind, her good judgment, and her practical commonsense. Indeed, when President Truman was a Member of the Senate, Mrs. Truman served for a time as a member of the staff of his Senate Special Committee To Investigate the Defense Program. Regarding her contribution. President Truman said:

I never make a speech without going over it with her, and I never make any decision unless she is in on it . . . not one of these reports has been issued without going through her hands.

Though her contributions to President Truman's public service were real and substantial, it was her personal

qualities that made Bess Truman as popular a First Lady as we have ever had. The flood of eulogies from the media and from friends that followed her death attest to the affection and respect which the American people held for Mrs. Truman. She was variously, and correctly, described as warm, modest, friendly, homeloving, thoughtful, and generous. She was lauded for her wonderful sense of humor, her integrity, her graciousness, and for her sense of duty, dignity, and quiet pride.

Mrs Truman had all of these qualities in abundance. I had the privilege to know her personally, and to represent her in Congress for the past 6 years. I can honestly say that she was one of the most remarkable women I have ever met. But, as I joined the others at her funeral services in Independence, I had cause to reflect on one aspect of Mrs. Truman's personality which I believe helps explain why Americans find so much reassurance and inspiration in the down-to-earth virtues which she personified.

Mr. Speaker, Bess Truman knew who she was and she never forgot where she came from. Her values were those of small town middle America, and they remained constant despite her 17 years in Washington as the wife of a U.S. Senator, Vice President, and President.

Though pressured by many to do so, Mrs. Truman refused to emulate her predecessor as First Lady, the renowned and controversial Eleanor Roosevelt. Confident of her own values and lifestyle, she had little inclination to change, even though her husband had been elevated to the highest office in the land. She preferred to be removed from the spotlight, and she relished the simple, private life in Independence with her family and her life-long friends.

Mr. Speaker, Bess Truman's long, full life of 97 years should be a model for us all. Even in the glare of publicity that surrounds the Presidency, she remained modest and unaffected, and she kept her priorities in order—her family came first. She was a great lady, and she will be missed. I know all Members of the House will want to join me in extending their deepest sympathy to Mrs. Truman's daughter, Margaret, her son-in-law, and her four grandchildren.

#### □ 1950

• Mr. WRIGHT. It is a privilege to join with my friend from Missouri (Mr. Skelton) to express a thought or two in tribute to the memory of Bess Truman, a woman of character, determination, and fortitude.

She came as a young matron to Washington with her husband Harry when he was first elected to the Senate in 1934. She was a wife, a help-

meet, and a mother in the truest sense of those words. No one who ever knew her failed to be impressed with her ability to meet with quiet dignity and unpretentious self-assurance the tests that life brings to each of us.

At a time when world leadership was being thrust upon America, some of the most difficult decisions in the history of the world were placed at the desk of President Truman. He did not flinch from these decisions, no matter

how awesome nor tortuous.

But Harry Truman, hero that he was, was, after all, a human being. Like all the rest of us, he needed the measure of confidence and companionship that only a devoted wife can bring. It is noteworthy, now 40 years later, to realize that precious little of Bess Truman's life ever wound up in the pages of the newspapers.

The unstinting and loyal support that she gave our President was never flaunted nor paraded about nor bandied through magazine articles nor the type of shallow "dear wifey" articles used by other political wives in other

times.

It is obvious from a history of those times that Bess Truman was, above all, a quiet, dedicated helpmate, whose heart and soul were selflessly devoted to the man she loved-a man who happened to be, at that most crucial moment in history, the President of the United States.

Mr. YOUNG of Missouri. Mr. Speaker, it is my pleasure to be able to join with the distinguished gentleman from Missouri, Congressman Skelton, who represents Independence, Mo., today in honoring and paying tribute to a woman who disliked tributes. In fact, she disliked public attention of

any kind.

Yet, for a number of years, she was in the limelight of national attention. To her husband, she was "the boss" and "my chief adviser." To the rest of the world in the late 1940's and early 1950's, she was the First Lady, Elizabeth Virginia Wallace Truman. That was her full name. But she simply pre-

ferred to be called Bess.

Bess Truman was a very private erson. But Bess found herself trapped in a public fishbowl known as the White House. Harry Truman was elevated to the Presidency suddenly upon the death of Franklin D. Roosevelt. This cast Bess in the role of First Lady following in the footsteps of the very public Eleanor Roosevelt. But Bess very wisely decided not to take on a role in which she would be completeuncomfortable. Instead she remained a private person, but one who was very much a part of the Harry Truman Presidency. She was warm and gracious in hosting official White House functions. But when she was not directly called upon, Bess preferred to stay where she felt most comfortable-and that was in her husband's shadow. That was her place-as a supporter and personal adviser to her husband, the President.

I was a young man serving my country in World War II in Germany when Harry Truman became President. As a native Missourian, I had great admiration for both Harry and Bess Truman. I felt the greatest respect for this man from Independence, Mo., who had risen to the Nation's highest office with the help of his wife at his side.

I think both Harry and Bess were lucky to have occupied the White House at the time that they did. They were there long before today's era of prying minicams and instant access news. That afforded the Trumans the opportunity to maintain some of their privacy. It also afforded Bess Truman the chance to do her Christmas shopping in Washington's department stores just 8 months after becoming First Lady and still not be recognized.

Bess Truman was a very shy and gracious lady. She served her country well as a First Lady to admire and respect. She maintained her own special degree of dignity, pride, and down-toearth values. She was never really touched by the fever of importance that seems to run so rampant in Washington. For when Harry's term as President was over, she was quite content to return to her family home in Independence and go back to being just a private citizen.

Bess Truman was a model of basic, middle-American virtues that remained simple and untainted by the rough and tumble of Washington politics. I admire Bess Truman. I admire her for what she stood for, for what she believed in and for how she conducted herself as a public personality living a private life. She gave the world a model of dignity and grace, a model that will remain somehow forever empty because of her passing.

Mr. SKELTON. Mr. Speaker, thank the gentleman from Missouri for joining me in this tribute.

Mr. Speaker, I yield to the gentleman from Kansas (Mr. WINN).

Mr. WINN. I feel honored to participate in this Special Order for former First Lady Bess Truman-a woman who showed us all the meaning of humility and dignity. Bess Truman did not seek the spotlight, nor the headlines. She did believe in her husband and family and always put their needs and wants above the demands of a Washington social life.

Bess Truman is mentioned prominently in Ken Hechler's new book entitled "Working With Truman: A Personal Memory of the President." My colleagues will remember Ken by his service in the House of Representatives from West Virginia from 1955 to 1977. I was privileged to serve with him as a member of the Committee on Science and Technology.

In his book, Ken tells a great deal of the human side of Mrs. Truman, her advice to the President behind the scenes, the fact that very few Presidential speeches were delivered without reading them and making suggestions the night before. Mrs. Truman was a great crowd pleaser on the many whistlestop trips which the President took. Even though she declined to make speeches she made it known that the Trumans were a very close-knit family.

Another aspect of Ken's book which interested me tells how both Mrs. Truman and Margaret could not wait to get out of Washington and back to their family home at 219 Delaware, in Independence. When Mrs. Truman and Margaret left Washington, President Truman became very lonely, spending hours on the telephone longdistance until either he could break away to go home to Independence, or persuade Mrs. Truman and Margaret to return to Washington.

Perhaps the biggest influence Mrs. Truman exerted was convincing President Truman not to run again in 1952. Here is how Ken Hechler describes the situation in his book:

One afternoon at Key West, I had a long conversation with Mrs. Truman in the sit-ting room of the little White House. Mrs. Truman loves biographies and she paused in her reading of the autobiography of James A. Farley, Franklin Roosevelt's national political chairman to discuss Farley's adamant opposition to a third term for Roosevelt in 1940. She voiced her strong support for Farley's view as matter of sound national policy in a Republic and went on to describe her conviction that far too many people in public life refuse to admit when it is time to quit. Mrs. Truman commented with some feeling on the selfish "hangers-on" who are constantly importuning public officials to stay in office one more term so that these self-seekers can continue to bask in the glories of the boss. I came away from that conversation with the feeling that Mrs. Truman was a major force in convincing the President to stick to his decision to retire in 1952.

Harry Truman first met Bess Wallace when he was 6 years old and they were attending the same Sunday school class. He always referred to her as "my school girl sweetheart," adding that. "I have never had another, and will never have another." As First Lady, she declined to hold news conferences despite the pressures of reporters accustomed to Eleanor Roosevelt who frequently took stances on public issues. The Nation will long remember the quiet dignity with which she performed the duties of First Lady. She carried them out faithfully.

Mr. WINN. Mr. Speaker, I thank the gentleman I appreciate the gentleman asking for this special order honoring Bess Truman.

Mr. SKELTON. Mr. Speaker, I appreciate the words of the gentleman from Kansas (Mr. WINN) so much.

Mrs. BOGGS. Mr. Speaker, will the gentleman yield?
Mr. SKELTON. I yield to the gentle-

woman from Louisiana.

Mrs. BOGGS. Mr. Speaker, I thank the gentleman for yielding, and I do thank the gentleman from Missouri (Mr. Skelton) for the opportunity of saying a few words about the highly literate, lively, and lovely Bess Truman, who had such a delicious sense of humor and who was also a

model for all political wives.

Mrs. Truman believed so strongly in her duties as a political wife that she would encourage all others to be able to extend themselves into the life of Washington and into the lives of their husbands' districts. She set an example by attending not only all of the functions in which the Washington wives were in charge but taking her precious time as First Lady to go at least 30 to 45 minutes ahead of schedule so she could thank the various chairmen, comment on the decorations, and tell them all once again what good work they were doing not only for the city and for the country but for her husband.

She was a perfect political wife. All of us at that time had two homes that we had to take care of, and we were always going back and forth and trying so diligently to make an attractive place in which to live and in which to have our husbands and con-

stituents entertained.

When Mrs. Truman went to the White House, she not only had to take over the White House but discovered soon after she was there that the White House was tumbling down around them, so she had to live through one of those dreadful wifely chores of having her entire home done over while she was the First Lady. She moved with grace and charm into Blair-Lee House and kept up the tradition of entertaining that this country is very famous for.

In every aspect of her life as a political wife, Bess Truman was a real star. I think that the best thing that she did for all of the political wives was to give us a sense that you could become such a strong and good family within your own home that your husband could go forth and withstand any kind of pressure, and that the country would be well served because of it.

The happiness and the joie de vivre that the Trumans had among the three of them, the President, Mrs. Truman, and Margaret, was something that all the world admired, and it was a source of inspiration and great fun to all the other congressional wives.

So, Mr. Speaker, I am very pleased to give her a tribute as a perfect congressional and Presidential wife and to the rest of us.

I thank the gentleman from Missouri (Mr. Skelton) for this opportunity to say these words.

Mr. SKELTON, Mr. Speaker, I think the gentlewoman from Louisiana (Mrs. Boggs) for her very gracious words concerning Mrs. Truman, she having filled that role so ably in years past, as I know so well. Those who read the RECORD in future years we make this evening will find that your words have added meaning, and I do appreciate what you said about the former First Lady, Mrs. Truman.

Mr. Speaker, we have heard a number of Members of this body join me in paying tribute to Bess Truman. She was a lovely lady, she was a remarkable person. I am pleased to say that she was my constituent for

almost 6 years.

There was a time when I personally appreciated her words of encouragement. She was always there and she was an inspiration not only to me but to all those who met her and to so many who did not but who knew what

a grand person she was.

We will miss her. We will miss her presence. We express our sincere sympathy to her very lovely daughter, Margaret Truman Daniel. I know that she goes with the memory that her mother fulfilled the highest calling of any lady in our land. She was a wonderful wife, a loving helpmate, and an inspirational wife of an outstanding leader.

. Mr. BAILEY of Missouri. Mr. Speaker, this Nation is greater because Bess Wallace Truman lived. We are poorer that she no longer lives among us.

We Missourians are particularly proud that she was the product of our soil, the product of our world, the product of that which is best about America.

Born in Independence, February 13, 1885, she gave Missouri and America almost a century of unswerving support of those qualities we deem best in America.

Married June 28, 1919, to Harry S Truman, she was not only one of our Nation's greatest First Ladies but also the mother of another great citizen, her daughter, Mary Margaret, now Mrs. E. Clifton Daniel, Jr.

Whatever she believed in, she supported with all her heart, with all her energies, with all her faith. Through a lifetime, no one ever questioned her loyalty and love of country and state, her support for her husband, her love for her daughter and grandchildren.

Proud, too, she was of being a Democrat and an Episcopalian. Proudest most, I think, that she was a Missouri-

Hence, it is with unusual pride and great affection that I today join my colleagues in commemorating the life and memorializing the death of a

thank her for everything she did for great woman, Bess Wallace Truman, wife of our late President Harry S. Truman.

• Mr. BOLAND, Mr. Speaker, I want to thank the gentleman from Missouri (Mr. Skelton) for reserving this time to allow us to pay tribute to former First Lady Bess Truman. Hers was a life worthy of admiration and respect, and I believe that her husband would have very much appreciated the House of Representatives pausing in its business to acknowledge the contributions she made to our country.

President Truman used to say that Mrs. Truman was his "full partner." He relied on the strength of her character and he valued her advice and her opinions. She discharged the considerable duties of First Lady with grace and dignity and I believe that the American people loved her because she exemplified the values with which they most closely identified. She was very much her own person and had a very strong sense of who she was. Devoted to her husband and her daughter, she never lost sight of the importance of her family and never allowed the demands of office to interfere with her responsibilities to them. The sense of stability which she exuded was needed and welcome in the years immediately following World War II.

Mrs. Truman wanted nothing more than to return with her husband to Independence after their term in the White House was over. She was content in the knowledge that they had done the very best they could for the country that had placed its trust in them. I believe that that is a judgment in which history will concur.

Mr. MAZZOLI. Mr. Speaker, I, too, would like to pay tribute to one of our country's First Ladies whose death has been a loss to us all.

Bess Truman was loved and respected by the American people as the devoted wife and companion of the President. She was a strong independent woman whose warmth and charm graced the Truman administration.

Mrs. Truman lived a long and full life, and I honor this great woman for her service to the American people.

Mr. ANDERSON. Mr. Speaker, although her death saddens us all, Bess Truman lived a rich and fascinating life. At one time, Mrs. Truman played a very important role in our Government, and with her death there passed away a great era in American history. I had the privilege of meeting her and her husband, the late President Truman, both of whom I personally admired. All who knew her can say that Mrs. Truman was a great woman and a great First Lady.

Bess Truman stood quietly but strongly behind her husband, President Harry S. Truman, during his historic years in the White House. Upon the death of President Franklin D.

Roosevelt in 1945, Bess Truman suddenly found herself having to assume a far more public role than she was used to. Although First Lady Bess Truman's reserved manner and style were quite a change from the superactive Eleanor Roosevelt, she contributed her own unique presence to American society.

Mrs. Truman was thoughtful and generous, never happy unless doing something for others, such as visiting veterans and patients from Walter Reed Hospital and the Bethesda Naval Medical Center. She was constantly on the go, dropping in at several luncheons and receptions in a day while managing her White House domain. Although reserved, and shy in large public gatherings, Bess Truman was good-natured and had a very warm and winning manner and a sharp, dry sense of humor. Mrs. Truman's great love for baseball was famous, and she attended the games of the Washington Senators whenever she could.

Bess Truman's complementary nature was a great asset to her busband, who frequently included her in the closed-door sessions of advisory groups, particularly during campaigns. President Truman said that he discussed every decision with his wife and referred to her as "a full partner in all my transactions-politically and other-Mrs. Truman's traditional American virtues were a source of strength to both the President and the Nation. Even if she was never completely able to curb his language, her deeply rooted sense of what was fitting and proper influenced her husband. No matter what she was doing, Bess Truman was always a lady. Her spirit made the White House great. and made her a great woman.

My wife, Lee, and I would like to take this time to offer our deepest condolences to her daughter Margaret and her family. We are grateful for the many years that Bess Truman had with us, and for her special contribution to our lives.

• Mr. CLAY. Mr. Speaker, I am honored to pay tribute today to Elizabeth Wallace Truman, a person of much affection and respect for those with a memory of postwar America. In the years following the turbulence of the Depression and World War II, Americans found reassurance and inspiration in the virtues Mrs. Truman personified. She was a warm, modest, friendly, and home-loving woman.

Her family always came first. She described the role of First Lady as requiring that a wife "sit beside her husband, be silent and be sure her hat is on straight." Actually Mrs. Truman took a keen interest in her husband's daily problems and he respected her judgment. He referred to her as his chief adviser and a full partner in all his transactions.

Mrs. Truman had a sense of duty, dignity, and quiet pride. She was always correct and gracious about everything she did in the White House. She remarked that the qualities most necessary for the wife of a President were "good health and a strong sense of humor." Mrs. Truman possessed these qualities and she served the country and her husband well.

In each of our families there is a woman who resembles Bess Truman and who embodies these same downto-earth virtues. She reminds us of someone we love. We mourn her death not so much for her public life, but for what we knew of her role as a wife, a mother, and the model for so many women of her generation. Bess Truman was a great American woman and she will be missed greatly.

 Mr. BINGHAM. Mr. Speaker, I appreciate the opportunity of saying a few words about a great American.

During the years of Harry Truman's Presidency, I was often impressed with the qualities of the lady he called "boss," his wife Bess. She had a quiet dignity and a kind of no-nonsense serenity that was apparent to all. It was clear that the President relied heavily on her judgment and her sense of perspective.

I had the pleasure and privilege of meeting Mrs. Truman on several occasions. On one of these she was a dais guest at a large luncheon at the Shoreham Hotel which I had been asked to address. She had to leave before my speech, which of course I quite understood. That very afternoon Mrs. Truman sent me a handwritten note explaining why she had had to go, expressing her regret not to have heard my talk, and apologizing for the apparent discourtesy. I never got over the fact that she took the time and trouble to do this.

Bess Truman was truly one of the most gracious ladies of the 20th centu-

My wife and I join in extending to the members of her family our deep sympathy on their loss, a loss which we all share.

• Mr. ZABLOCKI. Mr. Speaker, it is indeed a rare privilege to join my colleagues in honoring the memory of a truly great first lady of this land, the late Bess Truman. To those like myself, who served in this body during the Truman administration, Mrs. Truman will always be remembered with particular warmth, affection, and high esteem.

It is no secret that Mrs. Truman did not seek or relish living at 1600 Pennsylvania Avenue, but characteristically, she did what she perceived to be her duty as First Lady with graciousness and a high sense of personal dedication. Her first loyalty was clearly to her husband, and she provided great comfort and moral support to the President of the United States during

a very critical and challenging period in our Nation's history.

Perhaps her most striking quality was the utter lack of pretension which characterized all of her official actions and personal relationships. She did not attempt to emulate anyone but herself, and the image she projected to the world at large was one of quiet dignity and practical good sense. To paraphrase the words of Kipling, she could "walk with kings—nor lose the common touch"—and in the process, she managed to represent the finest attributes of the American people.

Mrs. Truman had a long, rich, active, and satisfying life, and she was supported to the end by the unwavering affection she received from her family, her friends, and her many admirers. As one of the latter, I am pleased to have this opportunity to pay tribute to this great lady and join in the national mourning which inevitably accompanies her loss.

#### GENERAL LEAVE

Mr. SKELTON. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject of my special order tonight.

The SPEAKER pro tempore (Mr. Breaux). Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. SKELTON. Mr. Speaker, I yield to my colleague from Missouri (Mr. Young).

### REEXAMINATION OF ROMANIA'S MFN STATUS IS CALLED FOR

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Maryland (Mrs. Holt) is recognized for 60 minutes.

• Mrs. HOLT. Mr. Speaker, between November 5 and 7, 17 Hungarian intellectuals in Transylvania, the Hungarian-inhabited province of Romania, were arrested. The major "defendants," nationally famous poet Geza Szoecs, philosopher A. Ara Kovacs and Prof. (Mrs.) Karoly Toth were subjected to violence. Szoecs is still incommunicado, either in a secret police jail or in hiding; the other three were warned not to leave town as they will be charged with treason. We have no reliable information about the fate of the other 13 intellectuals.

Today I rise to condemn the charges against these leaders of the freedom-loving Hungarian intellectuals in Romania who want to retain their Hungarian cultural traditions and the freedom to express themselves without governmental censorship. Their "crime" was to publish a lithographed monthly called Ellenpontok (Counterpoints) since November 1981, a literary and philosophical monthly that had little to do with day-to-day politics.

However, I believe that in addition, the Romanian authorities suspected them to be the signers of a recent memorandum on the complaints of the Hungarian minority in Romania which was smuggled out to Vienna in November and presented to Chancellor Bruno Kreisky on November 29, 1982 for transmittal to the Madrid Conference on Security and Coopera-

tion in Europe. Their demands are modest indeed and would have no problem even with the Constitution of the Socialist Republic of Romania. They only want the opening of Hungarian language kindergartens and special education classes, equal use of the Hungarian language in public and before the authorities where the Hungarians form a significant minority or the majority of the population, and equal access to professional positions. They are also calling for self-administration of the Hungarian-majority regions in Transylvania and condemn the existing practice of forcibly settling Romanians into the purely Hungarian villages, towns and cities of Transylvania. Most devastatingly, they add that the Romanian authorities should not regard the Hungarian intellectuals with suspicion just because they are Hungarian. Mr. Speaker, today I am joining with these brave people striking a blow for freedom and cultural rights of their ethnic groups at grave personal jeopardy to themselves. I also appeal to my colleagues to support Representative RITTER's letter President Reagan calling for protests and for a reexamination of Romania's most favored nation status next year if these persecutions, arbitrary arrests and conscious discrimination against the 2.5 million Hungarians of Transylvania do not cease or abate.

I congratulate the American-Hungarian Federation, its president, the Right Reverend Tibor Domotor; its executive committee chairman, Mr. Imre Beke, and its secretary of international relation, Dr. Z. Michael Szaz, for their strong and persistent efforts to help their brethren in Communist Romania. They have written to President Reagan and to Ambassador Max Kampelmann, the chairman of the U.S. delegation to the Madrid Conference on the Lesinki Accords, to protest the Romanian treatment of its Hungarian minority.

At this point, Mr. Speaker, I would submit for the RECORD the following article from the Vienna Arbeiter-Zeitung:

[Vienna Arbeiter-Zeitung in German Nov. 26, 1982]

ROMANIZATION OF HUNGARIANS IN TRANSYLVANIA SEEN

(Article by G.H.O.: "A Wave of Arrests Within the Hungarian Minority")

Vienna (AZ).—At the beginning of November the Romanian authorities detained several Hungarian intellectuals in Transylva-

nia. Among them was the well-known poet Geza Szocs. This was reported by Hungarian democratic opposition circles in Budapest. For over 2 weeks the fate of Szocs has been unknown. Several detailed people were allegedly maltreated.

This is the latest chapter so far in a conflict of nationalities that has been smoldering for a long time. A mionority of 2 million people lives in Romania, a minority which is increasingly defending itself against the stepped-up Romanization policy of the Ceausescu regime. The present wave of detentions is aimed at those Hungarian intellectuals who are charged with being connected with the underground paper Ellenpontok (Counterpoint) which has been published in Hungarian since the beginning of the year in Klausenburg. Its aim is to defend the minority rights of Hungarians in Romania.

In the last issue—the eight published so far—Ellenpontok published a memorandum to the Helsinki follow-up meeting in Madrid: "The Romanization of Transylvania and suppression of our culture is being pursued as never before. Romanians are being settled in primarily or exclusively Hungarian areas. The Hungarian schools are systematically reduced, the publication of our books and journals is curbed more and more. Our language is excluded from public life."

The subject of the suppression of the Hungarian minority in Romania is the top subject in Hungary today, not in the Government in Budapest or in the official media, which traditionally act carefully, but

in opoposition circles.

In an article which has now come to the West and which is directed above all to European social democracy, the Hungarian philosopher Gaspar Miklos Tamas (34), who comes from Transylvania, warns against a general underestimation of the national contradictions in Eastern Europe. The philosopher, who calls himself a liberal socialist, thinks that the national disputes in Eastern Europe "are not a bit less violent than those of their predecessors in the 1920's-for the present they are only covered and unofficial." Tamas sees these national contradictions as a threat for peace in Europe. He demands that: both the Hungar-Government and Western Europe should pay more attention to the problem of the Hungarian minority in Romania. In the article Tamas refers to a historical parallel: The nationalist Princip did not kill Archduke Franz Ferdinand with the most modern Krupp Cannon, but with a shabby gun. In the unfriendly and silent concrete high-rises of the East European settlements many such Princips are waiting . . . "..

• Mr. DWYER. Mr. Speaker, recent events in Romania have caused justified alarm among the Hungarian minority there as they remain steadfast in their efforts to assert their fundamental rights but face relentless, unjust persecution as a result.

The recent arrest of several Hungarian intellectuals by the Romanian Government symbolizes the gravity of the situation, as Romanian authorities continue to deprive them of their human and self-determination rights.

The 1947 Peace Treaty compelled Romania to guarantee the human rights of the citizens of northern Transylvania, but that promise has been repeatedly broken.

For more than two decades, Romanian pressures against the Hungarians of Transylvania have been unrelenting, including the complete suppression of Hungarian social, youth, and educational activities, destruction of the Hungarian language schools and suppression of the internal independence of Hungarian churches.

The Hungarians in Romania, quite rightly, have requested by memorandum, that the cultural autonomy promised them by law be granted to them.

The fate of these brave compatriots, their ethnic survival, and their civil and human rights must be of deepest concern. The U.S. Government should support a policy aimed at stopping this "Romanization" which threatens the existence of 2 million Hungarians. To do so would be in harmony with our own ideals of liberty, self-determination, and human rights.

A TRIBUTE TO HON. JIM JEF-FRIES ON HIS DEPARTURE FROM THE HOUSE OF REPRE-SENTATIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. Winn) is recognized for 60 minutes.

Mr. WINN. Mr. Speaker, when Jim Jeffries retires from the House of Representatives, we will be losing one of the most principled and dedicated Members of Congress. Jim is one of those rare persons who says what he means and means what he says and I have always admired him for that. His commitment to sound conservative values and policies is very difficult to match on Capitol Hill.

JIM always stood firm to popular political pressure and voted the way his conscience and constituency in Kansas dictated. Special interests are not big on JIM's list of priorities but the "little man" in the Second District of Kansas is. He was constantly fighting for the people's best interests both on the floor of the House and in committee where he served with distinction.

JIM's work on the Public Works and Transportation and the Veterans' Affairs Committees is well regarded. I know he had a special interest in the well-being of our country's war veterans and his service on the committee is an example of JIM JEFFRIES putting words into action. Generally speaking, JIM takes a fierce pride in the United States of America and does not believe in being embarrassed to praise this great country of ours or the men and women who fought for it.

When President Reagan was elected in 1980, Jim was like many of the rest of us who believed this country needed a change in direction. Jim's voting record is very indicative of his loyal support of the President—even when

it was not popular to vote with Mr. Reagan. JIM JEFFRIES has gone the extra mile many times for the President and even voted against the President when he believed, as I did, the President was abandoning a fundamental piece of his philosophy in the \$98.6 billion tax hike passed earlier this year.

I think one word strongly represents Jim Jeffries' tenure in Congress. That word is "integrity"—something all too often missing from all aspects of society. Jim believes in it and he acts it. He believes integrity is an element of a Congressman's personality that his constituents will always respect despite any issue disagreements. Jim's integrity always reaffirmed my faith in the institution of Congress and this country as a whole and I believe his strong character positively affected me as well as many other of our colleagues in the House.

I hope JIM remains active in the political process. He is a strong asset to it.

I would like to conclude my remarks about my Kansas colleague by pointing out what a strong family man Jim is. He and his lovely wife Barbara are a fine example to our younger generation of a sound and loving marriage. I know Jim has always believed he would not be where he is today without the support and advice of Barbara and their three children. Jim believes families are important and I hope he is able to spend more time with his family now that he is away from public life.

JIM JEFFRIES has enriched all of our lives here in the House and I wish him nothing but the best in the future.

Mr. SKELTON. Mr. Speaker, will the gentleman yield?

Mr. WINN. I am pleased to yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Speaker, I would like to commend the gentleman (Mr. Winn) for saying these words about our colleague, the gentleman from Kansas (Mr. Jeffries), who is retiring.

I have had occasion to know him and to be his friend. I have had occasions to have the opportunity to share his warmth and his friendship, and I also know of that sense of duty and that sense of patriotism to which the gentleman referred so ably.

I well recall the deep interest the gentleman from Kansas (Mr. Jeffres) took in the military affairs of our country. On one occasion we were on an aircraft carrier together, and he had an opportunity to see firsthand how the young men of our country serve and defend this land.

#### □ 2010

The deep interest and affection which he showed those young men for their sense of duty and encourage-

ment that he brought to them at that time is something we will remember.

I again compliment the gentleman from Kansas for saying these fine words about a fine American.

Mr. WINN. I thank the gentleman from Missouri for those fine words.

Just a few minutes ago before I took the well the gentleman from Kansas' Second District said he had had the privilege and pleasure of touring several of the naval bases with the gentleman from Missouri.

. Mr. ROBERTS of Kansas, Mr. Speaker we have long recognized and honored many types of courage: physical courage under fire, the moral courage of a dilemma, and political courage in an age of expediency. Today, we pay tribute to a retiring colleague whose career in this Congress also is marked with courage. JIM JEFFRIES of Kansas has maintained the courage of his convictions in representing the people of the Second District. In seeking the office 4 years ago, Mr. JEFFRIES clearly outlined to folks in the Second District his beliefs and his philosophy and promised to stick by his ideals on their behalf. He carried out that promise, often under duress and sometimes in spite of the popular media's perception of what his constituents "really wanted." Because he had given his word, he was little swayed either by media criticism or by partisan debate.

As we all know, Mr. Speaker, maintaining such a clear course is often difficult and lonely in an age of instant analysis and sharply shifting moods of public opinion that is sparked by such analysis.

It has been a privilege for me to serve in this Congress with my colleague from Kansas. His voting record clearly reflects a determination to stand solidly on his convictions, which were arrived at honestly and in the spirit of serving his district. In doing so, he accomplished a great deal for his district and set the stage for further accomplishments in the longer term.

From time to time we all need to be reminded that our Founding Fathers envisioned a Congress composed of Representatives responsive to the people and with the courage to honestly and steadfastly serve them. JIM JEFFRIES has done that job well. I join in wishing him well and saying that his presence will be missed as one of our colleagues here in Congress.

• Mr. WHITTAKER. Mr. Speaker, I

 Mr. WHITTAKER. Mr. Speaker, I thank my distinguished colleague and fellow Representative from Kansas, Mr. Winn, for reserving this time to honor our colleague and friend—Jim JEFFRIES.

JIM and I came to Congress together in 1978. JIM was the new Representative from the Second District of Kansas and I was the new Representative from the Fifth District. At that

time, I must admit that I had only met and visited with Jim on a few occasions—but over the last 4 years, I have come to know Jim very well and am honored to call him my friend.

During his time in Congress, JIM has kept faith with his principles. Never did he waiver from his principles, or take the easy road out by dodging an issue.

JIM also provided and established an outstanding record of service to his constituents. I am not aware of any request too great, or any too small, where JIM would not personally intervene to help resolve the problem for the folks back home.

I know that not only I, but the people of Kansas and the Nation, will miss JIM JEFFRIES' honesty, fairness, and energetic work in the future. I know all join in wishing JIM and his wife, Barb, the very best in the future.

• Mr. ROE. Mr. Speaker, I take great pleasure today in rising to join my colleagues in a well-deserved salute to my good friend JIM JEFFRIES, the highly able Representative of the Second Congressional District of Kansas.

JIM has served the people of his district, the State of Kansas, and the Nation with distinction and dedication. The name JIM JEFFRIES has become synonymous with honesty and great integrity.

I have had the pleasure of serving with Jim on the Public Works Committee. As a member of the Water Resources Subcommittee which I chair, Jim has shown himself to be totally dedicated to the Nation's water development needs.

We will certainly miss his expertise and guidance as we tackle the Nation's water resource problems in the years ahead.

• Mr. YATRON. Mr. Speaker, I would like to take this opportunity to honor a good friend and outstanding colleague. JIM JEFFRIES.

Since he came to the House in the 96th Congress, JIM JEFFRIES has been one of the most hard-working, diligent, and capable Members of this body. His reputation for looking out for the interests of the taxpayer and for actively working to reduce the waste, fraud, abuse, and mismanagement in our Government is widely known and admired by his colleagues. The taxpayers of this country will be losing a tremendous spokesman in JIM JEFFRIES when he leaves the House at the end of this session.

Mr. JEFFRIES has also distinguished himself as an active and effective legislator during his 4 years of service. His work on the Veterans' Affairs Committee and the Public Works and Transportation Committee is highly respected by those who serve with him on these committees. His concern for the military strength of our Nation is evi-

denced by his activity on the House Task Force on Defense. He has also been outspoken on the benefits to our country, in terms of jobs and technological advancement, of a sound space program. As a member of the Congressional Space Caucus, he has worked for the development of a policy to keep America first in space.

JIM JEFFRIES will be truly missed by those of us who know him and have served with him in the House. His excellent service to his constituents, and his total dedication to the welfare of our country will long be remembered. I want to wish my good colleague the very best in all his future endeavors. Mr. MONTGOMERY. Mr. Speaker, it is with mixed en.otions that I join this special order on the gentleman from Kansas, JIM JEFFRIES. After serving two terms in this Chamber, he had decided to return to his home State. I am happy to join in this tribute, but the fact that he is leaving the House of Representatives is a sad one.

I have come to know Jim through our service on the Veterans' Affairs Committee. He has been a most valuable member of the Education, Training, and Employment Subcommittee, as well as the Oversight and Investigations Committee. JIM was always well informed on committee matters and he has been a true friend of this Nation's veterans. I know he also has served very diligently on the Public Works and Transportation Committee.

After serving his country as a command gunner in World War II in the Army Air Corps, Jim returned to Kansas, where he gained experience in a wide range of enterprises, including grain and livestock farming, market research, and as an investment counselor. It was this dedication to business that promoted Jim to run for Congress to try and help reduce the tax and paperwork burden placed on small businesses across this Nation.

Throughout his two terms, Jim has been a great friend of small business and it is evidenced by the honors he has received. He has won the Guardian of Small Business Award from NFIB as well as the Watchdog of the Treasury Award from NAB.

Jim has served his Kansas constituents and the people of this country with distinction in this Chamber. He can be proud of his accomplishments here and I can say that we will, indeed, miss a man of his high integri-

ty and experience when the 98th Con-

gress convenes in January.

Mr. SAM B. HALL, JR. Mr. Speaker, after a very short time here in the House our good friend and colleague, JIM JEFFRIES, decided to retire. I wish that he would have made a decision to stay longer, because he had made a significant and lasting contribution to the work of the Congress.

JIM JEFFRIES originally ran for the House on a campaign pledge to fight excessive, unnecessary Government spending, and he remained true to that commitment. He has a reputation for consistency and integrity and is known for sticking to his guns. The people of his native State of Kansas have a reputation for independent thinking, and JIM JEFFRIES fits this coveted role.

It has certainly been an honor for me to be with Jim on the Veterans' Affairs Committee. He is a veteran and he understands the needs of our veterans. We have had mutual service on the Oversight and Investigations Subcommittee, and there is no question that JIM JEFFRIES fights for a better system of delivering essential services to the veteran population by the Veterans' Administration.

As a member of the Government Operations Committee, JIM has battled for regulatory reform and reducing the size of Government. He has been in the forefront of the struggle to maintain local control over education. and his very persuasive arguments against creation of the U.S. Department of Education were among the best I heard during consideration of legislation establishing the agency.

JIM JEFFRIES is an able, effective, and well-liked Member of this body. I have thoroughly enjoyed our all-toobrief period together, and I know that the future will continue to find him involved in the process of helping people. I wish him continued success. Mr. CARMAN. Mr. Speaker, I rise today upon the occasion of the retirment of JIM JEFFRIES from Congress. JIM has worked hard for the people of Kansas and the Nation. He understands especially well the problems of farmers, and he has been a strong voice for those who are responsible for feeding all of us. I have enjoyed working with JIM and seeing his devotion to his constituents. I wish him all the best in his future endeavors.

Mr. McDONALD. Mr. Speaker, the House of Representatives is saying "goodbye" to many fine men this month, but among the finest men I know and one of those I will miss the most is JIM JEFFRIES of Kansas. He has been more than just a colleague who shares my philosophy of government. He has been a real friend on whom I could count. Several times, he has very selflessly come to my aid, and I appreciate it more than words can express. He and I have worked on so many projects together that I will possibly list his name automatically as a cosponsor or cosigner next year until I stop to think that he has gone.

He will be sorely missed by those of us who feel a strict interpretation of the Constitution should be our guide. He will be even more sorely missed as we continue to try and rebuild our Nation's defenses in the face of the enormous Soviet buildup. So, Jim, all I can say is please reconsider and run again for Congress. I would like to have you back, but all my best in anything you undertake.

• Mr. SHUMWAY. Mr. Speaker, I would like to express my appreciation to LARRY WINN, PAT ROBERTS, and BOB WHITTAKER for requesting this special order to enable us to pay tribute to our friend and colleague, JIM JEFFRIES, as he prepares to return to private life.

JIM and I entered our congressional service together, and thus I will always have special memories of him. Being fellow freshmen, we learned the ground rules together, and that experience inevitably results in a unique friendship. Additionally, I have been privileged to know Jim through service on the Republican Study Committee and to admire his contributions as a member of the panel's executive committee

He has always performed in an exemplary manner on behalf of the people of his district and the Nation, whether in committee or on the floor of the House. His background provides him with a sound understanding of business and free enterprise, and his actions in this House have reflected his dedication to free-enterprise principles. For that, I admire and respect him greatly.

JIM will certainly be missed by all of us who have been privileged to know and work with him. I know that he will continue to apply his abilities and concerns in the private sector, and I am confident that his career will be marked by achievement wherever he

To Jim and to his family, I extend every best wish for a happy and prosperous future.

Mr. CAMPBELL. Mr. Speaker, I am honored today to take part in this special order for my friend and colleague, JIM JEFFRIES.

Since JIM JEFFRIES' election to the House in 1978, he has been an outspoken and stalwart member of the conservative movement in this body. He has been honored for his dedication to fiscally responsible ideals by being named the National Association of Businessmen's "Watchdog of the Treasury" and given the Distinguished Service Award by the Americans for Constitutional Action.

His appointment to the Reagan congressional advisory committees was further evidence of his ability to work hard for those concerned with the conservative movement. Furthermore, JIM JEFFRIES' dedication to a strong national defense has been exemplary.

The business community is losing a fearless defender with JIM JEFFRIES' retirement, and the Second District of Kansas is losing a capable and hardworking Representative. As his colleagues, we will miss him, and I wish JIM JEFFRIES and his family the best in their future endeavors.

#### GENERAL LEAVE

Mr. WINN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of this special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

#### PLOT TO SHIFT FORGERY LOSSES TO CONSUMERS RE-VEALED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is

recognized for 5 minutes.

• Mr. ANNUNZIO. Mr. Speaker, for over 200 years, it has been a rule of law that the person to whom a check is payable bears no loss if the endorsement is forged. The loss falls on the person or institution who dealt with the forger. Now, however, a committee dominated by banking lawyers is out to change this rule so that a consumer victim of check forgery would bear the first \$50 of loss from his own pocket.

Under draft No. 8 of the new uniform payments code, a consumer would be liable for the first \$50 arising from loss or theft of a check payable to him that was cashed by a forger. The new uniform payments code would hold consumers responsible if they obtain control over the check and it was subsequently lost or stolen from

the consumer.

This is a radical change from the uniform commercial code in effect in all 50 States, which holds that anyone whose check is stolen and whose endorsement is forged has no liability for the loss. Under present law, the entire loss falls upon the person or institution who cashes the check for the forger.

Under the new uniform payments code, an elderly women who is mugged after taking her social security check from her mailbox would be out the first \$50 if the thief forged her signa-

ture and cashed the check.

Many of our senior citizens can barely scrape by from month to month on their meager social security payments, yet insensitive lawyers seek to take millions from people where a couple of dollars may mean the difference between eating or going hungry.

Social security check forgery is no small matter. In 1981, the Social Security Administration referred 35,405 social security and 10,953 supplemental security income check forgery cases to the Secret Service. If each of the consumers in these 46,358 cases were held to the \$50 liability, these recipients would be out over \$2.3 million.

Social security checks are just the tip of the iceberg, however. According to Federal Bureau of Investigation estimates, about 30 million checks are forged in this country every year. An estimated loss of these forgeries to financial institutions and merchants is \$4 billion. At \$50 per check, it is possible that up to \$3.5 billion of the \$4 billion loss could be shifted to consumers

This is truly a radical proposition. Not only is it a departure from long-standing and settled principles of law, but it undercuts sound banking practices. Bankers preach "know your endorser" to their tellers. Every check issued by the United States bears a warning to the person cashing the check to "require full identification and endorsement in your presence."

Current law encourages good banking practices by placing the risk of loss on those persons in the best position to stop forgery losses. No forgery can succeed unless the forger finds someone willing to give cash or merchandise for the forgery. The financial institution or merchant stands face to face with the forger and has the power to thwart the crime by saying no. If someone gives something of value to the forger, then it is only fair that they bear the consequences of their action.

The new uniform payments code is being drafted by the 3-4-8 Committee of the Permanent Editorial Board for the Uniform Commercial Code. The board works closely with the National Conference for Commissioners on Uniform State Laws, which works to have uniform laws adopted by the States.

The board and national conference have been most successful in pressing for the adoption of the uniform commercial code. The uniform commercial code has been adopted in all 50 States and governs all aspects of commercial transactions. The new uniform payments code would replace those sections of the uniform commercial code that govern the payment and handling of checks and drafts and the allocation of loss for forgeries and unauthorized payments.

The 3-4-8 committee, named for those sections of the uniform commercial code which govern checks and negotiable instruments, is dominated by lawyers with close ties to the banking industry. Of the 11 members of the committee, 7 are members of firms who represent banks. An eighth member is employed by a chain of de-

partment stores.

The law firm of the chairman of the 3-4-8 committee is the registered lob-byist for the Consumer Bankers Association. The law firms of three of the committee members represent either Citibank or its holding company, Citicorp. One member of the committee sits as a director on the board of European-American Bank, and two of his partners are directors of the Bank of New York and Marine Midland Bank. Other banks who are clients of the committee members' firms are First

National Bank of Boston, Fidelity Bank, Philadelphia National Bank, Crocker National Bank, Manufacturers Hanover Trust Co., First National Bank of Atlanta, First National Bank of Chicago, Marine National Exchange Bank, Security Marine Bank, Capital Bank, and New England Merchants Bank.

There is no way that a committee dominated by banking lawyers can objectively rewrite our Nation's banking laws. The 3-4-8 committee simply does not adequately represent the interests of the elderly and the average citizen.

It should come as no surprise that the 3-4-8 committee discussion draft of the new uniform payments code states on its cover that "public disclosure is prohibited" and that the draft "should not be generally circulated \* \* \* or its substance disclosed." Given the proposal it contains, this desire for secrecy is as understandable as its proposal is outrageous.

It may well be that the laws governing our Nation's banking system need some refinement. In the past decade, many changes have come about. Retail charge volume on bank cards has increased over sixfold in the past 10 years. Debit cards and automated teller machines have experienced explosive growth over the past 2 years, with the number of cards increasing by over 500 percent. Networks of shared terminals permit a customer of one bank to obtain money from an automated teller machine hundreds of miles from home. Check truncation, in which checks written by a bank customer are not returned, is growing at a geometric rate. Electronic deposits and telephone transfer of funds continue

All these factors are changing the nature of our Nation's banking system. Next year, the Consumer Affairs Subcommittee will extensively study these changes. However, there is one thing that I can assure you will not happen, and that is a shifting of forgery losses onto the backs of the innocent victims of crime.

### CORPORATE POWER IN THE MARKETPLACE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. Reuss) is recognized for 10 minutes.

• Mr. REUSS. Mr. Speaker, 2 weeks ago the Hoover Institute at Stanford held a 2-day conference honoring the 50th anniversary of the publication of "The Modern Corporation and Private Property" by Adolf A. Berle, Jr., and Gardiner C. Means.

Dr. Means has been kind enough to provide me with a condensed version of the paper which he gave at that conference. It is entitled "Corporate Power in the Marketplace" and it is with a deep respect for this great figure in American economics that I commend the summary to my colleagues.

### CORPORATE POWER IN THE MARKETPLACE (By Gardiner C. Means)

(Prepared for the conference on The Modern Corporation and Private Property, Hoover Institution, Stanford, California, November 19-20, 1982, on the occasion of the 50th anniversary of the publication of Adolf A. Berle, Jr., and Gardiner C. Means's book, "The Modern Corporation and Private Property")

I have been asked to give you my present perception of the issues raised in our book on "The Modern Corporation" and, as an economist, I will focus on the second theme of this conference, the power of corporations. At the same time I will keep in mind the extent to which the separation of ownership and control increases that power. Also in speaking of corporate power in the marketplace. I want to make it clear that I am not concerned with monopoly power. Our book does not even list monopoly in the index. Rather I am concerned with the market power which arises naturally when there is active competition among a few large independent corporations and is re flected in the pricing discretion in the hands of individual competing enterprises. Also, the central aim of our book was not to give answers to the basic issues we raised but to prevent a realistic framework to replace the framework of the conventional picture of economic life so skillfully painted by Adam Smith in 1776, and which still provided the basic framework for the conventional wisdom fifty years ago.

I can summarize the paper on my present perception of our discussion of market power by first pointing out the basic change in the structure of the free market system which our book discusses. At the time we wrote, the prevailing economic wisdom centered on markets in which there were a large number of independent small competitors with no one producer having significant market power. But the gradual shift to corporate production so changed the market structure that a significant number of competitive markets represented competition among a few enterprises with individual firms having a measure of pricing discretion.

This gradual shift from market to administrative pricing had two profound effects. First, it gradually increased the productivity of both labor and capital so that the average level of living rose greatly over the years. Second, it undermined the ability of the free market system to maintain economic stability because competition among a few active competitors does not provide the

necessary price flexibility.

By the time our book was published, the conventional wisdom had registered the great increase in potential productivity due to the corporation but it still clung to the view that the free market system would operate automatically to eliminate excessive unemployment of labor and capital. Yet at that time a significant part of the country's industrial plant was idle and a quarter of its labor force was unemployed. Clearly a new framework was needed within which to work out the economic issues and policies for that day.

for that day.

As I now read what we said at that time, I continue to believe that the most important economic conclusion we reached is in the chapter on "Concentration of Economic

Power" where we said in our fifth and final conclusion on "economic power":

"Competition has changed in character and the principles applicable to present conditions are radically different from those which apply when the dominant competing units are smaller and more numerous." (p.45)

And I fully agree with our final conclusion that the Modern Corporation has wrought such a change in the free market system that:

"New concepts must be forged and a new picture of economic relationships created." (p. 351)

In our book we provided the new framework when we showed that by 1930 roughly three quarters of the business wealth of this country was held by corporations; that practically half of this corporate wealth was controlled by the two hundred largest; that a substantial part of this wealth involved a separation between ownership and control; and that the free market system had shifted from one dominated by markets in which competition was among the many to a system compounded of such markets and markets in which competition was among the few, with significant market power in the hands of management.

#### PART II

When I turn from my present perception of what we said with respect to market power and consider the new concepts which grew directly out of this new framework, I have no hesitation in saying that far and away the most important new economic concepts were the concept of an "Administered Price" and the concept of "Administrative Competition." The first can be defined as a price set for a period of time and a series of transactions. The second is what I will call the non-classical form of competition in which there are so few independent competitors that individual competitors have a significant degree of pricing discretion and price setting becomes an active function of business administration.

What makes these two new concepts which grew out of our book important is that they alone are sufficient to explain not only why, in the 1930's, the automatic corrective of Classical Competition could not work, but also pointed to an alternative mechanism which could maintain high employment in a way consistent with the free market system of that time.

This problem and a solution were clearly brought out in a 1934 paper on "Price Inflexibility and the Requirements of a Stabilizing Monetary Policy," which I gave before a joint session of the American Statistical Association and the Econometric Society. There I first publicly introduced the concept of an administered price and gave extensive statistical evidence that there were two quite different types of competitive market, one in which prices changed frequently and were highly flexible and one in which prices changed infrequently and tended to be inflexible. This can also be seen in Chart I.

[Charts not printed in RECORD.]

As I look back on this 1934 analysis, I would now modify it in only two important respects. First, I would add Keynes's deficit spending to my monetary expansion as a possible but not a necessary way for government to expand aggregate demand when there is excessive unemployment. Second, I would point out the new kind of inflation which we have been experiencing over most of the period since 1955 and say that the

1934 analysis does not cover this new phenomenon.

In my paper for this conference I elaborate on the confusion of policy and the long period for recovery but in this summary I will only say that the period was one of great confusion in economic policy and the final process of recovery shown in my Chart II tended to confirm the 1934 analysis.

When I turn to the role of Corporate Power in the Marketplace during recent years, I find that the creeping increase in the role of Administrative Competition has passed a critical point in changing the structure of the free market system and suddenly brought us a new type of inflation with prices rising sharply in recession.

The conventional wisdom holds that any sustained inflation "always and everywhere comes from too much money chasing too few goods." Yet, if this were true it would mean that simultaneous inflation and reces-

sion would be impossible.

Yet in each of the four substantial recessions in the last dozen years, prices rose substantially while demand fell substantially. Most of the inflation in these four recessions represented not "too much money chasing too few goods" but "too little money chasing goods on well stocked shelves." Obviously, in these recessions, more prices by weight, were rising than falling. I have called this new type of inflation "Administrative Inflation" because it arises from the behavior of administered prices. Chart III shows that in the administrative inflation of the 1950's prices which rose were, in the main, prices in the concentrated industries.

Once the reality of simultaneous Inflation and Recession is recognized three major questions pose themselves: What makes it possible? Why did it come suddenly? And how can it be overcome within the frame-

work of the free market system?

Here I will consider only four sources of inflation in recession. I will call them cases of "Perverse Pricing" in which a fall in demand leads a management to raise a price. They include: (1) Full-cost pricing; (2) a reduced risk of entry; (3) arbitrary wage increases; and (4) the expectation of inflation.

Full Cost Pricing takes various forms, most of which can produce Perverse Pricing. Each involves a fixed cost and a given profit target and when these have to be spread over a smaller production volume, the cost per unit goes up.

A second source of perverse pricing arises where competition is among a few and the risk of encouraging new entries to the industry is reduced by a fall in demand. The greater the idle capacity the less danger that a high profit target will attract new entrepts.

The third possible source of perverse pricing can result from the arbitrary raising of wage rates. It is well recognized that increases in real productivity justify and increase in real wage rates. But there tends to be confusion over what is a legitimate wage increase in other circumstances such as a rise in living costs. For example, in a period of recovery the reflationary increases in flexible market prices as they rise into balance with administered prices in a recovery period would be a legitimate ground for a wage increase.

The fourth source of perverse pricing is a widespread expectation of inflation. It bears little relation to the classical "flight from money". In classical markets, the double transaction of a speculator expecting infla-

tion tends to cancel out. But where a firm has pricing discretion the expectation of inflation tends to be self-fulfilling.

There may well be other sources of perverse pricing, but the above are sufficient

for present purposes.

Once one recognizes the fact that structural change has been gradually increasing the relative role of Administrative Markets, it is easy to see why the appearance of Administrative Inflation has been relatively sudden. So long as the balance between the two types of competitive market favored classical competition, it meant that, in recession, more prices would go down than would go up so that the price level as a whole would go down and the constructive program of monetary and fiscal measures already described could operate effectively. But once a critical point has been passed in this gradual structural change, the role of perverse pricing will have so greatly increased that more prices will go up than will go down in recession and we would have the new type of inflation with the level of prices rising in recession.

This critical turning point is a new conception and I will christen it the "Great Divide". It seems to have occurred without fanfare somewhere in the 1950s and it is well behind us at the present time. The passing of this Great Divide presents us with the basic problem of eliminating the new type of inflation in a way consistent with the free market system and the opti-

mum use of resources.

Once the Great Divide has been passed, we are in unknown territory which has been little explored and are faced with two major dilemmas. First the monetary and fiscal measures which can be used to control aggregate demand when the economy is on the favorable side of the Great Divide cannot control the new kind of inflation and second the expectation of inflation tends to become self-fulfilling once the economy has passed the Divide.

The failure of monetary and fiscal measures is beginning to be recognized even by laymen. For example, a tight money policy which limits demand in the hope of controlling inflation can be expected not only to increase idle machines and workers but also raise prices. And an expansion in the money stock to stimulate demand will also stimulate both inflation and the self-fulfilling ex-

pectation of inflation.

As I see it, the basic source of this double dilemma is not the perverse pricing as such but only that structural change has carried the number of prices set perversely beyond the critical point. The big problem is to bring our economy back to the favorable side of the Divide.

In theory there are various ways by which this could be done. Mathematically, if enough big companies were pulverized the amount of perverse pricing could be reduced to the necessary extent but this would mean a great decline in efficiency. If enough prices were regulated by government, perverse pricing could be limited to the necessary extent but it would reduce the efficiency of the free market system.

A third possibility is to get a sufficient number of big corporations to change their methods of pricing in a constructive fashion. I think the third of these is the most

promising to explore.

At first glance it might be thought that such a shift in the use of market power would be difficult to bring about without regulation. But there are conditions now existing which would facilitate such a shift,

once the need for the shift is recognized. These conditions are discussed in my full paper under the following heads:

1. The Relative Newness of Administrative Inflation

2. Corporate Experience with Long-Run Target Pricing

3. The Self-Interest of Big Business
4. Corporate Power and Corporate Responsibility

5. The Existence of Flexible Foreign Exchange Rates

In the presence of these favorable conditions it seems not impossible to find ways to return to the favorable side of the Great Divide.

I am encouraged to think that the necessary change in business practices could be brought about when I recall the success of the Committee for Economic Development, a group of progressive business leaders, known as the CED, in altering the outlook of business at the close of World War II.

As the War drew toward a close, there was widespread expectation of a big recession similar to that which had followed other wars. Faced with this danger, the CED set out to alter the business attitudes which pointed to a recession. To bring about such a shift, it persuaded the Department of Commerce to make estimates, industry by industry, of the real production which would result if demand were that which would give full employment. These estimates were then published as "Markets After the War" and very widely distributed. Then CED representatives visited key industrialists to persuade them to be prepared for a much larger demand than they had envisaged. Largely as a result of the shift in business attitudes which this brought about business was ready to expand its peace-time capacity when peace arrived. The nation avoided a recession.

In the present situation, the needed shift in business attitudes is more complex but could be facilitated by the preparation of current estimates of "Markets at Full Employment" and a similar drive on the part of progressive business leaders to stimulate pricing practices that will contribute to the new type of inflation.

The estimates of "Markets at Full Employment" would be stated in real terms and to be most effective would need to be supplemented by a set of price and wage Guidelines which distinguish between price and wage setting that would generate perverse pricing and that which would not.

This summarizes my present perception of the central economic problems raised in our book. I must reiterate the conclusions of our

book

"Competition has changed in character and the principles applicable to present conditions are radically different from those which apply when the dominant competing units are smaller and more numerous": and

"New concepts must be forged and a new picture of economic relationships created."

These words ring as urgently today as they did fifty years ago.

#### JAPANESE, EUROPEAN PACT EXISTS IN TRADE WAR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. Gaydos) is recognized for 30 minutes.

Mr. GAYDOS. Mr. Speaker, tomorrow, December 16, 1982, there will be placed in the records of the United

States full documentation that there exists a pact of economic aggression against the United States by our European and Japanese trading partners and allies.

It will not be placed there by the Government of the United States, which has a duty to be alert to such things.

It will be placed there by a group of American steelmakers, who had to ferret it out themselves, whose workers are being bled to death by this pact of aggression and the continuing trade war that is behind it.

This documentation will be filed with the Special Trade Representative of the United States as part of petition for relief from Japanese steel that has been traded in violation of our existing treaties with them and in willful disregard for the General Agreement on Tariffs and Trade.

Obtained from foreign sources, this documentation is to include evidence of talks and agreements dividing up the world steel market and limiting competition.

It will include a showing of government-to-government dealings, I am told, which makes it more than companies cartelizing.

The division of the world into what is called spheres of influence—a term of geopolitics and war—was along the following lines:

First, west of the Suez Canal, the Japanese honored prices set by the Europeans and they limited exports to that area; east of Suez, the Japanese held sway, setting prices and quotas the Europeans honored.

Second, there will be an allegation of formal restraints on price and quantity in the steel trade between Europe and Japan.

Mr. Speaker, they carved up the world like a big turkey, and the choicest piece of turkey meat, although not specifically named, but the only open market in the world, absorbed their excess production—took the steel that could not be fitted into the spheres.

In short, they made the United States a free fire zone in this secretly reached trade war accord of theirs; and as far as I know never mentioned us by name.

But the market is big and it is open and our governments always have been committed to honoring GATT, which they were not.

As Gen. Douglas MacArthur said, "wars are caused by undefended wealth."

This agreement is not unlike the Tripartite Pact of 1940 that preceded our participation in World War II.

In that accord, the Japanese and the Germans and the Italians promised each to come to the aid of the other in the event of attack by—and I quote from reference works on the subject—

"of attack by a power not already engaged in war."

The United States was not named in that pact either, but we were a primary subject of the agreement.

Striking in this fashion dovetails with the emerging theories of samurai economics as well as with the ideas of a European, Von Clausewitz, on war, that are being carried over into economics these days.

With this agreement, in their regard for GATT and other treaties, they have conscripted into service another European power thinker, Von Bismarck

Of treaties, Von Bismarck said:

All treaties cease to be binding when they come into conflict with the struggle for existence.

They are struggling to keep their mills and factories running and their workers employed.

I understand that the petition will file this documentation in a manner that will keep it confidential; that is, it will be closed from public scrutiny. I am told the confidentiality is necessary to avoid disclosing the source.

That may be so.

But it is the duty of the Government of the United States under our law to determine its validity—to pursue it with vigor and with force.

We have not been forceful in trade matters thus far in our history. We have been weak. In fact, it was U.S. Government pressure that brought the negotiated settlement of the recent subsidy and dumping disputes with the Europeans before the International Trade Commission's formal ruling. This settlement allows continued access to this open market. A formal finding and the imposition of countervailing duties and tariffs probably would have shut them out altogether.

Furthermore, there is an allegation that the yen is officially manipulated to keep it undervalued as a way of promoting Japanese exports.

Despite the weakness of the yen, the House should know that the only big criminal indictments for steel dumping were returned last summer against a Japanese company. The company paid \$11 million in fines and shut off further investigation.

Nevertheless, in responding to this petition the Government of the United States must follow the advice of the European, Von Clausewitz, who said:

Do not dread confrontation so much as to avoid it when attainment of a goal requires it.

The goal, Mr. Speaker, is nothing less than the survival of the industrial base in the long run.

My brief remarks tonight have been merely to put the House on notice of what will happen. I will follow up in detail later. Meanwhile, the disclosure of this pact of economic aggression should stand as harsh notice that there is a trade war.

In my mind it is as inescapable a notice as was the December 7 attack on Pearl Habor.

It is time for the U.S. Government to face up to what Clausewitz calls the most important job of a leader—it is time to recognize what kind of war we are in; and time to be sure we are not taking it for, or wishing it to be, something it cannot be.

In short, Mr. Speaker, secret agreements and cartels and spheres of influence and dumping have nothing to do with free trade—nothing, no matter what some might wish.

But they have everything to do with trade war.

The 175,000 steelworkers who are laid off or are on short weeks will be watching.

The 12 million unemployed will be watching.

All they want is for Congress and the administration to give them a chance to fight back in the trade war—and to win it.

Now, Mr. Speaker, for the RECORD, I offer the remarks of the chairman of the American Iron and Steel Institute, Mr. David Roderick, in explaining the petition today in a press conference.

Mr. Roderick's remarks were as fol-

The American Iron and Steel Institute and eight individual steel companies will file tomorrow with the United States Trade Representative a petition asking the Government to take remedial action against an agreement between Japan and the European Coal and Steel Community which limits the exports of Japanese steel to Europe. In this petition, filed under Section 301 of the Trade Act of 1974, we assert that over the last decade the Japanese Government has entered into a series of agreements with the European Community which have imposed minimum prices or quotas or both on steel exported by Japan to the Community. The most recent of these agreements, so far as we are aware, is a minimum price and quota agreement entered into by Japan and the European Community in 1978. Pursuant to this agreement, the Japanese and European steel industries negotiated a broader market sharing scheme under which each side had its own sphere of influence. The European sphere of influence is west of Suez, and in this sphere the prices are set by the Europeans and honored by the Japanese. The Japanese also limit their exports to this region. The Japanese sphere of influence consists of the coastal markets in the Far East plus India and Pakistan. In this area, the market prices are established by the Japanese and followed by the Europeans. Also, European exports to the Japanese area are subject to quota limitations.

Although the Middle East, Eastern Europe and China are not subject to quota limitations, the Europeans and the Japanese have agreed that market prices in Eastern Europe are set by the Europeans whereas those in China are set by the Japanese. Compliance with this comprehensive market sharing scheme is monitored through an exchange of confidental price

and volume information between the Japanese and the Europeans, and any significant deviation from the agreed prices or volumes is the subject of prompt consultations. Thus, the unvarnished truth is that the quantitative and price restraints imposed on Japanese shipments to the European Community under the 1978 agreement are an intregal part of a broader market sharing scheme and a continuation of quota arrangements between the Japanese and the European Community dating back a decade.

The petition alleges that the 1978 agreement between the Japanese and the European Community is in violation of Japan's most-favored-nation obligations to the United States under the GATT Treaty and under the Japan/US Treaty of Friendship, Commerce and Navigation. It also alleges that the 1978 agreement is discriminatory under both treaties and imposes a burden on United States commerce. Finally, we allege that the dominant position of the Japanese steel industry, which was originally attained through a program of governmental subsidization and protectionism, is being artifically maintained through an undervalued Yen in violation of the GATT Treaty.

We allege that each of these actions that I have mentioned on the part of the Japanese government violates Section 301 of the Trade Act of 1974 and that as a result the United States Government should take certain steps to grant relief to the domestic steel industry. The relief asked for is fourfold: first, reduced steel shipments to the United States from Japan by way of compensation for past harm; second, a phaseout of the agreement between Japan and the European Community; third, enforcement of Japan's most-favored-nation obligation to the United States; and fourth, the imposition of an import levy on Japanese steel to reflect the current undervaluation of the Yen.

You have already been given a summary of the petition, and the full text will be available to you tomorrow, so I will not attempt to give you further details now. I only wish to give you the background for this action.

This Section 301 petition is not a spur-ofthe-moment reaction to a short-term problem with imports, nor is it a reaction to the difficult conditions in which the domestic industry finds itself during this recession. For 20 years, the American steel industry has been attempting to fight a growing volume of predatory steel imports, in violation of our trade laws.

The figures speak for themselves: In the decade of the 1950s, imports took a 2.3 percent share of the domestic market; in the 1960s, 9.3 percent; and in the 1970s, 15.3 percent. In 1981, that market penetration rose to a record high of 19.1 percent, and in the first 10 months of this year, 22.4 percent—indicating another all-time-high record for the full year 1982.

We assert now, as we have for 15 years and more, that this growth has come largely from the sale of dumped and subsidized steel in this market, and as a result of other discriminatory and predatory foreign practices. The United States has been the only major open market for steel in the world. As such, we have been targeted by every other major steel manufacturing country as the dumping-ground for surplus production, often coming from over-built and subsidized steel plants. These plants export to the U.S. market at almost any price, in order to maintain employment—at almost any cost

to their national treasuries, and with little regard for the injury caused to the Ameri-

can steel industry and its employees.

Dumping and subsidization by the EEC countries have been partially alleviated by arrangements reached earlier this year by our government. But many other countries also routinely sell subsidized and dumped steel in this market.

The arrangements reached between Japan and the EC over the past ten years are a somewhat different example of discriminatory foreign conduct, which have had the effect of protecting foreign production and employment and have victimized the American steel industry and its employees.

The cumulative effect of these unfair trading practices has been a major contribution to the unemployment among American steel workers—now approaching 50 percent—and to operation of our steel mills below 50 percent of capability for most of this year, the lowest since the Great Depression. In recent weeks the operating rate has

been down almost to 30 percent.
This new "301" petition asks that the U.S.
Government require the Japanese to reduce
their shipments to the U.S. by almost onethird over a four-year period—while at the
same time obtaining a gradual phase-out of
the discriminatory agreement between
Japan and the EC. It also asks that an
import surcharge be put on Japanese steel
imports to offset the undervaluation of the
Yen.

We will continue to watch closely the marketing practices of all supplying countries, and will take whatever actions may be required to defend ourselves against unfair trade practices.

The unprecedented number of unfair trade cases filed this year has one central theme: Free trade must be a two-way street and it must be fair, fair as specified in international agreements and fair as provided by Congress in U.S. trade laws. Thus far it has been neither free nor fair. Success in these cases would result in a substantial reduction in steel tonnage imported, would represent a modest return to equity in steel trading relationships in the American market, and would produce more job opportunities for U.S. workers.

#### □ 2020

#### GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

### TIME OF CHANGE AT THE CO-OP BANK

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. St Germain) is recognized for 10 minutes.

Mr. ST GERMAIN. Mr. Speaker, this week, the news media has carried some information apparently released from an examination of the National Consumer Cooperative Bank.

As long as this information is being made public, it is important that the Bank's release of data be complete enough to reflect accurately the import of such documents as the Farm Credit Administration's examination report.

The report, in my judgment, is a serious matter for the Bank and one which requires decisive, quick, remedial action. I have informed the Bank's Board of Directors that it should make immediate corrections of the deficiencies noted by the FCA. I have received assurances from the Bank that remedial steps are being considered. At this stage promises outnumber definitive actions.

The material released to the press emphasizes the estimates of the ultimate losses from bad loans—2 percent of the title I portfolio and 27 percent of the title II portfolio.

While it had not been my plan to release the FCA report, I think it now becomes important to place these numbers in the context of the overall tone of the report. If the report is to be discussed, it is significant to note that nearly 25 percent of the portfolio is identified as nonperforming at the date of the examination. The number of classified loans was unacceptably high.

It is very true that the Congress did not give the Bank an easy set of assignments, and that it must face some situations that commercial banks are able and willing to ignore. However, it would be an extremely serious mistake if this rationale was used to cover deficiencies.

#### As the FCA report states:

Although the poor quality of the Bank's loan portfolio may have resulted partly from a business and lending philosophy deliberately formed with a greater tolerance for risk than was acceptable to conventional lenders, the causes more easily discerned by the examiners were deficiencies in organization and in the capabilities and performance of credit staff.

It is also true that the Bank was born under difficult circumstances and that it was forced to expend much of its energy to fend off the absurd vendetta of the Reagan administration in 1981. None of us should underestimate the extreme pressures placed on the Bank by its political enemies.

Nonetheless, the Bank must operate in a prudent and efficient manner. Clearly, it must if it is to carry out its mission and be able to raise funds in the marketplace. It must be structured and operated so that its "outreach" capabilities are brought into play and so that full potential of consumer cooperatives is realized.

Happily, the majority of the Bank's original capital is unimpaired. It is in a position to correct its earlier mistakes, to reorganize and to retain the confidence of the broad-based coalition which made the legislative effort a success.

At the moment, the Bank's president, Carol Greenwald, is on a sabbatical and her present contract with the Bank expires on January 31. For the past several months, the Bank has issued a number of limited and ambiguous statements concerning the status and plans for the chief executive officer. I would suggest to the Bank and its Board of Directors that there be an early and definitive public statement about the future plans for the most important position at the Bank. Anything less does a disservice to the institution and the cooperatives which own and support the Bank.

One of the items on this committee's agenda for the next Congress will be a full and open hearing on the National Consumer Cooperative Bank and the various examinations and studies now being carried out by the FCA and the General Accounting Office. We will be looking for the changes and corrections that truly suggest that the Bank understands its responsibility under its charter and that it is fully responsive to its shareholders and the consumer cooperative movement. I am certain that the Bank and its Board will understand that promises will carry much less weight with the committee than actions.

EXPLANATION OF SIGNIFICANT PROVISIONS OF THE HALL-KINDNESS AMENDMENT TO H.R. 746 THE REGULATORY REFORM BILL

(Mr. SAM B. HALL, JR., asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. SAM B. HALL, JR. Mr. Speaker, the basic purposes of H.R. 746 are unchanged by any of the modifications made by these amendments. In short, the purpose of title I is to improve the planning and management of the process through which major rules; that is, regulations, are developed. The purposes of title II are to amend the current Administrative Procedure Act (APA) to improve the quality of all regulatory decisionmaking, to increase public involvement in the regulatory process, and to modify the provisions for judicial review of agency action. Therefore, except as set forth in this discussion and the section-by-section analysis that accompanies it, the report of the committee that was issued on February 25, 1982 (H. Rept. 97-435) continues to apply.

### TITLE I

#### Section 621. Definitions

Section 621 sets forth definitions for purposes of new subchapters II, III, and IV of Chapter 6 of title 5.

New section 621(a)(2) and (3) define the terms "benefit" and "cost," respectively. These terms had been used without definition in the bill as reported by the Committee

tee, and it seems useful to provide defini-

Although the definitions of "benefit" and "cost" are quite broad-encompassing any direct or indirect beneficial (in the case of 'benefit") or adverse (in the case of "cost") effect-it is not intended that agencies will have to identify all benefits and costs no matter how insignificant and attenuated they may be. The benefits and costs that are contemplated are those that are reasonably identifiable and of some significance.

term "economic cost" in section 621(a)(4) is a subset of the term "cost" defined in section 6?1(a)(3)-being limited to those costs that are "reasonably quantifiable in monetary terms." The term "economic costs" is not limited to costs that are financial in nature. It also includes health, safety, and environmental costs which are reasonably quantifiable in monetary terms. In addition, it should be emphasized that some indirect as well as direct costs may be quantifiable in monetary terms, thereby qualifying as "economic costs". For example, an indirect effect of a rule, such as a reduction in innovation or productivity or an increase in consumer prices, might be quantifiable in monetary terms with a reasonable degree of effort and accuracy. If so, such an indirect cost would be an "economic cost" within the meaning of section 621(a)(4)

Section 621(a)(5) sets forth the definition of "rule". The exemption for rules involving internal revenue laws is moved from this list of exemptions to section 621(b)(2)(A), so that such rules can be designated as major either by the agency or by the President. Also, the exemption for rules that repeal, withdraw, or otherwise modify rules promulgated before the effective date of this Act has been deleted because of the imprecision of the language of the exemption and because of a concern that any agency action qualifying as a major rule should be careful-

ly analyzed. Section 621(a)(6)(A), as redesignated, defines a "major rule" as a rule or group of closely related rules that the agency determines". . . imposes economic which are likely to result in an annual impact on the economy of \$100,000,000 or more." The economic costs to which this provision refers are the aggregate costs imposed by the rule that are reasonably quantifiable in monetary terms. A rule also may because it would have signifibe "major" cant adverse effects or cause a substantial increase in costs that are not reasonably quantifiable in monetary terms. But a classi-

fication of "major" on these latter grounds

could be made under section 621(a)(6)(B) rather than section 621(a)(6)(A).

It is important to emphasize that the reasonably quantifiable costs referred to in section 621(a)(6)(A) are to be computed on an aggregate basis, without any offsetting allowances for associated benefits of the rule. Benefits, of course, are important and must be identified and carefully analyzed in any regulatory analysis performed for a major rule. Thus, in deciding whether a rule qualifies as "major" under the \$100 million test in the first place, the focus should be solely upon the gross costs that are reasonably quantifiable in monetary terms, without netting out any resulting benefits of the rule. On the other hand, if a rule, for example, reduces existing levels of environmental protection, that reduction in environmental protection would be a cost; though it may or may not be an "economic cost", depending upon whether it is reasonably quantifiable in monetary terms.

The modification to the definition of 'major rule" deletes the separate category for rules that "will have a substantial impact on health, safety, or the environ-ment" in light of the revision, described above, of the \$100 million test. Under that test, rules which have an adverse impact on health, safety, or the environment which can be reasonably quanitfied in monetary terms and which exceed \$100 million annually are major rules. In addition, either the agency or the President may designate as "major" any rules that have a substantial impact as defined in section 621(a)(6)(B).

Section 621(b)(1) requires the President to publish in the Federal Register a rule which he/she designates to be major. This publication must be accompanied by a succinct explanation of the basis for this designation. The President should make such a designation only when clearly justified since the designation of a rule as major imposes a burden on an agency's financial and personnel resources and may diminish the ability of an agency to carry out its other responsibilities. The bill prohibits the President from delegating his authority to make such a designation.

Section 621(b)(2) exempts certain rules from being major rules under the \$100 milannual impact test of section 621(a)(6)(A). These rules are exempted because the analysis required of a major rule is inappropriate for these particular rules. Such rules could still be designated as "major" by an agency or the President under section 621(a)(6)(B).

Finally, it should be noted that the regulatory process affects a wide variety of matters. The proposed section 621(a)(6) which defines the term "major rule" is therefore of necessity framed in general terms, and its bare words could, it is recognized, be read to provide for hundreds of regulatory analyses. That is not the legislative intent. Rather. the point of section 621(a)(6) is to direct the agencies to allocate their resources to throughly analyze rules of truly major significance. The judgment expressed in section 621(a)(6) is that given the money and time that must be invested to conduct these analyses, it is only worthwhile to undertake them with regard to such rules. It should be noted also that the President is expected to use the authority stated in section 621(a)(6)(B) is a manner that does not place a disproportionate burden on any agency.

Section 622. Additional procedures for major rules

Section 622 directs agencies to complete certain procedures as part of the process of issuing major rules. While these procedures should result in information valuable to the agency in making its regulatory decisions, they do not change the substantive standards applicable to the agency's action under

any other provision of law. Sections 622(b) and (c) require an agency to issue certain material regarding each major rule. The material issued should be succinct but appropriately comprehensive to satisfy the particular requirement. However, there is no intent here to imply that the material issued under subsection (b) be as complete as that issued under subsection (c). The material issued pursuant to subsection (b) is intended to be a preliminary document, that is, a document that indicates the agency's thinking in issuing the notice of proposed rulemaking. Thus, it will probably be less conclusive and less extensive than that issued under subsection (c).

Section 622(b)(2) requires an agency to describe the reasonable alternatives to a pro-

posed rule and the main elements of the rule that may accomplish the stated rule making objectives in a manner consistent with the applicable statutes. In any case where the proposed rule does not have lower economic costs—that is, costs that are reasonably quantifiable in monetary terms-than each of the reasonable alternatives, the agency is to identify the alternative having the lowest such costs. The method that may accomplish the stated objectives of the proposed rule, in a manner consistent with the applicable statutes, at the lowest economic cost should be one of the reasonable alternatives described under section 622(b)(2), unless the proposed rule tself is the method that has the lowest economic costs.

The phrase "may accomplish" rather than "will accomplish" was used in recognition of the fact that when an agency proposes a rule, it is unlikely to know with a high degree of certainty that the proposed rule or any one of the various alternatives will accomplish the stated objectives of the rulemaking. Consequently, in identifying and describing alternatives to the proposed rule, the agency should consider those alternatives that, at least at this preliminary stage, may reasonably be anticipated to accomplish the rulemaking objectives. A more well-informed and considered judgment on this point can be made by the agency when it takes final action in the rulemaking after analyzing the proposed rule and the various alternatives in light of the comments submitted by interested persons.

Section 622(b)(4) requires an agency to issue an analysis of the benefits and costs of the proposed rule and of each of the princialternatives described in section 622(b)(2). In any case where the proposed rule does not have lower economic costs than each of the other alternatives described in section 622(b)(2), one of the principal alternatives analyzed under section 622(b)(4), must be the alternative to the proposed rule that has the lowest economic costs. Section 622(b)(4) also requires the agency to present a comparison of the cost effectiveness of the proposed rule and of each of the principal alternatives that it analyzes.

This provision is a reformulation of the comparable provision appearing in the bill reported by the Committee. The analysis of benefits and costs required by section 622(b)(4) is intended to provide the agency with information that will be of assistance in evaluating various possible approaches to achieving the rulemaking objectives. In order to maximize the usefulness of an agency's assessment of the benefits and costs of a proposed rule and the alternatives to the rule, it is desirable to quantify, as well as describe, the costs and benefits. However, there are both technical and practical limitations on this exercise in quantifi-

For one thing, it may not be technically feasible to quantify certain costs and benefits. In some cases, particular costs of benefits may not lend themselves to quantification in any appropriate unit of measurement. In other cases, it may be feasible to quantify particular costs or benefits in some unit of measurement (relating, for example, to adverse effects that are incurred or avoided), but it may not be feasible to present a reasonable or responsible quantification of such costs or benefits in monetary terms, and section 622(b)(4) does not require the agency to do so.

In some instances, quantification in monetary terms or some other appropriate unit of measurement may be technically feasible; yet, practical considerations may be such that the effort to quantify particular costs or benefits probably should not be undertaken. For example, although technically feasible, quantification of particular costs or benefits may involve such an excessive expenditure of agency time and resources that it would seriously interfere with the discharge of the agency's overall public interest responsibilities as contemplated by Congress.

In other cases, quantifying particular costs or benefits might clearly be a wasted effort even though the expenditure of agency time and resources would not be particularly great in an absolute sense. For example, particular costs and benefits may clearly be insubstantial when compared to the overall costs and benefits of the rule. Quantifying such insubstantial costs or benefits almost certainly would not provide information that would be useful in evaluating the proposed rule and the various alternatives. Therefore, the agency would not be expected to quantify such costs and benefits under section 622(b)(4), even though the expense of doing so would not be particularly high.

In short, section 622(b)(4) contemplates that agencies will attempt to quantify costs and benefits, either in dollars or in the most appropriate unit of measurement other than dollars. But it recognizes that, in some cases, quantification of particular costs or benefits would be technically infeasible, or would unduly disrupt the discharge of agency responsibilities, or would provide information that would be only marginally useful in evaluating the various possible approaches to achieving the rulemaking objectives. Section 622(b)(4) does not require an agency to quantify particular costs and benefits in such cases.

Section 622(b)(6) requires agencies to identify any scientific, economic or other technical report or study upon which it has relied substantially or expects to rely substantially in the rulemaking. With respect to any such report or study that is scientific or economic in nature, the agency also must describe how it has evaluated or intends to evaluate the quality, reliability, accuracy, and relevance of the material.

This provision and the companion provision in section 622(c)(8), which applies to the materials issued in connection with the final rule, have been included in the bill in recognition of the fact that, in many instances, informal rulemaking for major rules has increasingly come to be dominated by complex scientific, economic, and other technical issues. In order to ventilate those issues in a useful manner, agencies ought to identify the scientific, economic, or other technical reports or studies upon which substantial reliance is being placed in the rulemaking, thereby allowing interested members of the public to focus on those studies.

To further facilitate this process and to help make it more likely that complex scientific and economic reports and studies are competently analyzed and evaluated and that the conclusions drawn from such studies and reports represent a valid basis for rulemaking activity, the agency must describe how it has evaluated or intends to evaluate (through peer review or otherwise) the quality, reliability, accuracy and relevance of any such report or study. This description should encompass not only the agency's evaluation of the information con-

tained in the report or study, but also the agency's evaluation of any factual conclusions drawn from the report or study. While this subsection does not require an evaluation of such reports and studies, the judgement expressed in this section is that agency decision-making on questions involving complex scientific and economic issues ordinarily will be improved if such evaluations are made.

Section 622(c)(5) is restated to clarify its original intent: agencies are to analyze the extent to which the benefits of a rule justify its costs. If the benefits do not justify the costs, the agency is to give an explanation of why it adopted the rule. This provision does not set forth a new substantive standard under which the rule must be issued. Rather, it requires an agency to look at the relationship of the costs and the benefits of a major rule, to draw conclusions regarding that relationship, and to explain its rulemaking decision in light of those conclusions.

Section 622(c)(6) is modified in a way similar to section 621(c)(5). This section also in no way imposes a new substantive standard on agency decision-making. It simply requires an agency to explain how the rule attains its objectives, in a manner consistent with applicable statutes, with lower economic costs than the other alternatives analyzed pursuant to section 622(b)(4). If the rule does not do so, the agency is required to articulate its reason for selecting the rule rather than the lower cost alternative. Obviously, there will be many instances where the agency will choose an alternative which does not have the lowest economic costs. For example, the alternative rejected may have low economic costs (that is, costs which are reasonably quantifiable in monetary terms) but may also have very serious adverse effects which are not so quantifiable or greater benefits than the alternative that was rejected.

Section 622(c)(7), as originally contained in H.R. 746, is deleted from the bill. It required a summary of significant issues raised by the public in response to the materials issued under subsection (b) of section 622 and a summary of the agency's response to those issues. This subsection was deleted only because it was deemed unnecessary in light of section 553(c)(1) of title 5 as it is amended by this bill. That subsection requires that the statement of basis and purpose for major rules, as for all other rules, will include a response to significant issues raised in comments. To have required the agency to issue such information under subsection (c)(7) of section 622 as well would

simply have been redundant. Section 622(d), as designated in H.R. 746 as reported, has been deleted. This subsection had required any person who submitted comments on a major rule to include in those comments the information on which they were based. This requirement was adopted by the Committee so the agency and the interested public could more fully evaluate the validity of the claims and conclusions contained in comments. Removal of this section is not intended to reflect a lack of concern about the fact that some participants in rulemaking proceedings submit comments that contain no factual or other support for their conclusions. In fact, it is very important for those who submit comments to provide the information necessary for the agency and the public to evaluate the validity of those comments. However, a statutory requirement that participants do so might have created an inference that unsupported comments, such as anecdotal letters from the public regarding the physical discomfort resulting from air pollution, could not be considered by the agency. Therefore, while the provision did state the intent of the Committee that agencies carefully scrutinize the basis and conclusions of comments, the provision itself was deleted from the bill.

Section 622(d)(3) requires an agency to include in the rulemaking file required by section 553(f) (as established by this bill) a copy of the material issued pursuant to sections 622(b) and (c), and a copy of the transcript of any informal public hearing held pursuant to section 622(e). The provision also requires the agency to include in the file a copy of any scientific, economic or other technical report or study that the agency actually considered in connection with the rulemaking, if information in the report or study pertains directly to the rulemaking and was prepared by officers or employees of the agency or by a person working under contract with the agency.

It should be noted that the scientific, economic, and other technical reports or studies that are required to be placed in the rulemaking file under section 622(d)(3) are different from the scientific, economic, and other technical reports that the agency is required to identify pursuant to sections 622(b)(6) and 622(c)(8). The reports and studies that must be identified pursuant to these latter provisions are limited to those, from whatever source, on which the agency has relied or expects to rely substantially in the rulemaking. Section 622(d)(3), by contrast, requires the agency to include in the rulemaking file not only the studies on which the agency substantially relies, but also any other scientific, economic, or technical reports or studies that agency decisionmakers actually considered (even though not relied on) in the rulemaking, as long as the information in the report or study pertains directly to the rulemaking and was prepared by the agency personnel or under contract with the agency.

Section 612(e) requires an agency which proposes a major rule to provide an opportunity for oral presentation of views at informal public hearings. In those cases where the agency determines that other procedures would be inadequate for the resolution of significant issues of fact upon which the rule is based, the agency is also required to provide for cross-examination on those issues.

Section 622(e)(3) is modified to provide an explicit requirement that the agency regulate the course of the informal public hearings required by this subsection in order to ensure orderly and expeditious proceedings. As stated in the Committee report, this provision is not intended to turn informal rulemaking proceedings into formal rulemakings or adjudicatory hearings, and agencies are required to control the proceedings to avoid undue delay and dilatory tactics on the part of participants in the hearings. The amendment makes clear that where cross-examination is allowed, the agency may impose limitations on the time and scope of that cross-examination.

Section 622(e)(3)(C) provides that one of the means through which the agency may regulate the informal public hearings is through the designation of a representative to make oral presentations or engage in cross-examination on behalf of persons with a common interest in the rulemaking. It is expected that the agency will first allow persons with a common interest to select their own representatives. The agency should only make the choice where such persons cannot agree. In a case when the agency must make the choice, it should seek to select the representative who will most effectively present the concerns of the persons being represented.

Section 622(f) permits an agency to delay complying with any requirement of section 622 if the agency finds, for good cause, that complying with such requirement before making the rule effective would be impracticable, unnecessary, or contrary to the public interest, and publishes a statement of such finding, along with a succinct explanation of the reasons therefor, in the Federal Register when it publishes the rule. If the rule for which compliance has been delayed pursuant to section 622(f) will, by its terms, cease to be effective within two years after its effective date, the agency need not comply with the requirement at all. In all other cases, section 622(f) requires the agency to comply with the requirements of section 622 as soon as reasonably practicable after promulgating the rule.

The "good cause" justification for delaying compliance with the requirements of section 622 is intended to carry the same meaning as it does in the "good cause" provision set forth in section 553 of title 5. Thus, there may be instances where complying with the requirements of section 622 before making a rule effective will be "im-practicable" or "contrary to the public interest", for example, when delaying a rule might jeopardize airline safety. However, a situation may arise where an agency may be fully able to comply with the requirements of section 553 of title 5 prior to issuing the rule, but may have "good cause" for not complying with the additional requirements of section 622. It may then delay compliance only with section 622. But, as in the case of section 553(b)(2), agencies should not abuse their discretion in invoking the good cause exception under section 622(f).

Section 622(g) is a restatement of section 622(h) in the bill as reported by Committee. As with the original provision, this subsection provides that the relevant authorizing statute remains the source of agency authority for rulemaking decisions; nothing in section 622 should be construed to override or change the prescriptions of those statutes. Thus, if a statute directs an agency to establish "just and reasonable rates", section 622 does not alter that mandate. It merely requires the agency to conduct the analysis required therein prior to prescribing the rule. Similarly, any procedural standards imposed by an authorizing statute or by the provisions of the Administrative Procedure Act continue to apply

This does not mean however, that an agency's consideration of a proposed major rule will not be different after section 622 is enacted than it is at present. The basic objection of section 622 is to require agencies to subject their major rulemaking activities to a new type of analytical discipline. Section 622 imposes additional procedural requirements upon the regulatory process, with the aim of improving decision-making. It is quite possible that rules adopted after being subjected to this more rigorous analytical process may be different from rules that might have been adopted in the absence of such an analysis. But the fact that more careful analysis may result in a somewhat different rule (or even in no rule at all) does not imply that the standards applicable to the agency's action under other provisions of law have been changed.

Section 623. Judicial review

With certain exceptions set forth in sections 623 (b) and (c), section 623(a) precludes the courts from reviewing compliance or noncompliance with the requirements of subchapters II, III, or IV of chapter 6, or from compelling an agency to act under those requirements, or from holding a rule unlawful, setting it aside, or remanding it on the ground that the agency failed to comply with such requirements. In particular, this means that there will be no judicial review of whether any material issued pursuant to section 622 is sufficient to satisfy the requirements of that section. Therefore, this subsection precludes a court from considering any challenge to agency compliance with these provisions on the ground set forth in section 706(a)(2)(D), as redesignated by this bill, that is, that the agency failed to comply fully or in part with a "procedure required by law.

However, as this subsection makes clear, a court may consider material issued pursuant to section 622 in determining the validity of the rule when an action for judicial review of the rule is brought under any provision of law other than section 623. In the vast majority of cases, an action to review an agency rule is brought under chapters 83, 85, 133, 151, 157 or 158 of title 28 of the United States Code and under sections 701-706 of title 5, and/or under provisions of the enabling statute pursuant to which the agency acted. If an action for judicial review cannot be brought under those provisions or under some other applicable provision of law-for example, if the agency action at issue is committed to the agency's unreviewable discretion-section 623(a) does not authorize judicial review.

In any case where judicial review of agency is not so precluded and can appropriately be sought under other law, this provision makes clear that any material issued pursuant to section 622 may be considered by the court in determining the validity of the rule, to the extent such material is relevant. That is, the court may consider this material in the same manner that it considers other material contained in the rulemaking file. However, while this material may be considered by the court in determining the validity of the rule, the material may not be reviewed for purposes of determining whether the agency has complied with the requirements of section 622 except as provided in sections 623 (b) and (c). More importantly, any findings the agency makes pursuant to the requirements of section 622 which the agency would not have been re quired to make in the absence of section 622 are not findings "on which the agency is required to rely" for purposes of section 706(d) of title 5, and need not have substantial support in the rulemaking file unless the agency asserts that those findings are the basis of the rule.

Several exceptions to this general preclusion of judicial involvement are set forth in sections 623 (b) and (c).

Section 623(b)(1) provides that section 623(a) does not preclude judicial review of the alleged failure of an agency to allow an oral presentation or cross-examination procedure required by section 622(e). Section 623(b)(1) does not, however, affirmatively provide for judicial review of an agency's failure to follow a procedure required by section 622(e). However, if review of such a procedural shortcoming is otherwise permitted by law, section 623(b)(1) allows such review to occur. The standard to be applied by the courts in deciding whether to enter-

tain procedural challenges under this provision is identical to the one contained in section 622(f)(4) of H.R. 746 as reported by the Committee, and the explanation of its purpose and application is set forth in the Committee report (H. Rept. 97-435, 46-47).

Second, under section 623(b)(2), a court may direct an agency to issue the material required by sections 622 (b) and (c) and to comply with the oral presentation and cross-examination requirements of section 622(e) when the agency has unreasonably delayed doing so after having invoked the "good cause" provision of section 622(f). In such circumstances, the petitioner presumably would be asking the court to "compel agency action [that has been] unlawfully withheld or unreasonably delayed" within the meaning of 5 U.S.C. § 706(a)(1).

should be understood that section 623(b)(2) does not authorize a court to hold a rule unlawful, set it aside, or even suspend its effectiveness. Rather, it permits a court to direct an agency, under penalty of contempt of court, to comply with the applicable requirements of section 622. If the validity of the rule at issue has been challenged. the court could hold the case (but not the rule) in abeyance until such time as the agency has completed its compliance with such requirements, so that the rule can be reviewed on the basis of the full rulemaking record that is developed at such time. This subsection in no way authorizes a court to review the sufficiency of any compliance with these provisions. The court may only consider whether an agency has issued material and conducted informal public hearings

623(b)(3) provides that if an agency fails to issue any material whatsoever that it designates as constituting the cost-benefit and cost-effectiveness analyses and related material required for major rules by sections 622(c) (5) and (6), a court may remand the rule to the agency with in-structions to issue such material. A court may not act under this subsection, however, simply because it believes that the material the agency has designated as having been issued pursuant to sections 622(c) (5) and (6) is flawed or otherwise inadequate in some respect, nor may the court review the sufficiency of compliance with these subsections after the agency states it has issued such material pursuant to the direction of the court. Moreover, a court, acting under this provision, could not set a rule aside or prevent it from taking effect until the agency has issued what it designates as the material required by sections 622(c) (5) and (6). The court could, however, hold in abeyance any action challenging the validity of the rule until such time as the agency has issued the designated material and made it available to be considered by the court as provided in section 623(a). But, if an agency designates any material it has issued as constituting the material required to be issued by sections 622(c) (5) and (6), a court is precluded from considering whether the material so designated does, in fact, satisfy the requirements of sections 622(c) (5) and (6).

Section 623(c) provides that this section does not preclude a court from directing an agency to publish a proposed schedule for the review of rules (section 641(a)(1)), a final schedule for the review of rules (section 641(a)(4)), a notice of the review of a rule (section 641(c)), or a notice regarding whether, after review, a rule will be retained, repealed, or amended (section 641(e)). However, as with section 623(b), a review on such grounds does not allow a

court to consider the adequacy of any such schedule or notice that has been issued, or to require the revision of any such schedule, or to determine whether the agency should retain the rule or institute proceedings for its amendment or repeal. The court may only direct the agency to publish the schedule or notice and to chose between (1) initiating a rulemaking to repeal or amend the rule, or (2) issuing a notice of the retention of the rule. If the agency decides to initiate a rulemaking, the resulting rulemaking proceeding and any agency action based on that proceeding will be subject to judicial review just as they would be if the rulemaking had been instituted apart from any review under section 641.

Section 623(d) provides that the exercise of any authority granted under sections 621, 624, and 641 or the failure to exercise such authority by the President or by an officer delegated by the President to exercise such authority shall not be subject to judicial review in any manner. This means that the exercise of presidentia! authority, if within the ambit of this section, is not subject to judicial review. However, if the presidential action is beyond the ambit of authority granted by this section, then it is not insulated from judicial review. For example, if the President designated a rule of the Securities and Exchange Commission (SEC) as 'major", the designation would not be judicially reviewable. However, if the President purported to exercise authority under section 624 to force the SEC to comply with the requirements applicable to major rules or with guidelines and procedures established under section 624, this action would be the outside the ambit of the authority granted by section 624 and therefore would not be insulated from judicial review. Another example would be if the President issued a guideline under section 624 that purported to require an agency to take rulemaking action without regard to the applicable standards of the enabling statute pursuant to which the agency was acting. In such a case, section 623(d) would not preclude a judical challenge to the validity of the decision reached by the agency with respect to the rulemaking proceeding. If the person challenging the agency action asserted that it conflicted with the standards of the relevant enabling statute, the agency could not defend its action by asserting that the action was in accordance with guidelines issued by the President under section 624, even though the issuance of those guidelines by the President is insulated from review under section 623(d).

#### Section 624. Executive oversight

Section 624 sets forth certain authority and responsibilities of the President under chapter 6. In contrast to the Committee bill, amended section 624 applies to all agencies, independent as well as executive. This was done because provisions were included in the amendment to ensure that presidential actions based upon authority granted under section 624 would not (1) displace the decision-making authority agencies, or (2) prevent agencies from preceeding with and concluding their rulemakings, or (3) require agencies to modify their proposed or final rules. These safeguards will protect the independent regulatory agencies, as well as executive branch agencies, from presidential intrusion under section 624 into their policy making discretion. Consequently there is no longer any need to exempt independent regulatory agencies from coverage under section 624.

Under section 624(a) the President is required to issue guidelines and procedures for agency implementation of the requirements of this chapter. The President is directed to monitor and review agency compliance with the provisions of this chapter and shall comment upon the adequacy of such compliance. Section 624(a) does not, however, authorize the President to ensure compliance with such provisions (or implementing guidelines or procedures); nor does it carry an implication as to whether the President has any such power under current

Section 624(b) provides that such guidelines and procedures shall be adopted only after public notice and comment and that they shall be consistent with the prompt completion of rulemaking proceedings. These guidelines and procedures may provide for review and evaluation by the President of the material required by sections 622 (b) and (c), however the review may not exceed 30 days (the President may extend this period for an additional 30 days). The purpose of such review would be to provide the President with an opportunity to comment upon whether such material complied with the requirements of this chapter; however, section 624(b) does not authorize the President to ensure that the agency has in fact complied.

Section 624(c)(1) makes clear that nothing in section 624 either provides authority, or limits authority that the President may otherwise possess, to prevent an agency proceeding with a rulemaking or issuing a proposed or final rule. Nor does section 624 provide or limit any such authority that the President may otherwise possess to require an agency to modify a proposed or final rule or to comply with the guidelines or procedures established under section 624. Whatever authority the President may presently possess in this regard remains unchanged so far as Section 624 is concerned. And section 624 takes no position on the extent of the President's existing authority in these areas. It should be emphasized that the President would have no more authority to enforce compliance with his guidelines than would exist if section 624 were not enacted.

Section 624(c)(2) makes it clear that nothing in this section changes the standards applicable to agency action under any other provision of law or relieves an agency of procedural requirements imposed by any other provision of law. For example, if the guidelines purported to require an agency to disregard the standards set forth in its enabling statute, those guidelines would not have been authorized under this section, and an agency could not properly follow them; a rule adopted in compliance with such guidelines and in disregard of standards set forth in the relevant enabling statute would not be valid.

Section 624(c)(3) makes it clear that nothing in section 624 relieves an agency of its responsibilities to comply with the requirements of this chapter.

Section 624(d) allows the President to delegate the authority granted by subsection (a) of this section. Any person to whom such authority is delegated shall be subject to all the provisions of this section that apply to the exercise of that authority by the President.

#### Section 625. Review by the Comptroller General

Section 625(a) was modified to assure that the Comptroller General may review compliance by agencies with the provisions of all of chapter 6, and not just with sections 621 through 624. Under this provision, it is expected that the Comptroller General will review not only agency compliance with these provisions but also the performance of the President or his designee in carrying out sections 621, 624, and 641.

Section 625(b) was modified to make it clear that the Comptroller General is to obtain information necessary to review agency compliance in accordance with the procedures for obtaining information set forth in section 716 of title 31.

Section 626. Authority of agencies and the President

Section 626 is a new section that reformulates a provision set forth in section 624(c) as H.R. 746 was reported by the Committee.

The purpose of section 626(a), as was the purpose of the comparable provision in H.R. 746, is to make clear that agencies retain their jurisdiction, authority, and responsibility to initiate, conduct, or complete rule-making proceedings and to make it clear that chapter 6 does not shift decision-making power from the agencies to the President or his designee.

Similarly, subsection (b) of this section makes it clear that nothing in this chapter limits the exercise by the President of the authority and responsibility that he otherwise possesses under the Constitution and other laws of the United States.

#### Section 641. Review of rules

Section 641 provides for the review of all existing major rules on a ten year schedule. It also provides that all new major rules be reviewed within 10 years of their promulgation. Generally, this section is clear and does not need explanation. However, a few points should be made.

The review of a rule can be a time-consuming and burdensome task. Thus, when the President designates an existing rule as major for purposes of review, consideration should be given to the agency resources available to conduct the review and to the other ongoing responsibilities of the agency.

The review itself should be conducted in an expeditious manner. It should focus on the identifiable results of a rule (costs, benefits, compliance, etc.). Speculative analysis will be of little use in determining whether to repeal, amend, or retain a rule. Moreover, the notice of review issued by the agency should be as succinct as possible while still covering each of the points required to be considered.

#### TITLE II

This amendment makes only a few changes to the revision of section 553 of title 5 as reported by the Committee.

Section 553. Amendments to section 553 of title 5—Rulemaking

Section 553(a)(2) is modified so that the exemption for rules regarding agency organization, procedure or practice is moved to subsection (b) where it is located in current law. The effect of this change is that such rules will be exempt (as they are now) from notice and public comment only if the agency has good cause for doing so.

Section 553(a)(3) is modified to rephrase the exemption from section 553 of certain interpretative rules or general statements of policy. This change was made only to better capture the intent of the similar provision in H.R. 746 as reported by the Committee. Thus, the rationale for and applicability of this change remains the same as that set forth in the Committee report (H. Rept. 97-435. 59-62).

Section 553(b)(1) remains essentially as it was reported by the Committee. A few largely technical changes have been made. but the substance of the provision has not been affected. Thus, in its present form, section 553(b)(1) continues to require that the notice of proposed rulemaking contain more complete information than has been required in the past, so that the public will have a better understanding of the problem that the agency believes needs to be ad-dressed by the rule and how the agency believes the rule will bring about an improvement in the status quo. Such information will permit the public to submit more informed comments and to suggest more useful proposals for possible alternatives to the rule.

Section 553(b)(2) permits the agency to waive the provisions of sections 553(b) and (c) "to the extent that the agency for good cause finds that notice and public procedure with respect to the rule are impracticable, unnecessary, or contrary to the public interest . . ." This provision is modified from the one currently contained in section 553. The present standards for waiver of these provisions are in no way changed by this bill. However, the addition of the words "to the extent" means that the good cause exception to notice and comment procedures is not an "all-or-nothing" mechanism. This change contemplates that full application of the requirements of sections 553 (b) and (c) may be impracticable, unnecessary, or contrary to the public interest, but that partial application of those requirements may be possible. For example, an agency may find, for good cause, that the full 60-day public comment period required by section 553(c)(1) is unnecessary with respect to a rule which raises no issues of any particular complexity. In such cases, the agency, acting under section 553(b)(2), might provide for a more abbreviated public comment period, finding that the 60-day comment period required by section 553(c)(1) is unnecessary. An agency might also find that the public interest requires the speedy promulgation of a rule and that a 60-day public comment period would be contrary to the public interest, but that a shorter period might be possible. In such a case, the agency should provide at least the abbreviated comment period, rather than providing no pre-adoption comment period at all. In either of these cases, the agency should comply with the remaining requirements of section 553 (b) and (c) to the extent possi-

A new section 553(c)(2) is added to the This new subsection requires that, unless otherwise permitted by law, an agency may not rely substantially on any report, study, or other document containing significant factual material of central relevance to the rulemaking unless such document was placed in the rulemaking file at the time the notice of proposed rulemaking was issued or, if publicly available, identified in such notice. The phrase "unless otherwise permitted by law" not only refers to cases where a specific statute authorizes reliance, but also encompasses the doctrine of official notice and situations in which courts have permitted agencies to rely on confidential material such as that described in section 552(b) of title 5 without making it available to the public.

Section 553(c)(2) applies only to a document "containing significant factual material of central relevance to the rulemaking." By focusing on "significant factual material," it is clear that section 553(c)(2) does not

apply to material that is policy-oriented or legal in nature. Unless barred by some other requirement of law, the agency remains completely free to rely substantially on such material. The same is true of advice, recommendations, interpretations, and discussions of law. This is not to say that such policy and legally oriented material should not be placed in the rulemaking file or that some other provision of law may not require the agency to take such action as a precondition to relying substantially on the material in promulgating a rule.

Nevertheless this subsection provides that under two circumstances an agency may substantially rely on such report, study, or other document even though it was neither placed in the file at the time of the notice of proposed rulemaking nor publicly available and identified in such notice. Section 553(c)(2)(A) provides that an agency may rely on such material which was developed by or under contract with the agency if the public has had an adequate opportunity to comment on it. The section provides that twenty-one (21) days constitutes an adequate opportunity for comment.

quate opportunity for comment. Section 553(c)(2)(B) applies to any report, study, or other document containing significant factual material of central relevance to the rulemaking that was not developed by or under contract with the agency. Under section 553(c)(2)(B), an agency may rely substantially on the document, as long as it placed the document in the rulemaking file promptly after the earlier of (i) receiving or (ii) reviewing the document in the course of the rulemaking proceeding. The documents most typically covered by this subsection will be public comments submitted in the rulemaking proceeding. For the most part, such comments will be received by the agency on the last day provided for public comment. As long as the agency places the comments in the rulemaking file promptly after receiving them, it may rely substantially on any material contained in those comments without providing additional rounds of rebuttal in which members of the public can respond to each other's comments. The agency may choose to permit a rebuttal round of comment in some instances, but nothing in section 553(c)(2)(B)

requires the agency to do so. To avail itself of section 553(c)(2)B), the agency must place the report, study, or other document in the file promptly after the earlier of receiving or reviewing it. In some instances, an agency may decide to rely substantially upon a document that it received outside the course of the rulemaking proceeding or at a time when the rulemaking had not yet commenced. In such a case, the agency may never actually receive the document in the course of the rulemaking proceeding. However, it will have reviewed the document in the course of the proceeding before deciding to rely substantially on factual material contained in the document. At the time it reviews the document and makes that decision, the document must be placed in the rulemaking file in order to bring exception (B) into play.

Section 553(f) required that each agency maintain a file for each rulemaking proceeding conducted pursuant to this section. These requirements have been modified by this amendment. The purpose of these modifications is to make the requirements more precise.

Section 553(f)(1)(B) requires that the file include a copy of all written comments on the proposed rule submitted after publication of the notice of proposed rulemaking.

Such comments would include any made by the President or his designee to an agency regarding a specific rulemaking proceeding, whether or not the agency chose to follow any suggestions contained in those comments.

Section 553(f)(1)(D) requires that the file include a copy of all written material pertaining to the rule submitted by the agency to the President (or the designee of the President who has been directed to review rules for their regulatory impact). A similar requirement had originally been included in section 624. It was moved to section 553 so it would cover all rules, not just major rules. While section 553(f)(1)(D) does not require that all communications between the President and an agency relating to a rule be reduced to writing, the public character of rulemaking proceedings ordinarily will be best served when all significant communications between the President (or the designee) and an agency regarding a rule are reduced to writing and placed in the record.

Section 553(f)(1)(E) is a new provision. It requires inclusion in the rulemaking file of a written explanation by the agency of the specific reasons for any significant changes it made to the proposed or final rule in response to comments received from the President (or his designee). Again, the purpose of this provision is to preserve the public character of rulemaking under the APA. Since the authority to promulgate rules resides in the agency, it must explain the basis of any changes it makes that respond to comments from the President (or the designee).

Section 553(f)(2) is modified to make it clear that it in no way changes existing law with respect to the circumstances in which and the extent to which an agency promulgating a rule may rely on materials which are not made available to the public. Rather, this subsection merely spells out the procedure for disclosure if an agency acts in reliance on such material. This section also makes it clear that even if material described in sections 553(f)(1) (D) and (E) might normally be exempt from public disclosure, they must nevertheless be included in the file.

Section 553(f)(3) limits the extent of judicial review of an agency's failure to comply with subparagraph (D) or (E) of paragraph (1) of this section. Thus, a rule would be held unlawful or set aside due to such errors only if the violation precluded fair public consideration of a material issue of the rulemaking taken as a whole. An agency failure under subparagraphs (A), (B), and (C) would be reviewed under the present standard of review which takes account of the rule of prejudicial error.

Section 553(g), designated section 553(h) in the bill reported by the Committee, is unchanged by this amendment. However, an explanation of section 553(g)(10) is necessary because of some confusion over this provision.

Section 553(g)(10) provides that the legislative veto procedure does not apply to rules proposed or issued pursuant to a statute which expressly provides for congressional review or veto of such rules. This includes rules promulgated under statutes in which the veto provision was included as a condition of the original grant of power, as well as those rules where the veto was imposed long after the original grant, such as the veto applying to the Federal Trade Commission or to the Department of Education under section 431 of the General Education Act. Thus, if any other legislative review or

veto provision applies to a rule, the provisions of section 553(g) do not apply.

Section 203. Judicial review of rulemaking

This section of the bill amends section 706 of title 5, which sets forth the standards for judicial review of agency action.

The first sentence of the amended version of section 706(c) directs courts to exercise their independent judgment in deciding questions of law without according any presumption in favor of or against agency action. In making determinations of law on questions other than statutory jurisdiction, a court is to give the agency's interpretation "such weight as it warrants, taking into account factors such as the discretionary authority provided the agency by law."

The purpose of this change is to make clear, in the statutory language itself, that a court may, in reviewing agency interpretations of questions of law, consider an agency's interpretation and rely upon it in construing a statute to the extent that the court finds it to be persuasive. While permitting a court to consider the agency interpretation, this amendment does not permit a court to presume that the interpretation of the agency is correct simply because it is the interpretation of the agency. The interpretation of the agency should be afforded "weight" by the reviewing court only be-cause of its persuasiveness, not simply because of the source of the interpretation. (See International Brotherhood of Teamsters v. Daniel, 439 U.S. 551, 53 L.Ed. 2d. 808, 99 S. Ct. 790 (1979)).

This prohibition on presumption does not alter the substantive criteria for judicial review under section 706(a)(2). Those criteria remain unaffected; but, the agency's interpretation of a question of law may not be presumed to be correct in determining whether those criteria have been met. Thus, the sentence only precludes a court from presuming that the agency interpretation of law is correct, it does not relieve the court of the obligation of critically analyzing the

basis of that interpretation.

In the instance of so-called mixed questions of fact and law and/or policy, the prohibition against presumptions which would be applicable to agency interpretations of questions of law should not be extended to questions of fact or policy because of the 'mixture'. Rather, the court must assume its traditional responsibility to parse questions.

its traditional responsibility to parse questions of law, fact and policy; and the presumption prohibition should apply only to an agency's interpretation of questions of law. Questions of fact or policy are governed by other criteria in section 706.

This language makes clear that section 706(c) does not affect the rule that "agency expertise" may be relied upon by a reviewing court where it actually exists. Courts should continue to consider the construction or interpretation of statutes by agencies and should utilize as aids to the court's own independent statutory construction such factors and considerations as whether the interpretation is made by an agency charged with primary or central expertise under the statute; and whether the interpretation of a statutory word or phrase involves a matter that is "technical," where the expertise of the agency is specialized, well-developed or unique.

It is not intended that section 706(c) would affect the policy choice of an agency where a court finds the Congress had delegated to that agency a certain policymaking authority by giving it discretion to apply statutory terms. For example, the Federal Communications Commission has authority

to issue rules that will serve "the public convenience, interest or necessity." This also includes instances where an agency decides not to act even though a statute authorizes, but does not require, the agency to act. FCC v. WNCN Listeners Guild et. al., 450 U.S. 582 (1981); See, also Watt v. Energy Action Educational Foundation, et. al., 50 U.S.L.W. 4031 (U.S. Dec. 1, 1981). Section 706(c) also does not preclude an agency from the consideration of other policies in its administration of a statute, unless the statute itself precludes such consideration.

Section 706(c) would apply even when the agency is not a party to the judicial action or the administrative action under review (see Daniel, Supra.), in other words the same application of the presumption prohibition would occur when a statutory interpretation by an agency is relevant to action

between two other parties.

Although an agency interpretation of a statutory provision that governs procedure may not be presumed to be correct, this sentence of section 706(c) otherwise has no bearing on procedural matters and does not shift traditional burdens of going forward.

The third sentence of amended section 706(c) directs that, when a challenge to agency jurisdiction has been raised, the agency's action be shown to be within the scope of its jurisdiction on the basis of the language of the statute, or, in the event of ambiguity, other indicia of ascertainable legislative intent. The language of a statute may give rise to ambiguity because it is contradictory or inconsistent, or because of its breadth or vagueness, or because a literal interpretation would produce an anomalous result. In such cases, the court would look at indicia of ascertainable legislative intent to determine whether jurisdiction in fact exists. Under section 706(c), a court, in the event of ambiguity in the statutory language, should not uphold an extension of agency jurisdiction simply because the extension is based on a possible interpretation

of the statute which is urged by the agency. The words "determine whether" have been substituted for the words "require that" in section 706(c) to: (1) make clear that section 706(c) does not impose an obligation on the court to investigate the basis for agency jurisdiction sua sponte where agency jurisdiction has not been challenged by a party to the litigation, and (2) remove any implication that a new burden is placed on the agency to demonstrate the statutory basis for its jurisdiction. However, when a question regarding the basis for agency jurisdiction has been raised, the court should exercise its independent judgment, without presuming that the agency's interpretation of its statutory jurisdiction is correct.

Finally, a confusing reference to "agency authority" has been removed from the sentence dealing with jurisdiction. The term 'jurisdiction' is intended to refer to agency power to act with respect to particular perpower to act with respect to particular per-

sons or subject matters.

Section 706(d) is modified to clarify the purpose of this subsection and to accomplish its objectives without creating unnecessary ambiguities. This new subsection (d), like the provision it replaces, applies to all agency rulemakings other than those to which the substantial evidence test applies. Like the new subsection (c) of section 706 which instructs courts on the application of section 706(a)(2)(C), the new subsection (d) provides guidance to courts on the application of the substantive standards in section 706(a)(2)(A). The purpose of the new subsection (d) is clear: reviewing courts are in-

structed to give a "hard look" to the factual underpinnings of informal rulemakings conducted by agencies. The approach taken by Judge Leventhal in *Portland Cement Ass'n* v. *Ruckelshaus*, 486 F. 2d 375 (D.C. Cir. 1973), cert. denied, 417 U.S. 921 (1974), is the model.

New subsection (d) clearly applies the "hard look" doctrine to judicial review pursuant to section 706(a)(2)(A), not as a separate, ambiguous substantive provision. In other words, a court in reviewing an agency rulemaking not subject to sections 556 and 557 would be required to "look hard" and specifically at the "factual basis" of a rule in ascertaining whether the rule was "arbitrary, capricious, or an abuse of discretion."

### CONFERENCE REPORT ON H.R.

Mr. DIXON submitted the following conference report and statement on the bill (H.R. 7144) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes.

#### CONFERENCE REPORT (H. REPT. No. 97-972)

The Committee of Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7144) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 9, 14, 15, 16, 20, 21, 22, 24, 25, 26, 27, 29, 30, 31, 36, 37, and 38.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 5, 8, 12, 19, 28, and 32, and agree to the same.

Amendment numbered 10:

That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$58,485,400; and the Senate agree to the same.

Amendment numbered 11:

That the House recede from its disagreement to the amendment of the Senate numbered 11, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$409,242,100; and the Senate agree to the same.

Amendment numbered 13:

That the House recede from its disagreement to the amendment of the Senate numbered 13, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert \$438,724,200; and the Senate agree to the same.

Amendment numbered 18:

That the House recede from its disagreement to the amendment of the Senate numbered 18, and agree to the same with an amendment, as follows:

In lieu of the matter stricken and inserted by said amendment insert: Provided further, That total funds paid by the District of Columbia as reimbursements for operating costs of Saint Elizabeths Hospital, including any District of Columbia payments (but excluding the Federal matching share of payments) associated with title XIX of the Social Security Act, approved July 30, 1965 (79 Stat. 343; 42 U.S.C. 1396 et seq.), shall not exceed \$24,748,700; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 3, 4, 6, 7, 17, 23, 33, 34, 35, 39, 40, and 41.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE

COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7144) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1983, and for other purposes, submit the following joint statement to the House and Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

### FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

Amendment No. 1: Appropriates \$361,000,000 as proposed by the Senate instead of \$336,600,000 as proposed by the House. The additional amount of \$24,400,000 above the House allowance reflects the increase in the Federal payment authorization in Public Law 97-334 which was approved October 15, 1982 subsequent to House passage of H.R. 7144 on September 30, 1982.

Amendment No. 2: Restores matter proposed by the House and stricken by the Senate stating that the Federal payment shall not be made available to the District of Columbia until the number of full-time uniformed officers is at least 3,880 using the same qualification standards as those in effect on the date of the House subcommittee's markup.

The Conferees are agreed that the total uniformed strength of the Metropolitan Police Department shall be not less than 3.880 police officers. This is somewhat of a departure from position allocations which are usually considered employment cellings rather than the minimum number of employees. This change is necessary because of language agreed to by the conferees which provides that the Federal payment is not available until the number of uniformed officers reaches 3,880. The Metropolitan Police Department cannot maintain the full

complement of police officers with an employment ceiling of 3,880. The conferees are agreed that by allowing the Department to exceed the number specified for purposes of maintaining an average strength of 3,880, the Department will meet the provisions of the amendment and maintain an average of 3,880 uniformed police officers monthly beginning on April 15, 1983.

#### SPECIAL CRIME INITIATIVE

Amendment No. 3: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

#### SPECIAL CRIME INITIATIVE

For a Federal contribution to the District of Columbia to aid in the detection and prevention of crime, \$2,342,600: Provided, that this amount shall be available to the Metropolitan Police Department.

For the Department of Justice for use in the Superior Court Division of the U.S. Attorney's Office for the District of Columbia, eson and

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees have included a total of \$3,142,600 for the Special Crime Initiative. This sum will provide for several special programs to improve the detection of crime and to provide greater public safety.

Of this amount a total of \$2,342,600 is provided for the Metropolitan Police Department for the one-time purchase of needed equipment. The Department requires 367 additional portable radios to support the increased number of police officers. Since the fiscal year 1983 budget provided for only 157 radios, the conferees have allowed \$525,000 to purchase the balance of 210 radios.

The remaining amount of \$1,817,600, will be used to purchase an automated fingerprint identification system and ancillary equipment. Currently, fingerprints obtained at the scene of a crime or from an arrested suspect must be analyzed by hand, taking several hours and, in some instances days. With this new equipment utilizing highspeed laser technology, officers will be able to perform this task and provide a positive identification within minutes. This will allow police officers to properly identify suspects who give false names, and will permit the Department to obtain warrants for arrest sooner, thus allowing less time for the criminal to flee. This time-saving device also will increase police productivity, so that offices can perform other investigative work. In addition, prosecutors will have more time to prepare their cases.

The conferees are agreed that \$800,000 is to be provided directly to the Federal Department of Justice to hire approximately 22 new Assistant U.S. Attorneys for the Superior Court branch of the District of Columbia office.

The conferees were informed that the current caseload of the 78 Assistants is about 70 to 75 per person with the optimum caseload being 40 to 50 per person. The workload problem is becoming more critical daily. Recent statistics show that there are currently 6,200 felony cases as well as 1,500 grand jury proceedings pending with the caseload increasing at the rate of 125 cases per day. These additional resources will provide for a more manageable workload in the office.

The conferees intend that future budget requests for the Department of Justice will

include funding for these positions as well as other related resources required by the District of Columbia U.S. Attorney's Office.

#### LOANS TO THE DISTRICT OF COLUMBIA FOR CAPITAL OUTLAY

Amendment No. 4: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds "(Including Rescission)" to the center heading.

Amendment No. 5: Deletes language proposed by the House and stricken by the Senate concerning the availability of previous Federal loan appropriations.

Amendment No. 6: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which strikes language proposed by the House placing a limitation on the amount of direct Federal loans available to the District of Columbia and inserts language rescinding \$48,832,500 in Federal loan authority.

#### GOVERNMENTAL DIRECTION AND SUPPORT

Amendment No. 7: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert the following: \$69.545.500

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Council of the District of Columbia.—The conference action provides 139 positions and \$4,914,300 as proposed by the Senate instead of 137 positions and \$4,714,300 as proposed by the House. The conferees direct that \$77,040 be transferred from the separate "personal services" appropriation to the Council to cover pay adjustment costs, notwithstanding the independent judgment of the executive branch.

Office of Personnel.—The conference action provides 361 positions and \$10,532,700 as proposed by the Senate instead of 308 positions and \$9,499,400 as proposed by the House.

Department of General Services.—The conference action provides 453 positions and \$23,353,600 as proposed by the House instead of 454 positions and \$23,645,400 as proposed by the Senate.

Office of Employee Appeals.—The conference action provides 16 positions and \$659,000 as proposed by the House instead of 18 positions and \$685,700 as proposed by the Senate.

District of Columbia Retirement Board.— The conference action provides \$425,000 from the general fund and \$1,264,000 from investment income as proposed by the House instead of \$1,689,000 from investment income as proposed by the Senate. Amendment No. 9 is related to this item.

The conferees are agreed that any shortfall in the amounts included in the District's budgets as the net-pay-as-you-go and amortization payments for the pension funds for fiscal year 1983 and future years is to be paid by the District government over a three-year period in accordance with the terms of the agreement reached by the Mayor and Retirement Board on September 29, 1982, and printed on page H-8479 of the Congressional Record of October 1, 1982.

Amendment No. 8: Deletes language concerning voter education in connection with the District of Columbia Statehood Constitutional Convention Initiative proposed by the House and stricken by the Senate. The language required the preparation and mailing, prior to the November 2, 1982 election, of objective statements both for and against the provisions of the constitution as expressed by the convention delegates. This language was included in Public Law 97-276, approved October 2, 1982 (96 Stat. 1193).

Amendment No. 9: Restores language proposed by the House and stricken by the Senate which provides \$425,000 from general fund revenues for expenses of the District of Columbia Retirement Board.

#### ECONOMIC DEVELOPMENT AND REGULATION

Amendment No. 10: Appropriates \$58,485,400 instead of \$58,263,400 as proposed by the House and \$61,122,000 as proposed by the Senate.

Department of Housing and Community Development.—The conference action provides \$20,539,100 instead of \$24,107,700 as proposed by the House and \$26,707,700 as proposed by the Senate. The decrease of \$3,568,600 reflects approval by the conferees of the transfer of the Building and Zoning Regulation Administration from the Department of Housing and Community Development to the Department of Licenses, Inspections and Investigations. This transfer was requested by the Mayor in a letter to the Committees dated November 16, 1982.

Housing Finance Agency.—The conference action provides \$2,593,200 instead of \$2,371,200 as proposed by the House and \$2,815,100 as proposed by the Senate. The increase of \$222,000 above the House allowance includes \$18,500 for personnel fringe benefits; \$193,300 for supplies, building rent and equipment, and \$10,200 for pay adjustment costs.

Department of Licenses, Inspections and Investigations.—The conference action provides \$8,202,200 instead of \$4,633,600 as proposed by the House and the Senate. The increase of \$3,568,600 above the House and Senate allowances reflects approval by the conferees of the transfer of the Building and Zoning Regulation Administration from the Department of Housing and Community Development to the Department of Licenses, Inspections and Investigations. This transfer was requested by the Mayor in a letter to the Committees dated November 16, 1982.

Commission on the Healing Arts Licensure.—The conference action provides 12 positions and \$400,000 as proposed by the House instead of 5 positions and \$214,700 as proposed by the Senate.

#### PUBLIC SAFETY AND JUSTICE

Amendment No. 11: Appropriates \$409,242,100 instead of \$410,175,078 as proposed by the Senate and \$405,111,600 as proposed by the House.

Metropolitan Police Department.—The conference action provides \$130,635,400 as proposed by the Senate instead of \$128,292,800 as proposed by the House and includes increases of (1) \$1,817,600 for an automated fingerprint identification system which uses high-speed laser technology and (2) \$525,000 to purchase 210 portable communication radios for the 3,880 uniformed officer force. The conference agreement recommends a special one-time Federal payment under amendment number 3 to finance these purchases.

Fire Department.—The conference action provides \$47,569,000 instead of \$46,369,000 as proposed by the House and \$48,769,000 as proposed by the Senate. The increase of \$1,200,000 will allow the Department to fund 93 additional positions to staff the

four heavy duty rescue units with separate crews beginning in April 1983. The conferees are agreed that the four units are to be fully staffed with separate crews by September 30, 1983.

Superior Court.—The conference action provides 916 positions and \$30,941,800 as proposed by the Senate instead of 906 positions and \$30,656,800 as proposed by the House. The increase of 10 positions and \$285,000 above the House allowance is for three hearing commissioners and support staff. The use of hearing commissioners is expected to free up at least two judges for criminal trial duties.

D.C. Court System.—The conference action provides 66 positions and \$6,368,200 as proposed by the Senate instead of 65 positions and \$6,332,300 as proposed by the House. The increase of one position and \$35,900 above the House allowance is for a CS-13 Training Officer and related benefits.

Police and Fire Retirement System.—The conference action provides \$84,967,000 instead of \$84,700,000 as proposed by both the House and the Senate. The increase of \$267,000 above the House and Senate allowances reflects the agreement dated September 29, 1982 between the Mayor and the Retirement Board concerning the shortfall in the budget estimates which resulted from incomplete and insufficient personnel records provided by District officials. This agreement is printed on page H-8479 of the October 1, 1982 CONGRESSIONAL RECORD.

Amendment No. 12: Provides \$300,000 for use by the Police Chief in the prevention and detection of crime as proposed by the Senate instead of \$230,000 as proposed by the House.

#### PUBLIC EDUCATION SYSTEM

Amendment No. 13: Appropriates \$438,724,200 instead of \$434,171,200 as proposed by the House and \$439,042,100 as proposed by the Senate.

Teachers Retirement and Annuity Fund.— The conference action provides \$55,883,000 instead of \$51,400,000 as proposed by the House and \$55,700,000 as proposed by the Senate. The increase of \$4,483,000 above the House allowance reflects the agreement reached subsequent to House action on the bill by the Mayor and the Retirement Board concerning the shortfall in the District government's contribution to the fund in fiscal year 1981.

The agreement calls for the District government to make up the total shortfall of \$14,300,000 in fiscal year 1981 in the Teachers Retirement and Annuity Fund and the Police and Fire Retirement System plus interest of \$1,400,000 by making principal payments of \$4,750,000 in three successive fiscal years, beginning in fiscal year 1983, with interest payments of \$475,000 in three successive years beginning in fiscal year 1984. The \$4,750,000 consists of the \$4,483,000 under this fund and \$267,000 under the Police and Fire Retirement System discussed earlier under the Public Safety and Justice appropriation.

Public Library.—The conference action provides \$11,246,300 as proposed by the Senate instead of \$11,176,300 as proposed by the House. The increase of \$70,000 above the House allowance will allow the Martin Luther King Library to be open on Sunday afternoons during the school year.

Commission on the Arts and Humanities.—The conference action provides seven positions and \$882,400 as proposed by the House instead of eight positions and \$1,383,400 as proposed by the Senate.

Allocation of Public Education Appropriation.—The conferees are agreed that the appropriation of \$438,724,200 under the heading "Public Education System" is to be allocated as follows:

Board of Education (Public Schools)	\$306,517,800
Teachers Retirement and	\$500,511,000
Annuity Fund	55,883,000
University of the District	22 202022
of Columbia	58,342,400
Public Library	11,246,300
Commission on the Arts	
and Humanities	882,400
Educational Institution Li-	
censure Commission	171,300
School Transit Subsidy	5,681,000

Amendment No. 14: Restores language proposed by the House and stricken by the Senate which requires that \$515,000 of the funds provided for the District of Columbia Public Schools shall be used exclusively for the operation of the driver education program.

Amendment No. 15: Restores the word "further" proposed by the House and stricken by the Senate.

Amendment No. 16: Strikes language proposed by the Senate relating to the fiscal year 1981 shortfall in the Teachers Retirement and Annuity fund since the shortfall also applies to the Police and Fire Retirement System. The conferees are agreed that of the \$55,883,000 provided under this appropriation heading for the Teachers Retirement and Annuity Fund, \$4,483,000 is to be applied against the fiscal year 1981 shortfall in this fund.

#### HUMAN SUPPORT SERVICES

Amendment No. 17: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert the following: \$466,890,500

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Office on Latino Affairs.—The conference action provides seven positions and \$290,900 as proposed by the House instead of eight positions and \$370,000 as proposed by the Senate.

Department of Employment Services.— The conference action provides \$14,094,000 for the District's four jobs programs as proposed by the Senate instead of \$13,430,000 as proposed by the House. The additional \$664,000 above the House allowance is split equally between two programs and will provide a total of \$3,337,300 for the "out-of-school jobs for youth" program and \$4,714,900 for jobs for "adults with dependents."

Department of Human Services.-The conference action provides \$334,912,200 instead of \$315,636,500 as proposed by the House and \$333,046,400 as proposed by the Senate. The conference allowance provides \$120,000 for the Special Olympic Games as proposed by the House instead of \$90,000 and report language as provided by the Senate. conference agreement also provides \$194,600 for the Office of Veterans Affairs as proposed by the House instead of \$158,000 and report language as provided by the Senate. A total of \$13,007,900 is provided for child day care services as proposed by the Senate. This allowance reflects an increase of \$1,768,000 above the fiscal year 1982 level and \$918,000 above the House allowance for fiscal year 1983. The conference agreement provides a total of \$97,518,700 for the District's Medicaid/Medical Charities program as proposed by the Senate instead of \$80,961,000 as proposed by the House. The conference action also provides \$24,748,700 for reimbursement to Saint Elizabeths Hospital instead of \$26,548,700 as proposed by the House and \$22,948,700 as proposed by the Senate.

Amendment No. 18: Restores language proposed by the House and stricken by the Senate amended to limit the amount to be paid to Saint Elizabeths Hospital from the District's local revenues to not to exceed \$24,748,700 instead of \$26,548,700 as proposed by the House and \$22,948,700 as proposed by the Senate. The conferees are agreed that the District's share of the operating costs of Saint Elizabeths Hospital must increase to a level which reflects the heavy use of these services by District residents. The conferees direct the Department of Health and Human Services and the District government to work closely in developing a fiscal year 1984 proposal which will accomplish this goal over a reasonable period of time.

Amendment No. 19: Deletes language proposed by the House and stricken by the Senate which would have required District officials to obtain Congressional approval of a plan prior to obligating any funds appropriated for the summer youth jobs program. The conferees note the significant progress made by District officials in the administration of the summer jobs program over the past few years and urge that these efforts be continued in the future.

Amendment No. 20: Appropriates \$135,712,400 as proposed by the House instead of \$136,712,400 as proposed by the Senate

#### ENVIRONMENTAL SERVICES AND SUPPLY

Amendments Nos. 21 and 22: Appropriate \$38,337,000 of which \$5,427,000 shall be transferred to the Water and Sewer Enterprise Fund as proposed by the House instead of \$50,140,500 of which \$17,230,500 shall be transferred to the Water and Sewer Enterprise Fund as proposed by the Senate.

#### PERSONAL SERVICES

Amendment No. 23: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert the following: \$17,364,100

The managers on the part of the Senate will move concur in the amendment of the House to the amendment of the Senate.

provides conference action \$17,364,100 to cover the unallocated cost-ofliving pay increases for employees of the District government in fiscal year 1983. This amount which includes \$6,352,000 to cover optical and dental benefit costs for certain groups of employees is under a separate appropriation title since some of the collective bargaining agreements had not been signed at the time the District's budget was developed. While this amount is above the House and Senate allowances, it is \$6,330,700 below the amount requested and District agencies will therefore be required to absorb a larger than expected percentage of the pay adjustment costs.

Amendment No. 24: Restores language proposed by the House and stricken by the Senate which provides that \$1,100,000 of

the personal services appropriation shall be solely for the Metropolitan Police Department.

#### REPAYMENT OF GENERAL FUND DEFICIT

Amendment No. 25: Restores matter proposed by the House and stricken by the Senate which requires that funds appropriated under this heading be used to eliminate the cash portion of the \$309,000,000 general fund accumulated deficit as of September 30, 1981. The Senate proposed striking the reference to the cash portion of the deficit. Amendment No. 26: Appropriates \$20,000,000 as proposed by the House instead of \$10,000,000 as proposed by the Senate.

#### ENERGY ADJUSTMENT

Amendment No. 27: Restores matter proposed by the House and amended by the Senate authorizing the Mayor to reduce the energy budgets within one or several of the appropriation titles by \$2,078,500.

#### CAPTAL OUTLAY

Amendment No. 28: Appropriates \$83,885,600 as proposed by the Senate instead of \$83,439,500 as proposed by the House. The Senate amendment provides an increase of \$446,100 above the House allowance for the highest priority road and bridge projects in the Department of Transportation. The conferees are agreed that this increase is to be used for two projects at Fort Lincoln new town -\$552,000 for street construction of 33rd Place, N.E. from South Dakota Avenue to Fort Lincoln Drive (project No. DB-35), and \$1,500,000 for grading and paving Fort Lincoln Drive from 31st Street, N.E. to beyond 33rd Place, N.E., and design services for the extension of Barney Drive to Eastern Avenue. The conferees are further agreed that the balance required to complete these two projects should be met by reprograming funds from completed projects District-wide.

#### WATER AND SEWER ENTERPRISE FUND

Amendments Nos. 29 and 30: Appropriates \$107,195,900 of which \$16,726,500 shall be for debt service for construction loans as proposed by the House instead of \$114,479,400 of which \$24,010,000 shall be for debt service for construction loans as proposed by the Senate.

Amendment No. 31: Restores language

Amendment No. 31: Restores language proposed by the House and stricken by the Senate which provides that capital outlay projects under the Water and Sewer Enterprise Fund shall be subject to the same requirements and restrictions applicable to general fund capital improvement projects.

#### LOTTERY AND CHARITABLE GAMES ENTERPRISE

#### FUND

Amendment No. 32: Adds the words "as amended" to the authorization citation for the Lottery and Charitable Games Enterprise Fund as proposed by the Senate. Certain technical changes were included in Public Law 97-276 approved October 2, 1982 (96 Stat. 1193), to the permanent legislation enacted in Public Law 97-91 approved December 4, 1981, establishing the Lottery and Charitable Games Enterprise Fund. These technical changes were made after the House passed H.R. 7144 on September 30, 1982.

#### GENERAL PROVISIONS

Amendment No. 33: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the number proposed by said amendment, insert the following: 33,268

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action provides a ceiling of 33,268 on the number of full-time, permanent employees in the District government instead of 33,109 as proposed by the House and 33,165 as proposed by the Senate. The increase is due mainly to the 93 additional positions required to restore the four heavy duty rescue squads in the Fire Department to full-service status.

Amendment No. 34: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the number proposed by said amendment, insert the following: 32,211

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action provides a ceiling of 32,211 on the number of full-time permanent employees financed from the general fund instead of 32,052 as proposed by the House and 32,108 as proposed by the Senate. As in amendment No. 33, this increase in the position ceiling results primarily from the 93 additional positions required to restore the four heavy duty rescue squads in the Fire Department to full-service status.

Amendment No. 35: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the number proposed by said amendment, insert the following: 28,616

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action provides 28,616 appropriated positions instead of 28,459 as proposed by the House and 28,515 as proposed by the Senate. As in amendments numbered 33 and 34, this increase is necessary mainly to accommodate the 93 additional positions required to restore the four heavy duty rescue squads in the Fire Department to full-service status.

Amendment No. 36: Restores matters proposed by the House and stricken by the Senate prohibiting the obligation or expenditure of funds through reprogramming unless advance approval of the reprogramming is obtained in accordance with established procedures set forth in the Joint Explanatory Statement of the Committee of Conference (House Report No. 96-443) which accompanied the District of Columbia Appropriation Act, 1980 (Public Law 96-93, approved October 30, 1979).

Amendment Nos. 37 and 38: Restore section numbers proposed by the House and changed by the Senate.

Amendment No. 39: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of section numbered 125 named in said amendment, insert the following: 126

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment adds a new section authorizing the Mayor to set the salary of the City Administrator at a rate not to exceed the maximum statutory rate established for level IV of the Federal Executive Schedule under 5 U.S.C. 5315, and provides that this salary may be payable to the City

Administrator during fiscal year 1983. The conference action also authorizes the Mayor to set the per diem rate for board members of the Redevelopment Land Agency in the manner consistent with his authority to set these rates for members of other boards and commissions of the District government. The Mayor does not have this authority at the present time.

Amendment No. 40: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of section numbered 126 named in said amendment, insert the following: 127

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The Senate amendment adds a new section which removes District employees from the pay ceiling for Federal employees. The language provides that the pay setting authority for District employees shall be the District's Merit Personnel Act rather than title 5 of the United States Code.

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate

with an amendment as follows:
In lieu of section number 127 named in said amendment, insert the following: 128
The managers on the part of the Senate will move to concur in the amendment of

the House to the amendment of the Senate.

The Senate amendment adds a new section which requires that necessary permits must be obtained from appropriate State agencies before sludge from the District's municipal waste system may be disposed of in any public or private landfills not currently used for this purpose.

#### CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1983 recommended by the Committee of Conference, with comparisons to the fiscal year 1982 amount, the 1983 budget estimates, and the House and Senate bills for 1983 follow:

#### Federal funde

Mr. LANTOS.

Mr. Won Pat.

Mr. Frost in five instances.

Mr. GUARINI.

Mr. MONTGOMERY.

Mr. BIAGGI.

Mr. ROYBAL.

Mr. AKAKA.

#### ADJOURNMENT

Mr. GAYDOS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 24 minutes p.m.) the House adjourned until tomorrow, Thursday, December 16, 1982, at 10 a.m.

#### EXECUTIVE COMMUNICATIONS, ETC.

5299. Under clause 2 of rule XXIV, a letter from the Secretary of Energy, transmitting the ninth quarterly report on biomass energy and alcohol fuels, for the period July through September 1982, pursuant to section 218(a) of Public Law 96-294, was taken from the Speaker's table and referred, jointly, to the Committees on Agriculture, Energy and Commerce, and Science and Technology.

#### REPORTS OF COMMITTEES ON BILLS AND RESOLU-PUBLIC TIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOWARD: Committee on Public Works and Transportation. Report on contempt of Congress (Rept. No. 97-968). Re-

ferred to the House Calendar.
Mr. DERRICK: Committee on Rules. House Resolution 629. A resolution providing for the consideration of H.R. 7397, a bill to promote economic revitalization and facilitate expansion of economic opportunity in the Caribbean Basin region. (Rept. No. 97-969). Referred to the House Calendar.

Mr. ZEFERETTI: Committee on Rules. House Resolution 630. A resolution providing for the consideration of H.R. 3191, a bill to amend the Internal Revenue Code of 1954 to exempt conventions, et cetera, held on cruise ships documented under the laws of the United States from certain rules relating to foreign conventions (Rept. No. 97-

970). Referred to the House Calendar. Mr. BEILENSON: Committee on Rules. House Resolution 631. A resolution providing for the consideration of S. 1965, a bill to designate certain lands in the Mark Twain National Forest in Missouri, which comprise approximately 6,888 acres, and which are generally depicted on a map entitled "Paddy Creek Wilderness Area," as a component of the National Wilderness Preservation System (Rept. No. 97-971). Referred to the

House Calendar.
Mr. DIXON: Committee of conference.
Conference report on H.R. 7144 (Rept. No. 97-972). Ordered to be printed.

#### PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. DINGELL: H.R. 7422. A bill to provide that any policy change which is adopted by the Board of Governors of the Federal Reserve System or by the Federal Open Market Committee and which will affect interest rates or the supply of money shall be subject to a congressional disapproval procedure; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SAM B. HALL, JR.:

H.R. 7423. A bill to recognize the organiza-tion known as Former Members of Con-gress; to the Committee on the Judiciary.

By Mr. HEFTEL: H.R. 7424. A bill to establish a hydrogen research and development program; to the Committee on Science and Technology.

By Mr. LOEFFLER (for himself, Mr.

COELHO, Mr. CRAIG, Mr. HIGHTOWER, Mr. MARLENEE, and Mr. SKEEN):

H.R. 7425. A bill to increase temporarily the duty on certain wool that is the product of Argentina or Uruguay; to the Committee on Ways and Means.

By Mrs. MARTIN of Illinois:

H.R. 7426. A bill to establish a program to provide funds to States for the purpose of job opportunities and business stimulation, and for other purposes; to the Committee on Education and Labor.

H.R. 7427. A bill to require the Secretary of Agriculture to establish a program to offset agricultural export subsidies imposed by foreign countries by subsidizing the exportation of agricultural commodities produced in the United States and products of such commodities; jointly, to the Committees on Agriculture and Foreign Affairs.

#### MEMORIALS

Under clause 4 of rule XXII.

519. The SPEAKER presented a memorial of the Senate the State of Illinois, relative to missing-in-action servicemen and civilians in Southeast Asia; to the Committee on Foreign Affairs.

#### PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. HUBBARD introduced a bill (H.R. 7428) for the relief of Kirsten Rytgaard; which was referred to the Committee on the Judiciary.

#### ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 2034: Mr. Harkin. H.R. 4086: Mr. Clinger. H.R. 6463: Mr. McEwen.

H.R. 6531: Mrs. COLLINS of Illinois and Mr. ANNUNZIO.

H.R. 6538: Mr. Morrison. H.R. 6850: Mrs. Collins of Illinois. H.R. 7108: Mr. Hansen of Idaho.

H.R. 7108: Mr. HANSEN Of Idaho.
H.R. 7275: Mr. ST GERMAIN, Mr. SABO, Ms.
FERRARO, Mr. WOLF, Mr. MURTHA, Mr.
HOWARD, Mr. SMITH Of New Jersey, Mrs.
SCHROEDER, Mr. HOYER, Mr. UDALL, Mr.
GARCIA, Mr. LELAND, Mr. CLAY, Mr. FAZIO,
Mr. WEISS, Mr. BARNES, Mr. MATSUI, Mr.
OTTINGER, Mr. DELLUMS, Mr. DE LUGO, Mr.
DASCHLE, Mr. JOHN L. BURTON, Mr. DYMTANDEROV, Mr. Mr. MYLLISKI, Mr. ALLY, Mr. FAUNTROY, Ms. MIKULSKI, Mr. WASHINGTON, and Mr. WON PAT.

H.R. 7406: Mr. ANNUNZIO, Mrs. COLLINS of Illinois, Mr. ERLENBORN, Mr. PORTER, and Mr. ROSTENKOWSKI.

H.R. 7411: Mr. WATKINS, Mr. KEMP, Mr. FISH, Mr. STOKES, AND Mr. BETHUNE.

H.J. Res. 459: Mr. McCurdy.

H.J. Res. 558: Mr. ATKINSON, Mr. GIN-GRICH, Mr. LAFALCE, Mr. MINETA, Mr. LEACH of Iowa, Mr. Conte, Mr. Kildee, Mr. Bereu-TER, Mr. MARTIN of New York, and Mr. LEATH of Texas.

H.J. Res. 591: Mr. Simon, Mr. Deckard, Mr. Neal, Mr. Sabo, Mr. Frank, Mr. Pashayan, Mr. English, Mr. Bethune, Mr. Brown of California, Mr. Fountain, Mrs. Holt, Mr. Atkinson, Mr. Yatron, and Mr.

H.J. Res. 603: Mr. SHARP and Mr. ROBERTS of South Dakota.

#### AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

#### S. 1965

By Mr. BAILEY of Missouri:

(Amendment in the nature of a substitute)

-Strike all after the enacting clause and insert the following:

That this Act may be known as the Paddy Creek Wilderness Act of 1981.

SEC. 2. In furtherance of the purposes of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), the following area as generally depicted on a map appropriately referenced, dated December 1981, is hereby designated as wilderness and, therefore, as a component of the Naand, therefore, as a component of the Na-tional Wilderness Preservation System; cer-tain lands in the Mark Twain National Forest, Missouri, which comprise about six thousand eight hundred and eighty-eight acres, are generally depicted on a map enti-tled "Paddy Creek Wilderness Area", dated December 1981, and shall be known as the Paddy Creek Wilderness Area.

Sec. 3. As soon as practicable after this Act takes effect, the Secretary of Agriculture shall file a map and legal description of the Paddy Creek Wilderness Area with the Energy and Natural Resources Committee of the Senate and the Committees on Agriculture and Interior and Insular Affairs of the House of Representatives, and such description shall have the same force and effect as if included in this Act: Provided, however, That correction of clerical and typographical errors in such legal description and map may be made.

SEC. 4. The area designated as wilderness by this Act shall be administered in accordance with the applicable provisions of the Wilderness Act (78 Stat. 890) and the Act of January 3, 1975 (88 Stat. 2096), except that any reference in such provisions to the effective date of such Acts shall be deemed to be a reference to the effective date of this

SEC. 5. (a) The Congress finds that-

(1) the Department of Agriculture has completed the second roadless area review and evaluation program (RARE II); and

(2) the Congress has made its own review and examination of National Forest System roadless areas in the State of Missouri and of the environmental impacts associated with alternative allocaitons of such areas.

(b) On the basis of such review, the Congress hereby determines and directs that-

(1) without passing on the question of the legal and factual sufficiency of the RARE II Final Environmental Statement (dated January 1979) with respect to National Forest System lands in States other than Missouri such statement shall not be subject to judicial review with respect to National Forest System lands in the State of Missouri;

(2) with respect to the National Forest System lands in the State of Missouri which were reviewed by the Department of Agriculture in the second roadless area review and evaluation (RARE II), except those lands remaining in further planning upon enactment of this Act, or designated as wilderness by this Act or previous Acts of Congress that review and evaluation shall be deemed for the purposes of the initial land management plans required for such lands by the Forest and Rangeland Renewal Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976 (Public Law 94-588) to be an adequate consideration of the suitability of such lands for inclusion in the National Wilderness Preservation System and the Department of Agriculture shall not be required to review the wilderness option prior to the revision of the initial plans and in no case prior to the date established by law for completion of the initial planning cycle;

(3) areas in the State of Missouri reviewed in such final environmental statement and not designated as wilderness by this Act or previous Acts of Congress shall be managed for multiple use pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 as amended by the National Forest Management Act of 1976; and

(4) unless expressly authorized by Congress the Department of Agriculture shall not conduct any further statewide roadless area review and evaluation of national forest system lands in the State of Missouri for the purpose of determining their suitability for inclusion in the National Wilderness Preservation System.

HR 7397

By Mr. DE LUGO: On page 17, after line 15, insert a new sec-

tion 103(e) and change subsequent subsections enumerations accordingly:

(e)(1) For purposes of this subsection, the term "entered" means entered, or withdrawn from warehouse, for consumption within the customs territory of the United States

(2) Duty-free treatment provided under this title during any calendar year after 1982 to bulk rum that is the product of a beneficiary country shall terminate for such portion of that year that remains after the quantity of such bulk rum which is entered during that year exceeds whichever of the

following quota amounts is greater:
(A)(i) for calendar year 1983, an amount, as determined by the President, equal to 150 percent of the total amount of bulk rum that was the product of that beneficiary country and was entered during either 1980

(ii) for each subsequent year after calendar year 1983 except as provided in subparagraph 3 of this subsection, an amount, as determined by the President, equal to 120 percent of the maximum amount of duty-free bulk rum allowable the preceding year; or

(B) 10,000 proof gallons.

(3) Unless the President determines, with respect to any calendar year after 1983, that the respective quantities of bulk rum which are the product of Puerto Rico and the United States Virgin Islands and are en-tered during that calendar year equalled amounts more than the greater of:

(A) 90 percent of the quantities of bulk rum produced in Puerto Rico and the Virgin Islands, respectively, and entered during cal-

(B) 90 percent of the quantities of bulk rum produced in Puerto Rico and the Virgin Islands, respectively, and entered during the immediately preceding calendar year.

then the maximum amount of duty-free bulk rum from each beneficiary country al-

lowable under clause (ii) of subparagraph (2)(A) of this subsection during the calendar year immediately following the year for which such determination was made shall be 100 percent of the maximum amount of duty free bulk rum allowable for the year for which such determination was made.

(C) The President may waive the provisions of subparagraphs 3(A) and 3(B) hereof if he determines that the reductions described therein were primarily the result of:

(i)(a) in the case of the Virgin Islands, competition from the bulk rum industry of Puerto Rico:

(i)(b) in the case of Puerto Rico, competition from the bulk rum industry of the United States Virgin Islands:

(ii) criminal acts:

(iii) concerted labor action; or

(iv) an act of God.

### SENATE--Wednesday, December 15, 1982

(Legislative day of Tuesday, November 30, 1982)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Gracious, Loving God, we celebrate world-wide the event that bisected history into B.C. and A.D. At the heart of that cosmic event is love-God so loved the world, that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life.-John 3: 16.

We need forgiveness, Lord, for the way we have violated that love. We have ignored it, demeaned it, diminished it, perverted it, and degraded it. We have turned love into weak sentimentality or emotionalism or sex. We have rejected it as irrelevant and im-

material.

Help us, faithful God, to understand that matchless, inexpressible love, given through a babe in a manger. Help us to comprehend that it is unconditional, unremitting, universal, inclusive, and eternal. Help us to realize that it is actually the most powerful force in history, transforming people and empires and civilizations. May we honor Thy love—receive it, submit to it, and share it. We ask this in the name of Him who was Love Incarnate. Amen.

#### RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The acting majority leader is recognized.

#### SENATE SCHEDULE

Mr. STEVENS. Mr. President, we are trying to clear the payment-inkind bill, S. 3074. If it is cleared, we hope to be able to proceed with it before we get back to the surface transportation bill. When we return to the surface transportation bill the amendment of the Senator from Ohio will be pending.

We also hope that we will have the Agriculture appropriations conference report sometime today, and that Members will permit us to have had that report considered and the bill sent to

the President.

The Senate, I am sure, expects my next comment, and that is the majority leader intends that we stay in late.

We hope we will be able to complete this surface transportation bill which contains the new gas tax.

We are compelled to remind the Senate that the existing continuing resolution expires on December 17.
That Appropriations Committee will meet today to complete marking up the continuing resolution we have re-

ceived from the House.

It is the hope of the leadership that that will be completed and sent to conference so that we may submit it to the President before the deadline on the 17th. I know that is a large hope, but I call attention of the Senate to the fact that there are two cloture motions that were filed late last evening. one on the Baker substitute and the other on the basic surface transportation bill.

I personally hope we are not compelled to go to those because we will trigger two periods of postcloture procedure which will be extremely difficult to complete prior to the time we must complete the continuing resolu-

So in this period before the holidays we can do no more than plead once again for the understanding and cooperation of all Members of the Senate on a bipartisan basis to help the leadership on both sides to see to it that we may complete our business and return to our homes and families in time for Christmas.

It is my understanding that there will be a period for the transaction of routine morning business following the leader time; is that correct?

The PRESIDING OFFICER (Mr. GORTON). The Senator is correct.

Mr. STEVENS. Does the Senator seek any time? If not, I yield back the remainder of our time.

#### RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER. The acting minority leader is recognized.

Mr. PROXMIRE. Mr. President, expect to use a small amount of the minority leader's time, and I will ask to reserve the time for his later use if he desires to use it.

#### ELECTROMAGNETIC PULSE-THREAT TO ALL RETALIATORY SYSTEMS?

Mr. PROXMIRE. Mr. President, while the Senate and House have been examining the technological justifica-

tion for the Dense Pack basing mode for the MX missile, little attention has been paid to the weakest link in U.S. strategic planning-command, control, and communications.

Intensive studies of the effects of nuclear explosions in the atmosphere or beyond the atmosphere indicate that there could be widespread failures in the command and control structure. Why is this important? Because it is now possible to speculate that an initial assault against the United States could be led off by highenergy nuclear detonations high above the United States which would in effect blanket out all U.S. military and civilian power sources and communications devices.

The weakest link in any strategy always presents a tempting target. So while we are deep in the debate over the MX, it is only appropriate to consider whether or not the MX and the rest of our retaliatory forces would even operate properly in a nuclear environment.

So we are faced with a new and more fundamental technological problem that simply has to be determined before, and I repeat before, a commitment is made to Dense Pack or any other deployment depending upon its communications links. If it is true that an exoatmospheric blast can knock out power sources, cause engine failures, blind satellites, interrupt radio and other telecommunications systems, then we are spending a lot of time and money discussing deploy-ment modes of questionable utility and survivability.

Perhaps, Mr. President, we need to start with the fundamentals of nuclear warfare first, and really understand what they mean for our retaliatory systems, before we dedicate tens of billions to programs of uncertain utility. It is time for the administration and the appropriate committees of Congress to investigate and explain this phenomenon of electromagnetic pulse before we lock ourselves into deployment schemes which are fundamentally unsound.

Mr. President, I ask unanimous consent that an article in the Washington Post on this matter be printed in the

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 5, 1982] FRYING ALL OUR ELECTRONICS WITH A NUKE OVER OMAHA, ONE SOVIET WARHEAD COULD DELIVER A KNOCKOUT

(By William J. Broad)

"All of a sudden a greenish-white flash lit up all of Hawaii," recalled an eyewitness. "The sky started turning pink, then orange, then red. The heavens were filled with a ghastly light."

It happened during an atomic test in July 1962. A rocket lifted off from Johnston Atoll, 800 miles southwest of Hawaii and, 248 miles above Earth, turned into a ball of

Something so unexpected happened that two decades later military planners still ponder its dark implications for the fighting

of nuclear war.

A second or so after the flash, the Hawaiian Islands were plagued by electrical problems. In Oahu, 300 streetlights winked out, their fuses blown. Burglar alarms started ringing and power lines went dead. Honolulu headlines the next day attributed the breakdowns to a nuclear "shock wave." It was not so easily explained.

The mysterious agent was EMP, an electromagnetic pulse given life by nuclear blasts. EMP is an intense burst of energy that can travel halfway across a continent at the speed of light and still pack enough

punch to burn out electrical systems.

An EMP attack would be the ideal first step in a massive atomic assault against the United States. A single Soviet warhead detonated 250 miles or so above Nebraska would blanket the nation with EMP having peak fields on the order of 50,000 volts per meter-almost certainly strong enough to shut down all power and communications. Though the pulse would do no direct harm to humans, it would throw the United States and its armed forces into confusion.

This vision is all the more menacing, with the Pentagon foreseeing the possibility of a prolonged or "limited" nuclear war. This takes for granted exceedingly good communications throughout the military, especially between the president and his troops. But EMP renders this assumption mere wishful thinking and turns the notion of limited nu-

clear war into fantasy.
Wrestling with EMP threat is a top priority. In unveiling a \$180-billion program for rebuilding the U.S. strategic war machine, President Reagan in October 1981 said the number one job was not to deploy the MX missile or build the B1 bomber but "to strengthen and rebuild our communications and control system-a much-neglected factor in our strategic deterrent."

Reagan has earmarked \$20 billion to this end—much of it for grappling with EMP.

Besides protecting communications links around the world, the Pentagon has assigned a top secret mission to a special team in the Joint Program Office: to create an altogether new communications system which will work reliably during nuclear war.

Why has it taken so long to awaken to the threat? What do the Soviets know of EMP? Can the United States defeat the electromagnetic crippler? The answers are buried deep in the history of the nuclear arms race.

The 1962 test, a 1.4-megaton blast known as Starfish Prime, was one of the last held aboveground. A few months later President John F. Kennedy and Soviet Premier Nikita Khrushchev agreed to ban nuclear tests from the atmosphere and space, ending the possibility of observing EMP in peacetime.
Unfortunately, the U.S. military misread

the hints already at hand. Military scien-

tists knew there had been a strong electrical pulse on the Hawaiian Islands. But they felt reassured by the fact that power failures had been scattered and that most telephone systems had gone right on working

By late 1963, military physicists had come up with an explanation for the pulse. On Earth, the atmosphere quickly absorbs the gamma radiation and X-rays unleashed by a nuclear blast. In space, this high-energy radiation travels over vast distances at the speed of light. A blast 50 to 500 miles above Earth sends radiation into the upper atmosphere, knocking electrons out of air molecules. The electrons twirl around and down the lines of force of the Earth's magnetic field. The electrons act like a radio transmitter, beaming out a powerful pulse spanning the frequencies from zero to about 100 megahertz-a range that takes in everything from power-line frequencies to most AM and FM radio and many television channels. The higher the blast, the greater the area on Earth covered by EMP broadcast

EMP can be picked up by airplane hulls, radio antennas, telephone lines, car bodiesanything metal. The longer or wider the collector, the more energy is induced. A wire the length of a football field would catch enough EMP energy to power a 100-watt bulb for an instant in 1,500 homes. A transcontinental power line would pick up enough EMP to cause blinding arcs between

transmission cables.

The physicists who looked at EMP in 1963 could not foresee the host of vulnerable devices waiting to be spun off by the semiconductor revolution. Vacuum tubes, still in widespread use in 1963, have thick metal parts, separated by a near vacuum, that can handle a high-voltage surge and operate as if nothing had happened. Solid-state devices, on the other hand, are built up of successive layers of silicon thinner than a human hair. Something akin to panic came in the 1970s, when military engineers discovered that solid-state integrated circuits are a billion times likelier to be destroyed by EMP than vacuum tubes.

Physicists had faith that EMP could be tamed, especially by shielding. Key systems would be covered with a thin sheet of metal that would siphon off the high-voltage surge. A primitive version of such a shield is described in "Nuclear War Survival Skills," a handbook published four years ago by the Oak Ridge National Laboratory: "A radio may be shielded against EMP by placing it inside a metal cake box or metal storage can, or by completely surrounding it with

aluminum foil."

A cake tin might work for a radio, and finding out is not difficult. Small systems can be "hardened" and then tested by blasting them with simulated EMP. But there is no way to test the reliability of a coast-tocoast communications link short of detonating a warhead high above the atmosphere.

The implications of the shielding problem dawned on the military during the construction of the \$5.7-billion Safeguard antiballistic missile (ABM) system. Safeguard's nuclear interceptors were to confront Soviet warheads high above the atmosphere, sending EMP surges across most of North America. The military initially considered EMP a bothersome side effect. But after trying vainly to build an invulnerable transcontinental phone line between Safeguard and the president, military planners began to see EMP as potentially fatal.

The Safeguard project was started in 1969, a time when attempts to harden small

systems such as strategic U.S. missiles against EMP had begun. Safeguard's massive size required a higher level of effort. Shields of steel were wrapped around entire buildings holding radars, missiles and the computers used to guide them. Huge EMP simulators then checked for hardness. But metal objects that penetrated the shielding made complete protection extremely difficult. By 1971 the U.S. military was sinking more than \$250 million a year into EMP hardening and testing.

Devices meant to back up the shielding by discharging the EMP energy across a gap or shunting it to the ground did not work. The pulse went through a system in 10 to 20 bil-lionths of a second and did its damage

before the devices could trigger.

To those in the know, the situation was ominous. Safeguard's 100 missiles were nuclear-tipped; the president would have to approve their launch. That required telephone lines stretching 2,000 miles from Washington to the ABM fields of North Dakota. Special shielded lines were leased from the Bell System. But the vulnerability of Bell's amplifiers and switching centers had skyrocketed with the wide use of solidstate circuitry. The size of the system, moreover, meant huge amounts of EMP would be collected-and complete testing for "hardness"

ess" would be impossible. On April 1, 1975, technicians made the final adjustments on the missiles. Ten months later, Congress closed Safeguard down. "We wondered with Safeguard whether we were going to knock out our own weapon system," says Claud L. Beckham, a former Bell official who worked on the project. Today ABM designers avoid hypothesizing nuclear intercepts in space at all costs. Instead, they assign blasts to the atmosphere, where EMP effects are intense but extend only a few miles rather than Defense strategists consider

Safeguard a \$5.7 billion fiasco.

Are the Soviets so careless? Evidence came to light shortly after Safeguard's demise that the Soviets are preparing for the pulse quite seriously. In 1976 a Soviet pilot defected with his MIG-25 to Japan. CIA director George Bush exulted that it was an "intelligence bonanza." The plane, an interceptor known as a Foxbat, had been clocked at three times the speed of sound and was the Soviet warplane most feared in the West. Air Force Secretary Robert C. Seamans in 1973 called it "probably the best interceptor in production in the world today.

Peals of laughter soon rang throughout liberal circles when it turned out the fear-Foxbat relied on old-fashioned vacuum tubes. But a few Western defense experts were far from amused. One year after the Foxbat landed, the Pentagon quietly revised "The Effects of Nuclear Weapons," its EMP bible to include the warning: "It may be advisable to design equipment with vacuum tubes rather than solid-state

components.'

In any event, the Soviets clearly could developed an early appreciation of EMP. They conducted their atomic tests in space high above central Asia. It is a sparsely populated region, but unlike the watery expanses around Johnson Atoll, it has towns. So the Soviets have had more of a chance to observe how EMP is picked up by intercity power and telephone lines and the way it affects electronic apparatus. Soviet manuals and magazine articles are rife with such references to EMP as this passage: "To achieve surprise in a modern war . . . highaltitude nuclear explosions can be carried out . . . to destroy the system of control and communications and to suppress the antimissile and antiair defense radar system.

Can the United States protect itself? Vacuum tubes cannot be used in every military device that has to function during a nuclear war. Energy efficient, reliable, compact and cheap, solid-state devices are irresistible to designers.

One possible way around the conundrum would be to rely on shielding only in small systems that can be fully tested for EMP hardness. So military planners turned their

attention to airplanes.

But can airplanes be made impregnable? The president and his generals have many airborne command posts from which they might orchestrate a nuclear war. The president has four specially designed Boeing 747s. The Strategic Air Command flies a fleet of two dozen Boeing 707s for the control of Minuteman missile fields alone.

In the early 1970s, Boeing took three 747s off the production line and tried to protect and shield individual systems. Bundles of wire cabling and thousands of key electrical systems were wrapped in special metal shielding. Pulse-limiting devices were stalled in important circuits. The upshot was depressing. Tests showed that up to 11,500 essential solid-state circuits would fail if the planes were hit by EMP from a nuclear explosion half a continent away. A few years later, Boeing, with another 747. tried to make the aircraft's hull one giant shield. The plane was built from scratch so the 2,000 or so openings in the hull could be covered or shielded. It worked but cost five times more than a commercial plane-so only one airborne command post in all the U.S. military is considered reliably "hard."

Other command aircraft are slated for hardening, but whether the resulting aircraft will truly be invulnerable is doubtful because of testing inadequacies. In 1980, for instance, a \$58-million EMP simulator in Albuquerque was placed into use, allowing large planes to be completely tested for the

first time.

Known as Trestle after the railroad structure it resembles, the 12-story platform is made of Douglas fir. Metal would affect the electromagnetic pulse, so Trestle is held together with, 250,000 laminated beech bolts. Two 5-million-volt pulsers discharge a surge of electricity into wires surrounding the test stand. For a few billionths of a second the pulsers are putting out 160 billion watts of power.

Yet that huge jolt cannot mimic a peak EMP surge. The pulse of about 40,000 volts per meter that Trestle lays down at an aircraft's hull is 10,000 shy of the peak accept-

ed by most U.S. scientists.

Even 50,000 volts may be too little. The Pentagon states the power of the pulse is 50,000 volts per meter no matter how big the bomb. But some French physicists, among others, envision a pulse of about 100,000 volts per meter. If they are correct, the nominal protections the Pentagon has tried to build into communications networks, missiles, radars and radios would almost certainly be useless.

way around the difficulty is to make critical communication links transparent to EMP by transmitting messages with pulses of light along hair-thin glass fibers. Fiber optics do not pick up EMP or conduct electricity and thus will not send damaging pulses to fragile solid-state devices. The B1 and Stealth bombers will use glass fiber to make them less vulnerable to EMP. The

Bell System, whose lines carry military messages, is installing a 496-mile fiber optic line between Washington and Boston-the first of many such conduits around the country

At first glance a transcontinental web of glass fibers might seem a perfect solution. But telephone calls on fiber optic lines must repeatedly be turned back into electric signals as they pass through switching centers and amplifiers full of solid-state equipment. And shielding is difficult, since the switches, computers, and amplifiers are powered by the commercial power grid-a perfect con-

duit for EMP. Its cost would be prohibitive.

In the war against EMP, the space front looks particularly grim. Communications satellites carry more than 70 percent of all long-distance military messages. For some time, the military thought satellites would be immune to all but a nearby nuclear blast. But in the early 1970s, physicists found that radiation from a nuclear blast in space travels vast distances and knocks electrons out of a satellite's skin and innards, causing an

EMP-type surge.

The oversight had dark implications. For more than a decade, starting in the early 1960s, the Air Force kept a secret arsenal in the Pacific, armed with missiles tipped with nuclear warheads. The arsenal's sole mission was to destroy enemy satellites used for early warning, reconnaissance and communication. But their EMP also could have crippled ours, accidentally altering the outcome of a nuclear war. The system was scrapped in 1975 when Pentagon managers were finally convinced the EMP threat was

As part of President Reagan's program, the Air Force is trying to harden some satellites. Shielding does not work well; much of the radiation that causes EMP in space passes right through a thin metal covering. So engineers are designing special circuits, filtering antenna inputs and fabricating cables from aluminum and other metals with low atomic weights, since they release electrons less readily than copper. Such limited protections will work only if the satellite is far from a nuclear blast-just how far, the Pentagon will not say. A relatively small explosion of two megatons just outside the upper atmosphere at an altitude of 50 to 75 miles would damage an unprotected satellite in geosynchronous orbit 22,300 miles above Earth. And the kill range can easily be extended by increasing the size of the bomb.

The United States is frequently crisscrossed by picture-taking Cosmos satellites at a height of some 150 miles. Just one of them, carrying a few pounds of plutonium instead of a camera, could knock out key U.S. military satellites and, as radiation from the blast slammed into Earth's upper atmosphere at the speed of light, touch off

coast-to-coast pandemonium.

In a worst-case scenario, the powerful surge of EMP would trip circuit breakers throughout the power grid, silence, telephone lines, lobotomize computer memories and throw the armed forces into disarray. Backup power would kick on deep within Cheyenne Mountain in the Colorado Rockies, the nerve center of the North American Aerospace Defense Command. Yet here too chaos would rule. The super-secret satellites that warn exactly where to expect a rain of Soviet warheads would have been knocked out and the U.S. early-warning radars would have been blinded, as predicted in the Soviet manual.

On strategic bomber bases, B-52 flight crews might run for their trucks to find they would not start, their electronic ignition systems dead. The president might get to his hardened airborne command post to learn, too late, that even if his plane got off the ground, its radio range would be sharply reduced; the satellites used to relay its messages would be out of action.

Some defense strategists are more optimistic. Perhaps the president could get enough of a signal through the atomic static to launch waves of U.S. nuclear warheads in massive retaliation. It is just such uncertainty that keeps the Soviets from mustering an EMP attack, according to such defense strategists as Gerald P. Dinneen, the top communications specialist in the Pentagon during the Carter administration.

The Soviets also run the risk that launch officers of Minuteman missiles and commanders of nuclear submarines, cut off from superiors by an EMP attack, might fire missiles on their own accord, unleasing an uncontrolled nuclear spasm.

In light of these apocalyptic visions, critics of the Pentagon say that a limited nuclear war waged over days, weeks or months, as proposed by Defense Secretary Caspar W. Weinberger, is simply impossible. Weinberger's aim is to give the United States, should it be attacked, choices other than releasing the entire nuclear arsenal in all-out retaliation or letting the country be destroyed. The knowledge that the United States can exact precisely measured punishment-if the Soviets bomb three large cities, the United States will retaliate in kind-serves to check the possibility of a Soviet preemptive strike. Or so Weinberger and his aides believe.

Yet Jeremy Stone, president of the 5,000member Federation of American Scientists, says that only the raw threat of convulsive massive retaliation will discourage the Soviet Union from toying with the idea of a first strike. In an influential article in 1980, Stone raised the specter of EMP and military chaos: "We ought not kid ourselves that we are prepared to fight a protracted nuclear war when no plausible improvement in command, control and communications is likely to permit it."

Pentagon hardliners claim that eventually the armed forces can be protected against EMP and thus could wage any kind of war. They cite the increased use of fiber optics and Reagan's \$20-billion program with its impending improvements that include new technologies. The Air Force is developing an emergency communications system that uses ground wave signals at low frequencies. The Army, after many failures with shielding, has begun trying to clip EMP pulses with new, fast-acting diodes. But the diodes offer no protection against EMP picked up by the national power grid or long communications lines.

One reason EMP came into public view was that the military felt obligated to warn Congress, defense contractors and civil defense authorities of the flaws being uncovered in large communication networks. As Pentagon official John A. Northrup admitted to Congress in 1972: "In our initial studies it was hoped that we could identify that the problem would not be a continuing one. That is, that the problem would go away. I think what has happened there is the recognition that the problem appears to be a potential hazard that must be addressed, and that our initial studies were not successful in making it go away."

HISTORICAI DOCUMENTARY RE-MINDS US OF THE NEED FOR THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, in January of 1945, Auschwitz-the infamous Nazi death camp-was liberated by the Red army in its push toward Berlin. Later that year, on April 12, it was America's turn to come face to face with Hitler's "final solution" as the forward units of Patton's 3d Army took possession of the Buchenwald camps. These horrific discoveries were soon followed by others like Dachau, Bergin-Belson, Majdanek, and Treb-linka which supplied the world with evidence of history's most extensive and catastrophic genocidal campaign. All of the triumphs and tragedies of the war years seemed lost in the almost daily revelations of Nazi crimes being uncovered by the invading Allied forces.

These ugly scenes became indelible and permanent fixtures in our memories and the world seemed determined to avenge the 6 million victims by not only punishing the culprits but by addressing the crime itself. It was in this atmosphere that the Genocide Convention was conceived and adopted by the United Nations. It was in this spirit that the United States, a major contributor to the writing of the convention, signed the document and moved to have the Senate advise and consent on final ratification.

While the convention's unratified status regrettably remains unaltered, much has changed in the 37 years that have passed since that time. For the children of today, the Nazi war crimes seem almost unreal and quite removed from contemporary considerations. The new generation learns of the camps but often only in the abstract; only through the faded pictures and grim accounts of a different age. There is only so much that children of this decade can extract from sensationalized films or stilted documentaries. The personal memories that we ourselves can draw upon, having lived through this period, gives us an appreciation for these events that largely escapes our children.

Recently, however, a program was aired on WNET, channel 26, that could supply the youth of today with a comprehensive understanding of what occurred during those days. The program, "The Rise and Fall of the Third Reich," is a documentary based on William L. Shirer's work which examines the growth of the Nazi movement in Germany and the atrocities carried out under its auspices. This provocative piece moves out of the usual pedestrian view of the events of this period and probes deeper into the possible motivations and objectives of the leaders in the German high command. Shirer's most excellent work is put into a form that enhances its content by making it more readily understand-

able for the general audience. The complicated mixture of Prussian militarism, German nationalism, and Aryan anti-Semitism that seemed to coalesce in Germany in the 1940's is dealt with through characters and scenes that are prototypical of the society at large. This use of a storyline based on historical documentation offers great promise as a early teaching device for viewers lacking a fundamental knowledge of the people and events of this period.

"The Rise and Fall of the Third Reich" is a perceptive and thoughtprovoking examination of a very difficult period. For those of us who personally witnessed many of these unfold, this new insight into the working of the Third Reich is an extraordinary opportunity. For those of our Nation who are too young to have lived through this period, this recreation of modern history's most tragic epoch is a mandatory education. The only crime approaching that of the Nazi genocide would be the crime of letting its tragic lesson fade and recede from our memories. As we begin a 38th year without the ratification of the Genocide Convention, we could do well to look back at the convention's genesis in the Nazi crematoriums. We succeeded in arresting only the criminals, not the crime, and consequently genocide remains a question unsolved and very much contempo-

#### ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond the hour of 10:30 a.m., with statements therein limited to 2 minutes each.

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### JOHN LIGHT NAPIER

Mr. THURMOND. Mr. President, in a few short days, the 97th Congress will draw to a close, and with it, the legislative service of some well-respected men and women who have dedicated substantial portions of their time and energy to serving their country.

For the last 2 years, I have been consistently impressed with the service of a man whom I have had the pleasure of working with for some time: Congressman JOHN NAPIER of Bennetts-ville. S.C.

John has represented the citizens of the Sixth Congressional District of South Carolina with honor and distinction since his election in 1980. He is a man who has shown great vision and dedication to the principles of honesty, integrity, and hard work. He is to be particularly commended for his legislative record while serving in the Congress.

Mr. President, John Napier has always had the courage of his convictions, and the strength to stand up for those principles in which he believes. In leaving the profession of politices, at least temporarily, John Napier can be secure in the knowledge that the people of his district have benefited greatly from his service in the House of Representative. To John and his lovely wife, Pam, I wish every success as they return to South Carolina.

John's service to the people of the sixth district—a predominantly agrarian section of South Carolina—has been particularly evident in the House Agriculture Committee, where he served on subcommittees dealing with tobacco, cotton, and other crops vitally important to his constituents.

He has also been supportive of South Carolina's growing tourism industry, and has worked hard to promote the State's Grand Strand area of Myrtle Beach and surrounding coastal recreation sites as outstanding places for family vacations.

But John Napier also realized that a strong economy in the Myrtle Beach area depended on development of a year-round tourism industry, and he worked closely with local and State officials to make that goal a reality.

In addition, he has been instrumental in protecting the coastal areas of the sixth district by supporting a comprehensive beach erosion study. To attract more people to South Carolina's Grand Strand, John procured funds for a traffic study to extend Interstate Highway 95 to Myrtle Beach.

Since his election in 1980, JOHN NAPIER has helped bring more than \$150 million in Federal grants and loans to his district, and he helped the Myrtle Beach Air Force Base secure funds for a new control tower and additional aircraft parking space for our Rapid Deployment Force.

Mr. President, JOHN NAPIER'S commitment to his country, his State, and to the principles which helped make this Nation strong should serve as an example to all of us.

I am particularly proud that he began his career of public service in my office, first as a congressional intern and later as a member of my legislative staff, where he served with distinction as an assistant on the Veterans Affairs and Ethics Committees in the Senate.

He is a devoted family man, public servant, and outstanding American. In

serving his district, and indeed the whole State of South Carolina, John Napier was tireless in his pursuit of improving the economic condition of our farmers and their families.

He has been a capable and helpful friend to the people of his district and our State, Mr. President. I know that all the people of South Carolina look forward to his continued public service in the years to come.

#### S. 823, THE TRIS LEGISLATION,

Mr. THURMOND. Mr. President, I am pleased that the Senate yesterday passed S. 823, as amended by the

House of Representatives.

This legislation, known as the tris indemnification bill, has been before the Congress on a number of occasions prior to this action yesterday. As a matter of fact, the tris legislation has passed the Senate three times in this Congress, and once in the previous Congress. The House has finally acted on this meritorious legislation with certain amendments that I have no objection to and, in fact, support as good improvements to the bill.

Mr. President, as I have stated many times on the Senate floor, this legislation is not a bailout for the textile and apparel industry. It simply permits those companies affected by the Government ban on the chemical flame retardant tris to go into the Court of Claims and show the extent of their losses. Once a judgment is entered, these claimants must return to the Congress for any compensation.

This legislation has probably been put under more legislative scrutiny than any other legislation of its kind in recent years. No one is getting the wool pulled over their eyes on this bill. Numerous hearings in both the House and Senate during the past 5 years have examined every aspect of this legislation. It provides relief that is fair, equitable, and reasonable based on regulatory actions by the Federal Government.

Mr. President, I am pleased that my colleagues approved this measure without amendment so it could be sent to the President for his signature.

#### CONCERNING U.S. REPRESENTA-TIVE KEN HOLLAND

Mr. THURMOND. Mr. President, I rise today to pay tribute to a fine man and able Congressman, Ken Holland, from my home State of South Carolina.

Ken has represented well the people of the fifth district, and they have shown their appreciation for his good work and trust by reelecting him in 1980 to a fourth term as their Representative to the U.S. Congress.

Ken has served his constituency well in tackling many issues of importance. One area where he has been particu-

larly effective is textiles. Textile plants are key employers of the people Ken represents, and he has done a good job of helping to protect the jobs of those whose livelihood depends upon the stability of our domestic textile industry. These jobs have been endangered recently with the onslaught of less expensive foreign textile imports.

In a mutual effort to help resolve this problem, Ken and I have worked closely to make our Government more responsive to the problem of foreign textile imports coming into this country from Hong Kong, Taiwan, Korea, and the People's Republic of China. These imports continue to be a major threat to Southern textile manufacturers and to all those in this country who rely on textiles for jobs and economic security.

Mr. President, Ken Holland has excelled as a Congressman in many areas and he has served our home State of South Carolina well. I wish him the best of luck in all future endeavors.

## TRIBUTE TO M. CALDWELL BUTLER

Mr. THURMOND. Mr. President, I rise today to recognize the career of Congressman M. Caldwell Butler from the Sixth District of Virginia. Calwell Butler is retiring at the end of the 97th Congress with a fine record in the U.S. House of Representatives.

After serving for 10 years in the Virginia House of Delegates, CALDWELL BUTLER was elected to the U.S. House of Representatives in 1972. He has served consecutive terms in that seat

for the past 10 years.

Caldwell Butler has earned the reputation of being a hard worker and a man who stands up for his principles. He has worked for tougher anticrime legislation and much needed reform of our immigration laws and has served his constituents well. He is respected by both sides of the aisle for his efforts as a member of the Judiciary and Government Operations Committees and by Members of both Houses of Congress. His contributions to the debate on issues in committee and on the floor will be missed.

Mr. President, I highly respect Caldwell Butler as a man of integrity and ability, and I have enjoyed working with him on issues of mutual interest. I want to publicly commend him on a job well done and to wish him and his family a wonderful future. His work during his tenure in the House will not be forgotten, and he can take with him a knowledge that he has made a valuable contribution to his fellow Americans.

#### JOHN J. RHODES

Mr. THURMOND. Mr. President, I rise today to pay tribute to one of the

most distinguished Members of the U.S. House of Representatives, Congressman John J. Rhodes of Arizona. John Rhodes will be retiring at the end of the 97th Congress, after 30 years of service to the people of the First District of Arizona. He will be missed by his colleagues in both the House and the Senate.

A Harvard Law School graduate and a veteran of World War II, John Rhodes has represented his district in an outstanding manner since his first election in 1952. He has served his constituents well in the various roles he has assumed in the House, and they have rewarded him by reelecting him every 2 years since 1952.

John Rhodes has served in many capacities in the House as a member of the Committee on Education and Labor, Committee on Interior and Insular Affairs, Committee on Appropriations, Joint Study Committee on Budget Control and the Rules Committee. In each committee assignment, he has worked diligently to do what was best for our Nation as a whole, not just for one particular interest group. He is to be commended and admired for his ability to see the broader picture and for his willingness to work toward achieving the best for all.

In other roles, as chairman of the House Republican Policy Committee for 7 years, and then for another 7 years as minority leader, John Rhodes provided most able leadership for the Republican Members of the House.

I have nown John Rhodes for a number of years, and am proud to call him my good friend. I have enjoyed working with him through the years and look forward to continuing our friendship. We all wish John and his lovely wife Betty much happiness and success in their endeavors in the future.

#### 1982 IS BICENTENNIAL OF UNITED STATES-NETHERLANDS RELATIONS

Mr. PERCY. Mr. President, as 1982 comes to a close, it is worth noting once again that this year marks the celebration of 200 years of continuously peaceful diplomatic relations between the United States of America and its oldest partner in the world, the Kingdom of the Netherlands. For it was in 1782 that the States General accepted the credentials of our first envoy to the Netherlands, John Adams, and thereby recognized the sovereignty of this country.

The bicentennial of Netherlands-United States relations was also the occasion for the invitation to Her Majesty Queen Beatrix of the Netherlands to address a joint meeting of the U.S. Congress, as her mother and grandmother had done before.

Not too many months ago I had a visitor in my office, Jack Fieyra. He is a Netherlander who, at his own expense, had come to Washington to take part in an exchange between the Disabled American Veterans and the Netherlands Ex-Servicemen Association. Mr. Fieyra had taken an important role in organizing the visit of disabled Americans to the Netherlands this summer, Americans who had taken part in the liberation of his country. He brought with him copies of documents, a sort of dossier on the establishment of relations between the United States and the Netherlands. The dossier, which has been placed in the Foreign Relations Committee's historical files, contains the declassified secret memorandum, draft treaties, minutes of private meetings and letters of two centuries ago which led to the signing of the first Treaty of Amity and Commerce between our countries, on October 8, 1782. That treaty took 6 years to negotiate.

Without that treaty it would have been impossible for this war-torn and struggling Republic to have received the foreign aid it so desperately needed. For, less than 2 months after John Adams had obtained Dutch recognition of the United States, the first loans were placed in the Netherlands: f.5 million at a then astronomic interest rate of 5 percent. And, with the treaty, Dutch caution was pushed to the side completely: Over the next 6 years three more loans totaling f.4 million were placed in the Netherlands. Congress was then in urgent need of cash to pay the interest on previous loans, both French and Dutch, and to establish this country as credit worthy in European financial centers.

The new Constitution of 1787 put the United States on a sounder financial footing; from 1790 onward there were few difficulties in finding subscribers for loans. Amsterdam bankers arranged eight more loans after 1790 for a total of f.25 million. One hundred percent of the U.S. foreign debt was held by Dutch bankers. And the United States paid back 100 percent,

principal and interest.

But the Dutch were not done, yet. In 1804 the banking house of Hope & Co. offered a U.S. public loan of f.12 million at 6 percent in order to finance the Louisiana Purchase.

Without the faith of the Netherlands in those critical years the War of Independence might have produced continuing financial and even colonial

dependence.

People of North America and the Netherlands, of course, knew each other for centuries before official recognition in 1782. From the year 1609 when Henry Hudson sailed for the Netherlands West Indies Co., past Manhattan Island in search of the fabled Northwest Passage, Netherlanders have been coming to our land

in order to settle, to contribute, and to build a future. People such as Mr. Fieyra, who came to bear personal testimony of his high regard for this country, are the descendants of centuries of travelers, who honor us with their presence and good wishes.

As 1982 comes to a close, the people and Governments of the United States and the Netherlands look forward to a third century of warm friendship, fruitful trade, and peaceful relations.

#### THE HIGHWAY BILL-H.R. 6211

Mr. ABDNOR. Mr. President, we have before us today legislation which is of vital importance to every Member of the Senate. The costs of rehabilitating our highway system and the allocation of the tax revenues to carry out this project has been foremost in our minds during the past few days.

In the Environment and Public Works Committee, of which I am a member, we have considered the allocation formulas from which each State will receive its funds, and I believe we have handled those provisions well. Chairman Stafford did an excellent job of directing the proceedings and I also applaud all of the Senators on the committee for their patience and hard work during the markup sessions.

It would have been easy for some just to open up the titles wholesale to attempt to bring more money to their respective States, but they refrained during committee considerations and I hope that my colleagues will not bring up damaging amendments during the

full Senate consideration.

In the Senate bill, we saw fit to compromise with our urban colleagues, giving them a provision which guarantees each State a minimum return of 85 percent for every dollar contributed to the highway trust fund. Also, in our revenue title we have designated 1 cent of the 5-cent increase in the fuel tax to go to urban mass transit even though little of these funds will be returned to our States. Most of my rural colleagues find this to be satisfactory because we understand the problems that our cities have building and repairing their transportation systems.

The Senate bill basically changes one formula in a substantive manner. The interstate construction formula (3-R) in the present legislation is based on 55 percent-lane miles and 45 percent vehicle-miles. We changed that formula to 60-40 percent.

The House has changed the formula to one-third miles traveled, one-third gasoline consumed, and one-third diesel consumed. This is very damag-

ing to rural areas.

The bridge formula also has been changed by the other body to the cost of rehabilitation on a State-by-State basis. The Senate provision uses the national average cost of rehabilitation.

We find this troublesome also because it will direct a disproportionate share of the funds to the cities.

The primary system formula has been changed in the House to reflect only population; our provision reflects not only population but also land area and post road miles (mail routes). I find this to be much more representative of the primary systems needs.

The 4-R reconstruction formula also has been changed to an urban bent. The House provision will consider population while the Sente provision considers the true elements that led to the need for reconstruction. One-third gasoline and one-third diesel consumption and one-third miles traveled is the more appropriate formula.

The House has included language to mandate the participation of minority businesses in the work to be undertaken. While I support the admirable goal of promoting minority enterprise, rigid requirement may not be in the best interest of many areas of the country.

My State of South Dakota, for example, would be significantly hurt by such an action. The South Dakota Department of Transportation has pursued vigorously the services of local minority businesses in good faith and effort, but it would be impossible to award 10 percent of their contracts to South Dakota minority businesses.

The State, in effect, would be forced to rely on out-of-State firms. It seems unfortunate that qualified in-State firms who need the work would be unable to bid competitively for those projects.

Mr. President, what the House of Representatives had sent to us is a bill which totally shifts the allocations away from the rural areas of America to the urban populations. My State of South Dakota would, in effect, go from a donee State to a donor State in a matter of 2 years. I find this totally unacceptable.

The reason we have considered the Surface Transportation Act and the Highway Revenue Act is because we had intended to enlarge the program and go after the difficult task of finishing our Interstate System and to start rebuilding the largest public works project in the history of the world—not to restructure the program and send it into disarray.

During the conference committee consideration of this bill, of which I have asked to be a member, it is my hope that we can be reasonable and put the system back together with the help of the House Members.

Mr. President, if we are to undertake this ambitious highway renovation project, we must raise revenue in a manner that is fair to all taxpayers. The 5-cent increase in the fuel tax has turned out to be acceptable to almost everyone who is affected by this legislative endeavor. As a user fee, this tax

is imposed directly on those driving on the highway. However, this is only one aspect of the revenue-raising measure.

Many of the other tax provisions as approved by the House are unacceptable to me because of the hardship that may be imposed on the trucking industry. The heavy vehicle road tax would be increased eightfold under the House plan. In the short run I am convinced that a tremendous increase like that would cause a great hardship on truckers.

Taxes on the rubber used for large truck tires would almost triple while reducing the tax on smaller highway tires, inner tubes, and nonhighway tires.

Another concern of mine is the House provision to delete the excise tax on truck parts while raising the taxes on new trucks and trailers. We need to encourage capital investment, and higher taxes will create a disincentive for purchasing new truck equipment.

The preferred tax treatment of gasohol and other alcohol fuels is not preserved by the House, either. If this new fuel innovation is to survive its entrance into the marketplace, its taxexempt status should be maintained.

The Senate, on the other hand, has taken steps to lessen the severity of the tax imposition on the trucking industry. I recognize the importance of this industry to the whole Nation, especially to rural areas that are not served adequately by other modes of transportation. Many truckers are small businessmen who can be adversely affected and even forced out of business because of excessive taxation.

Highway users and legislators both realize that our highway network is in need of repair and upgrading. Thus, we are faced with the obligation of raising revenue fairly.

The Finance Committee adopted more reasonable heavy vehicle road taxes and phases them in over a time period rather than imposing them abruptly. That action alone should lessen the burden on trucking businesses. In addition, tire rubber excise taxes will be graduated so that all tires pay the same tax for the same weight, and heavier tires have a higher tax imposed.

To make up for some of the revenue loss due to the lowering of the road use tax from the House level, the tax on truck parts would be retained. To the extent the highway trust fund must remain solvent, that revenue tradeoff appears to be fair.

I am pleased by the action of both Houses in regard to the treatment of farm vehicles and equipment and trucks used less than 5,000 miles annually. The exception extended to State and local government is also worthy of promotion. These tax increases would otherwise impose tremendous hardship on owners of occasional-use vehi-

cles, and I will support all efforts to provide exemptions to them.

As a Senator from a rural State, I realize the importance of an adequate highway system. Without one, the flow of resources, goods, and services would be constricted.

Many areas of the country are not served extensively by other modes of transportation, such as water and rail. Citizens in those areas are heavily reliant on truck service will experience higher prices or reductions in service or both if the tax increases proposed by the Congress are not implemented fairly.

I look forward to working closely with my colleagues in achieving equity while making our road network stronger, more efficient and safer.

# INCREASE AUTHORIZATION LEVEL FOR THE LOW-INCOME ASSISTANCE PROGRAM

• Mr. HEINZ. Mr. President, I am indeed pleased to cosponsor amendment to increase the authorization level for the low-income energy assistance program to \$2.5 billion annually. I commend Senators Danforth and Eagleton for introducing this amendment at the present time. This increase in the authorization level would permit a 33-percent increase in funding for LIEAP. Natural gas consumers throughout the country are facing increases in gas costs of between 20 and 60 percent this winter. A 33-percent increase would maintain the current level of energy assistance in the face of sharply higher fuel prices this winter. Considering the projections for increasing heating costs—especially for natural gas, it is essential to increase this assistance.

The Special Committee on Aging, which I chair, has a long history of concern regarding the impact of rising energy costs on the budgets of older Americans. Last year, our committee held two hearings to examine, first hand, the burden of high fuel prices and the severe winter on older persons. Those hearings clearly demonstrated that many of our senior citizens are being forced to decide between heating and eating.

We know that the elderly poor must pay an average of one-third of their incomes on home fuel, and as much as half of their incomes in the Northern States like my own State of Pennsylvania. In contrast, the average American household spends less than one-tenth of its income on fuel. So millions of families headed by older persons must face the impossible decision between food and fuel. For them the fear of each month's utility bill is often greater than the fear of crime or concern for one's health.

We know that high fuel prices have been an incentive for conservation among many Americans, but for the elderly poor, cutting back on fuel consumption too often means shutting off rooms, using the oven for heat, or, when all else fails, falling victim to fatal hypothermia.

It was not supposed to be this way. When Congress grappled with the problem of energy shortages and dependence on foreign oil, and took up the issue of decontrol, we all acknowledged the overriding Federal responsibility to the elderly poor and the most vulnerable in our society, who could not pay the price for our national energy problems. We enacted the windfall profits tax and we specifically proclaimed that a substantial amount of it be used to help fund low-income energy assistance. The logic of that action was clear and—in my judg-ment—compelling. With that declaration, Congress said that the benefits of decontrol would be shared with those who suffer from decontrol.

Mr. President, we know that there is a widening gap between the resources of Federal low-income energy assistance and the size of our needy population. The cost of energy continues to rise faster than the Consumer Price Index. According to the Energy Information Administration at the Department of Energy, energy bills rose \$1.6 billion during fiscal year 1981-82 for the 16.5 million low-income households eligible for LIEAP assistance. This figure represents all but \$0.25 billion of the entire program funding level. Additionally a national community action survey found that 14 out of 25 States surveyed had to lower their benefits due to reductions in funding. In the face of another severe winter, our actions today are even more essential.

Mr. President, I strongly support the commitment we in Congress made by enacting the low-income energy assistance program. Rapidly escalating energy costs will continue to pose a grim dilemma for the elderly poor. Cases where older Americans have died rather than turn on the heat in the winter will continue to serve as a stark reminder to all of us about the necessity of such a program. I urge my colleagues to vote for this amendment.

#### **EMISSIONS TRADING**

Mr. BAKER. Mr. President, environmental issues are among the most complex and controversial that we face in this Congress. They ae often portrayed as either right or wrong, black or white. Parties on opposite sides of the issues become ploarized and debate becomes stilted, subjective and high emotional. Some even say our environmental statues are stagnating. I believe it is time for us to get back to honorable debate and constructive dialog based on the merits of

the issues. We must seek new and creative approaches t maintaining the forward mementum and enhancing the environmental progress this country has experience over the past decade.

In this context, I would like to call to the attention of my colleagues an article written by my distinguished colleague, Senator Domenici from New Mexico. The article, "Emissions Trading: The Subtle Heresy," outlines the innovative approach to controlling air pollutant emissions that we must begin in order to avoid stagnation of environmental statutes. The article is from the December issue of the Environmental Forum, a new publication which provides features and analyses among interested parties representing all sides of environmental issues. I ask unanimous consent that Senator Do-MENICI'S ARTICLE BE PRINTED IN THE RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

Emissions Trading: The Subtle Heresy (By Senator Pete V. Domenici)

[Graphs that may be mentioned in text are not reproduced in the RECORD.]

Discussions of air pollution control, already arcane, have recently had a fresh dosage of new jargon injected into them.

Into the alphabet soup of SIPs, LAER, NSPS, and BACT has been added the terminology of emissions trading with its component parts of ERCs, bubbles, netting, offset, and banks. Proponents of the doctrine of emissions trading insist that it only adds flexibility to the Clean Air Act by allowing industries to meet existing regulations at less cost. This flexibility argument has a certain surface appeal. But as an active participant in the debate on amendments to the Clean Air Act, it is clear to me that emissions trading has triggered an emotional response that is usually reserved for religious heresies. To understand why some-thing which at first glance appears so inoffensive has triggered so much emotion, let's take a short digression into the history of the Clean Air Act.

The Clean Air Act Amendments of 1970 were a potent blend of environmental evanglelism and legal blitzkrieg. At the core of the 1970 Amendments was the conviction that ending the health menace posed by air pollution required such a mobilization of national will and resources that questions of cost and feasibility were irrelevant. This sentiment was summed up with stark simplicity in the 1970 Senate report: "Therefore, the Committee determined that existing sources of pollutants either should meet the standard of the law or be closed down

The legal structure of the amendments involved a combination of ambient standards set at levels to protect the public health and welfare, deadlines for achieving these standards, and civil and criminal penalties for any who faltered along the way. The sense of urgency of the authors of the 1970 amendments is reflected in the 1975 deadline for compliance by all polluters—clearly an optimistic and unrealistic time frame in hindsight.

Embedded within this structure is a theory of pollution abatement labeled by students of such things as "command-and-control." This approach involves setting uniform numercial limits on emissions from every point within a facility or an industry.

From the outset, the "command-and-control" theory has had its critics, particularly among economists. These critics point to the wide disparity in pollution control costs among sources that produce the same air pollutant.

A real-life example from St. Louis pinpoints the problem. The Government Accounting Office found it would cost \$600 a ton to control particulate matter from a particular brewery boiler in St. Louis. In contrast, it would cost a mere \$4 a ton to control particulates from a nearby paper products boiler. Under a typical commandand-control regulation, it would cost \$30,200 to reduce particulate by 100 tons in St. Louis if each source had to reduce its emissions by 50 tons (600 x 50 plus \$4 x 50).

Economists see such a result as insane since 100 tons could be controlled at the paper boiler for \$400. The \$29,800 difference between the two clean-up costs economists properly consider to be pure waste.

Given the continuing inability of command-and-control theory to address that problem, economists frequently prefer an alternative, using market incentives. They argue that private companies are basically economic creatures which respond best to the pleasure and pain of profits and losses. Rather than attempting to bludgeon them with the weaponry of the legal system, what is needed is an alternative that uses market incentives and disincentives to induce private polluters to clean up.

During the 1970s, the preferred alternative of the economists was emission fees. Fees had the theoretical advantage of solving the waste problem by insuring that the cheapest pollution control options would be adopted first.

Fees had only one problem: they had no political support. Supporters of the Clean Air Act saw them as an unworkable concoction of academia that would only derail the strict timetable for cleaning up the air. Industry, which on the pullution front is mostly staffed by engineers, found the concept equally foreign. Today, despite some successes, fee advocates are still reduced to

guerrilla warfare. The intellectual stepchild of emission fees is emissions trading. While fees were in the limelight in the early 1970s, there were ongoing discussions in remote corners of academia that air pollution was an example of market failure resulting from the absence of property rights. Thus, the appropriate solution was to vast polluters with property rights in their pollution. Those rights could then be bought and sold to the advantage of both the polluting company and the environment. In the intellectual climate of the early 1970s, the idea of the villainous private sector's being given a valuable property right that resulted from its own wrongdoing had no prospect of ever being consciously adopted. The emergence of emissions trading in the 1980s is a tribute to the pragmatic, problem-solving nature of the concept rather than to the merits of its intellectual underpinnings.

Emissions trading got its chance in 1976. EPA was confronted with the dilemma of how to allow for economic growth in areas of the country where the air violated public health standards (nonattainment areas). The law appeared to preclude new growth in nonattainment areas after the 1975 deadline. EPA's solution was to allow new

sources to build or existing sources to expand in nonattainment areas if the new facility "offset" its increases in pollution by a corresponding reduction in pollution at its own or someone else's facility. Emissions trading was born. Existing polluters now had a property right they could sell to new sources or could husband for their own use at a later time.

In 1977 Congress, recognizing the situation, and ignoring the intellectual ramifications, statutorily endorsed EPA's offset policy. The offset policy required that offsets for new growth had to provide more than a one for one ratio, thus enlisting new growth on the side of environmental cleanup. Emissions trading had managed to transform the dilemma of new growth in nonattainment areas into an additional weapon in the arsenal of environmental control.

#### COMPONENTS OF EMISSIONS TRADING

Once loose, the idea of emissions trading spread rapidly. EPA fleshed out the idea in policy statements issued in 1979 and 1982. At present, emissions trading consists of the following elements:

Emissions Reduction Credits (ERCs): These are the currency of emissions trading. They are created when a company reduces its pollution below that which is legally required. EPA policy requires that ERCs be:
(a) surplus; (b) permanent; (c) enforceable; and (d) quantifiable.

Offsets: This is the legal requirement, previously mentioned, that new sources in nonattainment areas more than offset the emissions they will add. There have been more than 1,800 offsets since 1977. Most by far have been "internal" offsets within the same plant.

Bubbles: This is EPA's policy that allows existing sources to find alternative emission reductions from other sources to meet a given legal requirement. The term "bubble arises from the figurative notion that many emission points are aggregated under one umbrella or "bubble." Bubbles may take place within a plant or between plants. An often cited example is Du Pont's Chambers Works facility in New Jersey. Du Pont faced the prospect of having to control over hundreds of vents and valves in a standard case of command-and-control overkill. Under the bubble policy, Du Pont substituted 99 percent control of seven major stacks. The "bubbling" resulted in faster compliance, 2,300 tons less pollution, \$12 million in capital savings, and \$2 million a year in savings on operation and maintenance costs. Approximately 18 bubbles have been approved and another 100 or so under study.

Netting: In nonattainment areas, a source used to be defined as either a plant or a piece of equipment within a plant ("dual" definition). EPA recently eliminated the dual definition so that the plant-wide definition of source applies in both nonattainment and prevention of significant deterioration areas. The significance of this regulatory mumbo-jumbo is that a plant in a nonattainment area may expand but avoid new source review by reducing emissions at other parts of the plant below certain threshold levels. The expansion must meet new source performance standards (NSPS) but could avoid the additional technological controls of lowest achievable emission rate (LAER) and best available control technology (BACT) that are imposed on top of NSPS as part of the new source review. The environmentalist attack on netting met with initial success when the D.C. Circuit Court of

Appeals ruled netting illegal (See The Environmental Forum, November 1982, p. 40).

Banking. Banks are where ERCs can be deposited for future use. The importance of banks in establishing an active market in emissions trading cannot be underestimated. At present, much of emissions trading is analogous to trying to obtain a \$5,000 home improvement loan by canvassing your neighborhood rather than going to local bank. Studies on the offset policy all cite the high level of frustration (transaction costs) experienced by new sources in searching for offsets. GAO in its study on emissions trading found that the absence of banks stymied potential offsets because the needs of the buyer and seller often did not match up. In one case, cited by GAO, a buyer of offsets did not need all of the offsets that the seller wanted to provide. The seller refused to go through with the deal because there was not place to bank the surplus emission reductions resulting from operation of the pollution control equipment. Instead, the seller decided to hoard its emissions for future use. This short example not only highlights the need for banks in creating an active, fluid market for ERCs, but also pinpoints how banks, by providing a depository for ERCs, can improve the environ-

So far, three formal banks are in operation—in Louisville, San Francisco, Puget Sound. Seventeen states and localities have incorporated elements of banking into their Air Act state implementation plans. Louisville's bank provides an example of the creativity possible under emissions trading but precluded under existing command-andcontrol regulations. The General Electric Company in Louisville had an old process line that was scheduled to be retired when a new process line became operational. How-ever, in the interim, G.E. faced the decision of whether to spend \$1.5 million on pollution control equipment to retrofit or shut down the old line prematurely. G.E. solved its problem by leasing credits which had been banked by International Harvester for use during this interim period. This leasing arrangement cost only \$60,000 in contrast to the \$1.5 million that retrofitting would have cost.

#### VIRTUES (PROBLEM SOLVING AND INNOVATION)

These points demonstrate the chameleonlike ability of emissions trading to insinuate itself into the fabric of the Clean Air Act without posing a direct threat, as emission fees did, to the law's prevailing commandand-control spirit. But the initial successes of emissions trading are attributable to more than just its adaptability. Its principal virtue is that it solves the waste problem by a subtle change in the traditional commandand-control regulatory process. Regulators writing rules under the command-and-control theory face an insoluble problem: Simple, broad rules ignore differences in control costs among the tens of thousands of sources regulated under the Act. More specific rules begin to collapse under an accumulation of detail that the regulators cannot assimilate.

Emissions trading solves this dilemma by transforming a regulation from a command to a proposal. Regulated industries then get to make a counter-proposal that saves them money and provides the same level of environmental cleanup.

This apparently subtle change of allowing industry to make a counterproposal has radical implications. Foremost among these is that it enlists the support of the only group

of people who know how various industrial processes operate: plant managers.

There is a myth that regulators, or even senior corporate management, can make informed assessments of industrial processes and costs. My tours of major industrial facilities have been enough to put this myth to rest. Making a major facility run is the result of a careful pyramiding of expertise. Neither the regulator nor senior corporate manager can ever hope to match the facili-ty-specific expertise of the plant manager. Command-and-control regulation, by de-manding compliance with the dictates of the omniscient regulator, has ignored this expertise. In contrast, emissions trading says to the plant manager, "If you don't like it, come up with something better.

Because substantial sums of money are at stake, there are incentives for both plant managers and senior management to respond to the challenge. Du Pont, in studying its hydrocarbon control costs, estimated that by using emissions trading, it could save 50 percent or \$80,000,000 on its projected cleanup costs. GAO cites savings of 40 percent to 90 percent. With the Nation's air pollution expenditures at \$26 billion a year in 1979, the potential for vast savings is ob-

The contribution of emissions trading in solving the waste problem has been widely heralded by its advocates. Less discussed is its constructive role in the related problem allowed for continued economic growth within the framework of the Clean Air Act. As stated earlier emissions trading had its origins in 1976 as a way for economic growth in nonattainment areas. Today, the of accommodating economic problem growth within the Act remains as acute as ever. Air as a repository for waste disposal is a fixed resource. Increased economic activiy serves only to place greater stress on this limited resource. Every industrialized society runs an ongoing risk of having to forgo either clean air or economic growth.

The response of the command-and-controllers to this dilemma has been twofold. First, they have included smaller and smaller sources in clean-up efforts. Second, they have begun squeezing already controlled sources again and again. Both of these responses, while providing some short-term gains, are fraught with long-term hazards.

Bringing more sources into the regulatory net heightens the prospects of a political Repeatedly backlash against the Act. squeezing the same sources sends marginal control costs on an upward geometric path. During the early 1970s, the issue of costs not seemed critical. However, since 1979 the American economy has been basically stagnant, and it is now necessary for us all to be concerned about the costs imposed on a clearly struggling private sector.

The conflict between growth and air quality is similar to the dilemma posed by Malthus: how to accommodate growth (industrial or population) on a fixed resource (air or food). In both cases, the answer is the same-technological innova-

Unfortunately, few laws pay more linguistic homage to technological advance while simultaneously scattering disincentives to technological progress throughout its provisions. The Clean Air Act is replete with requirements to make industry put on the best available control technology (BACT) or meet the lowest achievable emission rate (LAER). During debate in the Senate on the Clean Air Act during 1981, the BACT review was to be upgraded to employ the "best technology in the country" as an element of the review

Despite the rhetorical overlay, the National Commission on Air Quality, the Government Accounting Office, and outside commentators all agree on the Act's record with respect to innovation: poor. This discrepancy between rhetoric and reality has its origins in the disincentives to innovation inherent in command-and-control theory. The GAO report on emissions trading provides several case histories that can serve in place of an extended theoretical discussion.

When Standard Oil of Ohio, for example, was looking for offsets in Los Angeles, it offered to place innovative technology on a local power plant. The utility declined the offer because it feared EPA then would make the new technology the industry-wide standard. Another example occurred when the Watson Company in California proposed using new control technology. EPA, not wanting to run any regulatory risk, asked the firm to build a pilot project first. The company declined and cancelled the project.

From my own experience, I can add the case of Public Service Company of New Mexico. Back in the late 1970's, the company asked EPA for time to test its new Wellman-Lord scrubbers (with sulpur removal in the 90-95 percent range) on two units of its San Juan facility before being required to put the scrubbers on two other units. EPA turned down the idea on the basis that a small pilot facility in Indiana was successfully using the same process. The pilot facility subsequently had a fire while one of Public Service's boilers blew up (most likely because of the nitrogen oxides controls). The episode delivered an unambiguous message to the rest of the utility industry: innovate at your own risk.

Emissions trading eliminates some of the disincentives to innovation under present law. Companies are provided a financial incentive to do better than the law requires. Additional levels of pollution control can be turned into ERCs that then can be sold, or banked for future use. Just as with the waste problem, emissions trading provides those with the most information a chance to make money by doing a better job.

It is important to note, however, that emissions trading does not address industry fears that the law's technology provisions will transform a particular technological advance into an industry-wide standard.

### THE ELEMENTS OF HERESY

This partial incompatibility between the incentives for innovation under emissions trading and the technology requirements of the Act offers a clue as to why emissions trading is viewed askance by command-andcontrol advocates. Although emissions trading appears to only provide a cheaper way of getting the same environmental results as command-and-control theory, it's mere emergence as a regulatory option implies criticism of the trading way of doing things.

Although it will take more experience with emissions trading until the full dimensions of its unorthodoxy are apparent, the following heretical tendencies already have emerged:

Inefficiency of Command and Control: Emissions trading, by pinpointing important economies available using market incentives, serves as an indictment of the inefficiencies of present law. Where studies, such as those in Chicago and St. Louis, show that present regulatory programs are more expensive than necessary, it is difficult to be comfortable with blanket assertions that the Act is working well as it is.

Economics Does Count: The inefficiency issue naturally leads to the question of the appropriate role of economic considerations in the Clean Air Act, a source of more inflamed rhetoric than any other political issue. Rather than enter this thicket, I will make two points that I hope are reasonably obvious.

First, if we can purchase the same product for a lesser price, we should do so. This means that cost-effectiveness is a legitimate criterion for evaluating competing environmental clean-up strategies.

Second, we should treat environmental clean-up dollars as a scarce resource. The Nation will spend approximately \$500 billion over the next decade for environmental cleanup. This represents an annual growth in pollution control expenditures of 9.4 percent a year, or approximately 2½ times more than current projections of GNP growth (i.e., 3.5 percent) over the same period. The rate of growth between projected pollution control costs and the growth of the economy leads to the conclusion that the \$500 billion estimate represents the maximum the Nation will spend on environmental cleanup and, thus, must be spent wisely.

Although emissions trading has its origins in the concepts of cost-effectiveness and limited resources, command-and-control advocates are clearly uncomfortable with these economic concepts. Personally, I feel that a Clean Air Act consistent with economic rationality will be a stronger, not weaker, protector of the public health and welfare.

Consorting with the Enemy: The more moralistic strains of environmental thought have viewed the private sector as the enemy. Part of the rationale behind command-and-control theory is that the private sector needs to be told what to do—not just asked to do it.

Emissions trading breaks down these simple moral lines. The private sector becomes not only a repository of needed expertise, but a source of hope for innovative ideas to give the Clean Air Act new life. People cherish their villains more than their heroes, and this new view of the private sector is troubling to many.

vate sector is troubling to many.

Contra-Technology: The Clean Air Act has, with the passage of time, begun to rely increasingly on technological solutions. The 1977 amendments, by introducing RACT, BACT, LAER, and percentage reduction for coal-fired power plants, are an example of this reliance on technological fixes.

Emissions trading has no such bias. Instead, emissions trading adopts Gertrude Stein's view by declaring that "a pound of pollution is a pound of pollution is a pound of pollution."

The potential for heresy in this simple statement is large. A system of market incentives such as emissions trading treats pollution in a nondiscriminatory fashion. In contrast to command-and-control theory, regulatory strategies are not tailored to the age, size or type of facility. Instead, emissions trading asks only how much pollution needs to be controlled, and what is the cheapest way of controlling it.

The Ultimate Heresy—The New Source Bubble. The anti-technology implications of emissions trading jeopardizes one of the Clean Air Act's most sacred cannons: all new sources should have the most stringent technology placed on them.

Advocates of emissions trading have departed from this commandment and have proposed that new sources be allowed to "bubble" their emissions either against other new sources or existing sources. Because the issue of the legality of new source bubbles is in dispute, let me list several of the policy arguments in support of the new source bubble. The case for the "new source bubble" is built around the following considerations:

Existing sources emit the vast preponderance of pollution, more than 95 percent of the current nonattainment inventory. Using new sources as a wedge to clean up existing facilities would have the advantage of lessening the economic disincentives to new growth while offering a wedge to attack the problem of pollution from existing sources.

Existing studies show dramatic cost and environmental savings from new source bubbles. A study of power plants in Pennsylvania showed a reduction of 244,000 tons of pollution along with life-time savings of \$4.1 billion

New source bubbles involving new power plants in the West could be a way to finance pollution controls for western copper smelters whose precarious financial condition precludes their making new financial commitments. (Smelter cleanup varies from \$100-\$500 per ton of sulphur versus approximately \$1,600 per ton for new power plants.)

Against the new source bubble, commandand-control theorists have advanced two valid concerns. The first relates to the discrepancy in useful life between old and new plants. The following block diagram hopefully will help in discussing this problem.

The above diagram shows that new source bubbles have the potential for allowing for more pollution over time than would be allowed under current law. While legitimate, the concern is not insurmountable. New sources using the bubble cold either: (1) be required to obtain new offsets at the end of 10 years; or (2) failing to meet the first option, be required to retrofit to meet NSPS.

second concern voiced over new source bubbles is a technical one. A source meeting a new source emission limit of five units of pollution, for example, will in practice emit four units. This gap reflects the desire on the part of the source for some margin of safety in its operations. It reflects also the fact that the pollution control equipment actually performs better than the standard, which, after all, is an upper limit for all sources in the country. The issue posed by the new source bubble is this: What happens to the gap between the standard and actual performance? Is it a windfall for the environment, or can it be traded by the company? One answer would be to put a substantial discount on offsets obtained for new sources. Instead of allowing one for one trades, new sources would have to obtain from 25 to 50 percent more control, so that the ratio would be 1.25 to 1 or 1.5 to 1 on all trades. This approach would have the multiple benefits of solving the gap problem, providing added up-front environmental cleanup as part of the trade. and allowing the country to benefit from the enormous economic and environmental benefits of new source bubbles.

The preceding discussion on the new source bubble is representative rather than exhaustive. A host of technical issues surrounds the entire bubble concept, ranging from what baseline to use (actual or allowable emissions?) to the conflict of bubbles

with future impositions of reasonable available control technology on existing sources. None of these problems is insurmountable, but all must be carefully addressed if bubbles are to advance the cause of environmental quality and not become a regulatory loophole.

#### THE NEED FOR HERETICS

Emissions trading is not a panacea.

But the benefits of emissions trading in increasing efficiency, flexibility, and innovation in the Clean Air Act provide strong reasons for aggressively pursuing the experiment.

There is further reason that would require a separate article to fully address: the Clean Air Act is stagnating-politically, conceptually, and environmentally. The 1982 congressional deliberations on the Clean Air Act not only generated a political stalemate, but the participants, with isolated exceptions, spent most of their time refighting a law unequipped to meet the challenges of the 80's. This political and intellectual stalemate has been accompanied by a slowdown, beginning in the late 1970s, in the rate of environmental progress under the law. Today, 12 years after enactment of the Act, than 40-million Americans still e air officially designated as "unbreathe air officially designated as "un-healthy" for at least one pollutant. There has been no progress in cleaning up nitrogen oxides. Sulphur emissions are higher today than in 1960, the reported environmental dark ages. Futhermore, the regulatory linchpin of the Clean Air Act, the State Implementation Plans (SIPs), have become a curse to all involved.

The Clean Air Act desperately needs more heretics. It needs more debate and less political trench warfare. More attempts at pursuading Congress and fewer attempts at political intimidation through grass roots efforts.

Emissions trading has been the one bright idea that has emerged in the early 1980's. Its benefits for not only the Clean Air Act, but also other environmental statutes, are just being recognized. It is the duty of us heretics to insure that this idea has a chance to blossom. And like all politicians, I welcome any support I can get.

### EXTENSION OF TIME FOR ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that the time for routine morning business be extended until 10:45 a.m. We are still trying to clear a matter to take up before we get back on the highway bill.

Mr. METZENBAUM. Mr. President, I could not hear the Senator. Would he repeat his request?

Mr. STEVENS. I asked unanimous consent that routine morning business be extended until 10:45 a.m., and stated the reason for that is that we are still trying to clear an item that may be able to be cleared for rather speedy action before we go back to the highway bill. We want 15 more minutes to try to do that.

The PRESIDING OFFICER. Is there objection?

Mr. HUMPHREY. Mr. President, reserving the right to object, the Senator from New Hampshire has been anxious for some time to offer an amendment to the gasoline tax bill.

For one reason or another, as with other Senators, he has been continuously thwarted in his attempt to offer the amendment.

Mr. STEVENS. Will the Senator vield?

Mr. HUMPHREY. Of course.

Mr. STEVENS. I will say to the Senator that when we return to the highway gas tax bill, it is my understand-

Mr. CHAFEE. Mr. President, will the acting majority leader use his

microphone?

Mr. STEVENS. It is my understanding that the amendment of the Senator from Ohio is pending and it would not be possible for the Senator from New Hampshire to offer an amendment until that amendment is disposed of

Mr. HUMPHREY. My point is this: Can we have some assurance that there will not be a further delay

beyond that request?

Mr. STEVENS. I will state to the Senator that it was a request from the majority leader that if it is possible to clear this payment in kind bill, and it looks as if it still may be possible, that we try to get consent to do that, at the request of Senator Cochran and others, in order that it could be on its way to the other body.

If we could get that, that might be a request that I would have to make, to delay proceeding to the highway bill. Other than that, there would be no

other delay

Mr. HUMPHREY. I wonder if the Senator from Alaska can include in his request that upon disposition of the amendment of the Senator from Ohio, the Senator from New Hampshire will be recognized for the purpose of offering an amendment to the gas tax bill.
The PRESIDING OFFICER. The

amendment of the Senator from Ohio is a first-degree amendment and is subject to an amendment in the

second degree.

Mr. STEVENS. That is my understanding. It is also my understanding that the amendment the Senator from New Hampshire has is also a firstdegree amendment. The Senator will correct me if I am wrong.

Mr. HUMPHREY. That is correct.

Mr. STEVENS. Would the Senator permit me to request that he delay that request for unanimous consent until the managers of the highway bill arrive? I think that would be really something we should confer with them on. I would have no objection to the Senator's request that he be recognized to offer his amendment upon the disposition of the amendment of the Senator from Ohio. I think that that is a reasonable request in view of the fact that he has been waiting for recognition. But I would like to check that with the managers of the bill if he will permit me to do so.

Mr. HUMPHREY. Very well.

renew my request that the period for the transaction of routine morning business be extended until 10:45.

The PRESIDING OFFICER. there objection? Without objection, it

is so ordered.

#### CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. The time for morning business has expired. The Senator from Alaska is recog-

#### UNANIMOUS-CONSENT AGREEMENT-S. 3103

Mr. STEVENS. Mr. President, I send to the desk a bill and ask unanimous consent that it be given immediate consideration.

Mr. METZENBAUM. Reserving the right to object, will the acting majority leader be good enough to advise

what the bill is?

Mr. STEVENS. This bill is a bill dealing with the Office of Personnel Management in terms of the executive exchange. I believe it has been discussed with the Senator from Ohio. I understand he has one question.

It deals with a problem that has been discovered in that the funds that are donated to the Government to carry out an executive exchange program are going into the Treasury and have not been made available to carry out the purposes of the exchange.

There has been an agreement that the funds that are donated will be used for purposes of the executive exchange. This bill would authorize a deposit fund for funds contributed by the private sector for the operation of the executive exchange and would authorize the use of those funds that are donated to the Government from the fund. It does not involve Federal money. It involves the deposit of gifts into the fund and the use of those gifts for the purpose for which they were received.

Mr. METZENBAUM. Will the acting majority leader be good enough to advise, is there some impact upon the Federal Treasury by reason of the participation fees being contributed by the business sector, and, if so, does he

know the amount?

Mr. STEVENS. No. It is an amount somewhere around \$6,000 per participant, I understand. But in March of this year it was discovered that the authorizing legislation had not permitted the practice that was going on for years, and that is receiving the funds as gifts and paying them out for the use of the exchange. And so they suspended the use of the funds that had been received by the Government as gifts and requested our subcommittee to look into the matter to see if we could work out the basic authorization

Mr. STEVENS. Mr. President, I to give the Commission on Executive Exchange the right to collect these fees from participants and to go ahead with it.

> This is the only item, I might say, that was on the consent calendar that we were able to clear for today, and that is the reason I am proceeding with it now. This item was cleared for consideration on a consent basis.

> Mr. METZENBAUM. Does the unanimous-consent request of the acting majority leader include the fact that there will be no amendments to this particular measure and that it will be disposed of in a very short period of

> Mr. STEVENS. It is the request that it be considered on a consent basis and it would not be considered in any other way, with no amendment.

> I might say it does authorize later appropriations if they are made for the executive exchange to go into this fund and be used out of the funds. But there are no funds authorized in this. This is merely an authorization bill to make up for a deficiency in the original bill that created this Commission on executive exchange and, as I said, which come out of the subcommittee primarily that I chair on Governmental Affairs for the purpose of correcting this error in existing law.

Mr. METZENBAUM. I have no ob-

jection.

I yield to the minority leader.

Mr. ROBERT C. BYRD. Who has the floor?

Mr. STEVENS. I have the floor.

I yield it to my good friend, the Senator from Ohio, and he has reserved the right to object to my request that the bill be given immediate consideration on a consent basis.

Mr. ROBERT C. BYRD. Mr. President, I point out to the Senator that unless it is tied into the request that no amendments be in order amendments could be offered, even though it may have been cleared for passage by unanimous consent.

Mr. METZENBAUM. Mr. President, I ask the acting majority leader to do two matters if he may; that is, to so provide that it would not be subject to amendment and, second, that in obtaining the request that in no manner would this affect my right to the floor when we return to the consideration of the highway bill.

Mr. STEVENS. I am happy to accede to that request.

Again, I am just performing a function of the acting majority leader. It just happens to be a bill of mine that has been cleared.

I do make the request that we have unanimous consent that the bill be given consideration, that it be considered by the Senate without amendment, and that when it is disposed of the amendment of the Senator from Ohio will again be the pending business and his rights not be affected in office administration of the Commisany way by the consideration of this sion. This funding does not include unanimous-consent item.

The PRESIDING OFFICER. Is

there objection?

Mr. HUMPHREY. Mr. President, reserving the right to object, and I shall not object, I take it this is in addition to the matter relating to the Agriculture Committee and the Senator from New Hampshire wishes some idea as to when we are going to get into the gasoline tax since he came over here early in good faith and belief that he would have an opportunity to offer his amendment. By the time we get to that amendment the floor is going to be loaded with Senators seeking recognition.

Mr. STEVENS. I am aware of that. I again say to the Senator that if we had a routine call of the calendar my good friend from West Virginia, the Democratic leader, and I would have proceeded through it, but this is the only item on the calendar and there is no intent to delay. I do ask that this one item that we can dispose of be disposed and it is the intent that when that is done there is no other business. We are on the pending business subject to this unanimous-consent request. There will be no further delays.

The PRESIDING OFFICER. Without objection, it is so ordered.

## COMMISSION ON EXECUTIVE EXCHANGE FEE AUTHORIZATION

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3103) to amend section 1304(e) of Title 5, United States Code.

There being no objection, the Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, pursuant to Executive Order 12136, the Office of Personnel Management (OPM) is required to provide administrative and other services to the President's Commission on Executive Exchange (PCEE). For this purpose, the OPM receives appropriated funds from Congress on behalf of the PCEE which are included in a line item entitled "Other Programs" in its "Salaries and Expenses" appropriation account. Additionally, Executive Order 12136 mandates that the PCEE "shall develop an education program which places the work experience of the Exchange Executive in the broader context of both the Federal Government and the private sector." Accordingly, the OPM accepts training fees from participating Federal agencies as reimbursement for the PCEE's education program for Federal sector executives and expends these via a revolving fund at the request of the PCEE.

At present, Congress appropriates funds for the salaries, travel, and office administration of the Commission. This funding does not include moneys for the education of private sector participants. There is doubt that appropriated funds may be properly expended for such educational activities, because although these activities serve an important public need, they have a specific and unique benefit to the Exchange Executives and their private sector sponsors.

Historically, the PCEE has relied upon other Federal agencies to accept and expend private sector education fees on its behalf. This practice has been necessary because the PCEE does not have its own authority to collect fees. Since 1975, the Department of the Treasury has received these funds and maintained them in a deposit fund to be disbursed upon appropriate authorization from the Commission. In September 1981, the PCEE adopted amendments to the charter which governs expenditures from the deposit fund maintained at the Department of the Treasury. At approximately the same time, the Executive Director of the Commission sought clarification of the Department's authority to receive gifts and/or donations other than education fees. In response to this request, the Department reexamined statutes and regulations applicable to deposit funds and determined that while it has authority to receive and deposit gifts, it lacked authority to expend these funds for earmarked purposes. The practical effect of this finding was to negate the rationale for the existing relationship between the PCEE and the Department of the Treasury.

Accordingly, the PCEE suspended use of the Treasury deposit fund on March 16 of this year. The legislation I am introducing, today, remedies the problem by specially authorizing the President's Commission on Executive Exchange to collect participation fees from private sector firms whose executives are in the exchange program, and to credit the fees collected to the Office of Personnel Management revolving fund.

The bill would also authorize expenditure of these resoures for educational programs, including honoraria, and related travel; as well as for entertainment-facilities rentals, dinners and receptions-in amounts specified in annual appropriations acts; and for promotional activities. In addition, because of its need for promotional brochures in colors and paper not available through the Government Printing Office, the bill would permit use of non-Government facilities for promotional printing. Finally, the bill's authorization terminates on December 31, 1983,

Mr. President, I ask for passage of the bill.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 3103) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 3103

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, (a) That section 1304(e)(1) of title 5, United States Code is amended by inserting "(i)" after "(1)", and by adding a new paragraph as follows:

"(ii) Participation fees, which the President's Commission on Executive Exchange may impose for private sector participation in its Executive Exchange Program shall be collected and credited to the fund, and shall be available for the costs of education and related travel of exchanged executives; for printing without regard to section 501 of title 44, United States Code; and, in such amounts as may be specified in appropriations acts, for entertainment expenses."

(b) The authority granted in subsection (a) shall terminate on December 31, 1983.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

#### ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I think it would be in order to consider the request of the Senator from New Hampshire that he be given recognition after the disposal of the Metzenbaum amendment.

I do understand that the Senators from New Jersey have an amendment which will be agreed to, and they are going to ask the Senator from Ohio to set his amendment aside temporarily to take that up.

Mr. METZENBAUM. Mr. President, what is the pending order of business? Is the Senator from Ohio recognized at this point and are we on the highway bill?

#### SURFACE TRANSPORTATION ACT OF 1982

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 6211) to authorize appropriations for construction of certain highways in accordance with title 23, United States Code, for highway safety, for mass transportation in urban and rural areas, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. Under the previous order the Senator from Ohio is recognized to speak on this matter. Mr. BRADY. Mr. President, I wonder if the Senator from Ohio will yield for the purpose of offering an amendment on behalf of myself and Senator BRADLEY. It is an entirely noncontroversial amendment which we wish to send to the desk.

Mr. METZENBAUM. Mr. President, the Senator from Ohio will not yield under those circumstances. The Senator from Ohio will ask unanimous consent that I be permitted to yield for a period not in excess of 5 minutes for the offering of an amendment by the Senator from New Jersey, that the time in connection therewith be controlled by the two Senators from New Jersey, that the amendment not be subject to amendments, and that it be understood and by unanimous consent that there not be a rollcall in connection with this matter.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, the Senator cannot guarantee that.

Mr. METZENBAUM. Then I with-

draw that portion of it.

That the Senator from Ohio not lose his right to the floor after the disposition of the Brady-Bradley amendment and that all other rights the Senator from Ohio has be recognized and that the two-speech rule not be affected in any manner by reason of my yielding to the two Senators from New Jersey.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio?

Mr. HEINZ. Mr. President, reserving

the right to object.

Mr. STAFFORD. Mr. President, reserving the right to object, and I shall not object, I wonder if the distinguished Senator from Ohio would expand his unanimous-consent request to include a couple minutes for the Senator from Vermont, who is the majority floor manager for this part of the bill?

Mr. METZENBAUM. I always enjoy hearing the Senator from Vermont. I am certainly happy to accede to that request.

Mr. STAFFORD. I thank the Senator.

Mr. HEINZ. Mr. President, reserving the right to object, and I do not intend to object, let me ask the Senator from New Jersey what the amendment is about.

Mr. BRADY. The amendment involves dedesignation of section I-95 and replacing it with the section of the New Jersey Turnpike. It does not cost the Treasury any more money and will allow our State to utilize these construction funds on desperately needed infrastructure repair and maintenance.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Ohio?

Without objection, it is so ordered. The Senator from New Jersey is rec-

ognized.

UP AMENDMENT NO. 1447

(Purpose: To dedesignate certain routes as Interstate Routes 95 and 695 and to designate certain highways as Interstate 95)

Mr. BRADY. Mr. President, I send an amendment to the desk on behalf of myself and Senator Bradley and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from New Jersey (Mr. Brady) for himself and Mr. Bradley proposes an unprinted amendment numbered 1447.

Mr. BRADY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill add the following new section:

SEC. 138. (a) Notwithstanding the first sentence of section 103(e)(4) of title 23, United States Code, the Secretary of Transportation shall approve the withdrawal from the Interstate System the route of Interstate Route 95 and Interstate Route 695 from the intersection with Interstate Route 295 in Hopewell Township, Mercer County, New Jersey, to the proposed intersection with Interstate Route 287 in Franklin Township, Somerset County, New Jersey.

(b) Notwithstanding any other provision of law, the Secretary of Transportation is authorized and directed, pursuant to section 103 of such title, to designate as part of the Interstate Highway System the New Jersey Turnpike from Exit 10 to the interchange with the Pennsylvania Turnpike and the Pennsylvania Turnpike from such interchange to and including the proposed interchange with Interstate Route 95 in Bucks County, Pennsylvania.

(c) The Secretary of Transportation is further authorized and directed to designate the highways described in subsection (b) as Interstate Route 95 and assure through proper sign designations the orderly connection of Interstate Route 95 pursuant to this section.

Mr. BRADY. Mr. President, the amendment I am offering today with my good friend and colleague, Senator Bradley, concerns Interstate Route 95 which runs from Maine to Florida. There is a proposed segment of this route in New Jersey that for the last 20 years has remained tied up in a legal morass with threatened lawsuits on both sides of the issue. New Jersey's position is that the New Jersey Turnpike provides the necessary link for the purposes of Interstate Route 95 and that proceeding with construction of the planned segment would be redundant.

The amendment we suggest would simultaneously designate the planned segment of Interstate Route 95/695 between Hopewell and Franklin, N.J., and designate a portion of the New Jersey Turnpike as Interstate Route 95. This action is not without prece-

dent, meets with requirements of the surface Transportation Act, and has the strong support of the Administration of Gov. Thomas Kean of New Jersey. Both of the metropolitan planning organizations having jurisdiction in these areas are in concurrence.

I would like to emphasize to my colleagues that this amendment does not alter the allocation formulas of the interstate highway program. The funds that would have been used for construction would be made available for desperately needed infrastructure maintenance and rehabilitation projects on existing roads and transportation services. Additionally, this amendment would assist in moving the interstate system nearer its goal of completion by 1986.

For over 2 years, the State has been requesting that this action be accomplished through administrative means. However, after thorough review, the Department of Transportation concluded that under existing law they had no authority to act on the State's request. It was suggested that an amendment such as the one offered by myself and Senator BRADLEY be offered to achieve our goal. The U.S. Department of Transportation is not opposed to this amendment, and I would hope that the chairman of the Environment and Public Works Committee, Senator Stafford, will see fit to accept our amendment.

Mr. BRADLEY. Mr. President, I rise in support of the pending amendment to dedesignate a segment of Interstate Routes 95 and 695 in Mercer and Somerset Counties, N.J. Under this amendment, this particular route will be withdrawn from the Interstate Highway System, a portion of the New Jersey Turnpike will be designated as part of the Interstate Highway System, and New Jersey will be able to use funds from the interstate transfer program for other transportation purposes.

I have neither supported nor opposed the completion of I-95. What has been made clear by Governor Kean and Governor Byrne before him is that I-95 will not be built. In the face of that policy, New Jersey has no choice but to recapture the funds for other important projects or to lose the money altogether.

For almost a year now the State of New Jersey has been pressing the Federal Highway Administration and the U.S. Department of Transportation to approve New Jersey's request for dedesignation. The State favors dedesignation, believing that the transportation needs of this region of the State would best be served by using Federal and State funds for other highway needs, rather than building the interstate facility. In addition, the State favored dedesignation because of the serious doubts as to whether the roadway

could ever meet existing Federal deadlines, due to the various legal obstacles.

I offer this amendment today because I believe that this legislative dedesignation procedure is necessary to assure that New Jersey will have the Federal funds from the interstate transfer program available for the many other pressing highway needs in the State. These include the dualization of Route 206 north of Princeton to the Somerville Circle, the construction of Route 92 near Princeton. repair and intersection work on Route 1, and general improvement work on Route 31, Route 129, and other projects in the region. At a time when the Federal Government is cutting back on its aid to States and cities. and, at a time when many States, including my own, are suffering from serious budgetary problems, we must do all we can to insure that the States and local governments can participate in Federal programs which provide funding for urgent local matters. I believe that dedesignation will both serve the transportation needs of the State and provide needed jobs when work proceeds with the many other highway projects now pending in the State. I thank my colleagues for considering this important amendment and hope there will be no delay in the enactment of this measure.

I simply wish to reemphasize the point that this adds no money to the bill and I make the observation that perhaps the unanimous-consent request took longer than the amendment.

Mr. STAFFORD. Mr. President, I am familiar with the amendment offered by the two Senators from New Jersey.

I do understand it will not add in any way to the cost of the pending highway portion of the so-called tax highway bill, and I am prepared to accept it for the majority, and I am advised by staff for the minority that they also are prepared to accept the amendment.

The PRESIDING OFFICER. Are there any further remarks?

Mr. BRADY. Mr. President, there are no further remarks. I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Jersey.

The amendment (UP No. 1447) was agreed to.

Mr. BRADY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. BRADLEY. Mr President, I move to lay that motion on the table. The motion to lay on the table was

agreed to.

Mr. BRADLEY. I thank the Senator from Ohio.

AMENDMENT NO. 5008 (FORMERLY UP AMENDMENT NO. 1446)

The PRESIDING OFFICER. The question recurs on the amendment of the Senator from Ohio.

Mr. METZENBAUM. Mr. President, this is a very simple amendment. In that sense, it is the Buy American amendment to insure that all Federal highway and bridge repair and construction work be done with American steel and by American workers, and before I conclude my remarks, at the conclusion, I will move to modify to include cement, that it be American made as well.

I want to point out of my friends in the Senate that the House has already adopted a similar amendment.

This is a strong but necessary measure, and I am aware of the fact that there are those who consider themselves free traders, and I list myself in that category, who find this kind of an approach objectionable.

But when we are adding or attempting to add a nickel a gallon to the price of gasoline, when we are attempting to increase the cost of truckers' fees, what could be more right or more appropriate than that the jobs that will be created by reason of those additional funds will be jobs held by American workers?

Unemployment today hovers around 10.8 percent. More than 12 million workers are currently without jobs, and the domestic steel industry is in a shambles. It is operating at 33 percent capacity, with specialty steel operating at an even lower level. Over 160,000 American steelworkers are on layoff status; another 50,000 are on short work weeks. Daily these numbers continue to grow, and within the last several days, to give you some example of that, I have been getting additional calls from Youngstown that Jones and Laughlin is now talking about closing down its last operation in that community. I hope it does not because those jobs are so vital to those employees in that community and those dollars are so important to the community as a whole.

How can we possibly justify going overseas to buy steel for highways and bridges that are being paid for with an extra nickel a gallon of the American taxpayer? What logic is there in that?

It is a well-accepted fact that the highest White House sources are now saying that this jobs bill will produce 300,000 jobs and, at the same time, will cost 300,000 jobs.

What concerns the Senator from Ohio is that part of the 300,000 jobs that will be produced will not be in the United States of America, that they will be in some foreign country, but the 300,000 jobs that will be lost, you may be certain, will be in America, will be in our country.

Under the Federal highway bill approximately \$11 billion will go into

bridge and highway repairs. According to the Steelworkers Union for every \$500,000 spent on a public works project 193 tons of steel are used, and for every million tons of steel used 5,000 direct steel jobs are created.

The issue with respect to this amendment is, who is going to benefit from these jobs, who is going to get them? I know the argument: "Well, if we start to restrict foreign imports coming into this country they will be restricting foreign exports coming from our country to the other nations."

But that is not what this bill is about. This is a bill to add a nickel a gallon tax to do something about the infrastructure of our roads, highways and bridges. It is not a question of saying somebody cannot sell their products here. It is a question of, with a positive emphasis, that we will use American-made products, we will use American-made steel, and we will use American-made cement.

We can ill afford in these difficult economic times to let any of these jobs go overseas. There is no question but that imports are a major contributing factor to the catastrophic conditions that exist in the steel industry today. Our foreign trading partners have not played fair. We continue to open our ports to them and, in return, they close theirs to American goods and services.

Foreign nations restrict U.S. goods through a variety of means: Quotas, domestic taxes, superfluous and cumbersome safety and testing requirements.

This year we are running a \$30 billion trade deficit. Next year that deficit could be as high as \$70 billion. Are we here in the U.S. Senate going to sit by idly and let the American economy be destroyed, let the American steel industry go down the tube while we say we cannot abandon the heretofore supported concepts of free trade?

In basic or carbon steel, imports account for nearly 25 percent of the domestic supply; over 45 percent of the domestic steel, specialty steel, market is being displaced by foreign imports. That is outrageous.

Stanley Modic, editor of Industry Week, noted in a June 14, 1982, editorial:

America sits as the largest, most open market all but inviting other nations to flood it. The developed and undeveloped alike are building their economies and solving their unemployment at the expense of the U.S. economy. The bottom line is jobs.

This is from Mr. Modic, editor of Industry Week. He is exactly right, the bottom line is jobs.

Today hundreds of thousands of Americans stand in unemployment lines because of trade policies that are not working in the interests of the people of this country.

My amendment is limited in scope. It would only apply a "Buy American" provision for the steel and cement used to repair our bridges and highways and to construct those bridges and highways. It does not include a "Buy American" provision for the purchase of rolling stock. I must say that while I would prefer that we buy only U.S.-manufactured subway cars, I am informed that U.S. production may not be sufficient at this time to warrant the total positive emphasis on American production. But there is no question that there is plenty of domestic steel available to repair the Nation's highways and bridges and, Mr. President, we owe it to ourselves to insure that every penny collected through this new tax goes toward creating jobs for our own people.

A "Buy American" clause was included in the House version of the highway jobs bills, and I hope the Senate will do the same.

Mr. President, I send to the desk a modifying amendment on behalf of myself, Senator Rober C. Byrd, of West Virginia; Senator Riegle; Senator Huddleston; Senator Sasser; and Senator Levin.

The PRESIDING OFFICER (Mr. Durenberger). The Senator has the right to modify his amendment.

Mr. METZENBAUM. I am sorry I did not hear the Chair.

The PRESIDING OFFICER. The Senator does have the right to modify his amendment.

Mr. METZENBAUM. Mr. President, I anticipate speaking further on this subject if necessary or I will be prepared to vote whenever those who are on the opposite side of the aisle indicate their willingness to go forward.

Mr. SPECTER. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SPECTER. Is an amendment in the second degree appropriate at this time?

The PRESIDING OFFICER. The Senator is correct, it is appropriate.

Mr. SPECTER. Mr. President, I send to the desk an amendment in the second degree and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

Mr. CHAFEE. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Rhode Island will state it.

Mr. CHAFEE. We never learned what the amendment was that was being amended. What was the modification the Senator from Ohio sent to the desk?

AMENDMENT 5008, AS MODIFIED

(Purpose: To provide that only steel, cement, and other products manufactured in the United States are used in the construction of highways)

The PRESIDING OFFICER. The Senator has the right to modify his amendment and the clerk can report the amendment.

Mr. CHAFEE. Mr. President, I ask that the amendment be reported.

The PRESIDING OFFICER. The modification to the amendment will be reported.

The legislative clerk read as follows:
The Senator from Ohio (Mr. Metzenbaum), for himself, Mr. Robert C. Byrd, Mr. Riegle, Mr. Huddleston, Mr. Sasser, and Mr. Levin, proposes a modification to printed amendment numbered 5008.

In lieu of the language proposed to be inserted, insert the following:

#### BUY AMERICA

SEC. . (a) Chapter 3 of title 23, United States Code, is amended by adding after section 324 the following new section:

"§ 325. Buy America.

"Notwithstanding any other provision of this title or any other law, none of the funds authorized to be appropriated for highway and bridge construction and repair may be obligated or expended on any project in which steel or cement, manufactured outside the United States are used."

(b) The analysis of chapter 3 of such title is amended by adding at the end thereof the following:

"325. Buy America.".

#### UP AMENDMENT NO. 1448

(Purpose: To provide American industry with greater access to the courts in antidumping and countervailing duty cases)

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Pennsylvania.

The legislative clerk read as follows: The Senator from Pennsylvania (Mr. SPECTER) proposes an unprinted amendment numbered 1448.

Mr. SPECTER. Mr. President, I ask unanimous consent that further reading of the amendment in the second degree be dispensed with.

Mr. CHAFEE. I object.

The PRESIDING OFFICER. Objection is heard. The clerk will continue.
The legislative clerk read as follows:

In place of the language proposed to be inserted, insert the following:

SEC. (a) Section 801 of the Act of September 8, 1916 (39 Stat. 798; '5 U.S.C. 72) is amended to read as follows:

"SEC. 801. (a)(1) If—

"(A) any article manufactured or produced in a foreign country is imported or sold within the United States at a United States price which is less than the foreign market value of constructed value or such article.

"(B) such importation or sale-

"(i) causes or threatens material injury to industry or labor in the United States,

"(ii) prevents, in whole or in part, the establishment or modernization of any industry in the United States, and

"(c) any person is injured in his business or property by reason of such importation or sale, such person may bring a civil action against any manufacturer or exporter of such article or any importer of such article into the United States who is related to such manufacturer or exporter in the district court of the District of Columbia.

"(2) In any action brought under paragraph (1), upon a finding of liability on the part of the defendant, the plaintiff shall—

"(A) recover damages for the injury sustained or be granted such equitable relief as may be appropriate, and

"(B) recover the costs of the action, including reasonable attorney's fees.

"(b) The standard of proof in any action filed under subsection (e) is a preponderance of the evidence. Upon a prima facie showing of the elements set forth in subsection (a), or upon a final determination by the Department of Commerce or the International Trade Commission under section 735 of the Tariff Act of 1930 (19 U.S.C. 1673d) relating to imports of the article in question for the country in which the defendant is located, which final determination shall be considered a prima facie case for purposes of this Act, the burden of rebutting such prima facie case thus made shall be upon the defendant.

"(c) Whenever it shall appear to the district court of the District of Columbia before which any action under this section may be pending that justice requires that other parties be brought before the court, the court may cause them to be summoned, whether they reside in the district or not, and the subpenas to that end may be served and enforced in any district of the United

"(d) The acceptance by any foreign manufacurer, producer or exporter of any right or privilege conferred upon him to sell his products or have his products sold by another party in the United States shall be deemed equivalent to an appointment by the foreign manufacturer, producer, or

"(d) The acceptance by any foreign manufacturer, producer or exporter of any right or privilege conferred upon him to sell his products or have his products sold by another party in the United States shall be deemed equivalent to an appointment by the foreign manufacturer, producer, or exporter of the District Director of the United States Customs Service of the Department of the Treasury for the port through which the article is commonly imported to be the true and lawful agent upon whom may be served all lawful process in any action brought under this section.

"(e)(1) An action may be brought under this section only if such action is commenced within four years after the date on which the cause of action accrued.

"(2) The running of the statute of limitations provided in paragraph (1) shall be suspended while any administrative proceedings under section 731, 732, 733, 734, or 735 of the Tariff Act of 1930 (19 U.S.C. 1673-1673d) relating to the importation in question, or any appeal of a final determination in such proceeding, is pending and for one year thereafter.

"(f) If a defendant in any action brought under subsection (a) fails to comply with any discovery order or other order or decree of the court, the court may—

"(1) enjoin the further importation into, or the sale or distribution within, the United States by such defendant of articles which are the same as, or simillar to, those articles which are alleged in such action to have been sold or imported under the conditions described in subsection (a) until such

time as the defendant complies with such

order or decree, or

"(2) take any other action authorized by law or by the Federal Rules of Civil Procedure, including entering judgment for the

"(g)(1) Except as provided in paragraph (2), the confidential or privileged status accorded by law to any documents, evidence, comments, or information shall be preserved in any action under this section.

"(2) The court in any action brought

under this section may-

"(A) examine, in camera, any confidential or privileged material,

(B) accept depositions, documents, affidavits, or other evidence under seal, and

"(C) disclose such material under such terms and conditions as the court may

"(h) Any action brought under this section shall be advanced on the docket and ex-

"(1) For purposes of this secton—
"(1) The terms 'United States price', 'foreign market value', 'constructed value', 'subsidy', and 'material injury', shall have the respective meaning given such terms by title VII of the Tariff Act of 1930.

"(A) a subsidy is provided to the manufacturer, producer, or exporter of any article,

"(B) such subsidy is not included in the foreign market value or constructed value of such article (but for this paragraph).

the foreign market value of such article or the constructed value of such article shall be increased by the amount of such subsidy

(b) It is the sense of the Congress that the provisions of this section are consistent with, and in accord with, the General Agreement on Tariffs and Trade (GATT).

Mr. DANFORTH. Mr. President, a

parliamentary inquiry.
The PRESIDING OFFICER. The Senator from Missouri will state the

parliamentary inquiry.

Mr. DANFORTH. Mr. President, I would like to inquire whether this is a perfecting amendment or whether it is a substitute for the Metzenbaum amendment. Would the amendment of the Senator from Pennsylvania strike the Metzenbaum amendment or would it simply supplement it?

The PRESIDING OFFICER. The amendment of the Senator from Pennsylvania is drafted in the form of a substitute of the amendment of the

Senator from Ohio.

Mr. DANFORTH. I thank the Chair. Mr. METZENBAUM. Mr. President,

a parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Ohio will state the inquiry.

Mr. METZENBAUM. Mr. President, the fact that the amendment reads, "At the appropriate place in the amendment insert the following," would the Chair be good enough to explain how he interprets that as being a substitute to the amendment?

The PRESIDING OFFICER. The Chair is informed that the form has been changed to be in the form of a substitute, and the clerk can report

the changed language.

Mr. METZENBAUM. I have it in my hand. When was it changed, and how did it become changed?

The PRESIDING OFFICER. It was sent up in the form of a substitute.

Mr. METZENBAUM. Is that the intent of the Senator from Pennsylvania to offer this as a substitute amendment to the Buy American amendment of the Senator from Ohio?

Mr. SPECTER. My intention, Mr. President, is to offer this amendment for consideration in advance of any consideration of the amendment by the Senator from Ohio. The purpose here, by way of explanation which should shed some light on the question of the Senator from Ohio, is to provide a less drastic and a more effective way to deal with the problem. When I consulted with the Parliamentarian on the subject, I was advised the appropriate procedural approach would be to offer an amendment in the second degree.

Mr. METZENBAUM. Mr. President, does the Senator from Pennsylvania understand that it is not an amendment in the second degree but it is a substitute amendment? Therefore, if his amendment were to be adopted, the underlying amendment would no longer be eligible. The way the amendment was originally sent to the desk was as an amendment to my amendment. Now I am told it is in the form of a substitute amendment. That would displace my Buy American amendment.

The Senator from Pennsylvania certainly has such rights as he cares to take, but my understanding is that he was attempting to add on something to my amendment and that he was not attempting to have his amendment substituted for mine.

I would like to ask if I am correct. Mr. SPECTER. Mr. President, a par-

liamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SPECTER. Is there a procedure by which my amendment can be treated as an amendment which will be voted upon ahead of the amendment of the Senator from Ohio without substituting or displacing that amendment by the Senator from Ohio?

Mr. DANFORTH. Mr. President, who has the floor?

Mr. SPECTER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DANFORTH. I object.

The PRESIDING OFFICER. Objection is heard.

The bill clerk resumed the call of

Mr. CHAFEE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. SPECTER addressed the Chair.

Mr. CHAFEE. Mr. President.

Mr. SPECTER. Mr. President.

Mr. CHAFEE. Mr. President. Mr. SPECTER. Mr. President.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. SPECTER. Mr. President, a parliamentary inquiry.

Mr. CHAFEE, Mr. President, I believe I have the floor.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. SPECTER. Mr. President, is it correct that the business pending before the Senate is my amendment in the nature of a substitute to the amendment of the Senator from Ohio?

The PRESIDING OFFICER. The Senator is correct.

Mr. SPECTER. I thank the Chair.

Mr. CHAFEE. Mr. President, wonder if everybody appreciates the supreme irony that we have here, the irony of that zealous guardian against special interests, that man who, to all the world, has proclaimed that nothing is going to get by on this floor, who is not going to have the little fellow hurt. Now he comes forward with the biggest special interest program that has come before the Senate in connection with this bill. And that is saying something.

Mr. President, I do not know how many remember the story of Somerset Maugham's "Rain." Do they remember the Reverend Alfred Davidson, that high standard of rectitude who set out to save Sadie Thompson's sour? All of a sudden, what happened? The Reverend Davidson fell, He fell, subverted by all the temptations that came his way.

We have exactly the same scenario here. That pillar of rectitude, that defender of the small fellow, that person who is going to fight against that Alaskan railroad and those wicked things that are going to be done everywhere, that individual who patrols the floor ceasely. Suddenly, he has fallen, fallen to the depths, as he sweeps in with this ridiculous proposal that has no justification whatsoever.

Let us just look at it, Mr. President. Whom is he out to help? He is out to help the highest paid industrial workers in the United States. Is he out to help some little fellow? No, no, no.

Let us just look at it. UPI International, December 3, 1982: "The steel industry pegs per-hour labor costs, including wages, benefits, overtime, and the like at about \$26 an hour.'

That is not right, say the U.S. steelworkers. It is not \$26, it is closer to \$23.

Think of it. The Senator is out to protect, to cost every citizen in the United States of America more money, to cause fewer jobs, in order to protect these suffering steelworkers.

What are the steelworkers prepared to do to protect their jobs? You will notice that the U.S. steelworkers rejected for the second time this year an industry plea for contract concessions.

Are they going to do their part? Not at all. We are not going to back away from \$26 an hour. Why, we have this pillar of rectitude, who is going to help us out on the floor of the U.S. Senate. He will save our jobs. It is not enough to have a Buy American agreement that provides that substantially all steel used in U.S. highway projects financed by the U.S. Government will be U.S. steel; in other words, 51 percent. They do not want that. They want it all—they want 100 percent.

Listen to those hogs moving up to the trough—slurp, slurp, slurp. Get it

all; no compromise.

There he stands, this Senator, the distinguished junior Senator from Ohio, protecting us all against the special interests. The guardian of the little people, the little people making \$26 an hour.

This amendment would accord to the steel and the cement industries treatment that no other industry in the United States has. It would require that all, 100 percent, of the steel used in every highway or bridge construction or any repair funded in any way by the highway trust fund must

be American made.

This amendment would isolate from any form of competition the steel companies that supply the structural steel. The result of this will simply be higher project costs. Of course it will. There is no question about that. It means that every driver in the United States, every driver—must pay a nickel or more per gallon. It is regressive, this tax; there is no question about that. Why are we doing it? In order to have more bridges and more roads built.

We are not doing it to protect the economic royalists of the labor movement in America, the highest paid group anywhere. Is that right? Of course it is not right. It is wrong. It is, pure and simple, a subsidy. How often we have heard that Senator talk about denouncing subsidies and the special interests. Well, this is the granddaddy of them all. It subsidizes \$26-an-hour jobs in the steel industry by taxing every man and woman in America.

In my State of Rhode Island the average manufacturing wage is under \$7 an hour. What he is asking is that these people be taxed more, have their taxes increased, in order to protect the \$26-an-hour worker in the steel industry who is not prepared to do anything for himself; nothing. Is he prepared to go and renegotiate the contract? Noth-

ing doing. They are not going to do that. They are not going to help themselves. Come on in here to the U.S. Government and get them to help us.

Mr. President, this is serious business, because this flim-flam has passed the House and there is no recall now. We are beyond the point of return if it passes in the Senate. It is bad legislation.

I now would like to refer to what the distinguished chairman of the Foreign Trade Subcommittee in the House of Representatives, the very able Representative SAM GIBBONS, had to say:

Let me tell the members what we have done for the steel industry. And this is a steel industry initiative. We on the Demo-cratic side offered them the finest depreciation schedule imaginable but they were not sensible enough to take it. We have had in almost 20 years that I have been in the Congress a policy of trying to exclude foreign steel, and it has worked but not worked in the way one would think. We have had the Wilbur Mills proposals which informally kept steel out of our country. We had the trigger price mechanism which was another price-fixing mechanism to keep steel out. And what has been the result? While the price of everything in America has doubled. the price of steel has tripled. Steel wages starting after World War II began to escalate faster than all American industrial wages and now steel wages are 70 percent higher than all industrial wages in the country. In fact, steel wages are the highest wages in the country. In fact, steel wages are the highest wages in the world. And yet it takes about twice as many hours of labor to produce a ton of steel in the United States as it does in Japan. It is not that the Japanese work is that great but the Japanese management got off its rear ends and ran the business and got productivity up. So we have had a protective steel market, and all we have gotten is very inefficient steel production and very high prices and we have priced our steel out of the world market. In fact, we have priced it out of the American market.

Representative GIBBONS makes some excellent points. Centrally, he points out the fact that our Government has favored our steel industry for many years in a number of ways, mainly by arrangements negotiated with the major steel-supplying countries that have limited their access to this market. He refers to the so-called "trigger price mechanism" which in essence was a Government-fixed price below which foreign suppliers could not sell without being slapped with a dumping suit. And he points to the plain fact that this is an industry where very high wages have prevailed in the face of weak productivity, declining market share, and dreadfully low capacity.

As I mentioned previously, Mr. President, this is serious business. This is not just a frivolous little amendment that can be dropped in conference. And there will be wise heads prevailing in conference, I am sure. But the House bill contains a provision that will require all steel, cement, and other manufactured products bought

with trust fund moneys to be American made.

If we adopt this amendment today, Mr. President, there is no doubt that the bill will contain a 100-percent Buy American provision. There is no way out of it, both Houses having adopted it.

What is wrong with that? Here it is, all wrapped up in the American flag—Buy American. Who can beat that?

The problem with it, Mr. President, is that it taxes American drivers in order to subsidize, as I say, a small, elite, very highly paid, relatively unproductive steel worker. It would be the most dramatic and far-reaching Buy American provision that has been enacted into law. It occurs at one of the most sensitive, delicate moments in our recent economic history, only 3 weeks after the GATT ministerial conference in Geneva where our trade negotiator, a former Senator, our collegue, now ambassador, Bill Brock, labored to prevent the world trading system from collapsing by extracting an agreement from our trading partners that no one of us would take further action to impose new barriers on

Well, that apparently does not mean anything to the sponsors of this legislation. It is a far-reaching, draconian measure. It requires massive amounts of taxes on the public. It requires that the money be spent only for our products. It prevents competition whatsoever.

Mr. President, I should now like to read from testimony to the Finance Committee by the distinguished Special Trade Representative Mr. Brock.

Mr. HEINZ. Will the Senator yield for questions?

Mr. CHAFEE. Questions or ques-

Mr. HEINZ. Well, probably three questions.

Mr. CHAFEE. I will yield for a question which should not be in triple form, without losing my right to the floor, of course. But before we do that, before we hear the question, I just would like to—

Mr. HEINZ. The Senator is looking up the answer before I ask it?

Mr. CHAFEE. I would like now to read from testimony that Ambassador Brock gave in the Finance Committee. He did not appear there in connection with this measure. There have never been any Finance Committee hearings on this measure of the junior Senator from Ohio. We had no hearings on this Buy American provision. Ambassador Brock was there on another matter. At the conclusion of his testimony on the other matter, I asked him—this is from the record:

Mr. Ambassador, we are now involved in the roads and the tax program. In the House it is my understanding that they put on this bill a so-called Buy American provision in which all steel and all cement must be purchased in America. Could you give us your thoughts on that?

Ambassador Brock. I am very much opposed to that. It does not—

Senator Charge. Could you speak up a

little?

Mr. Brock. I am very much opposed to that. It really is difficult for us to go to the international conference as we did 2 weeks ago in Geneva and try, as the United States did, to keep the world trading system from collapsing into an insanity of protectionism that is being practiced on the part of other countries, to go to this conference and to exercise some pretty tough leadership to insist that political commitments he made not to take new protectionist actions and in fact to begin to roll back those that are presently in effect and to come home and within 2 weeks have the Congress suggest that we should start putting Buy American language on all these bills. It makes it very difficult for us to maintain a credible leadership position in the world that will stop other countries from doing damage to this. I would very much hope that the Senate would not follow that course and would in fact insist that the amendment be deleted. It will raise the price of the program. It will reduce competition. It will mean less jobs for construction workers. And that is one of the main purposes of the bill. I do not see how we can gain in that process, and I would respectfully hope that the Senate might find in its wisdom the way to oppose that particular amendment.

Mr. President, as I said before, the Finance Committee, which has jurisdiction of these matters, has never had any hearings on this. We have not heard what the effect would be on other trade in America.

It is very, very clear, and every Member of this Senate knows it, particularly those in the Finance Committee, that we have been trying to break into Government purchases in other countries. The prime case is the telecommunications system in Japan. Progress has been made.

We feel we should have access to that market for out high tech industries. That is right. We are going to

prevail.

But how can we ever prevail if we take steps of the kind proposed by the Senator from Ohio? How can the Japanese say, "That is fair, you should have an opportunity in this market," if we turn around and say 100 percent, not 51 percent, 100 percent they want, buy American steel, buy American concrete, buy all other American products used in connection with our road and highway program? That is wrong.

Hearings are required on this meas-

ure.

There are those who would suggest that this is the road to follow, that we are not getting anywhere in these GATT ministerial meetings, that everyone else is doing it so why should we not?

Mr. President, the implication is that the United States does not have to be responsible. The implication somehow is that we are free because of the failure to achieve at Geneva everything we wanted. We are free to

pursue our own objectives, greedy though they might be, oriented only for the elite few of American labor though they might be, harmful though they might be to the workers of the rest of America, in this greedy special interest legislation. But let us go back to Mr. Brock and see what he had to say to the Finance Committee.

Reporting on his trip to Geneva:

We came so close to a disaster that maybe the biggest achievement we had was in keeping the system in some form intact and at least without going backwards. We did not go backwards. We made some limited progress in a few areas, clearly not enough and certainly not enough to satisfy the United States.

However, said Ambassador Brock:

It is important that we did commit to the other 87 contracting parties to take or maintain no new action that would be destructive to the trading system. It is my judgment that if the United States were to begin to take these actions, while not overtly in contradiction to the Government procurement code, we admit that.

We are not saying this is overtly contradictory to the Government procurement code.

It certainly is in contradiction to a healthy liberalized trading system for us and for us to start saying that the products sold here will all have to be produced domestically.

More rationally-

Continues Ambassador Brock:

laying aside the theory of the GATT and the theory that we are pursuing in our trade stance, if in fact a part of the logic of this bill is to create greater employment in the construction industries of this country, this will not do it.

This will raise the price and that will mean less jobs to be held by Americans. I think that is the best single argument I can make against the buy American approach.

When asked whether the Housepassed buy American provision creates more or less jobs in the American steel industry, Ambassador Brock replied:

If it contributes to inflation which has been the primary cause of unemployment and therefore recession, ultimately the cost will be devastating.

I do want to say in one of the points made by Mr. Brock he alluded to the fact that the buy American provision offered by the Senator from Ohio is not in violation of the GATT code on Government procurement. Strictly speaking that is correct, and it is ultimately one of the most powerful arguments of the proponents of this measure.

But our objective as one of the great traders in the world is to expand and broaden the code to include just the sort of practices that the amendment would implement. Mr. Brock said:

I am concerned that this legislation will interfere with our efforts to open foreign government procurement markets to U.S. exports. We have made considerable progress in achieving this goal with the entry into force of the international government procurement code in 1981.

Look at it. A year ago we extered into this agreement, which opened other Government procurements to American businesssmen, to all countries.

Nevertheless, important limitations in the coverage of this agreement remain, and we had initiated efforts aimed at expanding it.

In particular, we are seeking to expand the code to cover foreign government entities that are major purchasers of transportation, telecommunications and power generating equipment.

However, our credibility with our negotiating partners will be sorely tested if we enact new buy national restrictions at the same time as we are trying to negotiate limitations on such practices.

Mr. President, much has been said about foreign retaliation against this sort of protectionism. I just do not think we realize just how intense are worldwide pressures for protectionist actions. The major world economies are all in recession, especially in Europe. Eastern bloc countries are in particularly dire economic straits.

Many of the more advanced developing countries have huge foreign debts.

In order to service these debts, countries like Brazil, for example, simply must continue to export to countries like the United States which are in need of the raw materials, consumer products and manufactured products they produce.

Mr. DANFORTH. Mr. President, will

the Senator yield?

Mr. CHAFEE. I am glad to yield to the distinguished Senator from Missouri for a question or whatever it might be.

Mr. SPECTER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. SPECTER. Mr. President, is the Senator from Rhode Island yielding to the Senator from Missouri for the purpose of a question, because I believe that is the only right he has to yield?

Mr. DANFORTH. All I wanted to do was to engage the Senator from Rhode Island in some questions.

The PRESIDING OFFICER. The Senator from Pennsylvania has correctly stated it as the Senator from Missouri has acknowledged the rights of the Senator from Missouri and the Senator from Rhode Island.

Mr. SPECTER. I thank the Senator.
Mr. CHAFEE. The Senator from
Rhode Island has the privilege of
yielding to the Senator from Missouri
for a question, without losing his right
to the floor.

The PRESIDING OFFICER. The Senator is correct.

Mr. CHAFEE. I am delighted to hear the question of the Senator from Missouri.

Mr. DANFORTH. The Senator from Rhode Island pointed out in his initial comments concerning the Metzenbaum amendment that this buy American amendment is special interest legislation and one thing that interested me in the Senator's comments was that he seeks to express surprise that a special interest amendment would be offered on the floor of the Senate. But would the Senator not acknowledge that in the last days of a Congress when Members of Congress are attempting to get home for the holidays it is not unusual to have a Senator offer a special interest amendment and try to tack it onto the bill.

Mr. CHAFEE. I respond to the distinguished Senator from Missouri that no, I am not surprised at special interest amendments. They are rampant

around here.

But what I did express surprise about was that that Senator who has been so righteous, I might even say self-righteous when others offer special interest amendments, and who has assumed a special role of protector of the American public against special interests, should himself come to this Chamber with the biggest special interest amendment that we have seen so far on this bill.

Mr. DANFORTH. Would not the Senator acknowledge that, perhaps, circumstances are different in that the holiday season is drawing near, Christmas is coming, the Christmas tree has now appeared on the floor of the Senate and a beautiful new star has been presented to the Senate for purposes of placing it on the very pinnacle of that Christmas tree and, therefore, given the holiday season and given the fact that the Christmas tree is with us, it is perhaps appropriate for us to entertain a special interest amendment at this time?

Would the Senator say that or

would the Senator disagree?

Mr. CHAFEE. Well, there is no question but the mammoth star has been toted into the Chamber by the distinguished junior Senator from Ohio who is bent down with the heavy load he is carrying, with this mammoth special interest package which he seeks to place atop the tree. It is just a little bonbon for the wealthiest workers in the United States, something for them, something that is being paid for by all the other workers who earn far less and many of whom in other industries have been prepared to make sacrifices in order to keep their jobs.

Mr. HEINZ. Mr. President, will the

Senator yield for a question?

Mr. DANFORTH. I would like to ask the Senator, if I may, something concerning special interest legislation. Would the Senator agree that one of the problems with special interest legislation such as this Buy American amendment is that in the clamoring to assist the special interest we are often doing real damage to the general interest, and in this case in attempting to carry in the ornament for one interest, namely, the steel industry, we

would be causing real damage to other interests; for example, we would be diverting funds that otherwise would be used for the construction of highways and for the rebuilding of our infrastructure and using those funds which could be used to build highways for the purpose of creating an artificial subsidy for one special interest and thereby damaging the general interest?

Mr. CHAFEE. There is no question the Senator from Missouri has put his finger exactly on it. Apparently the sponsors of this legislation are perfectly prepared to trample on the other citizens of the United States in the advancement of their proposal that they have on the floor. That is the ultimate in special interests.

Mr. DANFORTH. And one consequence of doing this would be that we might be helping some steel workers but we would be hurting the interests of some construction workers who would be employed building highways with the same funds which would be diverted into a Buy American provision. Would the Senator agree with

that?

Mr. CHAFEE. I certainly would agree with that. The Senator from Missouri has restricted himself to jobs that would be lost in additional highways that could be built if we did not have to pay so much for this steel. But it does far beyond that; 13 percent of the jobs in the United States of America are export-related; 1 out of of every 7 workers in Rhode Island has a job which is dependent upon exports.

What the sponsors of this legislation

are saying is:

We do not care about you; we do not care about you, you 13 percent.

In the greed to get this for this special little group of workers, they say:

We are going to trample on you, on everybody else and endanger their jobs.

Mr. DANFORTH. Is it the Senator's view that Buy American legislation could lead to retaliation by other countries and that that would thus endanger the jobs of American workers who are dependent on exports for their jobs?

Mr. CHAFEE. No question about it. Mr. DANFORTH. Would it, for example, endanger the jobs of, say, the 300,000 workers in the State of Ohio who are dependent on exports for their employment?

Mr. CHAFEE. It could very well do that. It could very well endanger jobs across the country, the entire 13 per-

cent involved in exports.

For instance, as I mentioned earlier, we are making massive, vigorous efforts to penetrate the Government controlled telecommunications markets in various countries with some success. But obviously this type of legislation invites retaliation against that.

I might also mention, in answer to the distinguished Senator from Missouri, that the largest exporting group in the United States of America, where 25 percent of the income comes from exports, is from farms, farm produce. One-quarter of everything that is produced on United States farms is exported.

Now we invite all kinds of retaliation against the farm groups, and that is why the farm groups have been so concerned about restrictive types of legislation such as this. As a matter of fact, as the distinguished Senator from Missouri is aware, in connection with the domestic content legislation, which is involved in our automobiles. the same principle applies; 16 farm groups have unified in order to fight that domestic content legislation, and if they were aware of this radical piece of legislation that is before us on the floor today I suspect they would be just as upset.

Mr. DANFORTH. Would the Senator agree that one of the purposes, perhaps the principal purpose, of debate on the floor of the Senate is to call to the attention of the American people the damage that could be done by legislation which would impact on them and, therefore, those who serve in the Senate—

Mr. SPECTER. Mr. President, point of order. Mr. President, point of order. Mr. CHAFEE. Mr. President, I be-

lieve I have the floor.

Mr. SPECTER. The point of order is, has the Senator from Rhode Island lost the floor by permitting the Senator from Missouri to speak without yielding the floor for a question, which he did not just do but the Senator from Missouri simply took over?

The PRESIDING OFFICER (Mr. KASTEN). If the Senator from Rhode Island yields for more than a question, the floor becomes open. He will be recognized. In the opinion of the Chair the Senator yielded for a question.

Mr. SPECTER. I suggest the Senator did not yield at all. The Senator from Missouri sought to ask a question but there was no yielding.

Could I ask if it is a fact that the Senator from Rhode Island did, in effect, lose the floor by permitting the Senator from Missouri to start to speak even though it was in the form of a question without yielding for a question?

Mr. President, I ask for a ruling on my parliamentary inquiry.

The PRESIDING OFFICER. Is the Senator from Pennsylvania making a point of order or making a parliamentary inquiry?

Mr. SPECTER. Both.

The PRESIDING OFFICER. In the opinion of the Chair the Senator from Rhode Island was yielding for a question and the Senator has the floor at this time.

Mr. RIEGLE. Mr. President, parliamentary inquiry. Is it possible for a Member to object to that ruling and ask for a vote on that question? Second, is it appropriate as well to ask that the record be read back so that we can ascertain precisely whether or not a request was made to yield the floor at that point or not, which would be reflected in the notes that have been taken by the Official Reporter here?

The PRESIDING OFFICER. The Senator from Michigan would need the floor in order to raise the point of order. Since the Senator from Rhode Island has the floor at this time, the Senator from Rhode Island is recognized.

Mr. DANFORTH. Mr. President, I was interrupted in my question. I wonder if the Senator from Rhode Island will let me finally continue the question that he so graciously yielded to me to ask in the first place.

Mr. CHAFEE. I am delighted to yield the floor to the Senator from Missouri to ask a question, but I am not yielding the floor permanently; let the record so show.

Mr. DANFORTH. Mr. President, I appreciate the courtesy of the Senator.

The question that I was asking was simply this: Is it not so that perhaps the most significant purpose of debate on the floor of the Senate is to call attention to the American people, to call their attention to how they will be affected by pending legislation? And, if it is true that a Buy American provision in this bill would have very serieconomic consequences on a number of groups in this country, is it not the duty of the Senate to debate at considerable length those possible dangers so as to inform each of the potentially affected groups how it may be affected by the pending amendment?

Mr. CHAFEE. I would say, in answer to the Senator's question, absolutely. It seems to me that we are hired, we are paid to come down here and to represent the people of our country, not just of our State but of the Nation as a whole, and that we have a duty, when legislation comes forward that is rank with greed, to expose it for what it is and to point out the dangers that legislation such as the amendment that we are considering here on the floor holds for most American workers.

But, Mr. President, I do not think it is our duty to come here and solely represent a tiny little group in America that is at the top of the wage scale.

ica that is at the top of the wage scale.

Mr. DANFORTH. Would the Senator agree that the amendment offered by the Senator from Ohio constitutes very significant trade legislation and further that the amendment offered by the Senator from Pennsylvania also constitutes very significant trade legis-

lation on which there have been no hearings in the Senate Finance Committee and, therefore, that each of the two amendments deserves quite extensive debate on the floor of the Senate?

Mr. CHAFEE. I would say, in answer to the question of the Senator from Missouri, absolutely; apparently the Senator from Pennsylvania was unsuccessful in prying his amendment out of the committee that it was before, I presume it was before the Judiciary Committee, so he is raising it as an amendment on the floor. Of course, it has never been considered in the Finance Committee and perhaps its jurisdiction lies solely in the Judiciary Committee. But, as the Senator from Missouri pointed out, it has wide ramifications on international trade, and so, Mr. President, does the amendment of the Senator from Ohio. And that, of course, is legislation that should come before the Finance Committee where, as we mentioned earlier, there have been no hearings whatsoever.

Mr. STAFFORD. Will the Senator yield to me for a brief question?

Mr. CHAFEE. I would be glad to yield to the Senator from Vermont.

Well, the senior Senator from Pennsylvania has been very, very—I was going to say patient but perhaps the word is impatient in trying to ask a question, so if the Senator from Vermont would not mind.

Mr. STAFFORD. I would be glad to defer to the Senator. My question would be a single question and very brief.

Mr. HEINZ. I thank the Senator from Rhode Island for yielding on the understanding he will not lose his right to the floor.

Mr. CHAFEE. Absolutely.

Mr. HEINZ. Now that we have taken care of all of those concerns, I want to say, as a preamble to the question, that I listened very carefully to the Senator's remarks and then his extended colloquy with Senator Danforth, and I heard the Senator say a number of things. I hope the body will understand and note that the amendment of the Senator from Ohio is not in violation of the procurement code, it is not in any way contradictory to GATT, and that, indeed, there is nothing legally wrong with it at all.

Second, as I understood the Senator from Rhode Island, he allowed as to how, nonetheless, the enactment of this amendment would in some way prejudice our negotiating position with respect to a freer world trading system.

Of course, this amendment is being brought up long after the ministerial meeting, a meeting which did not produce anything that is in any sense tangible except to avert disaster. My question to the Senator is this: The Senator made much of the fact that we negotiated a procurement code as part of the 1978 Tokyo Round and

that were we to put into law a Buy American provision for roads and highways—in many respects similar to Buy American provisions that we have in many other laws. In mass transit, for example, the Surface Transportation Act of 1978 has a Buy American provision in it. Many other statutes have Buy American provisions in them—if we were to put such a provision into law, our gains under the code could be jeopardized, the progress made in the ministerial meeting impeded.

My question is this: What, given the procurement code that we negotiated in 1978, given the supposed agreements that we have apparently stuck with, for example, with the Government of Japan's entity known as NTT, Nippon Telephone and Telegraph, what, quantifiably, in dollars have we gotten out of the procurement code in the way of trade that we did not have before? And I would ask the Senator from Rhode Island-and I think his entire case rests on this point-what have we gotten in terms of exports from that procurement code in dollars, not in generalities, not in principles? Could the Senator respond to that question?

Mr. CHAFEE. The USTR has estimated a potential gain from the code of about \$20 billion in already negotiated sales. No one can say with exact certitude. But I will suggest in response to the Senator from Pennsylvania that my entire case does not rest on the GATT. It was I who stated clearly that this was not in violation of the GATT. It was I who said it was not in violation of the procurement code. So this Senator has made no suggestion in that regard.

Mr. HEINZ. Will the Senator yield for a clarifying question?

Mr. CHAFEE. Let me just continue. I recognize that the Senator from Pennsylvania was not suggesting that. But let us make it very clear that in my remarks earlier, I clearly went into that and indeed I quoted from Ambassador Brock on the subject.

Mr. HEINZ. If the Senator would yield, I certainly agree with him. But I do want to ask a clarifying question on his answer.

Mr. CHAFEE. Let me just finish, if I might. What we are trying to do, as the distinguished Senator from Pennsylvania—who is active in this matter in the Finance Committee and also in the Banking Committee, where he has taken a very active role in the Trading Company Act, for instance, of which he was the principal author—realizes, exports are extremely important to the U.S. workers and that what we are doing here is taking a step toward protectionism. And it is not just a little step, it is a new and giant step toward protectionism.

As I said in my earlier remarks, I recognize that we have had a Buy American provision in this area for a total of 51 percent, but not for 100 percent that is sought here. And we are thus erecting further barriers against export of American products on which 13 percent of American jobs depend.

Mr. HEINZ. Will the Senator yield

for a clarification?

Mr. CHAFEE. I yield without losing my right to the floor.

Mr. HEINZ. I thank the Senator for

yielding.

By the way, I hope the Senator does understand that when I was referring to the fact that there was no violation of the GATT or of the Procurement Code, I did indicate that the Senator himself had said that in his opening remarks.

In answer to the question that I posed to the Senator, my question being how much has this Procurement Code realized to U.S. exporters in dolars, I think, Mr. President, it is important to note, unless the Senator wishes to change his answer, that what he said was that there is a potential here for \$20 billion. He left unanswered the question of how much we have received from the Procurement Code in the way of export business in the last 5 years.

This Procurement Code was under negotiation for 5 years, and it is a bit late now still to be talking in terms of the potential of the Code. Saying the potential is still \$20 billion, is to tell me that we do not have any numbers that indicate that any potential has

been realized whatsoever.

I do not wish to put words in the Senator's mouth, but I am sure he is as aware as anybody else that the Government of Japan and NTT have made practically insignificant purchases of anything made in America since the alleged implementation of this Code.

I ask the Senator again: here it is, 5 years later. Does he have any hard numbers? Does he have any indication at all, quantifiably, of what we have received from the Procurement Code

so far?

Mr. CHAFEE. It is so rare to find the senior Senator from Pennsylvania in error that I am reluctant to point it out.

Mr. HEINZ. Surely the Senator jests.

Mr. CHAFEE. The fact that it so rarely occurs makes it astonishing. [Laughter.]

The Senator has suggested the Procurement Code has been in effect 5 years. If he will search his memory, he will realize that it has been in effect for a year-and-a-half, not for 5 years. The figures are due out from the STR in about a month-and-a-half. As he well knows, if the State of Pennsylvania is anything like our State, getting figures back rapidly on complicated

matters such as this—and, of course, this is far more complicated than any State deals with—is difficult.

We anticipate having those figures from the USTR within the next 2 months. When they come out, I will make it a point of seeing that the Senator from Pennsylvania receives a copy.

I will yield to the Senator from Vermont for a question without losing my

right to the floor.

Mr. STAFFORD. I thank the distinguished Senator for yielding. My question is this: I am sure the distinguished Senator is aware of the fact that on December 6, 1978, we adopted Public Law 95-599, title 4, which is a Buy American provision. Under that statute, the recipients of Federal funds are required generally to purchase products manufactured in the United States with substantially all domestic components. That is in the language of the statute. The "substantially all" requirement has been interpreted by regulations as requiring 51 domestic components percent value.

My question is this: Do we not now have the Buy American policy under that particular statute which requires that there be over 50 percent domestic components by value in the transportation issue that is being attempted to be addressed by Senator Metzenbaum and others?

Mr. CHAFEE. I say in response to the senior Senator from Vermont that in the current legislation there is, as he suggested, a 50-percent, or 51-percent, if you would, Buy American provision

What the Senator from Ohio seeks to do, he who has joined the fallen in pursuit of this special interest, is to make it 100 percent.

Mr. STAFFORD. If the Senator will

yield further—

Mr. CHAFEE. Without losing my right to the floor.

Mr. STAFFORD. That is the understanding of the Senator from Vermont, that the current amendments

would require 100 percent.

Is it not reasonable to say that present law strikes a reasonable balance between the need to protect our domestic industries and the need to hold down the cost of transportation construction and equipment for both the States and the Federal Government?

Mr. CHAFEE. In answer to the distinguished Senator from Vermont, I would think getting half of the pie ought to be satisfactory. To come in and demand all the pie I would think would promote some embarrassment on behalf of the sponsors. But it has not slowed them up, at least to date.

I would point out, and it might be interesting, that all the States share in exports. In my State, for example, one out of every seven manufacturing jobs is dependent upon exports, a higher ratio than the national average. For example, Ohio was the third largest exporting State in 1981, the last year for which we have figures. Ohio exports over \$113 billion of goods. The main exports from Ohio, being an agricultural State, the ninth largest, are feed grains, soybeans, and dairy products.

It is not just Ohio and it is not just Rhode Island. I suspect Vermont has a vigorous export industry, and so does Pennsylvania and all the other States of the Nation.

Mr. President, I would like to pursue the subject of retaliation. For us to overlook that in the atmosphere in which the countries of the world are now operating I think would be a great mistake. By pursuing this proposal of increasing from 51 percent to 100 percent the domestic content in our bridges, highways, and roads, we are taking a massive step forward—or a step backward is a better way to phrase it—into the area of protectionism.

Mr. President, this is a road down which the United States has gone before. Of course, we refer to the Smoot-Hawley tariff in 1930, probably the most iniquitous piece of legislation that passed this Chamber, or one of the most iniquitous pieces of legislation to pass this Chamber, in this century.

I think everyone who has carefully studied the roots of World War II will acknowledge the Smoot-Hawley tariff was one of the principal causes that brought about World War II. It contributed to the international depression. It contributed to the rise of demagogues such as Hitler and Mussolini, and, of course, that led to the instigation of World War II in 1939.

Mr. President, I would like to make a couple of technical points, if I might, about the amendment.

One very important point is that the bill, according to industry analysts, will not lead to lower steel imports.

Steel imports are, in effect, regulated by voluntary agreements setting aggregate import levels. If the effect of the bill were to displace foreign structural steel such as that used in highway and bridge products, foreign steel manufacturers would quickly fill their quotas with other types of steel products, like steel plate, sheet, and specialty steels. There is a serious danger in a substitute having this effect, in that there is a higher U.S. labor content in sheet and specialty steel. If foreign manufacturers were to shift to those products as one result of this Buy American provision, more jobs could be lost in the steel industry than would possibly be gained by the new, artificial demand for U.S. structural

Another point is that the Japanese are now informally limiting their steel exports. Were we to adopt a Buy American provision, some analysts believe the Japanese would simply abandon their informal restraint and ship much higher quantities of steel. Here again, the Buy American provision of the Senator from Ohio would cost American jobs.

In summary, Mr. President, the amendment is bad policy. It is bad economic policy because it creates a new subsidy for an industry and a union already favored. It is bad policy because it means that the taxes we raise in this bill will buy less highway and bridge improvement. It is bad trade policy because it produces retaliation by our trading partners, which could escalate into a full scale trade war from which no one would gain and everyone would lose. The amendment should be rejected because it has not been studied by the committee of jurisdiction, in spite of its potential dangers. It should be rejected because it is bad for consumers, bad for taxpayers, and bad for our Nation.

I thank the Chair.

Mr. DOLE. Will the Senator yield? Mr. CHAFEE. I am glad to yield to the Senator from Kansas for a question.

Mr. DOLE. As I understand, this debate has just started. Is there a chance the Senator could continue for another 4 or 5 hours?

Mr. CHAFEE. We would have no trouble, in answer to the distinguished Senator from Kansas, in continuing this, because there is a substantial amount of material on the subject.

Mr. DOLE. I know it is a very important amendment. I am not certain we ought to leave it today. It seems to me it is one of those amendments that deserves-since we have not had many hearings, we ought to have a discussion.

Mr. SPECTER. Will the Senator from Kansas use his microphone?

Mr. DOLE. I was just suggesting that this is perhaps an amendment that ought to be debated until we get a cloture vote, as far as this Senator is concerned, until tomorrow. Then we would eliminate all the nongermane amendments hanging around. There are 80-some amendments, and if, in fact, we intend to finish this bill, as the President wants us to do and as the majority leader wants us to do. I think an amendment like this, as important as it is to many people, is probably one we ought to take a lot of time on. I hope the Senator will have a chance to rest for a while and maybe regroup a little later.

Mr. CHAFEE. I do not know quite how to take that suggestion, or question. In any event, we have mountains of material here. As a matter of fact, I have a book on the subject. It is of such importance that I want to bring

do not want to slough over it. It is a detailed, serious matter that I believe should be explored in considerable depth. May I just start?

Mr. SPECTER. Mr. President, a parliamentary inquiry.

Mr. CHAFEE. Mr. President, I believe I have the floor.

Mr. SPECTER. Is it true that the Senator from Rhode Island yielded the floor and then yielded again for a

question to the Senator from Kansas. which has now been answered, so the Senator from Rhode Island has in fact yielded the floor?

The PRESIDING OFFICER. It is the opinion of the Chair that the Senator from Rhode Island yielded to the Senator from Kansas for a question but did not yield the floor. So for the immediate period, the Senator from Rhode Island is recognized.

Mr. DANFORTH. Would the Senator yield for a question on that?

Mr. CHAFEE. I can, but because so many people are interested in this book, I thought I would read the front page so we can get an understanding of its weight and merit.

This is the Center for Strategic and International Studies Significant Issues Series. "The Economic Importance of Exports To the United States," by Jack Carlson and Hugh Graham. It is the U.S. Export Competitiveness Project. Georgetown Universi--a prestigious institution in Washington,

That is just the cover I was reading. I shall be glad to yield to the Senator from Missouri for a question without losing my right to the floor.

Mr. METZENBAUM. Mr. President, I object. I object. Mr. President, the words of the Senator from Rhode Island are that "I yield to the Senator from Missouri." He has no right to do that. He loses the floor. It was not stated as a question.

Mr. CHAFEE. Without losing my

right to the floor.

The PRESIDING OFFICER. It is the opinion of the Chair that the Senator from Rhode Island yielded to the Senator from Missouri for the purpose of a question

Mr. METZENBAUM. I want to point out to the Chair that you cannot change the language of a Member on the floor of the Senate. You have consistently been doing that. He has not been saying that he yields for the purpose of a question. He has been saying, "I yield." You have consistently changed the language in order to accommodate the Senator from Rhode Island. You have no right to do that.

The PRESIDING OFFICER. It is the opinion of the Chair that the yielding for the purpose of a question is not intended to yield the floor.

Mr. DANFORTH. Mr. President, I would simply like to ask the Senator from Rhode Island, with respect to the Metzenbaum amendment, if he feels that I can play some useful part

it to the attention of my colleagues. I in the debate and, if the Senator feels so, whether I should ask some workmen to deliver my files to the floor of the Senate so they may be available to me for the purpose of debate?

> Mr. CHAFEE. I think that the Senator from Missouri would do well to ask the workmen to deliver the files to him, because this matter requires a good deal of research. I think the Senator should have that material handy and if we are going to be here for a while-and there is such intense interest in this, as evidenced by the number of Senators on the floor-perhaps it would be wise to order those files.

> Mr. DANFORTH. Would the Senator further agree that the Specter amendment has received very little attention, either in committee or on the floor of the Senate; that the Specter amendment also constitutes very serious changes in trade laws; and that the Specter amendment deserves extensive consideration on the floor?

> Mr. CHAFEE. Oh, there is no question, in answer to the Senator from Missouri, that the amendment of the junior Senator from Pennsylvania is fraught with trade matters. I am sure he will admit that. That is what it is all about.

> At this time, I am favored by the presence of another study on this subject, which is called, from the Federal Trade commission, "Staff Report on Effects of Restrictions on United States Imports, Five Case Studies in Theory," by Morris E. Morkre and Theory," by Morris E. Morkre and David G. Tarr, from the Bureau of Economics, June 1980.

> I am torn between which of these important books to read first, because they are both significant and they both bear on the issue. Why do I not start on the first one?

> So that we can know what we are dealing with-it is a Significant Issues Series of papers that are written for and published by the Center for Strategic and International Studies at Georgetown University. The views expressed in these papers are those of the authors, not necessarily those of the Senator. (The Significant Issues Series, vol. II, No. 5.)

> Before taking the substance of the book, I think perhaps it would be well to read the foreword so we can understand just what it is about, because this bears on the economic importance of exports to the United States.

> This is the foreword, which I believe my colleagues will find of interest:

The United States faces a chronic crisis in its international trade accounts that adds to inflation, buffets the value of the dollar, contributes to unemployment, and heightens the increasing pressures for protectionist import policies.

Mr. President, if I have ever heard anything that is on the mark, that is it. And this is merely in the foreword. So I think we can look forward to the remainder of the book with interest because the foreword, it seems to me, gives a tantalizing portrayal of what is to come.

The authors say:

The problem is partly the lack of a sustained, comprehensive, national economic policy that gives priority to increasing U.S. exports. The statistical evidence illustrates this problem.

The United States exports only 6.7 percent of its GNP: a trifle figure when compared with some of our major trading competitors—West Germany 23 percent—

and I do not think many Senators realized this before this was brought to their attention in this book—

England 20 percent, France 17 percent, and Japan 12 percent.

I find it interesting, and I am sure my colleagues do, too, that Japan exports only 12 percent of its GNP.

As a result of the U.S. export performance, the rising price of imported oil and other industrialized and newly-industrialized nations, the United States ran a staggering \$24.6 billion trade deficit in 1979. In the last decade, the United States incurred a balance of trade surplus only three times.

In 1980, the problem will most likely be more acute because of cooling of the economies of our major trading partners, a decline in U.S. price competitiveness, growing barriers abroad to U.S. trade, further increases in our foreign dependence on raw materials, and the heightening of tensions between the United States and the Soviet Union.

In recent months, these startling trends and accompanying trade figures have begun to awaken the government, the citizenry, and the media to the serious implications of the bankrupt trade policies we have practiced for so long. Awareness of export difficulties is finally emerging in public policy debates and will continue to gain momentum through the election year.

tum through the election year.

To serve the national interest, the exportation of American goods and services now must become one of the main foundations of the U.S. market economy. To accomplish this, the United States clearly needs an agressive, sustained, and effective program to expand exports and improve the balance of

trade picture.

Recognizing that a major obstacle to export expansion has been the lack of understanding about the roots of our export problems, CSIS began a major program of studies of U.S. Export Competitiveness over 2 years ago. The following study by Jack Carlson and Hugh Graham considers the role of exports in the U.S. economy, the factors that determine the pattern and size of U.S. international trade, and the benefits to the nation from expanded trade. Carlson and Graham also discuss the structure of U.S. exports and the impact of these exports on the economies of major exporting states in the United States.

We hope that this study will have a significant impact in sharpening the terms of the debate and in contributing to government decisions that will serve broad U.S. interests. (A full listing of the project studies is contained in the last two pages of this book-

let.)

The foreword is signed by Michael A. Samuels, executive director, Third World Studies, and Robert A. Kilmarx, director, Business and Defense Studies, in April 1980.

Now, Mr. President, the list of contents is enough to make one salivate with anticipation. It surely leads to a tasty fare in the field that we are all interested; namely, the importance of exports to the United States.

Let me just look into the contents. First, "The Importance of Exports to the U.S. Economy," followed by a very interesting chapter, "Recent Trends in U.S. Trade Performance; Trade in Services in the Balance of Payments; The Importance of Exports in U.S. Output; U.S. Agricultural Exports."

Certainly that chapter will be of major interest. "Exports of Manufactured Products" is something that I think will appeal to all Members of

the Senate.

They are all so interesting, Mr. President, that one has trouble deciding where to start. It is like a smorgasbord—which does one choose first? Although I will take them out of order, because of the high interest that I find on the floor in the subject of manufactured products, I believe I will start with that first. That is on page

Mr. President, the title, as I say, is "The Exports of Manufactured Products."

According to the latest available census of manufacturers in the United States, exports account for about 7 percent of all shipments of manufactured goods—

Now, mind you, Mr. President, we are talking manufactured goods in this country—

And about 11.3 percent of all manufacturing employment.

The importance of exports as a source of demand for U.S. manufactured products, however, is partially underestimated by these figures since the total value of shipments but not exports from census data unavoidably includes substantial double counting of goods shipped from one industry to another and within each industry itself.

For example, the value of steel is recorded once again—

As I say, Mr. President, we touch on a matter that is at the crux of this debate today, steel.

The value of steel is recorded once in the form of the output of the steel plant and again implicitly in the value of shipments of products made from steel. This double counting artificially increases the value of shipments and so decreases the relative importance of exports that are not subject to double counting.

I hope that that got across to everybody; that when we get into export of steel, that the value of steel as part of our GNP shrinks because steel produced, for example, for domestic production of automobiles is counted twice, once as an output of the steel mill and once as an output of the automobile manufacturer.

After eliminating for the effects of double counting, exports of manufactures as a share of the net output of the manufacturing sector are higher (at 18.3 percent) than the share of exports in shipments. By any measure, however, exports constitute a siza-

ble and increasingly important source of demand for U.S. manufactured products.

That is the key point.

A disproportionately large share of exporting of manufactured goods is done by a few large innovative firms. Of the approximately 39,000 U.S. firms that export manufactured goods, the largest 200 exporters account for over 40 percent of all manufactured exports, and the largest 10 firms account for about 15 percent of U.S. manufactured exports.

Mr. President, I do not think we should be deceived by those statistics. First of all, 39,000 U.S. firms are engaged in the export of manufactured goods—not agricultural products—manufactured goods—not raw materials, not lumber products, but manufactured goods.

Mr. President, many of those 39,000 U.S. firms obviously are small so that when it says that the largest 200 exporters account for over 40 percent of all manufactured exports that should in no way denigrate the fact that the remaining 38,800 firms do not substantially contribute to employment in the United States because through their exports they are able to improve their employment.

I move down to the next paragraph.

The United States has often been seen to have a comparative advantage in exports of industrial goods involving high amounts of skilled labor, advanced technology, and sophisticated capital equipment and/or entrepreneurial skill in their production. In high wage countries such as the United States (or West Germany), industries involving standardized production techniques or that utilize a high proportion of only moderately skilled labor are unlikely to be able to penetrate foreign markets to any substantial degree.

I think that is a further amplification of the point I made earlier, that the smaller firms, the 38,800 smaller firms in the United States that are engaged in exports are not in many instances the most sophisticated, are not large employers, in many instances, but to them and to their employees it is just as important as it is to the largest companies. After all, a job for a job-holder in a small firm is just as important as the job to a jobholder in a large firm.

There are several tables here of which I might get into considerable detail later on, but I will continue with the text:

This view of the determination of U.S. comparative advantage is at least partially confirmed by the industrial makeup of U.S. exports of manufacturers. The nonelectrical and electrical machinery, transportation equipment and scientific and professional instrument sections—all industries involving intensive use of research and development—show above average dependence on export markets. The tobacco and chemical industries also show moderate export dependence. As would be expected, however, the textile and apparel industries are not heavily export-oriented.

That comes forward in table 11, which is of considerable interest. Textiles have, nonetheless, even though we say that it is not significant for textiles, nonetheless \$700 million, three-quarters of a billion dollars is exports. As a rule of thumb, Mr. President, we use 30,000 jobs for every \$1 billion of exports. In other words, for every \$1 billion that the U.S. exports 30,000 jobs are created in the United States, and I believe that is an important figure to remember.

There is a lot of talk around here about jobs and protectionism and, of course, the chief sponsor of this amendment I believe would freely acknowledge that it is protectionism, the ultimate in protectionism. What more protectionism can you get than Buy American, wrap it up in the American flag, serve it to the American public, take care of the highest paid workers in the United States of America, do in the rest of the workers, the lower paid workers and call it good legislation.

By whatever name it travels under it is protectionism and it is bad legisla-

Overall, nearly 1.2 million jobs in manufacturing in the United States are directly related to exports and another 1 million jobs are involved in producing components and parts for use by plants producing for exports. A further 1.3 million employees in nonmanufacturing industries supply materials and services to the manufacturing sector for export production. In all, nearly 3.5 million jobs are associated with exports of manufactured goods.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator might yield to me without losing his right to the floor, without interruption appearing in the Record, without counting as a second speech under the rules of the Senate.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. BAKER. Mr. President, will the Senator yield to me under those conditions?

Mr. CHAFEE. I am glad to yield under those conditions.

Mr. BAKER. Mr. President, it is almost 1 p.m. The Baker substitute is a long document that was filed late yesterday and has not yet been printed by the Public Printer and thus some Members who may have amendments they wish to get in before the qualifying deadline is reached under the provisions of rule XXII it seems to me that it would be fair and equitable to extend that time.

I have discussed this with the minority leader who has no objection to it, I am told.

I wish now to put this request.

I ask unanimous consent that the time for filing amendments pursuant to the provisions of rule XXII be extended from 1 p.m. until 3 p.m., today; provided, however, that no other provisions of rule XXII shall be affected or waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Senator for yielding.

Mr. CHAFEE. Mr. President, continuing on this extremely fascinating section of the book dealing with manufacturing jobs which is so pertinent to the matter we are discussing here today. The matter we are discussing, as the junior Senator from Pennsylvania I am sure would hastily acknowledge, is the question of manufacturing jobs. It is the question of steel and the attempt by the proponents of the underlying amendment to protect those jobs regardless of the cost to other American workers.

As I said:

In all, nearly 3.5 million jobs are associated with exports of manufactured goods.

About 400,000 of these export related jobs in manufacturing are in the nonelectrical machinery sector and about 300,000 export related jobs are in the electrical machinery sector. Another 250,000 export related jobs are in the transportation equipment industry.

The importance of exports in total manufacturing shipments varies significantly across states.

That is rather curious, while I suppose understandable, that we would find the exports in total manufacturing shipments varying across the different States.

In most of the larger industrial states, including California, Illinois, Michigan, Ohio, and Pennsylvania, export-related jobs (including the supply of parts and components) are about 12 percent of total manufacturing employment.

Even in New York—is that not interesting, going back—those larger States include Pennsylvania, where their export-related jobs are about 12 percent of total manufacturing employment.

Even in New York where the proportion of export-related manufacturing employment is lower than the national.

There is an interruption of some five pages of extremely interesting graphs and charts to which I will refer later, and I will want to pursue in some detail because they present, each of them, a fascinating delineation of the importance of exports to the United States and, indeed, take it up State-by-State. But I do not want to divert to that now because I am in the middle of this section.

Even in New York, where the proportion of export-related manufacturing employment, is lower than the national average, over 150,000 jobs or about 10.5 percent total manufacturing employment is export-related. While several States, such as Delaware, Montana, Nevada, and New Mexico, which export only a very small proportion of their manufacturing output, these States also have very small manufacturing sectors.

In some States the indirect employment effects of manufactured exports are crucial in providing manufacturing employment in the area. For example, the largest single employer in the manufacturing sector in the

State of Washington is Boeing Corporation, which exports 56 percent of its output.

I wonder if the President and others had though about that carefully. And that is not, I presume quantity; that must be by dollars, 56 percent is exported.

Moreover, many additional jobs in manufacturing in the State of Washington depend on supplying Boeing with parts used in aerospace construction and so depend, indirectly, on the exports of the Boeing Corporation.

I think it is no secret, Mr. President, that the Boeing Corporation is encountering severe competitive problems from Airbus which, as we all know, is an amalgamation of several nations, principally France and Great Britain.

Airbus is a major threat to the United States and to Boeing, and certainly I do not think that in this Senate we want to be part of an effort to cut off Boeing from its export markets as a result of retaliation that might be prompted by this iniquitous legislation before us today, this totally Buy American provision.

Exports also provide a source of stability in manufacturing sales and employment, helping to smooth out fluctuations in domestic demand. Again the Boeing Corporation provides an excellent example from the Aircraft industry, wherein for a period of 18 months in the early 1970's, no orders were received for commerical aircraft from domestic companies.

Think of it, Boeing went for 18 months without a single order from a domestic company.

(Mr. STEVENS assumed the chair.)
Mr. CHAFEE. Continuing:

During this period nearly all the jobs in the Boeing Commercial Aircraft Company, the commercial jet division of the Boeing Corporation, were dependent on exports. As the share of exports in total production of U.S. manufactures increases, the stabilizing role of export markets could become even more important.

A more detailed breakdown of these industries having the largest number of exportrelated jobs in manufacturing within each State is given in table 13.

Mr. President, at this particular time I will not pursue the tables because I think we now would like to move into trade in services, a chapter which starts on page 47.

Mr. President, you might say trade in services has nothing to do with what we are discussing today because what we are talking about is a manufactured product, namely, steel, and the effect that this prohibition against the use of any imported steel on federally funded bridges, highways, or the effect of any imported cement or any imported product—as a matter of fact, if I read the amendment of the Senator from Ohio correctly, any product used in the construction of these bridges imported would be prohibited, not just 50 percent, not just 75 percent. This is a measure that goes all

the way. This is the ultimate in greed. This is the ultimate in special interest legislation the likes of which we have not seen on this floor for some time, and that is a big statement, Mr. President, because we see a lot of special interest legislation, special interest legislation for an individual, for a few, for a company, whatever it might be, and often there is some justification that can be prompted for the support of this legislation.

But here we have the grandfather of them all.

Let me move now to the section on trade in services, which is a growing sector of U.S. exports, and if there is going to be retaliation, as everybody who is familiar with this field expects, as a result of the passage of this amendment, should it pass, then trade in services, that growing area in U.S. exports will suffer as well.

This is what the authors have to say about trade in services:

Trade in the services sector in the United States has traditionally been a neglected area in most analyses of trade patterns. A major factor inhibiting a detailed discussion of the contribution of the service sector to U.S. international trade has been the lack of readily available comprehensive data on the service sector, and even a lack of consensus on the definition of the service sector itself.

What are services?

Exports and imports of services is one area where the definitions adopted by statisticians in deriving estimates of the nation's gross national product differ significantly from what most non-statisticians would imagine the term to mean. The scope of the service sector itself is very broad and includes a wide variety of heterogenous activities. Under many U.S. definitions, the service sector includes those industries providing health, legal, engineering, and other professional services, personal, business, repair, and amusement services, educational institutions, and hotels.

Who would have thought of that, hotels falling in the service industry? But, indeed, it should.

Often the financial sector, wholesale and retail trade sector, insurance and real estate, and even transportation and utilities industries are also included in the definition. Indeed, the service sector is more reasonably defined by what it is not rather than what it is-the service sector broadly consists of those private sectors not engaging in primary production or manufacturing activities. The contribution of these sectors to gross national product is shown in Table 14 below.

Well, I think this is of such interest, this particular chart, Mr. President, that I will bring it to the attention of my colleagues. It is interesting how significant these dates are.

Let us take the 1979 figures. Transportation, 3.9 percent of GNP; communications, as you would expect is significant, 2.6; utilities, 2.6; wholesale and retail trade, 16.6; finance, insurance, and real estate, 13.8; miscellaneous, which is not defined, 17.9; and the total private service sector 57.4.

Mr. President, interestingly enough, there is a large growth from 1947 to 1979 in the share that the services constitute of the GNP. For example, the total private service sector in 1947 constituted 46.3 percent. In 1979, that had grown from 46.3 percent to 57.4 percent. That looks to me like a 25percent increase.

Now I think the point that should be stressed, Mr. President, is that the total private service sector of the GNP is growing, and I think we are all aware of that. It is growing signifi-

cantly.
Mr. President, I believe the junior Senator from Pennsylvania would like to explain his amendment. If he is prepared to go forward, I would be pleased to yield to him.

Mr. SPECTER. Mr. President, if that inquiry is to me, I am prepared to go forward.

Mr. CHAFEE. On that basis, Mr. President, I yield the floor to the Senator from Pennsylvania.

Mr. SPECTER addressed the Chair. The PRESIDING OFFICER. The

Senator from Pennsylvania.

Mr. SPECTER. I wish to thank the Senator from Rhode Island for his extraordinary graciousness in yielding the floor. I am advised that it is without precedent for a Senator to challenge for the floor before a Senator who has introduced a pending amendment has had an opportunity to explain and comment on his amendment, as the Senator from Rhode Island has undertaken to do here today.

compliment the Senator Rhode Island on his perhaps brilliant but definitely spirited speech. It is a shame that it is totally irrelevant to the subject matter which is pending before this body, which is not the amendment of the Senator from Ohio, but rather the amendment in the second degree in the nature of a substitute of the Senator from Pennsylva-

The Senator from Rhode Island has gone on at length about the Metzenbaum amendment, when, in fact, the relevant matter which is pending is the proposal which has been referred to as the Specter amendment.

But in order that the statements by the Senator from Rhode Island not be wasted, I modify at this time my amendment by changing it from a substitute to a perfecting amendment so that my language will be added at the end of the amendment of the Senator from Ohio.

Mr. President, the issues raised by the amendment which I have presented are those embodied in Senate bill 2167 and several previous proposed amendments, on which there are a number of cosponsors, including the junior Senator from West Virginia (Mr. ROBERT C. BYRD), the junior Senator from Mississippi (Mr. Cochran), the senior Senator from Utah (Mr.

GARN), the senior Senator from Alabama (Mr. HEFLIN), and the junior Senator from New York D'AMATO).

The essence of 2167, which is now the pending matter in the nature of a substitute, would open Federal court jurisdiction to make a determination of when there is dumping. And by "dumping," I mean when goods are sold by foreign importers below the cost of production or when sold in U.S. markets at a price lower than that sold in their home markets.

The arguments which have been advanced so far today by the Senator from Rhode Island and the Senator from Missouri are essentially arguments against protectionism which they say is being induced by the amendment of the Senator from Ohio. There are valid considerations against limiting free trade. That is a matter which has been established over the course of many, many years.

But an essential ingredient of free trade is fair trade, and that means the absence of dumping and the absence of subsidies. And, regrettably, the facts of life in the United States are that there is massive dumping and there are massive unfair trade practices which extend not only to the steel industry but to many, many other industries in the United Statesto mushrooms, to leather, to textiles, to cement, to virtually every product which is sold in our markets.

It is plain that the laws of this country prohibit dumping. It is equally plain that there are no effective remedies available to stop that dumping. The procedures before the International Trade Commission are totally ineffective. They take a very protracted period of time before they are complete. When they are completed, they are ineffectual because they are invariably prospective only. They are ineffectual because they do not grant damages to the injured parties and they do not stop the dumping.

The International Trade Commission has had some value, however, in establishing certain basic facts. Recently in the proceedings involving steel there was a factual determination made that British steel was being subsidized to the extent of \$250 a ton. In November 1982, last month, there was a meeting of the British-American parliamentary group in the south of England where the issue of trade and the issue of subsidies was a heated topic of conversation.

I had the opportunity to be one of the representatives in the U.S. delegation. The point that we made was that there had been dumping by the British, specifically with respect to steel, pointing to the findings of the Inter-national Trade Commission on the subsidies of \$250 a ton. The British Minister for Trade, Mr. Peter Rees, vehemently denied that there was subsidies as to British steel and quite a controversy arose over that issue.

Two days later, a lead article in the business section of the London Observer on November 14 contained factual information that the British Steel Corp. was losing <sup>1</sup>1 million daily and the Government would soon be faced with a <sup>1</sup>1 trillion bailout unless immediate action was taken to close certain factories.

During the course of the next week I had the opportunity to observe the proceedings in the House of Parliament which was fascinating when the Minister, Mrs. Margaret Thatcher, appeared to respond to questions from both her side of the aisle and the other side of the aisle during a 15-minute period. One irate questioner asked about the future of the giant Ravenscraig steel works where the British press had earlier reported that some 14,000 jobs were involved and 1,000 acres would become blighted if the plant were, in effect, closed.

Certainly, Mr. President, these factors demonstrate conclusively, I would suggest, that there are massive subsidies to British steel. I think the evidence is equally compelling as to imports on steel from Benelux countries, from many countries around the world, including subsidies as to Japanese steel.

I had occasion to meet with representatives of the Japanese steel industry on a visit to Tokyo on January 18, 1982. At that time, in an exchange with these Japanese steel officials, I raised the question about some orderly resolution of the dumping issue and raised the possibility of judicial action with a remedy such as the one which is encompassed in S. 2167, which is the matter now pending before this body.

At this time, Mr. President, I will read a letter which I wrote to the Honorable William E. Brock, U.S. Trade Representative, dated January 19, 1982. The letter summarizes the issue. The letter reads as follows:

U.S. SENATE, Washington, D.C., January 19, 1982. Hon. William E. Brock,

U.S. Trade Representative, Washington, D.C.

DEAR BILL: As part of a Congressional delegation visiting Japan, I had an opportunity to meet with a number of top-level executives in the Japanese steel industry. Mr. Akio Toyoda, Managing Director of Nippon Steel Corporation, hosted a luncheon for me on January 18, attended by representatives of the Sumitomo Metal Industries, Nippon Kokan, K. K., and Kawasaki Steel Corporation. I also had the opportunity to visit the Nippon Kokan, K. K. steel mill outside Tokyo.

My conversations with the Japanese were useful and informative. We discussed one particular topic which is especially important and should be pursued—the issue of Japanese steel exports to the United States.

During our discussions, I raised with the group the position of Thomas Graham,

President of J and L Steel Corporation of Pittsburgh. Mr. Graham believes strongly that quotas should be imposed on Japanese steel exports to the United States. He has made his position clear both in Congressional testimony and in a personal conversation with me in December while I visited the J and L Aliquippa plant where several hundred people have recently lost their jobs.

In addition to discussing Mr. Graham's proposal, I also brought up the possible authorization of private actions in U.S. Federal Courts to enforce violations of provisions such as the Trigger Price Mechanism (TPM).

In response, Mr. Toyoda argued in favor of diplomatic and political solutions to problems in international steel trade. He said that the Japanese steel industry was prepared to cooperate with the United States and that, if an antitrust defense were available because of an official, government to government, request, Japan would limit exports to the United States. He made that remark during a discussion of issues which included U.S. problems with European steel exports and it may be that his suggestion was in the context of not filling the market gap occasioned by potential restraints on European exports. But the important point is that representatives of the Japanese steel industry expressed a willingness to cooperate with the United States and limit exports. None of the Japanese executives at the luncheon disagreed with Mr. Toyoda's comment about limiting Japanese steel exports to the U.S.

I would appreciate your office pursuing the issue of limiting Japanese steel exports to the U.S.

I am considering introducing legislation that would provide an exemption from liability under federal or state antitrust laws where foreign producers voluntarily limit their exports to the U.S. in response to an official U.S. government request. The Japanese are very concerned about liability on antitrust grounds and, if they are willing to cooperate with us in restraining exports, we should try to eliminate that liability. I have reviewed the exchange of letters between the U.S. Attorney General and the Japanese government occurring in connection with the Japanese decision to voluntarily limit exports of autos to the United States. In my own view, the correspondence does not fully protect the Japanese from antitrust action. although it would strengthen their position in a U.S. court. I would very much appreciate your reaction to proposed legislation for an antitrust exemption in this situation.

Senator Cochran and Senator Symms, who were also in Japan, although not at this particular meeting, have authorized me to say that they are in favor of such an antitrust exemption.

I am writing to Secretary of Commerce Baldrige with this same message.

Thank you for your consideration of these matters.

Sincerely yours,

ARLEN SPECTER.

Mr. President, I will next read into the Record a letter from Mr. Brock to me, dated January 26, 1982. The letter reads as follows: THE U.S. TRADE REPRESENTATIVE, Washington, January 26, 1982. Hon. Arlen Specter,

U.S. Senate, Washington, D.C.

DEAR ARLEN: This is in reply to your letter asking my Office to seek limitation of steel imports from Japan.

I share your concern about the currently depressed situation of the American steel industry. I believe the steel import problem must be dealt with effectively if the industry is to be able to raise the massive amounts of capital needed for its thorough modernization.

However, removal of the stringent antitrust constraints for acceptance of offers of voluntary export restraint would not be a desirable step. The aim of the President's economic recovery program is to encourage the freest possible play of market forces as a means of stimulating competition, investment and efficiency. In the long run, there is no other basis for the stable, noninflationary growth that we seek. To freeze the market shares of foreign competitors by way of voluntary restraint or any similar agreement would significantly lessen the responsiveness of producers, here and abroad, to market forces.

It is just such a lack of responsiveness to changing market conditions that has produced our current steel problem. Many of our foreign competitors, particularly in Europe, have maintained excess, inefficient production capacity only with the help of ever greater injections of public capital. It is this condition that makes steel a chronic problem, and it is this condition that will have to change if we are to have any lasting peace in international steel trade. That is why we insist in our dealings with the European Community that solution of the steel problem requires action to phase out their subsidies and eliminate their excess capacity.

Toward that end, the Commerce Department last year launched on its own initiative ten countervailing duty and antidumping investigations. Despite this unprecedented trade law enforcement effort, the domestic steel producers have decided in recent months to file sweeping complaints of their own, involving ten products from thirteen countries. As a result, the Administration had no choice but to suspend the trigger price mechanism. However, it is important to keep in mind that the TPM was only a device to help us do what we are now doing on a massive scale-enforce the unfair trade laws. I can assure you that every well-founded complaint will be vigorously and expeditiously investigated and that special duties will be imposed whenever dumping or subsidization and injury are proven.

This approach, together with the President's economic recovery program to stimulate savings and investment, offers the best hope of a lasting and effective response to the problem of subsidized competition from abroad.

Let me also note that, despite our many trade problems with Japan over the past several years, rising steel imports have not been an issue. In fact, our imports of steel mill products from Japan have decreased rather steadily since 1977, falling 21 percent by 1981. As a result, the Japanese share of the U.S. steel import market has fallen from about 40 percent in the early 1970's to about 31 percent in 1981. Moreover, the Japanese seem to be making a concerted effort to shift into product lines that are less import sensitive, particularly the pipe and tubing categories in which the U.S. domestic

Authorization for such private actions would require new legislation. I understand that the TPM has recently been suspended.

supply is inadequate to meet demand in the booming oil and gas sector.

Very truly yours.

WILLIAM E. BROCK.

Mr. President, the pendency of S. 2167 received one very interesting inquiry which I considered to be a testimonial to the importance and efficacy of S. 2167. It is a seven-page, single-space letter from the chief executive officer and chairman of the Sony Corp., Akio Morita, headquartered in Tokyo, complaining about Senate bill 2167. The complaints by Mr. Morita are an eloquent testimonial to the efficacy of S. 2167.

Mr. President, I ask unanimous consent that this letter be printed in the

RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

Sony Corporation, *Tokyo, August 18, 1982.* Re: S. 2167, a Bill To Amend the Antidump-

ing Act of 1916. Hon. Strom Thurmond,

Chairman, Committee on the Judiciary, U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to express my concern about S. 2167, a bill to amend the Antidumping Act of 1916 which is currently pending before your Committee. The bill would expose importers to the payment of money damages and to a ban against importation of their merchandise if they are included in dumping findings that are issued by the Commerce Department in administrative antidumping investigations. With all respect, I would like to register my strong opposition to the bill.

Please understand that I certainly do not favor unfair import practices. My company, Sony, has been in the American market for over 30 years, and we have worked hard to establish a reputation for quality and integrity. Also, I am not speaking only as the chairman of a Japanese company that exports to the United States. Sony has a major stake in the American economy. We have invested millions of dollars in U.S. plants and are employing about six thou-

have invested millions of dollars in U.S. plants and are employing about six thousand American workers. Today about 80 percent of all the Sony televisions sold in the United States are made in America using American components and American labor.

I oppose S. 2167 because I believe that it is unnecessary and unfair. Passage of this bill would not solve the real problems of U.S. companies that are suffering from foreign competition, and it might only serve to divert management attention from the real tasks at improving productivity and quality control. The bill would only produce more lawsuits—not more jobs. I am sure you will agree that the American legal system does not suffer from any shortage of litigation. I fear that passage of the bill would only encourage the tendency of some American companies to engage in legal harassment of their foreign competitors.

I understand that your Committee has held several hearings on S. 2167 and a similar bill, S. 2517. At the June 24 hearing the Assistant Secretary of Commerce for Trade Administration and the General Counsel of the Office of the U.S. Trade Representative testified that these bills are unnecessary because domestic producers can already get adequate relief under current law, and they also pointed out that the bills may violate

the International Antidumping Code. This testimony raises serious legal and policy concerns which merit close attention by your Committee. I also think these bills, S. 2167 and S. 2517, are unnecessary. I would like to focus on S. 2167 to present my arguments here. I am particularly concerned about the provision in S. 2167 which incorporates administrative antidumping determinations into the Antidumping Act of 1916 and makes importers subject to severe sanctions under the 1916 Act if they are included in antidumping findings under the Trade Agreements Act of 1979.

S. 2167 permits the recovery of damages from importers and a prohibition against imports without any proof of predatory intent. The bill defines dumping in the same terms as the antidumping provisions of the Trade Agreements Act of 1979, and it provides that a final determination of sales at less than fair value by the Commerce Department or of injury by the International Trade Commission in an administrative antidumping proceeding will constitute evidence of a violation of the amended Antidumping Act of 1916. After the Commerce Department or International Trade Commission decision is made the Court can prohibit the importation or sale of the articles concerned until the completion of the suit. and the defendant will have the burden of proving that he has not violated the law. In my opinion, such severe penalties for what could very well be unintentional acts have no place in the American system of justice.

The drafters of the bill may have been under the impression that foreign producers and importers can easily determine whether they are selling at dumping prices. That is simply not true. The law and the regulations are extremely complex and are subject to shifting interpretations. Many of the critical judgments under the antidumping law are left to the discretion of the Commerce Department and the International Trade Commission, and rulings on those issues cannot be predicted with any certainty in advance.

For example, the difference between a price that is considered "fair" and one which is considered "unfair" may depend entirely on whether Commerce considers an expense incurred in home market transactions to be "directly related" to the sale of the merchandise in the home market or to "an overhead expense." If it is the former, the expense will be deducted in the calculation of fair value; if it is the latter, it will not. Whether or not the expense is deducted can make all the difference in the Commerce Department's determination of whether the prices for exportation to the United States are above or below fair value. Yet a foreign producer must take all expenses into account in setting his home market and export prices, whether those expenses are "directly related" or "overhead," and he cannot be expected to predict U.S. Government rulings on such technical distinctions before an investigation is institut-

Antidumping rulings are particularly unpredictable during a period of fluctuating exchange rates. A price which is at fair value can be transformed into a dumping price merely because of a decline in the value of the dollar relative to the foreign currency.

It is often impossible to predict exchange rate movements or to adjust prices quickly enough to avoid being placed in a dumping position because of exchange rate fluctuations. (The Commerce Department allows

only a 45-day grace period.) It is bad enough that importers who cannot adjust their prices in time may have to pay dumping duties merely because of a currency change. It is unconscionable to also ban their imports and to require them to pay damages for matters over which they have no control.

America's trading partners have frequently complained about the unpredictable and technical nature of calculations under the U.S. antidumping law and the exposure of foreign producers to harassment through litigation. This matter was analyzed in the January 1981 report of the Japan-United States Economic Relations Group (the so-called "Wisemen's Group"). The report demonstrates the unfairness of imposing retroactive penalties in addition to antidumping duties. It described the unpredictability of antidumping rulings in the following terms:

"There is a tendency in the United States, especially in Congress, to believe that a clear dividing line can be drawn between "fair" and "unfair" trade practices which can be readily determined by the administering authorities. In fact, the existence of "dumping," "subsidies," and other alleged "unfair trade practices" is often extremely difficult to establish, and it is all the more difficult to set appropriate margins of relief. Variations in products between home market and foreign markets, in manufacturing processes, in business practices, in taxation systems, and the like, do not permit the kind of precision on which the American laws are premised." (page 93)

But it went on to point out that this unpredictability is not a serious problem be-

cause the law is prospective.

"Foreign manufacturers often cannot determine in a technical sense whether or not they may be dumping, but since the laws are prospective, if foreign manufacturers have mistakenly believed they were not dumping, but are found to be dumping, they can comply and will suffer no penalty." (Id.)

In other words, the saving grace of the administrative antidumping law is its prospective nature. S. 2167 would eliminate that saving grace and would make the law retroactive and penal. It would not clarify the uncertainties, nor would it provide any exception for companies that were acting in good faith. Any company that finds itself caught in a dumping finding would be subject to a ban on imports and the payment of money damages, no matter how technical and unpredictable the ruling or how much the determination was affected by currency fluctuations beyond its control. I believe that such a result is completely inequitable.

In addition, passage of the bill would be an open invitation to legal harassment. Almost every antidumping petition that is filed with the Commerce Department would be accompanied by a lawsuit filed in a U.S. District Court under the amended Anti-dumping Act of 1916. As soon as the Commerce Department finds sales at less than fair value the plaintiff would get a court excluding his foreign competitors from the American market until the conclusion of the lawsuit, which could drag on for years. (The bill does not even require a finding of injury by the International Trade Commission before the imports can be excluded.) Plaintiffs would be tempted to file broad complaints so that the exclusion order would cut off as much competition as possible and the ultimate damage award would be magnified by the number of defendants ensnared. They might name every

foreign producer of competing products in petitions under the Trade Agreements Act of 1979 and in lawsuits under the Antidumping Act of 1916, whether or not there is any real evidence of dumping against each of them, hoping that technical rulings or currency fluctuatios would ensnare the "innocent" with the "guilty."

This is no exaggeration. I know whereof I speak, since Sony was unjustly included in the finding of dumping that was issued on Japanese television sets in March 1971, even though Sony's prices were the highest in the American market, and even though Sony was cleared of dumping charges during the fair value investigation. Sony was included because the Treasury Department had adopted the policy of issuing all findings of dumping on a country-wide basis. It took four more years to persuade the Treasury Department to exclude Sony from the dumping finding, and even then Sony had to go through more years of investigation and bureaucratic confusion over the liquidation of entries that were made up to the date of Sony's exclusion. What is worse, the fact that Sony was erroneously included in the original dumping finding led to its being named as a defendant in a lawsuit that was filed under the Antidumping Act of 1916 and the antitrust laws. After ten years of litigation the complaint against Sony was finally dismissed in 1981 when the court affirmed Sony's longstanding position that it has never engaged in illegal pricefixing tactics and in fact has always sold its televisions in a fair and legal manner in the United States. The case is now under appeal. If S. 2167 had been in the law at that time, Sony could have been prohibited from importing television sets during the entire ten years of the case merely because it was included in the original dumping find-

There is a real risk that such an injustice could occur if this bill is enacted. The Commerce Department regulations permit exclusion of an individual foreign producer from an affirmative determination only if all of the company's exports to the United States during the period under investigation were made at fair value prices. Even a single sale at a small margin is enough to bring a company within an affirmative determination. If the company does not qualify for exclusion from the original finding, it can revise its prices to eliminate dumping margins and can be excluded later if it can demonstrate that it has made no sales at less than fair value for at least two years after the finding is issued. But all of this would be to no avail if S. 2167 were enacted. Such a company would be subject to a court order excluding its merchandise from the United States during the pendency of a lawsuit which could last many years, and it might ultimately have to pay damages to one or more domestic manufacturers.

I appreciate the opportunity to present my views on this legislation, and I hope that my comments will help to point out the serious problems with S. 2167. Despite all of the trials and tribulations of U.S.-Japan economic relations, I have always had faith in the essential fairness of the American legal system. I trust that the Committee will recognize the unfairness of S. 2167, and will ensure that such legislation is not enacted into law.

With best regards, Sincerely yours,

Akio Morita, Chairman. Mr. SPECTER. Mr. President, it is my view that to the maximum extent possible the United States should adhere to the principles of free trade. If we are to stay with the principles of free trade, it is indispensible that we stop unfair trade practices and stop dumping.

The current remedies are totally insufficient. There is no reason why existing U.S. law, such as the one which prohibits dumping, should not have an effective remedy in the U.S. court. It is well-known that the U.S. courts are open to virtually every sort of a claim or counterclaim and that, in fact, our courts are inundated with litigation which really ought not to be in court. But if there is any controversy which is important to the people of this country and to the people of the world it is the controversy as to whether there is dumping on the United States to the detriment of very important industries in the United States.

The debate today has principally involved the steel industry, but similar arguments could be made and similar considerations could be given as to other industries. The steel industry is perhaps significant because of its indispensable role in defense. If permit foreign imports to dry up the American steel industry, then one day we may well face a national emergency without the steel industry with which to defend ourselves, similar to the way we have faced energy shortages when OPEC nations raised the price of oil on the market. We might face a similar situation with respect to the steel industry.

We might find a similar situation with even an industry like the glove industry. On Saturday of this week I met with officials of a small glove manufacturing company in Brookville, Pa., who brought a complaint to me about unfair trade practices on those who import gloves.

Gloves might not seem enormously important at first blush, but the point was made by those representatives that in time of industrial expansion, gloves are indispensable if we are to be able to mobilize for national defense. During World War II many workers in important and essential industries were compelled to work with stockings on their hands. So the glove industry is very important to our Nation's welfare.

Mr. President, the issue ranges all the way from steel to gloves, catching many, many industries in between, industries like mushrooms, which are an essential part of the industry in Pennsylvania and being victimized by unfair trade practices.

If foreign exporters seek U.S. markets, it is eminently fair, I submit, Mr. President, that they should be subject to U.S. court jurisdiction.

Our courts have a tradition for fairness. The text of my law would give

exclusive jurisdiction in these suits to the U.S. District Court for the District of Columbia in order to avoid any possible worry that a court in any particular American city might be overly concerned with the local industry. By having jurisdiction limited to the U.S. District Court for the District of Columbia, expertise could be developed and impartiality could be doubly assured.

There is ample precedent for that procedure by analogy to the provisions of the Voting Rights Act, where jurisdiction is limited to the U.S. District Court for the District of Columbia.

The Federal courts have shown the ability to handle complex matters in relatively short periods of time. Last year a complex piece of litigation was handled by a U.S. District Court in Ohio, involving efforts by Mobil Oil Corp. to take over Marathon Oil. That case involved complex facts and complex law. In the course of a few weeks, it was decided and an extensive opinion was written on the subject.

So the process could be handled on an expeditious basis.

It would also be appropriate to have available the discovery procedures of the Federal Rules of Civil Procedure so that, if a company seeks to sell in the United States, a foreign company, it should be compelled to respond to factual matters as can be developed through the discovery rules to make a determination as to whether there is or is not dumping. Once an injunction is issued, that injunction would be in force and effect and would stop further imports until an appellate court had reversed, if in fact that were to be the case, so what judgment can be rendered in the course of a few weeks need not await the lengthy, time-consuming processes of appellate court procedure, absent the posting of a bond, which is highly unlikely under such considerations and in such cases.

I suggest, Mr. President, that the current matter pending before the Senate, the gas tax, is a very appropriate, relevant, and germane bill for the consideration of this legislation because, in repairing the infrastructure of the United States, there will be the purchase of much by way of materiel. We ought not to be spending American tax dollars to buy subsidized goods which are unfairly competing with the American taxpayers who are paying for the purchase and the construction of those public projects.

This bill has been pending before the U.S. Senate since March 4. I am amused by the comments of the Senator from Missouri and the Senator from Rhode Island about the absence of hearings. Hearing were requested of the Finance Committee so that that committee could consider this matter, hear the evidence, and take whatever action it deemed appropriate. Somehow, the Committee on Finance and the subcommittee chaired by the junior Senator from Missouri have not seen fit to undertake those hearings. I suggest that it is hardly an appropriate objection to the consideration of this amendment at this time that such hearings have not have held when the responsibility for not holding such hearings rests with the person who did, in fact, raise that objection.

Mr. President, if this amendment is adopted and if the Federal courts are open for jurisdiction, I suggest that the purpose of broader legislative action in the nature of protectionism may well be avoided. We may be able to enact this gas tax without having the provisions which were sent to us by the House of Representatives on buying only American steel and American concrete for the construction of the roads, bridges, and other aspects of the infrastructure being addressed by this legislation. I suggest that no one can really object to a procedure which guarantees fair trade practices, which is at the heart of free trade. No one should object to having matters of controversy determined by the Federal courts in this country, which have long been a bastion of protection of rights, individual and property rights, and the dispensation of justice in a way which is unequalled, certainly unexcelled, in the history of the world.

I thank the Chair and I yield the floor.

Mr. STAFFORD. Mr. President, would the distinguished Senator from Pennsylvania, the author of the amendment, be willing to answer a few questions?

Mr. SPECTER. I would be delighted to respond to any questions of the distinguished senior Senator from Vermont.

Mr. STAFFORD. I say to my good friend from Pennsylvania that I think many of us can understand the concerns we have with the invasion of American markets by foreign countries which export to us and, in some cases, without allowing us any reasonable access to their markets in return. The Senator from Vermont believes generally in free trade, as I understand the Senator from Pennsylvania does. The Senator from Vermont is somewhat concerned with the Senator's amendment at this time. It appears to the Senator from Vermont, and I therefore ask my friend from Pennsylvania, have hearings been sought in the Committee on the Judiciary with respect to this legal proceeding which is established under his amendment?

Mr. SPECTER. Yes, hearings have been sought, hearings have been held.
Mr. STAFFORD. They have been

Mr. SPECTER. Yes, Mr. President. Mr. STAFFORD. Has the committee taken any action following hearings? Mr. SPECTER. The committee has not taken action on the bill.

Mr. STAFFORD. It would appear to the Senator from Vermont that he would be more comfortable if this amendment had had action on the part of the Judiciary Committee with respect to it. The Senator says that partly because we think it establishes a complicated system of judiciary handling of matters and partly because, for the first time in this Senator's experience in the Senate, we find large numbers of amendments being added to the highway portion of this bill which deals with taxes, highways, mass transit and so on. The Senator from Vermont hates to see the highway portion of this bill, in effect, Christmas-treed, which may sink the whole program of its own weight. While the Senator from Vermont is in some sympathy with what the Senator from Pennsylvania is trying to do here, we respectfully think it is the wrong place and the wrong time to do

Mr. SPECTER. Mr. President, I understand the arguments being made and considerations being raised by the Senator from Vermont. I respond by saying that I have sought action by the Judiciary Committee. That committee has had a very crowded calendar. I have sought, on at least a half-dozen occasions, to find a way of presenting this measure for action by this body. On those occasions, I have been met with the consideration, "This is not the appropriate time to do it; there ought to be hearings."

The reality is that given our workload and our business, there is hardly any time to do it or any time which is appropriate. Here we have an occasion which I think is uniquely appropriate. Why? Because American workers are being asked to pay 5 cents a gallon more for gasoline. If current practices exist, they will be paying out of their own pockets to foreign importers selling with unfair trade practices which have cost them their jobs. It is a very bad picture, succinctly stated, of an unemployed steelworker, hardly the profiteer characterized by the Senator from Rhode Island, who is paying a gasoline tax which is going to bring in steel which is subsidized and which has cost him his job. I can hardly think of any circumstance which points up more fundamental unfairness. That is because there is no remedy.

The concerns of protectionism may well be alleviated and the broader principle addressed by the Senator from Rhode Island and the Senator from Missouri may be accommodated if this is enacted.

Mr. STAFFORD. I thank the Senator. I ask him one more question: Should his amendment prevail with that of the Senator from Ohio, it would mean 100 percent content for

the construction of highways and equipment used in the construction of highways in this country. I point out, as I did once earlier this morning, that in the Surface Transportation Assistance Act of 1978, Public Law 95-599, adopted on November 6, 1978, provision was made—I shall read it since it is a short paragraph—that requires "more than 50 percent of United States content in supplies, materials, manufacture and articles used in mass transit and highway construction programs."

SEC. 401. (a) Notwithstanding any other provision of law, the Secretary of Transportation shall not obligate any funds authorized to be appropriated by this Act or by any Act amended by this Act and administered by the Department of Transportation, whose total cost exceeds \$500,000 unless only such unmanufactured articles, materials, and supplies as have been mined or produced in the United States, and only such manufactured articles, materials, and supplies as have been manufactured in the United States substantially all from articles, materials, and supplies mined, produced, or manufactured, as the case may be, in the United States, will be used in such project.

There are some exceptions that follow, but I shall not bore the Senate by reading those. I point out that, pursuant to that statute, by regulation, the statute has been interpreted to mean that over 50 percent of domestic components by value must be included in the highway and mass transit programs. There is a considerable body of belief that that strikes a balance between the need to protect our domestic industries and the need to hold down the costs of transportation construction and equipment to both the States and the Federal Government.

I tend to agree with that statement. I ask my friend from Pennsylvania what his reaction is.

Mr. SPECTER. Mr. President, my response is that it is a hard line to draw as to fairness when you talk about partial favoritism for American practices in the range of 50 percent or more extensive preference for American products to the range of 100 percent. In a context where the American industrial scene cannot get basic fairness because the State Department and becayse the Commerce Department are sacrificing important American industrial interests on the altar of foreign policy, then it may well be necessary to proceed with really strong medicine, such as that which has been proposed by the Senator from Ohio, so that only American products would be used or otherwise strong medicine, although not quite as strong by just its content, such as the 50-percent requirement, which I understood the Senator from Vermont to be looking toward.

I cannot in good conscience say to my constituents, a large number of whom are steelworkers, that I would oppose legislation which would be Buy American when they have been so unfairly treated by world trade practices, foreign dumping, and the absence of an effective program by the international trade community. If the trigger mechanism had worked, if we had a way of stopping unfair trade practices, then I would be able to have a very different attitude on the question of preferring American products. But given the facts, I think that tough medicine may be necessary. I think that the legislation by the Senator from Ohio may be necessary even if my amendment is adopted because of the difficulty of implementing my amendment in time to take the proper course on these large expenditures which are going to be made on the gas tax bill.

But I think, first things first, the most fundamental thing is to provide a procedure for justice, and absent that we have to use some tougher and some harsher medicine.

Mr. DOLE. Will the Senator yield?

Mr. SPECTER. For a question?

Mr. DOLE. For a question.

Mr. SPECTER. Yes.

Mr. DOLE. Obviously, the Senator from Pennsylvania understands his amendment very well. It does amend the Antidumping Act, which is clearly the jurisdiction of the Senate Finance Committee. We have had no hearings. We believe—we are checking to make certain-that there was an agreement to have a sequential referral from the Judiciary, or at least referred to our committee following action by the Judiciary Committee. And as the Senator noted earlier, the Judiciary Committee has not yet acted on the proposal. I would just suggest that it may well have merit, but here we are in the last few weeks of the session-not the last few days, in my view, but in the last few weeks of this session-trying to wind up a very important piece of legislation and there are probably 80 or 90 amendments and every one of those certainly probably has a great deal of merit.

I hope that we would not adopt an amendment without hearings, without it having been referred to the committee of appropriate jurisdiction, which is the Senate Finance Committee in this case.

We are starting trade hearings the first or second day we are back in January, the 25th of January, to address not only maybe the problem discussed here this morning but others that we believe are important to deal with.

So I hope that at the appropriate time—I am not certain what the appropriate time will be or what the majority leader has in mind—we may dispose of these amendments. If we could get some agreement to vote on cloture today instead of tomorrow, we might be able to go home early tonight.

That is just a thought.

I would ask for the yeas and nays on the Metzenbaum amendment.

The PRESIDING OFFICER. It would take unanimus consent to order the yeas and nays at this time. There is an amendment pending to the Metzenbaum amendment.

Mr. SPECTER. Mr. President, I ask for the yeas and nays on my pending

amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DOLE. Now is it in order to ask for the yeas and nays—

The PRESIDING OFFICER. It will take unanimous consent to order the yeas and nays on the Metzenbaum amendment at this time.

Mr. DOLE. Do you have any objec-

tion to that?

Mr. SPECTER. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. SPECTER. Mr. President, a parliamentary inquiry. Is it not true that the yeas and nays will occur on the Metzenbaum amendment after the vote on the Specter amendment?

The PRESIDING OFFICER. If they

are ordered, they would occur.

Mr. METZENBAUM. The only objection, I would respond to the Senator from Kansas, is that the minority leader has asked that we add the word "ferroalloy" to the amendment. If that can be included in the unanimous-consent request, I certainly have no problem, and I certainly do not believe that it is of such significance that anyone would care to make it an issue. I doubt that it adds or subtracts anything from the strength of the amendment.

Mr. SPECTER. Mr. President, will the Senator from Ohio repeat the

word that he seeks to add?

Mr. METZENBAUM. The amendment now talks about steel or cement, and the Senators from West Virginia have indicated that they would like the word "ferroalloy" (f-e-r-r-o-a-l-l-o-y) to be added.

Mr. SPECTER. I understand. I

thank the Senator.

Mr. METZENBAUM. It seems to me that if Senators are for this amendment or against it, they are not going to be affected in their thinking as to whether that particular language is included, and so I would say to my friend from Kansas, if he would be good enough to include that as part of the unanimous-consent request, I have no objection.

Mr. DOLE. The Senator from Kansas has no objection, but I understand—

Mr. SPECTER. Reserving the right to object, Mr. President, I am going to be sure that whatever unanimous-consent agreement is entered into it is subject to an understanding that there will first be a vote on my amendment, which is now pending, and after that vote is completed, then there will be a vote on the amendment by the Senator from Ohio.

Mr. METZENBAUM. I think that is understood.

Mr. DOLE. Except that there could be a motion to table, a motion to table both amendments.

Mr. METZENBAUM. It could be a motion to table, a motion to table the second-degree amendment or a motion to table the first and take the second with it.

Mr. DANFORTH. Mr. President, reserving the right to object—

Mr. SPECTER. Mr. President, in the

Mr. DANFORTH. Mr. President, reserving the right to object—

Mr. SPECTER addressed the Chair. The PRESIDING OFFICER. There is a pending request and the Senator has the right to reserve the right to object.

Mr. DANFORTH. Mr. President, I would simply like to make it clear, so there will be no misunderstanding, it is my understanding that the unanimous-consent request does not include any commitment that there be a vote on the Specter amendment or that there be a vote to table the Specter amendment specifically.

Mr. SPECTER. In that event-

The PRESIDING OFFICER. It is the Chair's understanding.

Does the Senator from Pennsylvania wish to restate the unanimous-consent request?

Mr. SPECTER. Mr. President, as part of the unanimous-consent request, I will object unless it is plain that there will first be a vote on my amendment before there is a vote on the amendment by the Senator from Ohio.

Mr. METZENBAUM. Will the Senator from Pennsylvania yield for a question?

Mr. SPECTER. I do.

Mr. METZENBAUM. Does not the Senator from Pennsylvania actually mean that if and when there is to be a vote at all, that the vote in connection with his amendment would precede the vote in connection with my amendment?

Mr. SPECTER. Mr. President, I do not mean that at all. The Senator from Ohio comprehends wrong. If there is a vote at all, the contingency is that there may be a vote on my amendment.

Mr. METZENBAUM. If there is a motion to table, and it is debatable, then the Senator would not have a vote.

Mr. SPECTER. If the Senator means a vote to table, that would be satisfactory. That would be a vote in effect on my amendment. I would be agreeable to having a unanimous-consent agreement that there be succession.

sive votes on the Specter amendment and the Metzenbaum amendment which could be either up or down or in

the form of a tabling motion.

The PRESIDING OFFICER. The Chair is constrained to state that the statement of the Senator from Pennsylvania is not exactly understood by the Chair, because the unanimous consent would permit a motion to table the basic amendment, which would carry with it the amendment of the Senator from Pennsylvania, and there would not be a vote on the amendment of the Senator from Pennsylvania.

In that event, I ask if the Senator from Pennsylvania wishes to restate the unanimous consent and state his

intent?

But the Chair is constrained to say that the interpretation of the Senator from Pennsylvania of the existing unanimous-consent request is not correct.

Mr. SPECTER. Mr. President, I object to the unanimous-consent request.

The PRESIDING OFFICER, Objection is heard.

Mr. RIEGLE. Mr. President, is the floor open at this time?

The PRESIDING OFFICER. The Senator from Pennsylvania has yielded the floor. It is available.

Mr. RIEGLE. I thank the Chair. The PRESIDING OFFICER. Does the Senator seek recognition?

Mr. RIEGLE. Yes; I do. The PRESIDING OFFICER. The Senator from Michigan is recognized.

Mr. RIEGLE. Mr. President, I shall speak briefly. The Senator from Ohio wishes to speak, and I shall reserve the main part of my remarks until he has a chance to speak.

While the chairman of the Finance Committee is in the Chamber, I shall make an observation that I think might be a helpful one in light of the discussion that has been going on

Since I have the floor, this Buy American provision is a very important part of this legislation. Certainly that has been the view of the House of Representatives that has put it into the bill that has come over from the House of Representatives. It is the view of many of us here in the Senate.

While one does not know yet where all the votes lie here in the Senate, it would be my own judgment that if this were not to be part of what emerges in the end as part of this legislation, I think it is very doubtful that we will see legislation pass, whether it be in a few days or, as the chairman says, in a few weeks.

I think this provision is vitally important and lies at the heart of the question of whether we are going to get any kind of domestic job creation help from this legislation. If those who have a keen feeling about knocking it out persist in doing so I think

they do so at the risk that this legislation may very well not pass.

I think this amendment is that important and I think it should be weighed on that kind of scale in terms of the tradeoffs involved here.

Mr. DOLE. Mr. President, if the Senator will yield, I cannot determine what other Senators will do. We are going to try to pass the legislation. There has been no vote on it. No one knows where the votes are on this particular amendment. It may be that the majority leader will wish to table both amendments, or one amendment, or whatever, at the appropriate time.

As far as this Senator is concerned I would just as soon discuss this amendment until cloture is either invoked or not invoked on the substitute and on the bill. But that is a matter that must be weighed after we have had a run at it to see where the votes are.

There are a lot of people who want to kill the bill for different reasons, and this might be another reason for some to vote against the final product.

But it is my hope that as to this measure, which has strong bipartisan support, passed the House of Representatives with an overwhelming vote and came out of the Finance Committee with a 15-to-4 vote, we could proceed with that whether this week or next week or the following week.

The Senator from Kansas certainly

understands we might lose.

Mr. RIEGLE. Mr. President, if I might just say, I further appreciate what the Senator said and he is correct in the fact that this did come over with a strong vote from the House of Representatives, but it also came over with a Buy American provision in the legislation. So I think we run a serious problem back on the House side if they were to be asked in the end to pass legislation that might be in the form of a conference committee report that did not have this provision.

I say further to those of us who have not yet made up our minds on how we might vote on final passage, and there are some of us, and happen to be one, who are troubled about the legislation. I say, until we get all the votes, we do not know where 100 people stand on this, but I think this provision is critical enough that how it is disposed of may very well sort of tell the tale on how this entire bill goes in the end, and I just

offer that for what it may be worth. Mr. DOLE. I thank the Senator.

Mr. METZENBAUM. Mr. President, I rise to indicate, first, that if the Senate decides to accept the Specter amendment that would, in my opinion, strengthen the Buy American amendment that is pending before this body. So, when and if that matter comes to a vote, I intend to support it.

But I wish to respond briefly, not at length, to the Senator from Rhode Island, not about his personal characterizations because he has his right to have his own views and I to mine, but rather to the subject that I think is far more important and that is to his indifference to the concern of unemployed steelworkers and the unemployed in this country generally.

I was rather surprised to see the Senator from Rhode Island so caustic about unemployed steelworkers and talking about how they are living high off the hog.

I wish he would come with me into Youngstown and Cleveland, and I would guess he could come into Pennsylvania, and my guess is he could go to other parts of this country and see the real plight of the unemployed steelworkers in this country. And then after he came and visited the homes of the people who are trying to keep their families together because they cannot find a job and because their unemployment benefits have expired. then I would like to have him come to the Chamber of this Senate and say that those poor unemployed people who want a job are special interests as compared to some of those who are pushing the legislation that the Senator of Ohio has indicated he would make every effort to defeat.

Would he compare the unemployed steelworkers of this country to the timber barons of this Nation who want the Federal Government to relieve them of \$2 billion in liability to this Government? Come now. How can he compare those two, one special interest as compared to the other?

Would he compare those who have been found guilty of price fixing and who want the Price Fixers Relief Act passed, would he say that those who are fostering that legislation can be compared as a special interest with the unemployed steelworkers? I see the Senator from Montana (Mr. Baucus) is in the Chamber who provided the leadership in fighting against that measure. Come now, I say to my friend from Rhode Island. Let us be a little bit realistic.

Or would he consider those who want to be exempted from the antitrust laws so that they may sell beer at a higher price as the same kind of a special interest as those of us who believe we should buy American steel? He must be kidding.

Or would he compare it to those creditors and financial institutions that are attempting to deny the poor who want to go bankrupt in this country the right to go bankrupt because it increases their ability to collect their money? How can he possibly make that comparable to the steel interests?

Or would he compare the whole shipping industry that wants exemption from the Antitrust Act with unemployed steelworkers? I think that he does not understand the issue.

The words alone do not speak nearly as loudly as the facts, and the facts are that there is unemployment in this country and the unemployment in this country will not be totally solved but it certainly would be much ameliorated if we did not buy steel from overseas or cement from overseas or ferroalloys from overseas when we build new bridges and highways and repair those same facilities.

I am saddened. I am not angry. I am saddened, saddened that he would see fit to go into a diatribe against unemployed steelworkers because when they were working they were making a decent wage and because they have decided, and that is their judgment, not mine, that they did not want to change their contract with the steel

industry.

I do not know what kind of workers he has in Rhode Island, but I respect them for whatever they do, and I am concerned about their being unemployed and it is my understanding that a great many of them are unemployed.

I would guess if they were asked whether they would support the Buy American amendment, the people of Rhode Island would support it, and certainly, maybe unanimously, the unemployed in Rhode Island would sup-

port it.

So I am proud of the fact that we have a Buy American amendment here. I am aware of the fact that there may be a motion to table and there will be those who will vote for the motion to table for any one of a number of reasons. But if you truly believe that this 5-cent-a-gallon tax is going to have something to do with jobs in this country, then you have to support the Buy American amendment and you have to vote against any motion to table.

Mr. President, I modify my amendment by adding "ferroalloys" after "steel and concrete."

The PRESIDING OFFICER. The Senator may modify his amendment. He will please send a copy of the modified amendment to the desk.

Mr. METZENBUAM. I thank he Chair and I now yield the floor to the

Senator from Michigan.

Mr. RIEGLE. Mr. President, I rise in support of this very important amendment, and I rise as a cosponsor.

I want to begin by commending the Senator from Ohio for his leadership on this issue as well as to commend the Senator from Pennsylvania (Mr. SPECTER) for his patience and hard work earlier today and in days before now in preparing this amendment, his amendment, and bringing this issue to the floor of the Senate.

I want to make a couple of observations at the outset about the very long minifilibuster conducted by the Senator from Rhode Island earlier today.

I have served in Congress now 16 years between the House and the

Senate, and I was trying earlier to recall a single occasion where I could remember a Senator or a Member of Congress rising to interject himself or herself in the speaking order ahead of that of a person who has just laid down an amendment at the desk and was preparing to speak to the amendment just offered. Today was the first time I have seen that happen, where I have seen one Senator interject himself in this instance before the opportunity afforded someone to speak who had just presented an amendment at the desk, and I thought that was not a particularly good practice to see nor do I think it is particularly appropriate, given the nature of how this institution normally works.

But I must say in terms of the comments that were then made and were directed at the Senator from Ohio, I found those remarks by the Senator from Rhode Island to be inappropriate, to be excessive, and I think lowered the tone and the purpose of the

I think it is always easy around here to play for a few laughs from the gallery and to interject some show business technique. But it really, I think, passes the point of serving any useful purpose when it is being done in the form of characterizations about another Member of the Senate and, particularly, one of very high standing and reputation and who is being ridiculed simply because he has a different point of view on an issue, and that is not to say that some measure of ridicule may not be appropriate in a certain debate to make a point or whathave-you.

I am talking about the degree to which one goes overboard in using that technique in a highly personalized way in an effort to exaggerate a point or to elicit a few laughs from either around the Chamber or the gallery. I felt that happen today and I do not think that elevates the Senate, and I also would say that I think that is a very sharp sword, and any time a Senator wants to take that sword out and use it, he may find that in the end he winds up cutting himself as much

as he does anybody else.

I must say, frankly, as I listened to the content of the presentation after the ridicule about the trade issue that the Senator from Rhode Island sounded very much to me as though he were a lobbyist for Japan or a lobbyist for one of the other foreign nations engaged presently in a trade war against the United States, using every manner of predatory trade practice to hurt this country to save jobs in their own country, violate the laws in a number of ways and use every manner of device, technique, gimmick to enhance their own situation in their own country in the case of Japan and other trading nations to the disadvantage of this country and our workers.

So when someone rises here on the Senate floor to make the case in behalf of those predatory trading practices and to defend them when we have got 12 million people unemployed in this country, some in Rhode Island, many in Michigan and in all the 50 States, I am very troubled about that.

(Mr. SYMMS assumed the chair.)

Mr. RIEGLE. I think anyone who feels that passionately about defending the inequitable and unfair trade practices that we see today ought to carry the title of the unofficial president of Japan, Inc. or whatever in terms of promoting and defending the kind of unfair trade practices we have been seeing.

I will tell you this: More and more people in the country are fed up with that, and when poll questions are asked in national polls by Gallup and Harris and others about domestic content legislation, which is much tougher than what is in this "buy American" provision, in this so-called jobs bill, that the majority of the American people support domestic content laws because they understand what is happening to the foundations of this country, and they understand we are in deep trouble. And it is not a matter of opinion. It is a matter of fact, in cases that have come before judicialtype processes to try to sort out these issues. We have had suits brought against trading violations by other countries. We have had findings recently in the area of steel alone that show that other nations have been employing unfair trade practices against this country that have helped put hundreds of thousands of workers in this country out of their job.

So if we are to talk about special interest pleading, I heard special interest pleading today from the Senator from Rhode Island and the Senator from Missouri in behalf of foreign workers and against American workers. I wish the people from their States might have been here in the gallery to hear it because I think we would have heard a lot of hooting and hollering and, as a matter of fact, if that debate had been able to take place prior to November I suspect we might very well have had two new Senators in here who had different views on these issues.

Fundamentally those have become life-and-death issues for people. I do not know how many people saw it in the paper this morning; it was buried in section B, I think the page was B12 of the Washington Post-but we have had four people here in the District of Columbia die of hypothermia within the last week. That means they froze to death. These are people, presumably they were those who were va-grants or who cannot find work or who were dispossessed in some other way in this very Capital City in a 7day period, four of them, and they merit a mention on page 12 of section

B of today's paper.

We could multiply this by hundreds of thousands of people across this country who are going hungry this very minute, and who are living in situations of absolute desperation, and all they want to do is to be able to go to work, yet we hear all this pious nonsense by other Senators in this body speaking today to the effect that this foreign trade invasion that is going on is something we cannot do anything about. I wish we had free trade because I believe in free trade. The fact is it disappeared on this planet a long time ago. We do not have free trade today. We do not have anything close

The gimmicks and the arrangements that are built into the terms of credit differentials, in terms of barriers against our products in foreign markets, all kinds of devices, are used to change the differential trading relationships; currency valuations, even in the cost of labor costs. The Senator from Rhode Island continued to talk about the issue of the question of what steelworkers may earn per hour. Well, when you start comparing that with workers in other countries it be-

comes very difficult.

For example, in Japan today much is made of the wage differential between American workers and Japanese workers. In Japan, they have national health insurance provided by the government, paid for by public expense. It is not in the labor bill, it is not part of the wage contract, it is not factored into labor costs in a direct way as it is in this country. It is just one of many contradictions that has to be sorted out.

I must say that I find it appalling, when we are literally on the eve of the Christmas season in this country, and the national television networks night after night are beginning to start to tell the story of people across this country-children, old people, workers in their forties and fifties who have worked a lifetime and lost their jobs and who have no prospects for work, desperate for work, want to work, desperately need the income to provide for themselves and their family, and here we have this modest, absolutely modest, so-called jobs bill to try to do something to repair highways and the least we could do is to see to it that the items that are going to be used in those projects provide some work for people in this country.

Why should that not be an obligation of the U.S. Senate? Where are the

people to turn?

I had an idea the other day. I know where I would turn if I were out there in the communities across the country like this and wanting to organize and move events toward providing jobs. There are stories in the paper saying these citizens have started going now to the city halls to call on the mayors. Well, in most instances the mayors do not have any money. They cannot solve this problem. This problem is much too big for that. It takes macroeconomic policy initiatives to do something about it.

I think, rather than going to see the mayors, they would be a lot better off going to see the Republican county chairmen in the various counties across the country; go visit them and talk to them about their problems. Ask those county chairmen if they cannot call the President or call Mr. Meese or call the majority leader or call the other Republican leaders that are in charge of this Government today to talk about the severity of this problem and the urgency of this problem.

My goodness, what have we come to when we have 12 million out of work in this country and the number rising day by day? Here we are talking about a jobs bill, and we are not even prepared to see to it that the steel and the other basic items are things that are going to be built and produced and provided by American workers. That just does not make a shred of sense at

In fact, if you want a justification for this bill, that is a justification, to try to see to it that some of our people have a chance to go back to work. You know, it is awfully easy, I think, for people who are getting three square meals a day and enjoying a fine living standard and so forth to tend to assume that those who are far less fortunate are somehow going to be able to get by.

The fact of the matter is people are not getting by. Less than half of the unemployed people in the country today are getting unemployment compensation benefits, meager as they are, because they have been cut back this administration-cut back to less than what they were when Gerald Ford was President or even when Richard Nixon was President. But fully half of the people in the country now unemployed do not even have unemployment compensation benefits. Their health insurance has expired. They are in desperate conditions. Why should they not have the chance to build the steel? Why should they not have the chance to provide the cement? Well, they ought to. They ought to.

That is what we are here to try to do something about. That is what the people said in this last election. They said they wanted jobs. And, as a matter of fact, when the results of the election were fresh in everybody's mind in the 24 hours or 48 hours after the election, many of the people on the other side of the aisle, people in positions of leadership, were saying,

"Boy, you know, we are going to have to do something about jobs. You know, people want jobs. Their patience is running out on Reaganomics and the failure of Reaganomics to set off an economic recovery."

Well, they seem to have forgotten that. I guess the days that have passed since the election have prompted them to forget what they were saying right after the election result, where people were saying, "Let's put this country back to work."

Well, we have an opportunity here. I will tell you this: I do not think this legislation is going to pass in the end if this does not have a Buy American provision. I do not know that it ought to pass if it does not have a Buy American provision. The few jobs that it creates, small in number that it isand it is far less than it should be-at least ought to be jobs going to American people.

I was thinking earlier about the Senator from Ohio and the great fight that he has made on this issue to try to bring this issue before the Senate and before the country on the need to say to it that American workers have a chance to provide the materials that are going to be used in this road building and repair program. I know the Senator made that a major issue in this last campaign, because those of us who ran in 1982 had an opportunity to take these views out to the public and to discuss these issues and to have to address these issues in a pointed way.

I know the Senator from Ohio was elected with nearly 60 percent of the votes in one of the largest States in this country. I think it is a great credit to him, and it is a great credit to his leadership on the issues.

It is interesting to me to note that those who have argued the most forcefully on the other side of this issue, who also just came through this campaign in 1982, escaped by the very skin of their teeth in terms of hanging on to their jobs. It may well have been something to do with these kinds of fundamental issues.

People want work in this country. They want work. And if we have time to do other things-whether it is raise congressional salaries or talk about the MX system or talk about other things or raise other issues or whether it is those that are in here seeking various special interest items in the closing days of the Congress-certainly we have an obligation to address, first and foremost, the jobs issue. That is the issue. That is the overriding issue. The rest of these issues basically boil down to next to nothing by comparison.

And that is why the Buy American provision here is important. It is absolutely vital. This country is in deep financial trouble, and so is the whole world. All you have to do is pick up the morning newspaper or yesterday's

newspaper or tomorrow's or step through that door and look at the ticker tape. The stock market was off again yesterday and off again today, despite the fact that the Federal Reserve, finally realizing that their monetary policy was destroying the economy, changed direction and are lowering the interest rates. They cannot lower them fast enough because they have kept them so high so long. And they have done so much damage there is a question now if we can even set off an economic recovery.

But to come here with a modest socalled jobs bill, a highway building bill, in the late hours of a special session of Congress, and not be prepared to see to it that the jobs that come out of it go to American workers would be a travesty, an absolute travesty. And to have that justified in the name of free trade, when free trade disappeared a long time ago, just multiplies the travesty.

I do not understand how thinking people can do that, quite frankly. If you look at our balance of payments, we are being murdered in the trade account every single day. Look at the trade deficit with Japan or other nations. They are not taking our goods back. They are dumping their goods in here and they are not taking our goods back.

Do you know what the unemployment rate today is in Japan. It is about 3 percent. And it is now nearly 12 percent in this country because too many people in the U.S. Congress are unwilling to do something about it, except maybe a few pious platitudes here and there, and so forth and so on.

But we are the court of last resort for people in this country who are saying to us, "Do something to give us our jobs back." We have a chance to do it here.

Instead, what we are doing is we are debating all of these lofty notions of free trade while the rest of the world is picking us clean—absolutely picking us clean.

Coming here, as I do, from a State with 17.2-percent unemployment this very day, we are at depression levels, and yet I have to listen in this Chamber to people who talk about a concept of fair trade that does not exist anymore and to be told that my workers cannot have jobs out of this bill because we have to let these foreign items, foreign products, foreign supplies come in here to build American roads. I say no to that.

Mr. LONG. Will the Senator yield at that point?

Mr. RIEGLE. Yes, I am happy to yield.

Mr. LONG. Does the Senator have some idea of how much advantage it means to a Japanese manufacturer in putting his commodities into our market when the exchange rate on the

two currencies does not reflect true my just shut right down. The deficit is value?

Mr. RIEGLE. Well, as the Senator is suggesting, when the currency values are out of line and the yen is artificially depressed, it gives them a price advantage in this country and it helps them get rid of their surplus production here in the U.S. market. Of course, evey time they do that, that keeps their people at work and it puts our people out of work. That is precisely what they are doing.

Mr. LONG. Might I just illustrate the point by mentioning a person who has made something of a study of this matter? That person explained to me recently that the difference between the currency exchange rate and the real value of the yen at that point was such that when the Japanese were selling their equipment, their farm machinery and automobiles and other goods, in the United States, it was just as though they were selling it at a 40 percent discount because of the unrealistic currency exchange rate.

Now, perhaps the exchange rate is more in line now with true value than it was at that point. But even if it were the equivalent of a 30-percent discount, when one looks at what amounts to a 30-percent discount by way of an artificial currency exchange rate-considering the fact that the United States helped Japan establish the same kind of technology as we have, every bit as modern and in many respects more modern, and every bit as efficient as ours-can the Senator explain to me how this Nation can expect an American industry manufacturing that kind of equipment to survive against Japanese equipment that has anywhere from a 30- to 40-percent discount in our market?

Mr. RIEGLE. The Senator puts his finger on a critical part of this trade war that is going on, which we are losing. What we are seeing is major companies in the United States which have been in business for decades-and I am talking about farm machinery companies and other companies that supply earth moving equipment and things of that kind, as well as the automobile companies and otherswhat we are finding is that they cannot survive under that kind of competitive differential that is the result of nothing having to do with productivity differentials or the fact that somehow they are smarter than we are. It is through the different kinds of trade manipulation. It has done a great damage.

When the unemployment starts to press up against 12 percent in this country, and as the Senator knows every 1 percent in unemployment increases the Federal deficit on the order of \$30 billion, part of our problem is that as these predatory trade practices go on and we do nothing about it. We are seeing our own econo-

my just shut right down. The deficit is going right up off the chart, beyond anything anybody has seen before. Now you have the anomaly of an administration that came in here to balance the budget now faced with the deficits rising so fast they cannot even calculate them. One week they think it will be \$170 billion and the next thing you know it is up to \$185 billion and rising.

The Senator is exactly right. This country is in danger today of losing major economic sectors, major firms, hundreds of thousands of jobs that we may not be able to bring back on line again if we just stand by and do nothing while these predatory trade practices take place.

Mr. LONG. Is the Senator familiar with the extent of our unfavorable balance of trade for this year?

Mr. RIEGLE. The Senator makes a good point. The Senator, I think, is well aware of what happens here, that they come in here and unload their goods in our country through a variety of devices, sometimes a two-tier pricing system, sometimes currency valuation or manipulation. But what is happening is they are turning around and recycling the money and coming back in here and buying prime assets in the United States, shopping centers, buildings, prime land, things of that kind. The Senator has related to me instances that he is aware of.

I think it would be well if we could maybe put that in the RECORD so people would know about it.

Mr. LONG. If you look at an unfavorable trade balance that might reach \$60 billion this year and simply put that in terms of jobs, at let us say an average of \$15,000 a job, how many jobs does that work out to?

Mr. RIEGLE. I would say probably about 4 million jobs.

Mr. LONG. There are 4 million jobs right there in that unfavorable trade balance. If we could eliminate that unfavorable trade balance would that not solve the whole depression? And assuming that you had 4 million jobs making automobiles, steel, TV sets, and other goods that does not even count the fallout. We used to be told that every job in manufacturing was good for about three jobs in other areas because when you have a manufacturing payroll in the community, with those jobs in manufacturing goes some fallout, the jobs that prepare the sandwiches, that provide groceries, drugstore facilities, and all the rest for the people who work in the factories.

Mr. RIEGLE. Absolutely, I believe the Senator is right.

Mr. LONG. If you had those 4 million manufacturing jobs plus the other jobs that they create, would that not just about take care of the 12 percent unemployment we are talking about in America?

Mr. RIEGLE. It would turn the economy around. We could see an economic recovery that we are waiting for. That would do it. A change of that magnitude would give us economic recovery.

Mr. LONG. Can the Senator tell us if any progress is being made in persuading the Japanese to buy something here and take it home with

them, for example?

Mr. RIEGLE. It is interesting that the Senator asks that question. I have talked to a lot of business people who have been trying to break into the Japanese market. The phrase they most often use is, "They talk us to death." They are willing to talk and talk and talk and talk and that is all there is, just talk. When it gets down to the hard questions of changing the imbalance of the trade relationship, taking down some of their barriers, easing up on the degree to which they are flooding our markets with their products, we do not seem to be able to get concrete results. Frankly, the committees here in the Congress and in the Senate that ought to deal with this problem have not done much

When I hear the argument that says, "Let us not take it up here as an amendment because this ought to come through the committees of jurisdiction," that is all well and good but that does not mean anything if the committees with jurisdiction are not out ahead of this problem and bringing tough legislation to the Senate floor, giving us the opportunity to act on it. The fact of the matter is that

has not happened.

I would say over the last 2 years the committees of jurisdiction have sidestepped this problem. They have not taken hold of it. As a matter of fact, I have had a hard time understanding that and the country has had a hard time understanding it. I would much rather offer these amendments in the context of a full-blown debate on these issues, but we should have done that a year ago, a year-and-a-half ago, 6 months ago. We should not have to take it up in the lameduck. We do not control the committees any more, so our side of the aisle does not have the privilege of bringing those matters for-

We need precisely what we are talking about here to make some change in this situation. Otherwise, I think what we are going to see is the rest of the world unloading their unemployment problems here in the United States. They are going to keep their people at work and in turn force our people out of work. That is the pattern and it is as clear as a bell.

The \$60 billion trade deficit that has been illuminated is the heart of the

problem.

Mr. LONG. Is the Senator aware of the fact that the Japanese who trade with us like to tell us that it would not be good for the Japanese to eat more beef? They say that it is better for them to eat soybeans, that people get healthy on soybeans, it is better for the body than beef, for example. Is the Senator aware of the fact that they come and tell us that kind of thing?

Mr. RIEGLE. Exactly. The other part of it is they are going to send about 2 million automobiles into the United States this year. This is a very high value-added product. There is a lot of living standard and national economic strength in those 2 million cars, whichever country produces them. They are going to take back about 20,000 of our cars. We are going to lose about \$13 billion in the process.

Then we try to sell them a few oranges or a few tobacco products and lo and behold we find out first of all that does not begin to offset the magnitude of dollars, of you have 2 million cars coming, or steel, or whatever the expensive, heavy products are. But when we try to sell just a few products, just a little bit of this or a little bit of that, then we find the Japanese have a hundred reasons why they just cannot take our products back. All the time the ships are coming across, unloading the Datsuns, the Toyotas, and driving them across this country, which is impoverishing the United States.

Mr. LONG. Is the Senator aware of the fact that all this money they are making in trade with us is being in large measure brought back here, but not in ways that create jobs? It is brought back to buy up our real estate, to buy our farms, our homes, our office buildings, even our best companies, to buy them up. The money is coming back, all right.

Is the Senator aware of the fact that it is just about the same as if a farmer, instead of raising his entire food needs on his farm, decided it was cheaper to go to town and buy milk than to have a cow, cheaper to go to town and buy eggs and chickens rather than raise his own and in due course find that in order to pay for that he was having to sell his farm acre by acre?

Is that not about what we are doing here, letting all these products come in here, selling them at a discount, putting Americans out of work while we have depression and they have full employment?

Mr. RIEGLE. And they are coming back in. It is exactly like the example of the farmer the Senator speaks of, who is selling off his farm acre by acre to buy the products he could be pro-

ducing himself.

Mr. LONG. And in that particular case, where the farmer is selling his farm acre by acre to buy things he could just as easily produce on the farm, he is achieving a balance of payments. But he is balancing payments by selling his farm. Is not that about

what the United States is doing right now? We have a trade deficit that may reach \$60 billion this year, keeping our people out of work while we import all these things we could just as well make here—and in the name of free trade, yet we let them discriminate against our goods world without end?

As I recall, do not the Japanese do a pretty good job of "buying Japanese"?

Mr. RIEGLE. I agree with the Senator. I think he makes an important point here. If we take this one further step, we can imagine that once they have managed to cave in certain industries in this country or damage them so badly that they are no longer in a competitive position, that they cannot modernize because they do not have the capital, they do not have the sales volume, and so forth, I think we can anticipate that at that point, after certain basic economic sectors of the United States have been damaged beyond repair, then we are going to see the price for these foreign goods go up.

This is the classic pricing pattern of somebody who is coming in to capture a market. They come in with a lower price and with a variety of devices, until they destroy the competition as they see it which, in this case, are American suppliers. Then, normally what happens is after the American suppliers have been knocked out of the ball game, the foreign suppliers raise their prices; they go right up again. Then what we find, going back to the farm example, is not only has the farmer lost the farm, but he is finding that what he is paying the other fellow to do the producing continues to go higher and higher.

We are going to end up in just that kind of situation. It is amazing to imagine that could happen to the United States because we have lived with notions about the tremendous economic strength we were able to demonstrate during World War II, for example, when we had this massive national mobilization. New people came into the fork force; we were able to do things we never imagined we would be able to do. That is being destroyed section by section, sector by sector, at the present time. I see it in my part of the country, but as I talk with Senators from Alabama and Senators from Washington and other places where other economic sectors are in trouble, I see this happening all over the place.

Not just in heavy manufacture, the concern we are focused on here. We are seeing it in agriculture. Our agricultural sector is in terrible trouble. We are seeing it in a host of other areas as well. I just do not think we can continue to do that and think we can provide for our own people or project the kind of leadership around

on over the last few years.

We provide most of the defense spending for Japan. They are under a defense umbrella we provide, which is paid for by the earnings and the livelihood of the American people. There will come a point when we are not going to be able to pay that bill. We may be there now, simply because we cannot produce enough and our production is being badly damaged by this import invasion of foreign products.

The kind of proposal in this amendment is what we are going to have to do and we can do it. It is consistent with what we have done before. It goes to submissions to bodies when we have had problems of predatory trade practices, where we have had findings that indicate we are the victims of dumping violations. We have to get this issue focused. If the ranking mi-nority member of the Finance Committee were still chairman, I suspect we would have legislation out here that would be much more to the point so we could take this up directly and not have to come at it through an amendment process to a roads bill.

Mr. LONG. Will the Senator from Michigan yield?

Mr. RIEGLE. Yes, I yield.

Mr. LONG. Is it not logical to extend the argument made by the Senator from Rhode Island into other areas? For example, if the Senator were to suggest by his argument that we should not do anything to save jobs in our steel industries because we want those steelworkers to work for less, would not the same argument suggest that we should not do anything to build ships because we want our shipyard workers to work for less? And we should not do anything to help automobile workers save their jobs because we want them to work for less? And we should not do anything to help textile workers save their jobs because we want them to work for less? And we should not do anything to help the people in the electronics industry to save their jobs because we want them to work for less? Perhaps we shold not do anything in any other areas-farm machinery, or even eventually something like airplanes-because we want our workers to work for less.

Can the Senator suggest just how much less they should earn? About what earnings level do we want them to work at? Do we want them to work at the standard of the Japanese worker, or do we want them reduced to the standard of a Korean worker, or reduced to the standard of the Dominican or the Haitian worker? Just how much less do we want our workers to

work for?

Mr. RIEGLE. I think that is a good question because there are a lot of countries out there that are coming into the stream of world commerce and as pressures increase, they want to

the world on the scale we have taken come in and produce our products at a fraction of our living standards. If we are willing to abandon all those sectors of our economy to those foreignbuilt products, we are not going to have much of a country left.

> It is one thing to think about it in an academic way, though I do not see how you can defend it even as an academic suggestion, but take somebody who has worked in an industry, is 50 years old and worked over a period of years with an implement company or building steel or whatever. They are buying a house, a car, trying to raise their family, trying to help their children get an education and make their way out into the work world. Suddenly, you tell that person, "You have been getting by on an income of \$22,000 a year, or \$25,000." That is well above the median income in the United States. Now the proposition that we are hearing from Senators on the other side is, "We want you to live on less, earn less, have less to spend and so forth. We would like you to gear down to maybe an income level of \$18,000, maybe \$15,000."

I do not know where they are heading, but I know if you are out there and you are 50 years old or 53 and have been working a lifetime in a certain area and you are trying to pay off a mortgage on a house and so forth, I do not find that those families have any extra money. If you are going to try to crank down their income \$3,000 a year, \$5,000, \$7,000, I do not know how they are going to be able to survive in the kind of America we know today. Utility bills are going up. We had a big fight in here yesterday on that issue. The cost of medical care is going up, interest rates are sky high. It is awfully hard for me to see how a lot of rank-and-file people across this country who are having a hard time making ends meet on an \$18,000- or \$15,000-a-year income are somehow going to be better off if they are only earning \$12,000 or only \$8,000 a year.

I agree with the Senator. I do not know where that leads us except in the wrong direction. I would like to see us in a situation where we cannot only preserve our living standard but hopefully, if we all work hard and all work together, we can improve our living standard so there is a chance for us to perhaps have a higher living standard down the road, rather than have to embark on a policy that is going to give us a lower and lower standard.

Mr. LONG. The question that occurs to this Senator is this: If we really want the American worker to settle for a lesser standard of living, why do we not tell him that? I personally cannot find it in my heart to ask him to lower his standard of living. But all who really want the American working people to settle for a lesser standard of living, why do they not make it clear

to the American people that this is their position?

Mr. RIEGLE. I think that puts it very straightforwardly. That is what they should be saying, because that is what they are advocating.

Mr. LONG. The Senator, I believe, has voted for a pay raise for Government employees generally. Have we not raised their pay during this Congress? It is my impression that we have raised the pay for Government employees generally.

Mr. RIEGLE. Is the Senator referring to within the last year?

Mr. LONG. The last couple of years. Mr. RIEGLE. Yes; we passed a costof-living increase for all Government employees.

Mr. LONG. If we really want all American workers to have a lower standard of living, not to receive as much pay as they are receiving now, what sense would it make that we have given a cost-of-living increase to civil service workers? Those are good jobs, jobs a lot of people would like to have. Why give our Government employees a pay raise if we really believe that American workers ought to have a lower standard of living?

Mr. RIEGLE. I think the Senator is correct in suggesting that that is a contradiction, that you really cannot have two standards. You cannot, on the one hand, vote to see to it that one class of workers, people over the country, have a chance to move ahead in terms of their living standards and at the same time be advocating policies that mean that most of the rest of the American people are in fact going to have less and less and have a lower living standard. I think that is a contradiction. I think that contradiction lies at the heart of the proposition that those on the other side have brought forward today.

Mr. LONG. Will the Senator yield further?

Mr. RIEGLE. Yes.

Mr. LONG. The Senator very ably represents the State of Michigan. He lives among the people of that State. He has been elected by those people. He was just compaigning among them only this year. Can the Senator tell me, are the automobile workers out there living the life of Riley, those who have a job? Are they really living it up, living on the fat of the land, enjoying the best of everything?

Mr. RIEGLE. I am glad the Senator asked that question, because the average autoworker-and there is a lot of misunderstanding about it-earns a figure of less than \$25,000 a year.

Now, by some standards, that is a high salary. But when you look at the basic components of the cost of living today, you look at housing, you look at energy bills, you look at food costs, medical costs, and so forth, \$25,000 is not an inflated or a lavish income by

any standard. And many, by the way, do not make as much as that.

Might I say one other thing about it, because there has been a tendency, I think unintentionally, to demean in some way the work of the steelworker or the work of the autoworker. These are tough jobs and people ought not to misunderstand.

The best way to figure it out is to stand outside a plant gate and watch the workers file through as they go into work or they come out at the end of the work shifts.

In the course of a half an hour, you will see maybe 1,500 workers of all ages go by. You will see those who are very young and who have just taken jobs, and then you will see those who are close to retirement age. But in these heavy manufacturing jobs, as you watch all the people going through, it is as if you are watching one person at every stage of their life. What you see in those that are in their fifties, for those who are still able to work, maybe even early sixties-many have to go out on early retirement because their health is shotis what these jobs take out of a person physically. You notice the fact that these jobs over the course of a workday drain the life right out of the workers who are in these kinds of work environments.

These jobs pay somewhat more on the average than someone who may be working in McDonald's or working somewhere else, but these are hard jobs and oftentimes are dangerous

jobs. They are noisy jobs.

But in the end, what I have tended to notice is that the people who work those jobs pay for it in terms of their physical health. They pay for it in terms of aging faster than may be true for people in other occupations throughout our society.

throughout our society.

I have the feeling that they earn what they are paid and that they are not earning some excessive wage that is two or three times beyond either what they contribute or what they ought to expect to earn for work of

that sort.

Mr. LONG. Has the Senator ever noticed that when he visits a plant gate in the morning, fellows on their way to work have time to visit. They feel pretty good and they are glad to see you. But if you stand around trying to shake hands at the plant gate when people come out of one of those factories in the evening, they do not want to be bothered, they do not want to shake hands, visit, or say hello. They just want to get home; they are tired and weary, many of them exhausted. Is that not the type of thing the Senator has in mind when he says those people work hard for their money?

Mr. RIEGLE. They work hard for it, and if you take a look at what most of them end up with at the end of a worklife—and I am talking about

somebody that is in their fifties or somebody in their sixties who has spent their whole life as a steelworker, working as an autoworker-if you take a look at their portfolio and their holdings, what you normally find is that in order to help their families come along-because most of them have children and need to help the children go out and make their own way or to help their own parents, and there is a tendency of a higher incidence of health problems, partly because the work does demand a lot-in most cases if the person has managed to buy a house, that may be the extent of any asset accumulation that they have managed over a lifetime. They will have the furnishings in the house and they may be buying the car and paying for it on time, and so forth, but it is the rare autoworker or steelworker that you will find sitting there with a portfolio of common stocks or bonds, two or three houses or lavish other personal assets that they have acquired over a lifetime. It is just not the way it works.

As a matter of fact, a lot of these jobs that have what seem to be higher than normal wage levels do not provide a full year's work. We are talking about industries that have tended to be quite cyclical because they relate to the way the economy tends to go, in cycles. So very often you will find that for those workers, if you compute their salary on an annual basis, it is one number but very often they do not have an opportunity to work for a full

year

That is also true of people in the construction business, as the Senator well knows. In the wintertime oftentimes and during slack periods or when interest rates are high, construction workers who may have a high hourly wage, because they do not have an opportunity to work for the entire year, end up earning an actual income that is less than what you would compute if they were working 12 months of the year.

So my observation has been that the folks that we are talking about here, who, by the way, have built an awfully big part of this country—they have built it with the sweat of their back and with their muscle—at the end of a worklife in terms of assets that they have earned and accumulated, they do not have an awful lot to show for it.

Mr. LONG. In other words, is the Senator saying that the average worker for whom he is speaking, after a lifetime of hard work, going to work, let us say, at about age 20 and working to age 65, has a home to show for it?

Mr. RIEGLE. That is right.

Mr. LONG. That is the life of Riley we are talking about?

Mr. RIEGLE. Yes.

Mr. LONG. That is what some think is just too much for a workingman?
Mr. RIEGLE. That is exactly right.

When I talk to workers now who are approaching retirement, they are full of apprehension because they are finding that even though they worked all their lifetime and they may have acquired a house as their one principal asset-and by the way, frankly, largely due to policies of the Federal Government; if we had not had the GI bill and some of the other things, the way we managed interest rates and monetary policy in this country we probably would not even see the high incidence of homeownership that we have achieved over the last, say, 20, 25, 30 vears

But what I am finding now is that people who are close to retirement are finding that their sons and daughters who are now of an age maybe in their twenties or thirties have formed families and cannot acquire housing. In other words, they cannot get a house because the housing prices are high. They cannot accumulate a large enough downpayment. They cannot afford the high interest rates. They do not have job security, if they have a job at all. As a result, more and more working people of the kind we are speaking about, are finding now that the one asset that they have which is their house, prior to retirement agesay, somebody between 60 and 65-are now faced with two new facts: One, that maybe social security is going to be cut away, which they have been depending upon and which is the way they see being able to meet their needs after they retire, so now suddenly that is in jeopardy; No. 2, in order to help their children be able to at least get the start where maybe they will have a chance to acquire a house over their lifetime, many of these workers are now faced with having to go out and take a new mortgage on their house-the one thing that they have worked all these years to pay off so that they would have a little peace of mind when they reached retirement and would not have those house payments every month; they would know that they had a house that they could live in, presumably the rest of their lives. They are now finding that if they are going to see their children have the same opportunity, they are going to have to go back to the bank, and take out a new loan on their house.

And I can tell Senators about the anxiety and the stress that is creating in so many of the workers that I talked to in these families, because this comes at a time when health problems are setting in, and so forth, they do not want to abandon their children; they want to help their children whom they see needing help.

But again when workers in this country are somehow characterized as having made off with the great wealth of this country or somehow sabotaged

the system or somehow gotten more than they deserved to get, now we have to punish them, we have to make sure we grind down their standard of living, take it down \$3,000, \$5,000, whatever people have in mind, which they have not made clear-I mean I just cannot accept that and I do not see how there is any equity in that proposition.

Frankly, I must just say, and this will express my feelings about equalitarianism in this comment, but I do not hear those kinds of things being stated by people who do not have much. Inevitably, whenever I hear this, and I do not just refer here in the Chamber, but also outside the Chamber, the people who pound the hardest on the working people and pound the hardest on others who are living in modest economic levels are invariably people who are pretty well situated and who are living well and who normally have the comfortable situation and who eat well and who are housed well and have the opportunities of the best educations and health care for their children, and so forth and so on.

I have yet to find a case, as a matter of fact-I am wracking my brain right now-I cannot recall a case of someone who comes out of a more modest circumstance who is out there leading the charge to tighten the screws down on people who basically live under modest circumstances.

So I must say I get troubled about

that.

But I thank the Senator for the comments he has made and the questions he has asked.

Mr. LONG. I thank the Senator. Mr. RIEGLE. Mr. President, I wish to say a few more things here.

Mr. BRADLEY. Mr. President, will the Senator yield for a question?

Mr. RIEGLE. I yield. Mr. BRADLEY. Will the Senator agree that the issue here is not the productivity of the American worker?

Mr. RIEGLE. I do not think that is the critical issue here. I think one might argue that in a shortrun period one can get caught in a capital shortage and a lack of modernization, and so one can have some productivity differentials.

But my view would be that those can be corrected. I mean we need to cor-

Mr. BRADLEY. What we need is some time; is that correct?

Mr. RIEGLE. I think time is part of the answer, although time alone will not do it unless we have supportive policies that help us close some big gaps which I think exist in our current

economic circumstances.

Mr. BRADLEY. One of the things that I know the Senator would not like to have his amendment do is to divert attention from the point that the Senator from Louisiana made a few moments ago about the relative price differentials among products due to changes in exchange rates. I think that the Senator would agree that in large part the reason there has been a price differential of sometimes close to 40 percent in the last year and a half has been because of the monetary policy that has been followed by the Federal Reserve; is that not correct?

Mr. RIEGLE. I think that has been a major factor, but I would not rule out also national policy strategies taken by foreign nations to in effect arrange where their own currency values level out vis-a-vis the dollar.

Mr. BRADLEY. I think it is very important since this is the kind of opening debate of a very long debate probably over the next several years that we make that clear distinction, that the problem today from a trade standpoint would not be nearly so bad had we had a more balanced macroeconomic policy followed by this administration. Foreign goods, whoever produces them, Japan, Germany, whatever, would not be as cheap as they are in the country today had we not followed an unbalanced macroeconomic policy.

Mr. RIEGLE. I would agree with the Senator's point to the effect that the economic policy that we have had in place for the last 2 years which has driven interest rates high and kept them high-I am talking about real interest rates as well as nominal interest rates-has had the effect of making this currency valuation problem more severe and it has made us less competitive and it has hurt in the trade ac-

count.

Mr. BRADLEY. The Senator from Louisiana and the Senator from Michigan also engaged in a colloquy in which they talked about the big imbalance in trade with the Japanese. It is, I think, fair to point out that there has been a sizable surplus with the Europeans at the same time and that it is important to look at the overall picture to see what is the equilibrium position which has deteriorated here because of the relative price differentials caused by exchange rate fluctuations due to a bad monetary policy in this country.

Mr. RIEGLE. I would agree that that is a major element of this puzzle. But I would want to say again that there are other elements, too. In other words, as the Senator knows, there are a variety of pricing gimmicks used either to have a two-tier pricing system so that the goods sold here are sold for less than they are in the exporting country and also barriers in other countries that block our goods from coming in. There are a variety of devices used to take and hamstring the free flow of goods, and we have been victimized by that to a very large extent.

Mr. BRADLEY. The Senator also engaged in the discussion in which one side argued the pure free trade position is really unrealistic in a world where we have very high unemployment. Would the Senator not agree to that?

Mr. RIEGLE. I think that is correct. Mr. BRADLEY. If everyone is working and I produce paper and the Senator from Michigan produces glasses and we each produce them at the cheapest level it pays that we trade together. But if 10 to 20 percent of the workers who produce this paper are out of a job and I am in a modern industrial economy I have a cost for that unemployment that has to be figured into the total picture. I would argue that in theory one can reach a point where unemployment gets to such levels that the theory of comparative advantage, free trade no longer applies as clearly as it does where we have full employment.

Mr. RIEGLE. I think the Senator is exactly right, and I think in addition another thing that adds to the problem that he points up is that if you are the last of the big large open markets, as the United States market is, you become the market that everyone has to seek. In other words, if the world is deflating and what buying power is left is in large measure in this country, whether it be for paper or whatever other items one wants to imagine, then the flow of goods in that production from around the world is going to find its way into this market and puts enormous pressures on domestic suppliers in the United States. We are seeing that happen.

Mr. BRADLEY. The Senator, I think, has expressed a very important point in recognizing that relative prices are important here and, second, that unemployment has costs. The key thing is at what point do you begin to put up the barriers and what danger does that pose for the entire trading system itself?

I think certainly no one would make the argument that this amendment alone challenges that entire trading system. But there are at least in this case certain problems with implementing it as I understand it. Is that not correct?

Mr. RIEGLE. I am not sure there are. There is some difference of opinion on that, but as to the Senator's first point, I think that it is possible here to work these problems out if we were dealing with them as they are, as they truly are taking place. For example, if we had some transition strategies to deal with the industrial base problems that would be temporary in nature that might extend for a 3- to 5year period to enable us to adjust, for example, for an energy shock or a basic change in competitive position with foreign suppliers we could work ourselves through a transition and have those mechanisms that enable us to do that that would be temporary so that we have them in place for a period of time, and it may even involve special credit facilities, and so forth, and then at the end of the period of time if the plan works as it is designed we withdraw those things and then we are back on a truly competitive footing

If we had some response to our problems that enabled us to adjust in a different fashion, then we would not be in as severe condition as we find our-

selves today.

But I must say that has not happened and as a result we are left with initiatives that are not designed with as much sophistication and over as long a timeframe as we might want.

But I think we can finally reach a point where the damage that is being done is so severe and it is so cumulative that finally we have to do something that is direct and deals with the

problem here.

But I want to hasten to say that I agree with the Senator from Pennsylvania (Mr. Specter) and the Senator from Ohio (Mr. Metzenbaum) in the sense that I find this proposal within the law. I do not find this proposal as violating the trade laws that now exist and, as a matter of fact, to those who would suggest—and I am not saying the Senator from New Jersey is suggesting that—but I want to make it clear that I think this approach is entirely within the framework of the trade laws as they now stand.

Mr. BRADLEY. I would like to ask

Mr. BRADLEY. I would like to ask just one final question: Is the Senator's amendment intended to be temporary in nature or is it permanent?

Mr. RIEGLE. Well, I think we are talking here about the scope of this particular special roadbuilding program, so it is by definition limited to the scale of this initiative.

But to the larger question as to where we go next year, I do not think anyone has the answer to that. I would much prefer to be here in a more orderly way, through a more orderly process, with the Trade Subcommittee of the Committee on Finance having acted fully on this issue, and I mean well before now, having brought us serious policy recommendations upon which we could act, which we could debate, which we could make decisions on as a fuil Senate. That has not happened, and there is no prospect that is about to happen any time soon.

So what we are left with here now is tailored to this instance. This is an approach that is a function of one unusual procedure we are faced with. We are in a lameduck session of Congress. That by itself is unusual. We are here in large, part because we have got a jobs crisis in the country. We have got major industries that relate to this kind of activity that are running at 30 to 40 percent of operating capacity,

and where you have hundreds of thousands of workers out of work. So we have here a very simple and, in fact, a temporary response on a small scale that will say:

Look, at least in this emergency road program we are going to put together, let us use materials, basic materials, that can come out of our own internal economy, our own domestic economy, which we can provide where we have idle capacity, and let us put some people to work.

I mean, let us kill two birds with one stone. That is the proposition, and it is by no means an assault on all of the large issues that others would like to bring in in an effort to sidetrack this proposition.

It is very simple, it is very straightforward, and I think it is sound. I think it is the soundest step we can take at this time.

Mr. BRADLEY. I thank the Senator. Mr. RIEGLE. I thank the Senator for his comments.

I might just say, before yielding the floor, that I want to thank the Senator from Louisiana for his comments and his questions, as well as the Senator from New Jersey for his comments. and to say that I am very hopeful that the Senate will take the step here that the House has previously taken. I want to again comment on the odds of this legislation finally emerging later on down the line, after whatever number of days, and surviving a conference committee and coming back and surviving all the parliamentary challenges that could be leveled at the late hours of the Congress against this legislation. I think if the Buy Ameri-

the odds are less than 50-50. I yield the floor.

Mr. HEINZ addressed the Chair. The PRESIDING OFFICER. The

can amendment is in here, this legisla-

tion has a better than a 50-50 chance

to survive. If it is not in here, I think

Senator from Pennsylvania.

Mr. HEINZ. Mr. President, the debate on this amendment started late last night, and began again at about 10:45 this morning, and in the course of the consideration of this Buy American amendment I have heard some extraordinary statements made.

I, of course, support this amendment, I spoke briefly on the floor earlier today, and I also support Senator Specter's amendment in the nature of a perfecting amendment to Senator METZENBAUM's amendment.

But at this point I particularly will not comment on one of the statements made by one of the opponents of the legislation, that, if enacted, this legislation was somehow going to cause us jobs.

Now, most people in this body, Mr. President, want the underlying bill, the highway bill, to pass the Senate, It will create 320,000-some jobs, and is self-financing by virtue of the gas tax increase and the user fee. There are a

few who remain unconvinced, we all realize, but the vast majority of the Senate wants this bill to go through, and although it may be a highway and rehabilitation repair bill to some or a job bill to others the truth is that it is both. It is good investment in our infrastructure. It comes at a time when people need work, when there is substantial unemployment in the construction industry, substantial unemployment in those industries that supply the materials, including steel, to highway and bridge repair. It is good legislation, it is supported by the President. It has bipartisan support.

The jobs-creation aspect of this legislation, the 320,000 jobs as estimated, falls roughly into two groups: Those people who would be put to work in construction on the highways and those in supplying industries, and one of the major supplying industries, no doubt about it, will be the steel industry. You cannot build bridges without steel, you cannot build overpasses without steel, you cannot have guardrails along the highways without steel in most instances. Steel is going to be purchased to fulfill the building requirements that we would like to see enacted.

A substantial portion, therefore, of the 160,000 jobs that will be created, aside from onsite, are going to be in the steel industry, and the question, Mr. President, is really very simple: Whose steel industry is going to be the beneficiary of those jobs? Are those steel jobs going to be created in the United States or are they going to go to Japanese steelworkers, Taiwanese steelworkers, Korean steelworkers, steelworkers all over the world?

Frankly, if anybody in this body would say that there is some virtue to creating jobs today, I would think they would want to create them in the United States of America, not help other countries out of their economic problems. There is some irony in that because many of the countries that would be beneficiaries are some of the worst offenders when it comes to protectionism, when it comes to thumbing their noses at the 1979 trade agreements-the codes from the mutilateral trade negotiations that we solemnly invoke on dumping, on countervailing duties, on procurement. There is no worse offender than Japan, no greater beneficiary from this legislation unless this amendment passes.

Those who maintain that somehow the enactment of this amendment would cost Americans jobs really ought to know the facts, that the failure to enact it will cost us thousands upon thousands of American steelworkers' jobs, workers in other supplying industries such as cement, asphalt, tar, all the other components that go into putting together the highways,

the transportation system that we know we have to have in this country.

It has been suggested too that

It has been suggested, too, that somehow or another the taxpayer loses because the price might be a little bit higher if we have Buy American provisions included in this bill.

Now, it is probably true that there will be some modest increase in cost—although, frankly, nobody that I know in, for example, the steel industry is making any money. They are all going broke. There are not any steelworkers getting fat; 150,000 of them are currently out of work, laid off.

I have not seen any gigantic rush to make new investments in the steel industry to modernize it. I have not seen any dramatic turnaround in this industry in any firming of prices—indeed, prices are weak, so much so that we could very well lose permanently a substantial portion of the industry that is now shut down. Over 60 percent of the capacity of the steel industry is now out of business; it is shutdown. How much of it will be permanently closed, we do not know. But one thing we can be sure of is that a lot of it will end up being permanently shut down if we do not wake up.

Some people have suggested that we might lose a few construction jobs if this amendment went through. Presumably, we would lose them because a few more steelworkers got employed, a few more people in cement plants

got employed.

Now I want to help our construction workers. We have a lot of them out of work in the Commonwealth of Pennsylvania. But without granting the premise that this would take one group of jobs away from one and give it to another-and I do not grant that premise for a reason I will state in a few minutes-even if it were so, I ask my colleagues to assess what industry has the worst problem right now, steel or construction? Which has greater unused capacity? In steel about 36 percent of capacity utilization is where we are. In construction, I do not have exact statistics but it cannot be as bad as that. We are not talking about much difference, I suppose, in wage levels here between the two.

So I ask my colleagues, what is so sacrosanct about the construction industry that we cannot protect the American steel industry by insuring that it benefits from this legislation and not just one or two other very select, albeit deserving, industries.

Mr. President, I said a minute ago that a few have expressed the concern that somehow this legislation is not in the interest of the taxpayer. I remember confronting that issue well over 4 years ago when I first came to the Senate and there were a number of arguments made against our putting into the Surface Transportation Act of 1978 the Buy American provisions that are now in there

One of the ways that I was able to, I think, help that legislation and add to the debate was to ask the Library of Congress, the Congressional Research Service, to do a study of the extent to which a taxpayer's dollar, a dollar of Federal procurement spent in America, differed in terms of its return to the Federal Treasury from that spent on one used for purchases coming in from overseas.

At the time the study was done, tax rates at the time being somewhat higher, the study by the Congressional Research Service said that roughly \$555 for every \$1,000 spent by the Federal Government on domestic procurement would be returned to the U.S. Treasury, compared to the same \$1,000 spent for procurement from overseas where the return to the U.S. Treasury would be virtually zero. Well, frankly, Mr. President, that sounds like a pretty good deal to be able to get 55 cents back on every dollar rather than zero back on every dollar.

Then some people said that study was out of date. We went back to the Congressional Research Service. They reviewed the numbers and we have a more recent study dated September 23, 1980, where the numbers are still comparable. It amounts to \$473 in return to the Fectral Treasury for every \$1,000 spent on domestic procurement. And that is a considerable return on the taxpayer's investment, the more so when you realize it is virtually zero if you buy overseas.

(Mr. CHAFEE assumed the chair.)

Mr. HEINZ. It is my hope, therefore, Mr. President, that all friends of the taxpayer—and I trust we are all friends of the taxpayer—will realize that a dollar spent in this country generates a lot of revenues from income taxes, from corporate taxes, from excise or sales taxes, and gasoline taxes, even, and that anybody who suggests that somehow this amendment is going to be in any way detrimental to the American economy simply cannot marshal the facts to bear out that point.

Mr. President, we have also talked a good deal today about how the enactment of this amendment would affect the world trading environment. We are all aware that U.S. Trade Representative Bill Brock and other members of the President's Cabinet returned after the Thanksgiving weekend from the GATT ministerial. We

know that the GATT ministerial was short of a disaster, which is to say it was not a success at all. We wish it

had been otherwise,

Maybe it will be possible for us in the next Congress to fashion a responsible, tough-minded trading policy that will have as its goal the realization of a freer, more open world trading system where nontariff barriers are widely reduced, where dumping and the subsidization of exports is sub-

stantially diminished, where Government intervention, overt or covert, on behalf of industries, companies, or specific markets is relegated to the past.

But I can tell you this: This country is becoming very fed up, not just with the inability of one set of negotiators to make progress when confronted by intransigent trading allies, but they are getting impatient with the fact that America is being taken to the cleaners day in and day out by people who say that they are on our side, want access to our markets, and then slam the door of their markets in our faces.

We know very well that there are a range of possible solutions that are being contemplated now and will be contemplated in the future in the legislative process.

Senator Danforth and I, earlier this year, in the hope that we could get early enactment, introduced two reciprocity bills. They were good bills. They have been combined into a somewhat more modest version of either of our bills. The bill has been reported on the calendar. It is moving slowly but surely, we hope, toward enactment. But, because of the change in attitude and realization that the rest of the world is becoming more protectionist, there are a growing number of Senators who are coming to the conclusion that that legislation will not be strong enough to do the job, to open the markets that we believe everybody should have a right to compete in.

We know that there are other proposals around. The local content bill has a majority of House Members supporting it. It is expected to pass. There may be a vote here in the Senate. It might pass in the Senate. It is a controversial bill. Some of us support it; some of us do not. But the fact is that unless we begin to fashion a more effective trade policy that works, legislation like that is going to continue to attract support and, irrespective of the adjectives that may be applied, sooner or later that legislation will pass and it will have a much more dramatic effect than the legislation we are considering today.

I think there are some better alternatives than the scenario I have just described. I think it is possible for us to do some creative rewriting of our trade laws so that they work within the context of the fora we all like to think we share with other countries to do a better job.

What do I have in mind? Well, what I have in mind is our escape clause, section 201. It has been rather a disappointment for a number of reasons. It is very hard to explain why, when 2 years ago, almost to this day, the U.S. auto industry got a ruling from the U.S. International Trade Commission, which ruling was that the U.S. auto industry, then in just about as bad

shape as it is in now, was not being substantially injured by reason of imports, at a time when, as largely now, when one out of every five cars being driven off a lot was a Datsun, a Toyota, a Japanese, or a European import.

The American people found it very difficult to understand how the U.S. International Trade Commission, an agency of the Federal Government created by the Congress, could come to that conclusion, when to their commonsense the American auto industry was certainly being hurt by foreign imports, as indeed it is today.

We on the Finance Committee know part of the reason for that. We know the way the law is written and the

shortcomings it contains.

Second, often when relief has been recommended by the Commission against a substantial amount of import injury, that advice in the nature of a recommendation that must be accepted, modified, or rejected by the President, is, in fact, ignored. It was ignored by President Carter on many occasions. This President has ignored it on occasion. It is not a successful statute as it now stands.

What I would like to suggest that we need some time to do in the coming months, so that we can enact something in the coming year, is the opportunity to rewrite our escape clause legislation so that a defined and sufficient period of import relief, carefully and effectively crafted import relief, is available to hard-pressed industries, provided that they undertake a genuine program of adjustment.

We are going to have to face up to this issue in the Finance Committee because the adjustment assistance legislation that is on the books expires in 1983. It expires on September 30. It is going to be extremely important for us to find something other than a regulatory method or a method of centralized Government planning to deal with the problems of industries that are going through a period where they must do something to adjust, improve their product line, modernize, intelligently shift into new areas, retrain their workers, do all those things that we understand industry sometimes needs to do in order to get a new and longer lease on life and on the employment of their work force.

We do not have any legislation like that on the books today. We have a little adjustment assistance for workers. We have a little program to try to give some loans but more often moral support to a few companies that qualify for assistance. But by the time they qualify for assistance they are particularly dead on their feet, it is so

We do not ever, under any circumstances, tie adjustment, as I believe we must and should, and, frankly, as I be-

lieve we will, to import relief, except in the most informal of ways.

I remember in my home State of Pennsylvania a little over 2 years ago the Carter administration received a recommendation from the International Trade Commission on mushrooms, and the recommendation made by the Commission was a very strong recommendation. It recommended a very strong set of import relief reductions. The Carter administration went to the industry. They looked at the industry and they said, "Well, we do not think this industry can really make it. We are just going to whack back this relief." What happened was that they made a self-fulfilling prophecy. By cutting back the amount of relief they made sure the industry could not possibly make a really strong economic impact. As a result of that, we have had continuing problems in that industry, a major employer in southeastern as well as southwestern Pennsylva-

It is not something that most Senators are very knowledgeable about because the mushroom industry is concentrated mainly in Pennsylvania, if you exclude Taiwan, Hong Kong, Korea, and the People's Republic of

That is a brief illustrative history of

the problems we face.

What I am saying, Mr. President, is that I think there are some better answers, some consistent answers, some progressive answers, some answers that will help get industries back on their feet in better ways. Those laws do not now exist on our books. I intend to try to be in the forefront or a part of any team effort to try to rewrite those laws, to structure them so that they really work for the benefit of this country, and so that they really do marry a genuine adjustment program with genuine import relief.

Today, we do not have the luxury of having those kinds of laws available. That is why this important but, frankly, I would have to say, judged by the size of the problem-with 150,000 steelworkers out of work-modest relief, legal relief under the GATT and under the Procurement Code that this Buy American provision repre-sents, needs to be enacted by this

I have in front of me today, just off the AP wire, the following dispatch dated 2:57 p.m. eastern standard time:

U.S. Steel Corp. suspended plans Wednesday to modernize its Edgar Thomson plant as a high-volume producer of slab steel because of a depressed market, high labor costs and low productivity.

The announcement was another economic blow to the battered Monongahela River Valley near Pittsburgh, which has already seen more than 15,000 steelworkers lose their jobs.

"It's bad news, no question about it," said Thomas, President of United Steelworkers Union Local 1219 in nearby Brad-

dock, where the Edgar Thomson plant is located.

Mr. President, what we are going to see is the continued undermining of an absolutely essential industry. country cannot survive without a sufficiently strong steel industry to underpin both our economic growth and our national defense requirements. It is no accident that virtually every country in the world has a steel millat least every country that has a minimal amount of ambitions. They have steel mills, for the most part, built through subsidized export financing, in part or largely facilitated by the French and others, who are supposed to be rather restrained in their offering of export financing.

The result is that with that world overcapacity in steel, unless we start acting—and I do not mean the middle of next year, I mean now-by the time we do start acting in a meaningful way next year, we shall have very little to act upon to save. That is why, Mr. President, I want to see this amendment offered by the Senator from Ohio succeed. It is very similar, with one important difference not related to the highway and bridge portion of this amendment, to an amendment that I have filed in a variety of forms down at the desk. Hopefully, this issue will not be seen by people as a question of being philosophically pure on free trade or somehow a sacrificing of principle on free trade. I consider myself a free trader, but I also like to consider myself realistic when it comes to succeeding in negotiations.

You do not get something for nothing. You have to have a strong negotiating position if you are to succeed with other tough negotiators. Right now, the negotiators of the other trading countries are, indeed, tough. According to the headlines from 21/2 weeks ago, they are almost intransigent.

Ambassador Macdonald just re-turned from Japan with virtually nothing to show for it. I fear that our negotiations with the Japanese have settled into a cycle where we shall escalate the rhetoric in this country for 2 months, 4 months, 6 months; the pitch of the rhetoric will be keen and sharp and high, indeed. We shall then send a negotiator over to Japan. He will have talks with all the powers that be. There will be an attempt at some kind of communique, but ultimately, the negotiator will return with very little-indeed, often nothing at all—to show for his efforts.

Mr. RANDOLPH. Will my colleague vield?

Mr. HEINZ. If the Senator will allow me to finish two more sentences, I shall be happy to yield to the Senator from West Virginia.

I find it the height of irony that, as this body is about to debate whether

or not we ought to have some kind of MX missile funding in order to preserve the President's credibility in the negotiations on arms control at Geneva, with all the incredible pressure that the Senate is being put under to preserve the President's strength in those negotiations, making sure that he has, at a minimum, that kind of bargaining chip, we would be here on the Senate floor, saying there something un-American taking a much more modest but, nontheless, equally realistic approach to dealing with trade.

Mr. President, I hope the Senate does not adopt a double standard. There is nobody I know of who is for absolutely unilateral disarmament in the defense area. I trust that the Senate will not go on record as favoring unilateral disarmament when it

comes to trade.

Mr. President, I shall be happy to yield to my good friend, the senior Senator from West Virginia (Mr. Randolph).

Mr. RANDOLPH. Mr. President, the able Senator from Pennsylvania has discussed trade with other countries from the standpoint of, let us say, Pennsylvania and its products, and certainly, West Virginia would be in that category as a producer of steel. I do know that few realize that since 1977, when we organized the steel caucus in the Senate, with the active participation of my colleagues, the Senator from Ohio, Mr. METZENBAUM, and the Senator from Pennsylvania, Mr. Heinz, who now serves as our able chairman, we have sought to have what we called fair trade between the United States and Japan or any other country, including our friends in

So we are saying in essence that we are at a disadvantage, apparently, in the production of steel and other products in this country, because, realistically, we are faced with products that come into the United States of America that are produced at a much lesser cost than we can produce those products in the United States. Therefore, we cannot compete against those products and when the money to produce those products, let us say, in Japan or some other country, is lacking, the government, in whatever country it may be, makes up the difference that, in effect, those governments are subsidizing their own industries. Is that not true?

Do we not run into that constantly? Mr. HEINZ. The Senator is quite correct. His statement is accurate.

Mr. RANDOLPH. Is it not also true that today—and I cannot give the figure at the moment, though perhaps I can place it in the Record—it is almost astonishing, incredible, the amount of money in the form of loans and grants that goes from the United States to other countries, billions and

billions of dollars. Those billions of dollars, my friend knows, go into companies that produce products that come in direct competition with the products manufactured in the United States. I ask unanimous consent that a table from the December 13 issue of U.S. News & World Report which shows "Where Billions in Economic Aid Have Gone" be included in the Record.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

[From the U.S. News & World Report, Dec. 13, 1982]

The state of the s	CANADA CONTRACTOR

Mr. RANDOLPH. That money does not go for any reason except it goes to help to build the economy—is that not true—of the country in question?

Mr. HEINZ. That is often the case. Mr. RANDOLPH. Billions of dollars. So we get into the category of—well, call it fair trade or unfair trade. It must be a realistic trade. That is what the Senator is asking, is it not?

Mr. HEINZ. The Senator has stated it better than I did myself.

Mr. RANDOLPH. Mr. President, I think this is a matter of genuine concern to the Members of the Senate, regardless of these so-called tactics of delay, which I deplore at any time. I believe in moving through debate and then voting an amendment up or down or taking action legislatively, at a time after matters have been discussed, not filibustered. I do not believe in it, never have, and I have never supported it.

And so I think we ought to come to grips with and vote on this amendment. Is that what the Senator desires?

Mr. HEINZ. The Senator has read my mind. I hope that it would be possible for us to get to a vote on this issue. I do not see what purpose is being served by the kind of delay that is taking place on this amendment. This is not the first time a Buy American amendment has been considered on the floor of this Senate. When the Senator himself was managing a bill about 3 years ago, I know that he and I had a debate on a Buy American amendment. Our colleagues were involved in it and the amendment was disposed of in less than an hour. It is not the kind of amendment, frankly, that is all that unusual. It is not precedent-setting in that we have other versions of this kind of legislation in the law already, and they have been debated without filibuster on many previous occasions.

Mr. RANDOLPH. This further word, and then I am through. I am very appreciative of the Senator's understanding of my question.

I do not say to any Senator that he or she not have the right under the rules of the Senate to use the parliamentary procedures to the advantage that they hope to gain. I understand that, and I have used the words often; I respect my colleagues in their judgment and conscience, but I do feel that there are matters that can be discussed and then after the discussionthorough, to be sure-we should vote that proposal up or down. It seems to me that this is the time to act on the matters that the Senator from Pennsylvania, and Senator Metzenbaum, and others have brought to the attention of this Senate.

Mr. HEINZ. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, the Buy American amendment and the antidumping enforcement mechanism that are pending are excellent examples of legislation that is designed to help our people to keep their jobs and expand the economy. I strongly support both efforts. At a time when our crucial domestic steel industry is utilizing approximately 40 percent of its total operating capacity due to the depression-I call it a depression with 12 million people out of work and with some West Virginia counties, at least one, with the unemployment running at better than 34 percent-due to the depression and unfair trade, what could be more sensible, more rational than requiring the Federal Government to use American steel? When steel hurts, coal hurts. When the steel industry in West Virginia is operating at 40 percent of capacity, West Virginia coal miners are thrown out of work. And when West Virginia coal miners are thrown out or work, retail sales are down, store clerks are thrown out of work, truck drivers are thrown out of work, other people are thrown out of work. The infrastructure improvements that are authorized in this legislation will require a substantial volume of steel. Given the unacceptable unemployment rate in the steel industry, which in November 1982 was 26 percent, the steel used should be of American origin.

Now, I talked with the British Ambassador some time ago, and I told him about our dilemma, that we have thousands of steelworkers who have lost their jobs and the State is faced with a possible closure of the steel facility at Weirton if something is not done and done soon.

I have tried to be helpful to that plant in every way that I could. The employees there are attempting to set up an ESOP—an employees stock ownership plan—so that they would take over the plant and operate it, and that plan is on target, thus far. We hope to

get some help from certain Federal agencies.

The Environmental Protection Agency has already been helpful. It has approved the first bubble proposal, and there is a second bubble proposal in the works. This bubble proposal that has been approved by the Environmental Protection Agency, and hopefully the second one will be approved, will save the plant millions upon millions of dollars which would have to otherwise be spent for antipollution equipment, which can otherwise be used in the ESOP approach.

If that plant goes down, it will be a catastrophe, not only for 11,000 workers and former workers there but also for their families and for associated industries and the workers in those industries. It would be a catastrophe for the Ohio Valley, the northern pan-

handle of West Virginia.

I was talking with Sir Nicholas Henderson, British Ambassador, and I said, "Mr. Ambassador, your government is subsidizing the steel industry and it hurts our steel industry." And he said, "Well, we do that so that we will continue to keep our steelworkers employed."

"Well," I said, "it takes jobs away

from our steelworkers."

The same thing is true with Japan and Germany. These other governments subsidize their native industry. The same thing is true with footwear as with steel.

Mr. RANDOLPH. Will my colleague

yield at that point?

Mr. ROBERT C. BYRD. Yes, I will

yield to my colleague.

Mr. RANDOLPH. As the Senator knows, in West Virginia we have 11 footwear facilities of one type or another. Usually they are in the more rural communities and perhaps 55, 60 percent of the employees are women. And they have been doing a good job, and they have employed 2,500 individuals in our State. In one plant there might be as many as 325 workers as we have had in my home county just south of Elkins, as the Senator knows, near Beverly with the Bata Shoe Co. Only recently, why, it had no layoffs. They had had layoffs, but its doors closed in September 1982. A few individuals, 45, have been called back to work now, but many workers remain unemployed. All over West Virginia in these counties like Greenbrier and Preston and Hampshire and Pendle-

Mr. ROBERT C. BYRD. Tucker.

Mr. RANDOLPH. Yes, Tucker, Preston, and Geilmer, why, these plants are operating at maybe 20 percent, 30 percent of capacity. When I was in West Virginia recently to meet with over 100 of the workers at Bata Shoe, one of the men from Bata Shoe brought his son into me. He said, "I would like for you to see the shoes that he is wearing." He took them off,

and I found they were made in Korea, but they were being sold in West Virginia at a price of about \$1.75 cheaper than we can produce any shoes that this man could buy for his son. I am very supportive of the footwear industry and worker's trade cases currently under investigation by the U.S. Trade Representative, and I hope the investigation will go forward.

So it is a very practical matter that the Senator brings to our attention today in reference to not only that very important steel industry at Weirton but throughout the steel industry as a whole.

These are difficult times, and we cannot live unto ourselves alone. But we must not live in a world where we are being driven to the wall by unfair

trade practices from abroad.

Mr. ROBERT C. BYRD. I thank my colleague for his observations. He is correct. Other countries look out for themselves and their people. It is steel today. Tomorrow it will be computers. The Japanese are coming on very aggressively, and it will not be long until our lead in technology may be taken away from us. In high tech, computers, and so forth, the Japanese are very aggressive. They are going to be No. 1 in that area before long. We are No. 1 now. But the same thing is going to happen there as has happened to steel and footwear. My colleague has spoken about footwear. I was in Parsons, in Tucker County, not many weeks ago where they have had to cut a good many people off there.

A good many employees in the town have lost their jobs in the footwear plant. I was told by the manager of the plant that since the quotas were lifted back the middle of the year, the increase in imports of footwear is about 30 percent from abroad. He also told me that about 60 percent of the footwear that the American people use is now imported.

So every country except this country is looking out for its own people.

Protectionism is a bad word around here. It should not even be in the dictionary. It is a bad word. It is not a four letter word, but it is a bad word.

I feel that the time has come for America to show a little toughness on this issue, and it would seem to me if America did that we would find that our neighbors would be willing to sit down and talk about fair trade—which ought to be a two-way street.

I was about to say that the infrastructure improvements that are authorized in this legislation will require substantial volumes of steel, and I pointed out in November, this last month, that the unemployment rate in the steel industry was at 26 percent. An important portion of steel has special alloys in it for purposes of strengthening it and making it more resistant to corrosion.

might be like a piece of rubber if it were not for these alloys.

So then where would our skyscrapers be? Where would our bridges be if those steel beams and steel columns were devoid of this important and vital ingredient-ferro alloys.

An important portion of steel has special alloys in it for purposes of strengthening it, making it more resistant to corrosion. These alloys, ferro, chrome, and chrome alloy are necessary ingredients for many of the high-strength steels that are needed for the bridge and road improvement program.

In Fayette County, in Glen Ferris, there are West Virginians whose jobs have been destroyed by unfair foreign trade in the ferroalloy industries. The domestic ferroalloy industries. The domestic ferroalloy industry is operating at less than 20 percent of capacity. Think of that-less than 20 percent of capacity.

Suppose this country gets into a war. Are we going to be dependent upon other countries for the steel and the ferroalloys that are so vital to our security? Or are we going to make our ships, our tanks, and our armored vehicles out of fiberglass?

Our economy is fast becoming a service-oriented economy, and I am glad to see service-oriented industries grow. I want them to grow. But this Nation should not become just a service-oriented Nation.

We must remain an industrialized Nation if we are going to have a foreign policy that works and if we are going to be prepared militarily to keep our country secure.

Mr. RANDOLPH. Mr. President, will my colleague yield?

Mr. ROBERT C. BYRD. I yield. Mr. RANDOLPH. When my colleague mentions service-oriented industry. I do know that in just one fast food firm, McDonald's, there are more workers in that one company than all the workers in all the steel plants of the United States of America today. Over 404,000 men and women are employed by McDonald's and at this time there are over 146,000 steelworkers unemployed, which is nearly 50 percent

I am not against a hamburger by Wendy's or McDonald's or whatever it may be. But we cannot continue, as my colleague is saying, we cannot continue to develop a service-oriented industry in this country. We have to have that strong industrial base with which the Nation has prospered and which, frankly, if we lose it the Nation shall be the loser.

of the work force.

Mr. ROBERT C. BYRD. I agree with my friend and my senior colleague.

Secretary Regan said recently to our steel people that they could forget their old jobs, that they might never

In other words, a piece of steel have them again, that Sears and some of the other industries were employing more employees than the steel indus-

> When De Tocqueville visited this country in the early 1840's, he said the "incredible American believes that if something has not yet been accomplished it is because he has not yet attempted it."

> people do Incredible incredible things. And it was the incredible American who put a man on the Moon, and it took the launching of Sputnik I to galvanize America into developing a space program that 10 years later put Neil Armstrong on the Moon.

> For centuries man had stood upon his native Earth and looked longingly at the Moon. But the incredible American put a man on the Moon, where he stood and looked lovingly back upon his home Earth, and it was the incredible American ingenuity that brought that man safely back to Earth again.

> To tell the steelworkers of this country that they "may as well forget it, they might never have their old jobs back," that is foreign, that is alien to the spirit that built this country, that built America, and I do not agree with that attitude at all.

> I think we just need to have a little ferroalloy in our backbones, to stiffen our backbones in dealing with our friends and let them know that if they are going to set up these barriers or these time-consuming testing procedures and certification procedures, as the Japanese do-our products are already tested when they are sent to Japan-but if they set up these timeconsuming procedures, certification procedures, testing procedures, if they subject our products to those and cause the price to go up, and Japanese buy Japanese products first and there are various and sundry barriers that are set up to keep our products out and to keep our products from being bought in other countries, then we will retaliate. Instead, our Treasury Secretary just says, "Well, boys, you might as well forget it. In other words, ours is becoming a service-oriented economy. You can get a job at Sears, Roebuck or at McDonald's."

As my senior colleague has said, we mean no reflection by that. We want to see McDonald's prosper. We want to see Sears prosper. But if our steelworkers are out of work and our coal miners are out of work and our ferroalloy people are out of work and our leather goods and footwear workers are out of jobs, who is going to buy at

Mr. RANDOLPH. And our aluminum workers.

Mr. ROBERT C. BYRD. Our aluminum workers.

Mr. RANDOLPH. And our glass

Mr. ROBERT C. BYRD. Our glass workers.

Mr. RANDOLPH. Our chemical workers.

Mr. ROBERT C. BYRD. Our chemical workers.

You name it. Anyplace we can be soft in trade with our trading partners we are being soft.

I have been around here for 30 years on this Hill and we have talked about free trade and all that, and I want to see us increase our exports to other countries and we can do that. But we are going to have to do something to protect our basic industries because, under the Constitution, Congress has the responsibility to promote the common defense of this country, and we cannot do it if we do not have the vital steel industry and ferroalloy industry and other basic industries to keep our country free.

Mr. METZENBAUM. Mr. President, will the Senator from West Virginia vield for a question?

Mr. ROBERT C. BYRD. I yield.

Mr. METZENBAUM. Mr. President, would the Senator from West Virginia agree that even those of us who consider ourselves free traders in the past are now living in a world where there is truly very little free trade? The only free trade that exists is for those who are exporting their products into our country. Almost with no exceptions every other nation in the world has some kind of protective barrier against American products being sold there, any one of a number of kinds of restrictions, so that free trade is just a myth that we continue to talk about here in this country but really does not exist when we try to export our products to other nations.

Mr. ROBERT C. BYRD. It is great in theory, and I would like to see it. I would like to see free trade, but we are not witnessing free trade when Belgium, the Netherlands, Brazil, Germany, Luxembourg, Italy, Japan, and these other countries subsidize their own native industries.

I told the German Foreign Minister, Hans-Dietrich Genscher, the same thing when he visited my office sometime ago. They protect their industries, they subsidize their industries, and it enables those industries to send products to this country and sell them at cost, below the cost of producing those goods in this country. Our steel mills cannot compete under those situations, so what should we do, just give up and say to our steel people, "Forget it, you won't ever have your old jobs back"? But an industrialized nation has to have a viable steel industry.

I know there are those who say, "Well, you will start a war." I say we have been in a trade war for many years, and we are losing it. We are losing that trade war. We are losing it without firing a shot.

So I hope Senators will support the Metzenbaum amendment, and the Specter amendment along with it, and commend the Senators for their leadership in proposing those amendments, and I am glad to join in cosponsoring them.

If one has to be called a protectionist, why, so be it, even if it is a bad word. But you go over there and talk to those steelworkers, go over there and talk with them, talk to those coa! miners, those people who are out of jobs in Parsons in Tucker County, in the footwear industry, talk to them; talk to the people, talk to the people within the companies; talk to management in the companies; talk to them about forgetting it, you know. "You might as well get yourself a job in a pie factory."

Mr. METZENBAUM. Mr. President, will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. METZENBAUM. The Senator has traveled all around the State of West Virginia and probably knows his State as well as any Member of this body, and I know that bordering my own State of Ohio there was a steel mill in West Virginia that at one time employed 12,000, if my recollection is correct.

I have heard comments today on the floor of the Senate about how steelworkers are living at a very high pace, tremendous amounts

I know the Senator knows his State well, I would like to ask him has the Senator seen the conditions near the steel mills in the areas in which the steel mills operate, and will the Senator give his impression as to whether steelworkers are living in this great lap of luxury which has been described to us earlier in the day? Or are the steelworkers in West Virginia doing that which steelworkers in Ohio are doing, and that is they are at best trying to make out and trying to keep their families together, to educate them, clothe them, house them, feed them?

Mr. ROBERT C. BYRD. Well, Weirton, W. Va., is going to become another Youngstown if something is not done and done pretty quickly, and the same thing that is happening with Weirton Steel is happening with other steel companies.

Wheeling-Pittsburgh Steel is having its problems, and one can understand why. Weirton Steel produced, I suppose, over 1 billion dollars' worth of steel last year, I believe, and the margin of profit was something like one-half of 1 percent. Well, one can do much better than that by just purchasing market certificates or Treasury bills.

One can talk about the wage of the coal miner. My foster father worked in the coal mines, worked for \$2 a day;

sometimes he was overdrafted and in debt to the company.

Of course, coal miners are getting more money now, and they are entitled to every dollar they get, because those who would criticize the wages of the coal miner just have not been back in those damp, dank bowels of the Earth and heard the timber cracking to the right and the timbers cracking on the left, and have not had to wear the kneepads as they slog through the waterholes back in the bowels of the Earth, and they have not stood at the mine mouth after an explosion to see the faces of members of the families waiting. The miners are entitled to every dollar they earn, and so are the steelworkers.

But there may come a time when industry and management will have to work more closely together and with Government. Perhaps there needs to be more cooperation among the three but, at the same time, I do not think we can stand idly by and see these other countries shipping goods into our country at prices which our native industries cannot meet, forcing those industries to close down, people to go out of work, go on unemployment compensation, food stamps, and welfare. With each 1 percent of increase in unemployment, the Federeal deficit is increased by \$28 billion-\$7 billion in food stamps, in welfare, unemployment compensation, and \$20 billion to \$21 billion in lost revenues to the

So the crocodile tears that are shed by those who speak out against protecting the American workers and American business do not impress me. They might go over to Weirton and talk to those steel people there and see what they think, and they will be impressed pretty quickly by the fact that those people over there believe that their elected Representatives ought to stand up for America and Americans and American industries, American working people and American businesses, and not be told, in essence, "Boys, you may just as well forget it. You may never have your jobs back. We are exporting our jobs overseas. Furthermore, we will continue to do so; get yourself a job in a service station, or at Sears, or at MacDonald's."

DANFORTH addressed the Mr. Chair.

The PRESIDING OFFICER (Mrs. HAWKINS). The Senator from Missou-

Mr. DANFORTH. Madam President, it was clear from the outset when the Senator from Ohio first offered his amendment last night that we were in for a very lengthy debate, and it is equally clear that this debate has given every indication of having a very long, long way to go.

There are times on the floor of the Senate when issues are before us and they are debated at length, and those lengthy debates are known as filibusters, and they are nothing but wastes of the Senate's time. They go on and on for hours, days. Trivial matters are discussed, there are long procedural wrangles which are undertaken and, frankly, it is nothing but just a filler.

I would point out in connection with this debate that I think very serious substantive matters have been discussed, and they have been discussed by both sides. They have been discussed by the advocates of the Metzenbaum amendment and they have been discussed by the opponents of the Metzenbaum amendment.

Madam President, it is now approximately 10 minutes after 4 in the afternoon, and I arrived on the floor this afternoon at about 20 minutes after 2. So that is just short of 2 hours. I would point out that during that 2hour period of time, all of the debate was being conducted by those who support the Metzenbaum amendment or the Specter amendment, or both amendments.

So this is not simply a debate to delay something; although it is my hope, for reasons to be stated, that we do not end up voting on the merits of either of these two amendments during this lameduck session. But it has been a very hopeful airing of the merits, of the substance. And the substance has to do with U.S. trade policy.

It is interesting that during the last nearly 2 hours, when I have been on the floor, the discussion has really ranged through the whole spectrum of U.S. trade problems. We have been talking not only about the problems of the steel industry, but we have been talking about the shoe industry, we have been talking about the U.S. deficit with the rest of the world in international trade.

Now, the distinguished minority leader says that this is not the beginning of a trade war, but that we are already in a trade war. But I think that it is clear that something very dramatic is about to happen in the United States with respect to trade policy. What we are hearing today on the floor of the Senate is either the first shot in a trade war or, in the alternative, it is an attempt to accomplish a very significant escalation in a war which has been conducted at a much lower level than is anticipated by the debate today.

Mr. METZENBAUM. Without losing his right to the floor, would the Senator from Missouri yield for a question?

Mr. DANFORTH. Of course.

Mr. METZENBAUM. We are aware of the fact that this matter has been debated an entire day. We are all aware of the fact there are some strong positions and views stated. I am also aware of the fact that the Senator from Missouri has not concluded his own personal statement. But, in order that the matter might be brought to a vote, would the Senator from Missouri consider offering a motion to table so that we might see whether we do or do not have sufficient strength in support

of this amendment?

Mr. DANFORTH. Right now the Senator from Missouri would not be prepared to offer a motion to table, because I do want to offer my own comments on the merits of both the Senator's amendment and also Senator Specter's amendment, which has been underdebated so far, but I do think it deserves attention. Whether or not either I or someone else will offer a tabling motion in the future, I am just not prepared to say.

Mr. METZENBAUM. I thank the

Senator from Missouri.

Mr. DANFORTH. Madam President, I think that it is clear what we are going to see is either the beginning of a trade war—in fact we may have seen the first shot fired today—or a major escalation in the trade war. And I think the fact that this has been coming has been clear to many of us

now for some time.

We are in a recession right now. It is not simply a recession which affects the United States. Often when we pick up the newspaper or listen to the television and read or hear about the recession, we conclude that only the United States is in a recession and that it has lasted only a very short period of time. But that is not the case. This has been coming for some years now, and it has been a recession which is worldwide. It has certainly affected Europe, it has affected Latin America, and it has even affected Japan. We sometimes think that Japan is omnipotent in its economy. Well, Japan would not state that right now.

This is a worldwide recession. And at a time of world recession, countries all over the world are saying, "What can we do to help ourselves? How can we

protect ourselves?"

There is nothing like an economic decline to cause introspection. There is nothing like a decline to cause people not to look toward the wide horizons of the world in a sense of optimism and a desire to conquer those horizons, but instead to cause people to hunker down and to crawl into their own shells and to think about themselves and only themselves, to turn inward. And that is what we are seeing now all over the world.

We have certainly seen it with respect to Japan. Everything that has been said on the floor of the Senate about Japan today has been absolutely right. The Japanese want to export everything they can to the United States. And the Japanese want to import as close to nothing as they possibly can. It is difficult to export to Japan. It has been pointed out agricul-

tural exports are difficult. Indeed, they are.

The distinguished Presiding Officer represents a citrus-producing State. Japanese barriers against U.S. citrus exports are legendary and the same is true with respect to beef. These are not exactly high value-added products. These are agricultural products and even there the Japanese are protectionists. And it seems as though they are increasingly protectionist.

We are having more difficulties, not less, with the Japanese. Everyone who says we have been talking, we have been complaining, we have been tearing our hair out, we have been screaming and yelling and threatening and it does not seem to do any good, they are absolutely right. It does not do any good. It is posturing; it is crying wolf. We threaten them and we do not follow up and do anything. There is no systematic mechanism for dealing with the Japanese, and I want to talk about that more in a moment.

With respect to Europe, we just came from a GATT ministerial meeting in Geneva. The problem in Geneva was primarily a problem with Europe. The Europeans are practicing a variety of measures which together do constitute if not economic warfare, it is something very close to it—agricultural subsidies, export subsidies. As a matter of fact, I think that it is fair to say that France attempted successfully to thwart virtually everything that the United States was interested in accomplishing at the GATT ministerial conference.

We are having difficult times, and we are having difficult times because basically the approach of the United States has been, and is, not to close down its own markets but to try to do business in world markets. And other countries are saying, "At a time of international recession, we do not want to do business any more. We want to take care of number one. We want to protect ourselves. We want to subsidize our products and what we make in our country."

So what has been going on for the last day on the floor of the Senate has been quite predictable: A reaction on the part of the United States, a reaction to unfair advantages taken against us by other parts of the world.

But, Madam President, reaction striking back, striking out—does not necessarily make sound U.S. trade policy.

Yes, it is understandable. It is understandable to get mad. It is understandable to want to retaliate, to want to play their game with them. But if we are going to protect, truly protect, the interests of the United States, does it not make sense that we do so in a well thought out way? Should we not contemplate where we are heading before we embark on our course?

Should we not attempt to anticipate where we are going rather than to just dispute something? That is what we are being asked to do with these amendments.

Here we are, Madam President, on the 15th of December. We were told that we were coming back for a "lameduck" session of the Congress to deal primarily with the continuing resolution and with the highway bill. We were told that this would be a 3-week "lameduck" session and that it would end up the 17th of December.

A lot of us do not think it will end up with the 17th of December, but maybe it will. That at least is the target.

But here we are 2 days before the target. Each House of the Congress in something that very much resembles a state of chaos, Members of the Congress desirous to go back to their homes for the Christmas holidays, their kids arriving back from college or wherever for the holidays. We are asked now, with 2 days left to go before we are supposed to adjourn, to take up two blockbuster initiatives in the very serious matter of international trade—blockbuster initiatives. We are asked to do that, Madam President, without any bill having worked its way through the committee system.

I may be wrong, but on the steel question and the "buy American" provision in steel, I do not even know that a bill has been introduced on this subject. I may be wrong. I do know in the Finance Committee hearings have not been held. I do know that nothing has been marked up.

With respect to the Specter amendment, the Specter amendment has had hearings in the Judiciary Committee. It has not been marked up in the Judiciary Committee.

The Finance Committee, which has jurisdiction on trade matters, has asked for a sequential referral of the bill and has not received a referral of the bill and, therefore, has not held hearings and has not marked up anything.

So, with 2 days left in this Congress—hopefully 2 days left in this Congress—we are asked on the floor of the Senate to address major matters of trade policy at a time when people want to just strike out in response to protectionism by other countries.

I would like to say some words about the Specter amendment.

Madam President, back in 1979, in connection with the Trade Act that was passed in 1979, we in the Congress undertook major procedural reforms dealing with antidumping and countervailing duty cases. I remember it vividly because I was right at the heart of that effort to reform our procedures for dealing with dumping cases and with subsidy cases.

When Senator Heinz was speaking earlier, I was reminded of the great effort that we put into changing the procedures in dealing with trade cases.

Madam President, I can honestly tell you it was the most tedious undertaking I have had since I have been in the Senate.

First of all, we started with enormous staff work. Then we proceeded to the Finance Committee in a seemingly interminable process dealing with how many days should such and such event occur; what kinds of procedures should be undertaken simultaneously; what is the proper forum for determining one thing or another thing that has to be determined in these extremely complicated casesvery complicated cases. What is the subsidy? What is the bargain price? What is it being sold at? What is cost? What is injury? All of these are very, very difficult, factual questions. How can they be determined?

It was clear in 1979 when we addressed these questions in the Congress that the system as it existed at that time was not working well. There were horror stories, Madam President, about endless delays in the system, in trying to process these cases. We attempted to fix those endless delays, to shorten them, to have a better system for processing trade cases.

But I must say what we went through to accomplish that objective was not just a simple matter. It was not something that was reserved for the floor of the Senate. We could not have done it on the floor of the Senate. To try to do so on the floor of the Senate would be comparable to try to make a very delicate machine on the floor of the Senate. It was long, it was tedious, hard work. But it was necessary work.

We did it in the committee and they did it in the Ways and Means Committee at the committee level. We worked it out with the U.S. Trade Representative in lengthy, lengthy negotiations, and we worked it out in conference. That was in 1979.

Now we are facing the question, what did we do in 1979 and how has it operated? How have we fixed or not fixed the question of how to proceed in antidumping cases and countervailing duty cases? When I ask practitioners in the field of trade law how we did, I get mixed results. Some people say, "It looks good." Some people will say, "We are on such a fast track now that it is a lawyer's paradise. You have to have so many lawyers operating at any given time that it is just too expensive to go through."

Other people say, and I think this is probably the majority of people who are knowledgeable about antidumping and countervailing duty cases, that it is too early to tell. They say, "We really do not know yet."

Madam President, the point is this: In this complex area of enforcement of the trade laws, of procedural measures to enforce the trade laws, in this area which took us a seeming eternity to work out in 1979 and in which we are still not sure whether or not we did the right thing, should we now, on the floor of the Senate, without hearings in the Finance Committee and without a markup of anything, attempt at the 11th hour to set in motion a whole new enforcement process?

My answer to that question is to do so would be harebrained, having gone through this thing before. We cannot undertake a procedural reform on a matter this complex on the floor of the Senate.

I wonder, Madam President, in all honesty, how many Members of the Senate know what the procedure is

I wonder, if we were to give an examination to Members of the Senate on how dumping cases or subsidy cases are processed today, how many people would score a passing grade? I would not, because it has been about 3 years since I have really gotten into the details.

Maybe other Members of the Senate are conversant with it and know with certainty how the process should work—but I doubt it. I do not believe we should go off halfcocked and, furthermore, I am told by staff that the process that is now being suggested is a violation of the Geneva Agreement on Tariffs and Trade.

If that is so, Madam President, and I cannot speak to that definitely myself, but if that is so, are we prepared now to violate an international agreement to set in motion a new procedure for enforcing the trade laws without hearing in the Committee on Finance and without any markup? I hope the answer to that question is no.

Madam President, some would argue that the system is too complex and too slow now in the Department of Commerce and in the International Trade Commission. Some practitioners would say that it is too fast. I take it that the Senator from Pennsylvania believes that it is too slow. I do not know what the answer to that question is. I do know this: The solution of trying to move this process from the Commerce Department to the International Trade Commission and from the International Trade Commission to the court system is hardly a blueprint for an expeditious process.

The amendment of the Senator from Pennsylvania would put the courts in the act of adjudicating antidumping and countervailing duty cases. It would put the courts in the business of adjudicating very complex situations involving economic determinations. I ask the Senate, does the judicial system have expertise to adjudicate

economic questions? Do judges, when they are confirmed by the Senate, have the sort of expertise, do we quiz them on that kind of expertise that we would expect from the International Trade Commission?

How can the courts have the competence to make this kind of determination? If they do have that kind of competency and we do think that that is a reasonable forum to make this kind of determination, do we really expect the courts to act expeditiously on these cases?

I have practiced law. The distinguished author of this amendment is a very distinguished lawyer. Maybe the courts in Pennsylvania are not like the courts in Missouri, but one of the things I never was able to figure out when I practiced law was how to get a judge to decide a case.

In fact, in the trade cases that have been before the courts, we have seen exactly the same thing. The famous Zenith case went on 8 or 9 years. Consider virtually any complicated antitrust case that goes before the courts. How long does it take to decide an antitrust case from the time that the case is filed—from the time that it is finally completed and determined, how long does an antitrust case take? Does anybody think that it takes half a year or less? Does anybody think that it takes 5 years or less?

Antitrust cases go on and on forever. A complicated trade case involving many of the kinds of considerations, as a matter of fact, that go into antitrust litigation, would go on at least as long. It would be endless.

A lot of people are concerned about clogging up our judicial system. They say that the courts are overloaded, that there are too many cases. Wait till we lay this one on them. Wait till we try to put trade litigation before the courts. It would go on forever.

Madam President, if I were an aggrieved party from an unfair trade practice, would I want my case to be in the judicial system? Why would I? Would I want to subject myself as an American corporation, an American business, to the Federal Rules of Civil Procedure? Would I want to subject my officers to having their depositions taken, to having my books and records opened and examined by foreign competitors? No.

Wait until the first interrogatories are served, or the first deposition is taken in a trade case, before you see a procedure really backfire.

Therefore, Madam President, I believe that the Specter amendment is ill considered, I believe that it would cause chaos in the trade system, that it would possibly violate the Geneva Agreement on Tariffs and Trade, and that, as a matter of procedural

remedy, we would embark ever deeper into the woods.

At this point, Madam President, I would like to read a statement by the U.S. Trade Representative, Bill Brock. It states as follows:

The Administration opposes enactment of Amendment No. 1448 proposed by Senator Arlen Specter to H.R. 6211 or any similar amendment. Amendment No. 1448 amends the Antidumping Act of 1916 to provide a judicial means of antidumping action for U.S. industry. Practical legal problems strongly weigh against enactment of Amendment No. 1448, moreover, Amendment No. 1448 would violate the international obligations of the United States under the General Agreement on Tariffs and Trade (the GATT) and the GATT Antidumping Code. Exporters in many of our most competitive industries depend on the protection of these obligations, and enactment of Amendment No. 1448 or any similar amendment, would expose them to retaliation in kind from our trading partners.

Amendment No. 1446 is premised on the belief that going to court for a judicial remedy under the antitrust laws would be faster and less expensive for domestic industry than pursuing the existing administrative remedies. In our view, however, the remedy in Amendment No. 1448 would further overload the courts, and would subject domestic industry to the uncertainty, high cost and well-known delays of the judicial process, typified by antitrust litigation. The foreign defendant could prevent resolution

of such a case for years.

A judicial remedy for antidumping, in fact, would expose the domestic plaintiff to substantial down-side risk from a foreign defendant's possible antitrust counterclaims for treble damages. A foreign exporter could use discovery in such a case to probe extensively into the U.S. plaintiff's business operations. The U.S. plaintiff would also realistically have severe problems in obtaining discovery of the facts concerning the defendant's business which would be necessary in order to show dumping. In contrast, the present system offers no risk to the domestic petitioner, and discovery problems are handled at no cost to the petitioner by the Commerce Department.

We also oppose Amendment No. 1448 because it would be inconsistent with United States international obligations under Article VI of the GATT and the Antidumping Code. These obligations concern the fair and open operation of anti-dumping measures; the Antidumping Code was approved by the Congress in the Trade Agreements Act of 1979. Enactment of Amendment No. 1448 or any similar amendment, would invite passage of similar measures by our major trading partners such as Canada, Japan and some of the European countries. Such measures could have a severe impact on U.S. firms and workers producing goods

exported to those markets.

The Trade Agreements Act of 1979 mandated expeditions handling of antidumping and countervailing duty cases. The Commerce Department has enforced the antidumping and countervailing duty laws in a vigorous, tough and timely fashion. The record shows that this Administration is processing more antidumping and countervailing duty cases now than at any time in the history of these laws. Adding the judicial remedy proposed in Amendment No. 1448 or any similar amendment would be neither necessary nor desirable.

The fact that Amendment No. 1448 proposes a judicial remedy for dumping does not exempt it from our international obligations. The full obligations of the Code apply to any remedy for dumping. Provisions of Amendment No. 1448 are at odds with basic requirements of the Code and the GATT concerning findings of injury, non-excessive assessment of antidumping duties, customs clearance and due process in antidumping investigations. Therefore, we believe that the statement in Amendment No. 1448 that this Amendment is consistent with the GATT is incorrect.

The Office of Management and Budget advises that there is no objection from the standpoint of the Administration's program to the presentatin of these comments.

Madam President, that is the comment of our U.S. Trade Representative. That is the position of the administration on this amendment. It is opposed by the administration. It is a possible violation of the GATT. It is a process which subjects aggrieved U.S. parties to discovery, to having their books and records and businesses opened up by foreign competitors.

Madam President, I have been approached by the distinguished President pro tempore who has a privileged matter which he would like to bring before the Senate, and therefore I ask unanimous consent that the Senator from South Carolina be recognized at this point without losing my right to the floor or without it being counted two speeches under the rule.

The PRESIDING OFFICER. Is

there objection?

Mr. RIEGLE. Reserving the right to object, and I do so on behalf of the leadership until we ascertain whether this item has been cleared, I would be compelled to object until such time as we are sure it has been cleared on this side.

Perhaps the Senator could put his request shortly, not right at the moment, so that we can determine whether that has been cleared on this side.

Mr. DANFORTH. So. Madam President, given the fact that there have been no hearings in the Finance Committee on this amendment, it has never been marked up by any committee in the Congress, to my knowledge, certainly no committee in the Senate, given the fact that it would contemplate a new procedure for pursuing trade cases while the 1979 procedures are still in a shakedown cruise, so to speak, given the fact that the court system is even more time consuming and elaborate than the processes by which these cases are now handled on the administrative level, and given the fact that it subjects U.S. companies to discovery and to counterclaims, I hope that at the appropriate time the Senate agrees this is not the occasion to consider a matter this complex and this far reaching with respect to the enforcement of our trade laws.

Now, Madam President, I turn to the question of U.S. trade policy in gener-

al, where we stand now and what we should do about it, where we should go from here, because it is my opinion that the route we should not take, at least we should not take without thinking it out in advance, is the route outlined by the Senator from Ohio.

Madam President, it is clear that the United States has serious difficulties in international trade, and it is also clear that for some time it has been known to us that we have been treated unfairly by our trading partners and most particularly and obviously by Japan. This is not new news, and, as a matter of fact, in 1981 the Senate Finance Committee passed a committee resolution which pointed out the very serious nature of the situation which we then perceived and now perceive with Japan.

I should like to read into the RECORD the resolution adopted by the Committee on Finance, United States Senate, on December 2, 1981.

# COMMITTEE ON FINANCE: COMMITTEE RESOLUTION

Whereas the 1981 bilateral trade deficit with Japan will exceed \$15 billion and by 1985 may reach \$25 billion:

Whereas there is no indication that under present trading conditions the projected growth rate of this bilateral trade deficit, will decline;

Whereas the United States is committed to free and fair trading relations;

Whereas United States producers and exporters as a practical matter are denied reciprocal access to Japanese markets;

Whereas hundreds of thousands of American workers and thousands of American producers are adversely affected by this lack of reciprocal market access; and

Whereas the continued denial of equivalent access and the perception of denial of access to Japanese market will inevitably damage our long term trade relationship and support for free trade in the United

States: Now, therefore, be it

Resolved, That it is sense of the United States Senate Committee on Finance that the United States Trade Representative and other officials of the United States Government take such actions as are necessary and appropriate to bring the denial of equivalent market access specifically and directly to the attention of the Government of Japan; to achieve expeditiously reciprocal trading opportunities for all American producers in the Japanese market; to take such other action including the use of existing laws, existing international agreements, or the submission of any needed legislation, as appropriate to guarantee equitable market access in Japan.

That is the sense of the Senate Finance Committee as expressed a year ago this month. And I am confident that a very similar resolution would be passed unanimously by the Committee on Finance today if it were offered. This resolution, as a matter of fact, did set in motion some favorable measures that were accomplished with respect to Japan. We did express through our U.S. Trade Representative our position that we are being treated unfairly.

There were some concessions which were offered by the Japanese to reduce some nontariff barriers that were in existence. So there were some

forward steps.

Madam President, this resolution that was offered last year is so typical of the way we in Congress view our dealings with other countries and particularly Japan in international trade. It is as though we believe that making a speech or issuing a resolution, making a statement or complaining will somehow accomplish results. Sometimes they do accomplish some results. Usually they are very minor and very short lived.

But our approach to dealing with our trading partners has been typically sporadic. We complain, we gripe, and we hope that by complaining, threatening, and crying wolf some-

thing will be done.

We talk so often about sending our trading partners a signal. We talk about sending them the right signal or sending them the wrong signal.

What resolution can we pass? What speech can we make? Can we send over delegations from Congress basically to

complain to the Japanese?

When I was in Japan along with the Senator from Rhode Island, Senator Chafee, last January, we were not alone. It seemed that every time we picked up the paper there was another delegation of Members of Congress or members of the executive branch arriving from Washington to voice their complaints to the Japanese. You turn on the evening television and you would have the electrifying experience of seeing your colleagues with translators describing in Japanese what they were saying and you knew the message was always the same. We were hurt. We wanted something done. We were threatening them.

This strategy of complaining, griping, and hoping that there will be some relief has, as I say, brought some modest relief every now and then but, Madam President, I for one do not believe that this is the way the United States should deal with other countries in foreign trade or anything else.

If all we do is use the signal method, flashing signals to other countries, use the right words, hope that we will scare them, eventually they will say, "Well they do not mean it. They are

crying wolf."

So the verbal abuse method, it seems to me, is not serving the United States particularly well, and I do not think that that is the way a great country should act toward another great coun-

So when I went to Japan with Senator Chaffe last January that is precisely the same message that I made and that I gave, and I wish to read into the RECORD the comments that I made to the Keidanren, the Japan Federation of Economic Organizations, in Tokyo on January 12, 1982. The statement is this:

I am very pleased to be here today to share with you some thoughts on U.S.-Japan economic relations. Your kind invitation has made this visit, my first to Japan. possible and has provided me with an invaluable opportunity to take a first-hand look at one of America's very closest friends and allies.

As Chairman of the Senate's International Trade Subcommittee, it is appropriate for me to focus on the subject of the trade relationship between our two nations. This is a particulary good time for a fresh assessment of our trade relations, and I intend to offer an American perspective on where we stand.

I need not tell you that our trade relations are strained. This American politician is very concerned by what he sees.

When we look at America's balance of trade with the rest of the world, the outlook is gloomy at best: In 1971 the U.S. trade balance went into deficit for the first time in more than three quarters of a century. Last year that deficit reached \$36 billion. Today, it appears that the U.S. trade deficit may have exceeded \$40 billion in 1981.

The statistics on America's trade deficit with Japan are even more dismal. In one year, the U.S. trade deficit with Japan is likely to jump an incredible 50 percent. From an appalling \$10 billion bilateral deficit in 1980, it now appears that our 1981 deficit exceeded \$15 billion. This is a trend which has clear political implications in the United States. It cannot be permitted to

Taken together with other comparative economic data, it should not be surprising that many of us in Congress now question the equity in the existing trade relations between the United States and Japan. In 1980, the rate of growth in GNP reached 4.3 percent in Japan in contrast to no growth at all in the United States. The increase in consumer prices in the United States was almost twice that of Japan. And the rate of unemployment in the United States reached 7.1 percent in contrast to Japan's 2 percent rate. With the recession this past year in the United States, this gap has widened.

The remarkable nature of Japan's postwar economic growth cannot be disputed. Your own efforts and strength of domestic demand in Japan have been major factors. But it cannot be denied that this "economic miracle" has, in large measure, come about through the generosity of open American markets and, to a significant degree, at the expense of American products that were at one time more competitive. The United States has followed a free market policy. One result of this policy has been a boom economy in Japan and widespread unemployment in the United States.

At the same time that American markets are open to Japan, there is indisputable evidence that the Japanese market remains closed to the better part of American exports. What we observe, from our side of the Pacific, is a Japanese approach to trade policy that combines an "infant industry" import strategy with an export program that has concentrated on targeting and protecting high-growth and high value-added industries.

TVs, autos and steel got this treatment in the last two decades; high technology products such as computers and telecommunications have it now.

I fully recognize that the trade problems that exist between our two countries result in part from factors other than the inaccessibility of Japanese markets. Some of these factors are of our own making. However, we are now engaged in an effort to tackle our domestic economic problems head-on.

In Congress, we are implementing budget cuts that are tough, often politically unpopular and demonstrative of an unprecedented degree of self-discipline. We are confronting the need for regulatory and tax reform. We are reaching for a bipartisan approach to stimulate research and development, sav-ings and investment, and productivity. And one by one we are reducing or eliminating a number of unilateral disincentives faced by American exporters.

This brings me to the issue of U.S. competitiveness. On a number of occasions it has been suggested that the problems American businessmen face in penetrating the Japanese market come not as a result of import barriers, but rather from a lack of U.S. competitiveness. The inexplicably low levels of Japanese imports of products ranging from computers and telecommunications equipment to manufactured tobacco products, leather, beef and citrus-where the United States is clearly competitivedemonstrate that competitiveness is not the source of the problem.

In response to the related allegation that we are not trying hard enough to export, I suppose I could accept the argument if American businessmen were the only ones unable to sell their products successfully in Japan. However, Japan's trade surplus with the world reached \$25 billion in 1978 and businessmen throughout the world-be they German, Australian or Korean, all complain about the problems they face selling in

Putting aside these tired arguments and counter-arguments we have all repeated for the past five years, the bottom line is clear:

As an elected official and as an American, the prospect of a bilateral deficit with Japan of over \$15 billion is clearly, clearly, unacceptable in view of the lack of reciprocity of access between our markets. It is inconceivable to me that the government of Japan would tolerate a bilateral trade deficit even close to that amount if the situation were reversed.

Most aggravating to the United States is the fact that Japan's market is not open. This closed market condition is perpetuated. even encouraged, by broader Japanese practices in the area of investment.

Protection of the Japanese market is maintained in a variety of ways-some clearly intended, some not. Some of the barriers are obviously illegal under the GATT, but others may not be.

But regardless of whether these impedi-ments are formal or informal, legal or illegal, the fact is that they work.

Illegal import quotas on products such as beef, citrus, and leather prevent competitive American exports from gaining more than a fraction of the Japanese market.

Unusually high tariff on other principal U.S. exports including computers, manufactured tobacco products, and plywood are also highly restrictive.

Other practices that serve as severe nontariff barriers are less obvious. There are the restrictive customs practices that preclude administrative or judicial review. There are standards and certification procedures that are far more extreme than those elsewhere in the world with some, such as the use of a "positive list" of additives, that seem designed to prevent changes. And there are a myriad of others such as government purchasing policies, government regulations, import cartels and other closed industry practices that exist in fact, if not in law

Finally, there exist in Japan a growing number of restrictions not traditionally considered under the general GATT framework. These include barriers to services and invesment that are not only harmful in and of themselves, but that also have a major impact on trade in goods. For instance, the difficulty facing American firms in investing in Japan and in buying Japanese firms, effectively blocks one potential solution to the problem of Japan's complex distribution system. I refer specifically to the ability to purchase a distribution system that is al-ready in place. Japanese firms face no such barriers to investment in the U.S. and take full advantage of the benefits.

I am not sure the full range of Japanese barriers to trade has ever been adequately catalogued, or that their true impact on our bilateral trade has ever been measured. What is clear is that they severely inhibit trade, and that they are the result of, and are in turn perpetuated by, practices and preferences which, taken together, result in a distinct anti-import bias. That Japanese growth is export-led is evident from the statistics: Last year some 80 percent of the 4.2 percent growth of GNP in Japan was based on exports. This occurred at a time when the rest of the developed world faced recession. As a major economic power, Japan cannot view this situation in a vacuumwithout regard for their impact on the rest of the world.

In recent months a multitude of American politicians and government leaders have traveled to Japan to complain about your trade policies and to plead with you to change your ways. Were I to follow their lead, this would be the point in my speech where I would make a plea that you alter your customs and open your markets to our products. I do not intend to follow that lead, because I am increasingly convinced that such complaining and pleading is not only useless, it is demeaning to both our countries.

To date, America's reaction to the lack of access to the Japanese market has been characterized by diatribe and threats. We have sent over repeated missions to Cabinet officials from the U.S. Trade Representative's Office, the Department of Commerce, the Department of Agriculture, the Department of Transportation and the Departments of State and Treasury to make the same speech I just made. Then, having listed their grievances, they have pleaded, urged, begged, argued and admonished Japan to change it ways.

I reject this approach and will not engage

in it.

The approach has had only limited success in terms of fundamental changes in Japanese import practices, and even this incremental progress has occurred at the cost of constant strain in the overall bilateral relationship caused by the well-publicized diatribe and rhetorical attacks.

This is no way for two great nations to behave. The constant rhetoric is demeaning to both sides. The United States should not be in a position where it must plead for equity. And Japan, as a sovereign nation, should not have to be told by outsiders to change its economic practices, customs and traditions to placate another country.

The United States and Japan must move

beyond rhetoric.

Both countries have a major stake in the economic and political health of the world and of each other. Japan, in particular, because of its national dependence on exports, has an immense stake in the economic well being of its principal markets. And both countries must set the policies that they perceive to be in their own interests. Once these policies are set, it is then up to the other country to respond in an appropriate fashion.

This method of non-rhetorical response is what I would propose for America's trade relations with Japan, and the objective of this form of response would be summed up

in a single word: reciprocity. One of the basic principles embodied in the GATT is that of reciprocal market access. But the GATT has not achieved reciprocity in the true sense of the word. Free trade is largely a myth. Moreover, GATT rules do not address directly many of the more sophisticated impediments to imports found in the world today. Finally, barriers to the free flow of investment and services, an integral part of international trade in today's world, are not addressed by the GATT at all. These barriers, and other trade restrictive policies undertaken by nations such as Japan, continue to grow in the absence of any guidelines at all.

The United States has, since the inception of the GATT, taken the leadership role in lowering international barriers to trade. We have had to push and cajole our trading partners into accepting each new guideline; unlike most of those countries, we have taken pains to employ the GATT's dispute settlement provisions; and we have been in the forefront of any negotiations aimed at the reduction of tariff and non-tariff bar-

It is time for the United States not only to protect our interests through the GATT rules, but to move beyond the GATT to seek reciprocity in the areas of trade in services and investment.

This new approach could be undertaken unilaterally by the United States, requiring no action on the part of Japan. I respect Japan's customs and have come to truly appreciate Japan's culture. Japan should be free to engage in whatever policies it deems appropriate. It would, however, still be up to the United States to respond in an equally appropriate fashion.

If offsetting measures are necessary to achieve reciprocal and equitable access between the Japanese and U.S. markets, than we should consider a straightforward mechanism to put them into place. Therefore, it would be incumbent on the United States to fashion its own mechanism by which to achieve our goals of fair and reciprocal trade, rather than constantly telling Japan what to do.

The Japanese economy is now approaching 10 percent of world GNP. Japan is clearly a major international economic power, whose presense is felt throughout the world. With its great power and proud tradition which I so deeply respect, Japan should be expected to set its own course and follow its own ways without the preaching or pleading of any other country.

Yet, Japan should understand that the United States, as well, is a great power with a proud tradition, and that we must set our own course and do what is necessary to respond when the policies of others injure our people.

The time of rhetoric and bombast, so demeaning to both of our countries, should be brought to an end. The time of understanding and action is at hand.

Madam President, I conclude my remarks as follows:

I believe that what we need is a systematic way of redressing our trade grievances, not this sporadic verbal method and not this business about flashing signals by having ridiculous bills or amendments offered in this Chamber.

I think we lose credibility by the verbal approach, and that is why I have introduced the reciprocity bill, and that is why I hope that the reciprocity bill is eventually enacted. The sooner the better because it provides us with an ongoing continuing mechanism to correct real problems of unfair treatment where those problems exist.

To offer an amendment and vote for it in this Chamber in the 11th hour on the notion that somehow it scares another country or other countries just does not work and it has not worked in the past and it demeans us.

We need an ongoing mechanism to deal with these grievances on a systematic basis and that is what the reciprocity bill does.

That is why I hope that Senators who are perhaps tempted by the Metzenbaum amendment might consider the reciprocity bill as a reasonable and sensible alternative.

Madam President, I yield the floor. Mr. METZENBAUM and Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. METZENBAUM. Mr. President, will the Senator from Kansas yield to me 1 minute?

Mr. DOLE. I yield.

Mr. METZENBAUM. Madam President, I send to the desk two amendments in the second degree.

I yield the floor to the Senator from Kansas.

Mr. DOLE. Madam President, I shall take just a minute or two. I understand the distinguished majority leader will offer a motion to table the underlying amendment in the next few moments so that we may vote.

We have had a good discussion of this amendment. It is an important amendment.

I must say I share the views expressed by the distinguished Senator from Missouri.

I first shall take a minute to speak to the amendment offered by the distinguished Senator from Pennsylvania, Senator Specter.

It seems to me that what the Senator proposes is a radical change in the antidumping laws without committee action. It has not been marked up by the Judiciary Committee, nor has it been considered by the Finance Committee which has principal jurisdiction over international trade issues, including how U.S. international trade agreements are implemented in U.S. law. The Senate, therefore, does not have the benefit of the wisdom of those committees with principal interest in

So, again, it may be meritorious, it may have every reason it should be acted upon, maybe modified, maybe not modified. But unfortunately it is not the fault of the Senator from Pennsylvania. We just have not had hearings on it. It has not been referred to our committee and we would hope that without even getting into the merits or demerits of the amendment that we have a chance to take a look at it in our committee.

The administration is strongly opposed to the bill. The administration argues that even if altered as Senator SPECTER proposes, S. 2167 violates numerous provisions of the GATT and the International Antidumping Code. U.S. exporters would be subject to severe retaliation if the United States violates its international commitments in such a wholesale manner.

There is some doubt whether or not the amendment would accomplish its desired purpose to expedite administration of antidumping cases. It would place them in the Federal courts. The 1979 Trade Agreements Act provided stiff time limits for the Commerce Department and the ITC to issue determinations. No Federal judge could make such determinations as fast or accurately as the large staffs available to these agencies. On the contrary, justice is likely to be delayed substantially; comparable litigation over trade and antitrust matters takes years to complete.

The bill's remedies are disproportionate to and do not accord with the problem. The purpose of the antidumping laws is to relieve material injury caused by discriminatory pricing; because injury need not be material, and equitable relief can be granted without regard to injury. S. 2167 goes much further; it allows articles to be excluded totally from importation without such a finding. Because dumping can result from many reasons beyond the importer's control-including exchange rate fluctuations, lack of knowledge of home market prices, Commerce Department adjustments to price calculations-it is unfair to penalize them and consumers by totally denying access to the U.S. market.

The amendment ignores the severe domestic and international procedural obstacles to discovery that would be required by this bill. The Westinghouse antitrust litigation in the mid-1970's entangled the parties and the courts in years of fruitless litigation over foreign discovery issues. Those cases further sparked a major adverse reaction in our foreign relations with several allies that led to retaliatory legislation in several countries. Further, it is doubtful that U.S. firms would wish to be subject to the counterclaims and discovery that would be afforded to foreign firms by the bill.

The difficulties of individual firms with dumping can be remedied in less counterproductive ways. In principle, something can be said for providing individually injured firms with damages to compensate for injury from predatory dumping. But this bill is not likely to lead to any such remedy, for the reasons given above. There may be other ways of providing such compensation, however, or at least providing some relief from the costs of bringing an antidumping suit. Such possibilities should be fully explored in the responsible committees before coming to the floor for adoption into law.

The prima facie evidence rule operates to put the burden of proof on the defendant upon a final Commerce Department finding alone. Thus, a domestic company would not have to demonstrate injury to win its case.

This would violate the code.

The amendment does not address the difficulties caused to many U.S. firms, in addition to the plaintiff, by the extensive discovery that would have to be allowed the defendants in these private actions.

The amendment authorizes an injunction against exportation of goods to the United States without any clear basis in international law or practicality. Such orders are certain to cause enormous strain to U.S. foreign relations with the affected countries and would lead to retaliation, for example, under the British Protection of Trading Interests Act or similar statutes.

The amendment clearly bears no relation to the purpose of the 1916 act. in that there is no requirement of any intent at all (unlike S. 2167's "reasonably foreseeable" standard). It thus cannot be compared to antitrust laws; it is solely a dumping statute and must be held up to U.S. international obliga-

Mr. President, with reference to the so-called Buy American provision, and there has been a lot of debate, and again I do not quarrel with the motive of the authors of the amendment, it just seems to us that it is something that again we are all frustrated about people out of work. I had the opportunity to go to the GATT meeting in Geneva.

It is fair to say not much happened there. About the only positive thing you could say about the meeting is we still have the GATT framework. Countries are still willing to sit down and talk about problems.

When we consider there are 35 million people out of work in the industrial nations and we are all searching for some easy way to get an economic recovery and we are all focusing on trade, those of us who live in farm States are concerned about gluts, surpluses of grain at very low prices, unprecedently low prices, and we are

looking at some way to help the American farmer, I believe that the Buy American provision, as in local content legislation, is appealing in its simplicity but in reality it could be dangerous. It could be dangerous because I doubt that anyone can predict the ramifications of this type legislation, and every time we approve a provision supporting one segment of American workers to the exclusion of others, it makes it harder to deny the same treatment to others.

Second, this process inevitably leads to, will encourage, our trading partners to enact the same kind of legisla-

Now, I do not believe this amendment violates the letter of our international commitments, but it does violate the open trading policy we are trying to maintain. We support this policy because in the long run it is a policy which will create the most jobs in this country.

One of every three acres of farmland is now planted for export. The conference board recently issued a report which indicates that 80 percent of the jobs created in the last several years were export-related. Every \$1 billion in exports is estimated to produce 30,000 jobs. What we need are more exports not less, and that is why I am reluctant to support what sounds good. Buy American, who could be opposed to that? But I just believe that will more likely mean fewer jobs than more jobs.

Let us face it, our economic base is shifting and we must do all we can to guarantee our growth sectors have export markets.

Every Senator in this Chamber wants to protect the strategic industrial base of America, and no one holds to this position more strongly than the Senate Committee on Finance or its chairman. But every Senator also recognizes that for better or worse our economic industrial base is changing. We are going to reduce our heavy industrial capacity simply because other nations have increased theirs and, as a result, there is overcapacity around the world so far as some products are concerned.

We know we need to secure a national industrial base, but I also recognize that job creation is taking place in sectors like the service sector and high technology products. We are competitive in these areas because of the unique skills in our society. I think we have to do everything we can to make certain that the workers possessing these skills and the new workers who will be employed have an opportunity to work to produce these products and sell their services in every possible market.

We have had reference to Ambassador Brock's concern about this bill. Let us face it, he did not have a very good time in Geneva. It was not a very successful meeting. It was not his fault. Ambassador Brock, I believe, did everything he could and worked hard and long to bring about some agreement, but agreements were just hard to come by.

Ambassador Brock has addressed this issue in both testimony before the Finance Committee and in a letter to me and opposes this provision.

Madam President, as you know, Bill Brock just finished a somewhat unsatisfactory round of negotiations in Geneva with our trading partners. He sought to move our trading partners to accept more international discipline in areas like services and high tech products. While our partners would not agree to this, the countries at that meeting did commit to restrict protectionist pressures. I think that commitment was correct and should be respected. Even though we did not move the GATT system into new areas we kept it from falling apart. It is still possible to try again another day to fashion a trading system which will take account of our economic self-interest.

At this point I ask unanimous consent to insert into the RECORD the letter which Ambassador Brock wrote to me on this subject.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE U.S. TRADE REPRESENTATIVE, Washington, December 8, 1982. Hon. Robert J. Dole,

Chairman, Committee on Finance, U.S. Senate, Washington, D.C.

Dear Bos: I am writing to express our concern regarding a provision being considered for inclusion in the proposed Surface Transportation Assistance Act of 1982. The provision in question would significantly extend the "Buy America" provisions presently included in the Surface Transportation Assistance Act by, inter alia, removing any proviso dealing with unreasonable cost. I strongly

urge that this provision be deleted.

I have several concerns with the trade provisions under consideration. First, I believe that a sector specific bill which creates new barriers to trade will be harmful to U.S. trade interests. Just two weeks ago, at a ministerial level meeting of the GATT, we and our trading partners undertook to do all in our power to resist pressures to close our markets to imports. While the Ministerial did not produce all the results we had hoped for, this was an important and positive result. Exports are vitally important to our economy. One of every seven manufacturing jobs and one of every three acres of agricultural production depend on exports. If after just two weeks, we violate this Ministerial commitment by adopting this new trade restrictive legislation, we will be inviting other countries to similarly forget their commitment to resist protectionist pressures. That would not be in our economic interests.

Second, I am concerned that this legislation will interfere with our efforts to open foreign government procurement markets to U.S. exports. We made considerable progress in achieving this goal with the entry into force of the International Government Procurement Code in 1981, which was implemented under the Trade Agree-

ments Act of 1979. Nevertheless, important limitations in the coverage of this agreement remain and we have initiated efforts aimed at expanding it. In particular, we are seeking to expand the Code to cover foreign government entities that are major purchasers of transportation, telecommunications, and power generating equipment. However, our credibility with our negotiating partners will be sorely tested if we enact new buy national restrictions at the same time as we are trying to negotiate limitations on such practices.

Finally, I am concerned that an absolute preference, with no provision for unreasonable cost, will be at cross purposes with the objectives of the bill. The purpose of the bill is to repair and improve the infrastructure of our transportation network. Even with the revenues that will be generated by the increased gas tax, resources will be limited. A provision of this nature which limits competition will inevitably lead to more expensive sources of supply, which will limit our ability to make these infrastructure improvements.

For the reasons I have just enumerated, I urge that this provision not be adopted.

Very truly yours,

WILLIAM E. BROCK.

Mr. DOLE. I just suggest that the country that will be hurt the most with this type legislation will be Canada. I do not suggest that we do not have problems with Canada, but I am certain that those who support this amendment would agree with me they are nowhere near the magnitude of the problems we have with the European Community, Japan, and other areas.

Will this provision help us get access to Japanese markets? Will it encourage Europeans to reduce their agricultural export subsidies? I think the answer is clearly "No." How will the Japanese react to this provision? They will probably smile and say to themselves:

The next time the Americans talk about market access, thank goodness we can talk about "Buy American."

For all the reasons stated by those who have debated this at length today, it would seem to me that we ought to be given an opportunity next year to take an overall look at trade policy and how it might impact on the industrial sector and other sectors of our economy.

I can assure those who have strong concerns about American jobs and exporting American jobs, preserving American jobs, we are going to do that. In fact, we have scheduled hearings really the first full day we are back here in January to start looking at trade policy.

Madam President if we are going to endanger our export markets let us do it in a fashion which will be useful in getting the attention of those with whom we have real trade problems.

Madam President, I yield the floor.

(Mr. MURKOWSKI assumed the chair.)

STEEL DUMPING

Mr. HEFLIN. Mr. President, I rise to call for action against a foreign practice that is sapping the strength of our American industries, a practice that this Congress must address. I refer to the practice of dumping, that method by which foreign governments subsidize their own industries and dump foreign goods into this country at prices below the sale price in the United States. I support the amendment of Senator Specter to put teeth into our laws to end this undermining of the American economy.

We need only look at the statistics to see the need for such a measure. Unemployment in our Nation has reached what a few years ago was a totally unthinkable figure, upward of 11 percent. A large number of these working men and women are idled because of the hard economic times that important industries—particularly steel and rubber—are suffering through.

In my home State of Alabama, just this summer one of the largest steel manufacturers in Birmingham announced plans to shut down one of its primary plants. The impact such closings have had on my State is apparent in the unemployment rate, which this month is over 15 percent.

Witnesses in hearings held by the Judiciary Committee this summer also reaffirmed the adverse impact of these foreign subsidized imports on our

economy.

Quite simply, manufacturers of steel, rubber, and other goods and materials are being devastated by a combination of extraordinarily high interest rates and excessively subsidized foreign imports.

Our industries cry out for immediate assistance. They are being severely damaged by these unfair trade practices. While I am a firm believer in free competition, I also believe it is unfair for foreign governments to subsidize the manufacture of their own countries' products, only for these products to be dumped into the United States for a lesser price than American goods.

I believe that if American workers are given a fair and equal chance they can outwork and outproduce any other industries in the world. We must give these industries, these working men and women, the fair chance they deserve.

I believe it is critical that we act at this time to save American industry. Our present statutes provide no mechanism for vigorous and effective enforcement of dumping, which is unlawful. I urge the Senate to support this amendment before us.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I earlier indicated probably at some point I

would make a tabling motion against the Metzenbaum amendment.

Debate has continued now for most of this day. I have taken the precaution of notifying all of those I know of who have a particular interest in this matter of my intention to make that motion at approximately 5 p.m. I believe everybody is aware of that situation.

Mr. President, I now move to table the Metzenbaum amendment, and I ask for the yeas and nays on the motion.

The PRESIDING OFFICER. there a sufficient second? There is a sufficient second

The yeas and nays were ordered. The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Tennessee to lay on the table the amendment of the Senator from Ohio.

The clerk will please call the roll The legislative clerk called the roll. Mr. STEVENS. I announce that the Senator from Arizona, (Mr. Gold-WATER), and the Senator from Maryland (Mr. Mathias), are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced-yeas 51, nays 47, as follows:

## [Rollcall Vote No. 412 Leg.] YEAS-51

Abdnor Exon Nickles Andrews Garn Nunn Armstrong Gorton Packwood Hart Percy Hatfield Rancus Proxmire Bradley Hawkins Quayle Brady Hayakawa Roth Burdick Rudman Helms Byrd, Harry F., Jr. Humphrey Schmitt Stafford Jackson Chafee Jepsen Johnston Stevens Chiles Symms Cochran Kassebaum Thurmond Laxalt Cohen Tower Danforth Matsunaga Dole Mattingly Weicker Domenici McClure Murkowski East

# NAYS-47

Glenn Bentsen Mitchell Grassley Hatch Moynihan Biden Pell Boren Boschwitz Heflin Pressler Pryor Randolph Bumpers Heinz Byrd, Robert C. Hollings Cannon Huddleston Riegle Sarbanes Cranston Inouye D'Amato Kasten Sasser DeConcini Kennedy Simpson Specter Stennis Denton Leahy Levin Dixon Dodd Tsongas Wallop Long Durenberger Lugar Eagleton Melcher Zorinsky Ford Metzenbaum

# NOT VOTING-2

Mathias Goldwater

So the motion to lay on the table amendment No. 5008, as futher modified, was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed

Mr. DOLE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The majority leader is recognized.

#### SENATE AGENDA

Mr. BAKER. Now, Mr. President, if I could have the attention of Senators. I would like to suggest a course of action for this evening, for tonight, and for tomorrow. It goes without saying that we still have two major items to deal with before we can adjourn the Congress sine die, the highway bill, which is now pending, and the continuing resolution, which is now in the Appropriations Committee in markup and has not yet been reported.

There is no way we can reach the ontinuing resolution until that continuing occurs, and I do not expect that before sometime tomorrow at the earliest.

Mr. President, there are a number of other items, however, that can be dealt with. I am going to suggest two or three of them that we might do in a relatively short period of time. And then, of course, we have rule XXII, which will require a cloture vote sometime tomorrow on the Baker substitute to the pending measure, which was the first cloture motion filed.

Mr. President, first I would like to suggest that the Senate ought to consider whatever conference reports are available to us, particularly conference reports dealing with appropriation bills.

I would call to the attention of the Senate that fact that there is a report here on the Commodity Futures Trading Commission, which is H.R. 5447.

I am advised that it may be possible to dispose of that conference report with a very short time limitation, maybe about 20 minutes equally divided.

There is also a conference report on the agriculture appropriations bill, Mr. President, which is H.R. 7072-more particularly, the conference report to accompany H.R. 7072. On this side, at least, I believe the distinguished chairman of the committee has indicated that it might be possible to get a short time limitation, maybe even 10 minutes equally divided, to dispose of that conference report on that appropriation bill.

Mr. President, I had also hoped that the agriculture PIK bill, S. 3074. I am advised now that maybe that cannot be done, or that at least, we cannot get a time limitation on that measure. On this side. I advise Senators that the matter can be dealt with in fairly short order and I encourage those who are principally involved in and interested in that matter to explore still further the possibility of a time agree-

ment and a time certain to deal with that measure

Mr. President, what I am about to propose is that we go off the highway bill temporarily, that we go to the CFTC conference report and finish that; that then we go to the agricultural appropriations conference report and finish that; then, Mr. President, that we go to the cloture vote tonight-this afternoon or tonight-on the Baker substitute instead of waiting until a minute or two past midnight, which might be possible to do, or wait until tomorrow in order to get to that cloture vote. It is as much a matter of conserving energy as it is anything else, but at some point, the rules require that we have that vote. I respectfully suggest that the best interests and perhaps the health of Members would be best served if we go ahead and have that vote tonight, say 7 o'clock, spending 2 or 3 hours dealing with the post-cloture situation-if indeed cloture is invoked—then recess the Senate over at midnight or thereabouts and get a fresh start tomorrow, when we come back.

That is the plan I advance for consideration. Most Senators are on the floor so let me put this request.

#### UNANIMOUS CONSENT REQUEST

Mr. President, I ask unanimous consent that, at the hour of 6 p.m., the Senate temporarily set aside the pending business, H.R. 6211, the highway tax bill. I further ask unanimous consent that the Senate then turn to consideration of the CFTC conference report, H.R. 5447, under a time agreement of 20 minutes equally divided.

After the disposition of that matter, Mr. President, I ask unanimous consent that the Senate turn to the consideration of H.R. 7072, the agricultural appropriations conference report, under a 10-minute time limitation, to be equally divided. I ask unanimous consent that the control of the time be in the usual form.

Mr. President, I then ask unanimous consent that the Senate resume consideration of H.R. 6211, the highway tax bill, and that the provisions of rule XXII be waived and the rollcall vote occur on the motion to invoke cloture on the Baker substitute amendment to H.R. 6211.

Mr. ROBERT C. BYRD. Reserving the right to object, Mr. President, there will probably be amendments in disagreement to the agriculture conference report, in which case they will be amendable. I call that to the attention of my colleagues, so they can have that in mind as they consider this request.

As to waiving rule XXII and voting at 7 o'clock, I personally do not have any objection to that because the majority leader can, if he wishes, arrange to have a cloture vote in the morning at about 1:15 a.m. I have done it

before, myself, and he can do it. It would not be 2 minutes past midnight, because there has to be a lapse of an hour on the following day except one. I personally have no feeling about that. I would just as soon vote for cloture at 7 o'clock tonight as at 1:30 in the morning.

I do want my colleagues to know that those amendments in disagreement are amendable. I personally have no objection to the request, but I thought that my colleagues should have their eyes open in the event that they might be concerned about amendments that are in disagreement.

Mr. METZENBAUM. Reserving the right to object, Mr. President.

Mr. ROBERT C. BYRD. Conference reports, of course, are privileged and a Senator can bring a conference report up any time he wants to.

Mr. METZENBAUM. I understand they are privileged, Mr. President, but they do not have a limitation of time with respect to debate. I have been trying to get clarified with the leader, if he will repeat a little more slowly which three conference reports he is intending to bring up and what kind of time limit.

Mr. BAKER. Mr. President, there are only two. Originally, I had hoped to take up three items. I have stricken one from the list, the agriculture PIK measure, which we could not clear. The two are CFTC conference report, the other one is the conference report on Agriculture appropriations, which is H.R. 7072.

Mr. METZENBAUM. Since there are items in disagreement with respect to that measure, are they subject to amendment, do I understand the majority leader?

Mr. BAKER. Yes. Mr. President, as I understand, any item in disagreement would be subject to amendment. The way the unanimous-consent agreement was put by me, however, may I inquire of the Chair, if there is no further elaboration of that request, all debate on the conference report itself and items in disagreement would be subject to that time limitation?

The PRESIDING OFFICER. There was no time limitation placed on the items in disagreement.

Mr. BAKER. Mr. President, I amend my request then to provide for 10 minutes equally divided on any amendment to an item in disagreement.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, I think I understand pretty well what can be done—what at least can be tried. I would personally not want to agree to it. As far as I am personally concerned, I have no amendments that I want to offer, but I want to protect my colleagues. If they want to enter into that kind of agreement without knowing what amendments might be offered, they can do so.

Also, on the invoking of cloture, what does the majority leader propose to do about amendments in the second degree which under the cloture rule will have to be offered by the time the cloture vote began? If we have the cloture vote at 7, I do not know whether my colleagues have any amendments that they want—

Mr. METZENBAUM. I filed my amendments.

Mr. ROBERT C. BYRD. What is the

Senator saying?

Mr. METZENBAUM. I said I do not know what the Senators' positions are, but I filed amendments that I have. I have no concern of going to a vote on cloture at 7 o'clock.

Mr. ROBERT C. BYRD. They are filed as second degree?

Mr. METZENBAUM. They are amendments in the first degree and second degree, yes.

Mr. ROBERT C. BYRD. The Senator, as usual, has looked ahead and taken adequate precautionary measures.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from California.

Mr. CRANSTON. I have an amendment dealing with California utilities and a problem they have that I would like to be sure I will be able to bring

Mr. BAKER. Mr. President, as the Senator knows, I support his position on the California utilities measure and, indeed, tried to get that measure up as a freestanding bill before the Senate.

I do not know what form that amendment would take and whether it would be germane and qualify after cloture or not. But if the Senator wishes to offer it before the time for cloture, then we could arrange that.

Mr. CRANSTON. I would like to have it arranged that I can do it before cloture.

Mr. DOLE. If the Senator will yield, I do not think we can arrange that.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. I am told by the distinguished chairman of the committee that he would not be able to arrange that.

The PRESIDING OFFICER. Will the Senate please come to order?
The majority leader.

Mr. BAKER. Mr. President, under the rule, the second-degree amendments, if there are any, would still have to be filed an hour before the vote, I believe, and we can protect against that if anybody has any second-degree amendments that have not already been filed.

On the question of amendments to items in disagreement on the agriculture conference report, we can certainly accommodate that. It may take

some time.

Let me ask, does any Member have any amendments—maybe we could identify any—that are going to be offered to items in disagreement to the agriculture conference report?

Mr. ROBERT C. BYRD. Mr. President, may I respond to the majority leader?

Mr. BAKER. Yes, I yield.

Mr. ROBERT C. BYRD. There is a Senator who I do not see on the floor at this time, and for his sake I should think I would have to object until I get clearance from him on that portion of the request.

Mr. JOHNSTON. Mr. President, will the Senator yield?

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I am wondering if the majority leader has insured that on the agricultural appropriations bill there is a germaneness rule on the amendments or else

that the amendments are identified?

Mr. BAKER. No. I will be glad to do that, Mr. President. To tell you the truth, until this moment, I was not aware in fact there were items in disagreement.

My information was that there were not, but I will check into that, and we will see.

Mr. President, if I could have the attention of the Senate, it is clear to me—

The PRESIDING OFFICER. The Senate will come to order. The majority leader.

Mr. BAKER. It is clear to me that we are going to have to work some more on this unanimous-consent request, but it also appeals to me that there seems to be a general willingness to try to work something out so that we can have the cloture vote some time tonight at a decent hour, even, I presume to say, a civilized hour. So I am going to come back and make this request again, but before I do so, and so we do not go to a lot of trouble for nothing, let me ask if any Senator intends to offer an objection that they are aware of at this time to the general proposition of trying to do these items, these two conference reports, to provide a brief time for other amendments to be offered in advance of the cloture vote and then to set a time certain for that cloture vote tonight, say, at 9 o'clock or thereabouts?

Now, that is about the shape I am going to come back in. If somebody is going to shoot down, I sort of wish they would tell me now.

Mr. ROBERT C. BYRD. Will the majority leader allow us to determine whether or not there are Senators who want amendments voted on before cloture on this side?

Mr. BAKER. Yes. Mr. President, let me see if there is any Senator who wishes to answer my question, and then I am going to suggest the absence this matter further.

Mr. HUMPHREY addressed the

Mr. BAKER. I yield to the Senator

from New Hampshire.

Mr. HUMPHREY. If the majority leader will yield, I would object to the request as I understand it now. I would like an opportunity to discuss matters with the majority leader.

Mr. BAKER. I thank the Senator. Mr. President, I suggest the absence of a quorum.

Mr. PRYOR addressed the Chair. The PRESIDING OFFICER. The Senator from Arkansas.

Mr. BAKER. Mr. President, I will withhold the request, and I yield to the Senator from Arkansas.

THE CONTINUING RESOLUTION

Mr. PRYOR. I would just ask a question as to the continuing resolution which relates to everything else in this body at this time.

Will the majority leader please inform us as to whether there is any communication with the leadership in the House as to an extension of time on the continuing resolution whereby it might be considered before expiring?

Mr. BAKER. Mr. President, the question of the Senator was whether or not there have been any communications or contact between the Speaker and me or others on the possibility of an interim and temporary extension of the present continuing resolution in order to accommodate the problems we have with the time.

Yes; the Speaker and I have discussed that. Both of us agree it is a bad idea; that we ought to try to go forward with the matter that we have and try to complete the continuing resolution and get it to conference and try to get it on the President's desk.

I do not rule out the possibility that we may have to do something else, but I do not think we ought to do something else if we can help it. I really do

not believe he does either.

Mr. PRYOR. So the majority leader is basically saying we are going to try to finish this legislation and the continuing resolution by 12 Friday night, is that correct?

Mr. BAKER. Yes. Mr. President, that is so. Of course, I must tell Senators, in all candor, that we may run over into Saturday morning sometime or even during the day Saturday. But it is still my intention to try to finish on Friday before midnight, December

Mr. PRYOR. I thank the majority

Mr. LEVIN. Will the majority leader withdraw his request for a quorum call?

Mr. BAKER. Yes, I withhold.

SURFACE TRANSPORTATION ACT OF 1982

Mr. LEVIN. I have been waiting this afternoon to offer an amendment. I

of a quorum so we can inquire into have a bipartisan amendment to one would like to just offer his, but we extend unemployment compensation benefits.

Will the majority leader withhold his quorum call request so that I can be recognized and offer that amendment? That is one of the amendments that I would want to be covered by your unanimous-consent request in any event.

Mr. BAKER. Mr. President, the Senator from Michigan has indicated to me that he wanted to do that. Other Senators have done the same, however, and in fairness to all Senators I prefer to get a list and see where we

Mr. SARBANES. Will the majority

leader yield for a moment?
Mr. BAKER. Yes, I yield to the Sen-

ator from Maryland.

Mr. SARBANES. One of the difficul-ties I think with the cloture vote request is that many of us have amendments, which technically, I take it, might be ruled as nongermane to the bill, which we should offer. Actually a lot of us were here all day long waiting to do that. Of course, the whole day was messed up with one amendment.

Mr. BAKER. What does the Senator

suggest?

Mr. SARBANES. I suggest that we have some way to cover that. Does the majority leader intend to do that?

Mr. BAKER. Mr. President, I plan to do that. As I indicated to the minority leader, perhaps we need to canvass our Members, and I will on this side, to see who has amendments that they want to offer in advance of the cloture vote. I am perfectly willing to try to provide a time for Members to do that in advance of the time that we ordered the cloture vote to occur.

So I recommend, if I may, that the Senator from Maryland might make his wishes known to the minority leader, and I will consult with the minority leader and we will see what we can do in that respect.

Mr. DOLE. Mr. President, will the

majority leader yield?

Mr. BAKER. I yield. Mr. DOLE. I say, while so many Members are in the Chamber, there are about 80 amendments pending. If everyone wants to offer amendments before we have cloture I do not see any reason to have a cloture vote. Some of the amendments are going to take a long, long time to discuss. Once we have cloture they are not going to be germane.

That does not mean Senators cannot get a vote on appeal. But if in fact, if there is any desire to finish this weekend, someone is going to have to start saying, "I will offer my amendment next year to something." If everyone insists on his amendment we are going to be here New Year's Eve. I still think we will be here New Year's Eve what-

ever happens.

In any event, there are 80-some amendments around here, and every-

cannot pick and choose. I am sure we are going to have to treat everyone the

So hopefully if there are any volunteers who suddenly in the spirit of Christmas or the holiday season wish to take an amendment away, we would be glad to give it back to him.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. Boschwitz). Without objection, it is so ordered.

Mr. BAKER. Mr. President, in the course of the last several minutes, the minority leader has attempted to canvass Members on his side, he advises, to see if they have amendments that they would like to offer before the cloture vote, particularly if the amendment might be considered nongermane and cut off in case cloture is invoked.

To my acute distress, I find that he has five pages with tightly spaced names and title descriptions.

Mr. President, on my side of the aisle, we did not quite have five pages, but we had five Senators who also have made known the fact that they had amendments that they would like to offer in advance of cloture.

Now, what that means is, once more, my ambition is thwarted. I do not see any chance that we can be fair and expeditious at the same time. Therefore, I am going to abandon the idea of trying to have that cloture vote tonight. I do not think there is any way we can arrange to do all the things that have been made known now and arrive at a time certain to vote on cloture prior to midnight.

Mr. President, just so Senators will not take what I have just said as a threat, I also do not intend to try to take the Senate out before midnight and bring us back after midnight. which would technically qualify the cloture vote. I think, while that is possible and, as pointed out by the minority leader, it has been done on a number of occasions, it also puts us in the worst possible set of circumstances to try to deal with these matters. We are tired, there is an accumulated burden of fatigue, and I do not think it would serve a good purpose.

Mr. ROBERT C. BYRD. Especially if you do not have the votes. That is the point.

Mr. BAKER. The minority leader, somewhat ungraciously, makes the observation that it is always more difficult when you do not have the votes.

Mr. ROBERT C. BYRD. I do not mean to be ungracious to the majority leader.

Mr. BAKER. But, you know, there is a modicum of truth in that. I will add, for the benefit of the minority leader. I hope, by the generosity of this gesture, that I will earn some votes when the time comes for cloture and for final passage on this measure.

But, all kidding aside, Mr. President, there are many Senators who have much work to do prior to the cloture vote. I abandon the idea that we can have that tonight. It will occur tomorrow routinely. The live quorum contemplated by rule XXII will begin 1 hour after we convene.

ORDER FOR RECESS UNTIL 10 A.M. TOMORROW

Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until the hour of 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, what I urge is that Senators be prepared to go forward with these amendments. But, before we do, there is one other thing I would hope to do.

The two conference reports I really think ought to be done now before we get back into serious debate on the highway bill.

Mr. President, as I recall, there was not any serious problem with the CFTC conference report request. It was pointed out by the minority leader that there were three items in disagreement to accompany the conference report on the Agriculture appropriations bill and that each of those is amendable. I am going to try to provide that they cannot be amendable.

Maybe that will cut the knot. PROCEDURAL UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, I ask unanimous consent that, at this time, the Senate temporarily lay aside the pending business, H.R. 6211 the highway tax bill, and I ask unanimous consent that the Chair lay before the Senate the conference report to accompany H.R. 5447, the CFTC bill on which there will be a time limitation of 20 minutes to be equally divided.

Mr. President, I ask unanimous consent that following on after the disposition of the CFTC conference report, the Senate turn immediately to the consideration of the agriculture appropriations conference report to accompany H.R. 7072; that no amendment be in order to any item of disagreement accompanying that conference report; and that the debate on that measure be limited to 10 minutes, to be equally divided.

Mr. President, when I was in the process of making that request, I was advised by one of my staff that there is one other Senator that we have to clear this with. So, before the Chair puts the request to the Senate, I am

going to suggest a brief quorum call so cannot be accepted, even though they that we can complete that.

Mr. FORD. Mr. President, before the distinguished majority leader suggests the absence of a quorum, would he mind answering a question?

Mr. BAKER. I would be happy to.

Mr. FORD. I understand the majority leader's dilemma. I happen to be one that has a couple of amendments. I am willing to try to work them out if they can be reasonably acceptable on a time limit. I do not think there is any problem. There may be. But I am perfectly willing to have a very short time agreement on both of those amendments. I would like to expedite them and get them out of the way and help the majority leader as much as I can. I think you will find other Senators that have amendments that can be worked on and I believe expedite some of these amendments at the present time.

Mr. BAKER. Mr. President, I thank the Senator from Kentucky. I am very grateful.

The minority leader has also indicated that there might be possibilities for time agreements.

I see the Senator from Arkansas is seeking recognition.

Mr. PRYOR. Mr. President, will the majority leader please indicate, after we finish with these two items of business, if we then go back to the gas tax bill?

Mr. BAKER. Yes. Mr. President, I include that in my request. After disposition of the second conference report, the Senate will return immediately to the consideration of the highway bill.

Mr. President, while we have some time during the deliberations on the conference report, if we get to that, I urge Senators to confer with either the minority leader or the ranking member, if the minority leader so directs, to see if we can negotiate time agreements. The distinguished manager of the bill on this side, Senator DOLE, will be the clearing point for such negotiations on this side.

Mr. DOLE. Will the majority leader yield?

Mr. BAKER. Yes.

Mr. DOLE. Mr. President, as you know there are four titles in the bill. Amendments going to title II, which Senator STAFFORD would have, would have to be cleared with Senator STAF-FORD and I think with Senator Packwoop-I am not certain there are any amendments to that title-and with Senator GARN in the Banking Commit-

But I would say we have a number of amendments that have been given to us. It is not that we do not want to take the amendments. We are looking at a number of amendments from Senators. Some are technical in nature, and I do not see any reason why they

are not germane.

That would be my hope, that there might be four, five, or six that we might be able to accept and do very quickly. It is those that we think, on the revenue side, that are very costly or for some other reason we just cannot accept them. But we are now in the process. I promised Senator FORD to let him know in the next few minutes. I know Senator MITCHELL has an amendment. We have other amendments on this side. So we are trying to see if we can accept some of the amendments. If we can do that, we can do it very quickly. We need to do at least enough to get cloture.

Mr. Baker. Which is a seizure of excess candor I have seldom witnessed on the floor of the Senate.

Mr. ROBERT C. BYRD. Mr. President, may I say to the distinguished majority leader, not ungraciously, because he is always most gracious to me and to those on this side of the aisle, that we will attempt, on this side of the aisle, to see if those who have nongermane amendments would be willing to enter into time agreements and then we will come back and notify the majority leader.

Mr. BAKER. I thank the minority leader. I am most grateful.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. There is a pending request.

Mr. SYMMS. Mr. President, I withhold the amendment.

The PRESIDING OFFICER. Is there objection to the majority leader's request.

Mr. BAKER. Mr. President, a request is pending.

The PRESIDING OFFICER. That is correct.

Mr. BAKER. Mr. President, I have been advised that there is no objection that we are aware of on this side and I now renew the request.

Mr. HUMPHREY. Mr. President, reserving the right to object, I point out that the Senate has been in session for 8 hours. Very little business has transpired.

I would point out further that this is not the result of any filibuster. There is no filibuster underway. We are in late night session which does not involve those who oppose the gasoline tax. There has just been a slow pace of business in the Chamber today.

I will not object to the majority leader's request. I welcome that. We have important work to do. Speaking for myself. I do not wish to slow down that business. In particular, I urge the majority leader to move to the continuing resolution as soon as it is ready for action. It must be passed by Friday night, I must emphasize to everyone. I assume that the gasoline tax must not interfere with the passage of the continuing resolution.

Mr. BAKER. Mr. President, I appre-

ciate the clarification.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader repeat

his request?

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate temporarily set aside the pending business, H.R. 6211, the highway tax bill. I further ask unanimous consent that the Senate turn to the consideration of the CFTC conference report, H.R. 5447, under a time agreement of 20 minutes to be equally divided and the controlled time to be in the usual form.

Mr. President, I ask unanimous consent that after the disposition of the conference report to accompany H.R. 5447, the Senate immediately turn to the consideration of the conference report to accompany the agriculture appropriations bill, H.R. 7072, on which there will be a 10-minute time limitation, equally divided.

I further ask unanimous consent that no amendments be in order to any item in disagreement to accompa-

ny the appropriations bill.

I ask unanimous consent, Mr. President, that after the disposition of the agriculture appropriations bill conference report, the Senate immediately return to resume consideration of the highway tax bill.

Mr. ROBERT C. BYRD. Mr. President, I know of no objection on this

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

#### FUTURES TRADING ACT OF 1982-CONFERENCE REPORT

Mr. BAKER. I submit a report of the committee of conference on H.R. 5447 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5447) to extend the Commodity Exchange Act, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference

(The conference report is printed in the House proceedings of the RECORD

of December 13, 1982.)

Mr. HELMS. Mr. President, as the chairman of the Committee on Agriculture, Nutrition, and Forestry, I am delighted and, I might add, totally relieved to bring before the Senate the conference report dealing with the reauthorization of the Commodity Futures Trading Commission, the Futures Trading Act of 1982. The House and Senate conferees held three sessions during the past week and from those sessions emerged this conference report. I am glad to report that the conference report is a balanced one which strengthens the Commodity Futures Trading Commission, provides greater protections for investors and free market mechanisms, and opens avenues for orderly expansion of the futures trading industry.

I particularly want to commend the distinguished Senator from Indiana (Mr. Lugar), the distinguished Senator from Kentucky (Mr. HUDDLESTON), and the distinguished Senator from Oklahoma (Mr. Boren) for the splendid efforts they devoted to crafting the compromises between the differing House and Senate provisions. It would be an understatement to say they labored untiringly to develop compromise proposals and to lead the conferees to agreement. I also want to commend Senators Roth and Rudman who, while not conferees, attended portions of the conference and unselfishly gave of their time so that the conferees would have a better understanding of the provision relating to State anti-

fraud jurisdiction.

The conference substitute contains many important provisions. While I will not go into all of them now, I would like to discuss just a few of them.

Probably the most visible provision in the bill is one which does not deal with futures trading. The conferees agreed to the "contract sanctity" provision added to the Senate bill by Senator Durenberger. This provision prohibits the President, except in times of declared war or national emergency, from embargoing the export of any agricultural commodity covered by an export sales contract which meets two conditions. These conditions are that (1) the export contract must have been made before the embargo is announced and (2) delivery of the goods covered by the export contract must be made within 270 days of the date the embargo is imposed.

At the outset, I think it is important to focus on the limited nature of this proposal. First, this proposal places no limitation whatsoever on the President's powers to embargo agricultural

exports in times of national emergency or war.

Second, in times other than a national emergency or war, the President's powers to embargo agricultural exports are limited only if the two conditions are met. At the very most, the provision merely delays the effective date of an embargo for those agricultural products that meet the two conditions.

This provision will go a long way toward restoring the image of the United States as a reliable supplier of agricultural commodities. It has wide support in the farm and agribusiness communities throughout the country. I believe it is consistent with President Reagan's position on embargoes of agricultural commodities, and I hope the President will not feel it is necessary to veto the bill because of its inclusion.

The conference substitute implements a modified version of the jurisdictional agreement previously made between the Commodity Futures Trading Commission and the Securities and Exchange Commission. The conferees agreed to the Senate provisions applicable to the approval of stock index futures contracts for all such contracts submitted to the CFTC for approval prior to December 9, 1982

However, the conferees agreed to a modfied version of the House bill preventing the CFTC from approving any stock index futures contract submitted to the CFTC on or after December 9. 1982, if the Securities and Exchange Commission determines that the contract fails to meet certain statutory criteria applicable to such contracts. Mr. President, I am not happy with this provision, but it is the best we could get under the circumstances. The Committee on Agriculture, Nutrition, and Forestry will certainly monitor the operation of this provision very closely.

The conference substitute contains a compromise provision dealing with the issue of user fees. The bill clarifies the agency's authority to charge fees for certain types of services. The types of services for which specific fees can be charged are specifically set forth in the Statement of Managers. I feel this is a good compromise all around, one which will permit us to turn our attention to matters which have been overshadowed by the debate over transaction or user fees.

The conference substitute provides for an authorization for appropriations for the commission for a period of 4 years. The Senate provision coupled its 2-year period of reauthorization with resolution of the user fee issue. When a compromise on the user fee issue was reached, the conferees adopted the House provision reauthorizing appropriations for the Commission for a period of 4 years.

The conference substitute gives States new powers to attack "off-exchange boiler rooms" and other frauds. The States will be allowed to apply any State statute or regulation to any activity lying outside the regulatory preview of the Commodity Exchange Act. In addition, the conferees adopted a modified version of the Senate provision offered by Senators ROTH and RUDMAN. The conference substitute provides that nothing in the Commodity Exchange Act will preclude the States from proceeding in State court against any person registered under the Commodity Exchange Act-other than a floor broker or a registered futures association-for violation of any of the antifraud provisions of the Commodity Exchange Act or any antifraud rule, regulation or order issued pursuant to the act. The Commission would have the right to intervene in any State antifraud action brought under the Commodity Exchange Act, as well as to file an appeal in the action or to remove the action to Federal court.

The Commission will also have the right to appear as amicus curiae in any proceeding brought under the Commodity Exchange Act, in the event the Commission has not intervened or is not otherwise a party. Nothing in this provision precludes the Commission from filing joint enforcement actions with any of the several States, should the Commission and the individual

States wish to do so.

Mr. President, this State jurisdiction issue was one of the most difficult matters considered by the conferees. The House conferees were strongly opposed to any provision at first but finally agreed to the provision included in the conference substitute. While it may not go as far as some would like. again it was the best we could get.

The conferees adopted the House provision authorizing an explicit private right of action for violations of the Commodity Exchange Act. The Senate had not included a statutory private right of action in its bill, since the issue of the existence of such an implied right had been decided by the Supreme Court in the case of certain violations at the time the Senate considered the bill. The conferees decided to adopt the House provision because this area of the law is new and unchartered, and it was felt that the provision would be helpful in clarifying the limits of liability for violations of

The conferees achieved a true compromise on the differences between the House and Senate on the issue of authorizing the CFTC to permit trading in agricultural options. The conference substitute follows the House approach of authorizing agricultural options trading within the concept of a pilot program no longer than 3 years. The conferees, however, dropped the

House provision preventing the CFTC from approving more than 1 option contract per exchange. Under the conference substitute, the CFTC could authorize options in as many agricultural commodities as will provide an adequate test of these options.

It is my hope that the concept of agricultural options will be tested in a broad cross-section of agricultural commodities. In order to achieve the intent of this provision, the CFTC may wish to authorize more than one agricultural option contract on some exchanges.

The conference substitute also provides for a study, costing not more than \$3,000,000, on the effects of the trading of futures and option contracts. The study is to be carried out by the Board of Governors of the Federal Reserve System, the Commodity Futures Trading Commission, and the Securities and Exchange Commission, with assistance to be provided by the Treasury Department. The Board of Governors would be responsible for organizing and administering the study. Among the areas to be studied are:

First. The effect of such trading on the formation of real capital and on the structure of liquidity in credit markets.

Second. The economic purposes, if any, served by the trading of such instruments.

Third. The sufficiency of the public policy tools available to regulate such trading activity to avoid harmful economic effects in the markets for such instruments, the underlying cash markets, and related financial markets.

Fourth. The adequacy of investor protections afforded to participants in the markets for such instruments.

Fifth. The extent to which such instruments may be utilized to manipulate, or profit from the manipulation of, the markets for evidences of indebtedness, foreign currency, and securities.

The conference substitute gives the Commodity Futures Trading Commission and the Securities and Exchange Commission the primary responsibility for selecting and studying the instruments under their respective juridictions. The Board of Governors will review the portions of the study performed by the Commodity Futures Trading Commission and the Securities and Exchange Commission and may supplement these portions with analysis of its own, should it choose to do so. A report of the study will be submitted to Congress by September 30, 1984.

Mr. President, there are many other issues in this bill which I could discuss. I believe it is clear, however, that the bill is in the best interest of the people and I would ask my colleagues to join with me in supporting adoption of the conference report.

Mr. President, I say again to my friend from Indiana that I am eternally grateful to him for the immense amount of work he contributed to this legislation. It took a year and a lot of patience. He has been a real trooper and I thank him very much.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I thank the distinguished chairman of the Committee on Agriculture for his thoughtful comments, and, likewise, his indefatigable leadership throughout the past 2 years.

I am also deeply grateful to Senator HUDDLESTON, the ranking member on the committee, and Senator Boren, who has been the ranking member of our subcommittee. He held extensive hearings and extensive markups and his labor resulted in a successful con-

I want to pay tribute also to Senators Roth and Rudman for the contribution they made on State participation in the enforcement area and cracking down on fraud in this area.

I especially pay tribute to Senator DURENBERGER of Minnesota, who provided language on contract sanctity which had been avidly sought and was adopted by the conferees unanimous-

I believe we have produced a worthy product in these 2 years that will offer greater strength to the industry, greater safety to consumers, certainly a strong statement with regard to agricultural policy in this country.

There are two areas of controversy which I shall outline for Members. One does surround the amendment offered by the distinguished Senator from Minnesota at the time that this body considered this legislation in late September. We believe the contract sanctity language offers a strong indication of our feelings on this subject but, at the same time, it preserves clearly to the President of the United States and the Secretary of State, who are involved in the diplomacy of our country, all the options they have save for the fact that contracts cannot be cut across for 270 days after they are entered into. This offers considerable assurance to exporters in this country with regard to agricultural exports, to require in our country those 9 months of certainty for contracts to be com-

Clearly, the President of the United States, through a declaration of war on national emergency, can abrogate the sanctity provision, but it would require a very serious situation indeed for those contracts to be abrogated. We feel that is an important contribution to both the agricultural policy and the foreign policy of this country.

The second major item that preoccupied us was the question of user fees. Clearly, the committees of the House and the Senate relevant to this legislation have worked out a user fee arrangement which we believe and estimate will lead to \$3 million of new revenues for the CFTC. We think this is a substantial contribution and a worthy compromise in what was undoubtedly one of the more controversial portions of this 2-year quest.

Mr. President, these are the only major objections that I know of to the legislation and I believe they have received considerable consideration from all parties. Therefore, I ask at this point that Members give enthusiastic attention to this product and support it.

Mr. HUDDLESTON. Mr. President, I am pleased to support the conference report on H.R. 5447, the Futures Trading Act of 1982.

The conference report contains provisions authorizing appropriations for fiscal years 1983 through 1986 to carry out the commodity futures regulatory program under the Commodity Exchange Act. It also contains a number of amendments to the Commodity Exchange Act to improve and update the commodity futures regulatory program.

The conferees have developed a bill that is comprehensive and that includes provisions recommended by the Commodity Futures Trading Commission, the futures industry, the General Accounting Office, farm organizations, securities regulators, and others. It provides, I believe, a strong framework for the continued improvement of the Federal regulatory effort.

The conference report also contains a provision, of importance to our Nation's farmers, to guarantee delivery under contracts for the exports of agricultural commodities. Under this provision, except in periods of declared war or national emergency, the President cannot, under a suspension of trade, curtail the exports of agricultural commodities covered by export contracts already signed if the contract calls for delivery within 270 days after the suspension is imposed.

I wish to commend Senator Helms for his leadership as chairman of the conference committee. It is in no small part due to his efforts that the conference was able to resolve successfully the differnces between the House bill and Senate amendment. Of course, Congressman de la Garza, chairman of the House Agriculture Committee and leader of the House conferees on H.R. 5447, also deserves commendation for his major contributions to the successful conclusion of the conference.

Senator Lugar, chairman of the Subcommittee on Agricultural Research and General Legislation, and Senator Boren, the ranking Democrat on the subcommittee, deserve special thanks for their dedicated work, from the time the bill was introduced through

the conference deliberations, in shaping this important legislation.

NEED FOR LEGISLATION

Futures trading plays an increasingly important role in our economy. Futures contracts are being written on a diverse array of commodities and instruments vital to farmers and industry. The contracts cover agricultural commodities, forest products, precious metals, energy products, foreign currencies, interest-bearing instruments, and stock composites.

More than three dozen new future contracts have been authorized since the Commodity Exchange Act was last amended in 1978. In 1981, the number of futures contracts traded was double the number of contracts traded in 1978.

Trading in financial futures has skyrocketed. In connection with this type
of trading, last December, the Commodity Futures Trading Commission
and the Securities and Exchange Commission reached an agreement on jurisdiction and regulatory responsibilities with regard to futures contracts
on securities indexes, futures and
option contracts on exempted securities, and options on foreign currencies.

Recently, the National Futures Association began operations. This organization will manage the industry's self-regulatory efforts and assist the Commodity Futures Trading Commission in overseeing the activities of industry professionals.

When the Agriculture Committee began its work on the Commodity Futures Reauthorization earlier year, we were presented with suggestions for changes in the law from a number of sources. The Commodity Futures Trading Commission and the SEC had legislative proposals relating to their jurisdictional agreement. The Commodity Futures Trading Commission had developed a number of other proposals to make their regulatory effort more efficient and to improve prosecution of commodity-related frauds. The General Accounting Office had performed a thorough study of the operations of the Commission and developed its own recommendations for legislative changes to improve the operations of the Commission.

The futures industry, State regulators, and others had prepared proposals for legislation to address problems stemming from the rapid expansion of the industry and increased involvement by the general public in futures trading.

It was clear that, in addition to reauthorizing appropriations, other revisions of the law brought about by the evolution in futures trading and its regulation since 1978 would be needed.

Mr. President, H.R. 5477, as reported by the conference committee, is the culmination of a year-long effort to develop legislation that responds to

the changed needs of the industry and its regulators. It addresses every area of major concern brought to the attention of Congress.

It is a comprehensive bill that is the result of many hours of hard work sifting through a multitude of suggested changes in the law; and it represents a concerted effort to balance competing interests. For these reasons, the conference report deserves the support of the Senate.

CFTC-SEC ACCORD

The conference report contains amendments to the Commodity Exchange Act covering the CFTC portion of the jurisdictional agreement reached by the Commodity Futures Trading Commission and the Securities and Exchange Commission. The agreement resolves jurisdictional ambiguities as to the regulatory responsibilities of the CFTC and the SEC, brought about by gaps in existing law.

The Commodity Futures Trading Commission will continue to regulate trading that serves hedging and price discovery functions, and the Securities and Exchange Commission will continue to regulate trading that has an underlying investment purpose. A related law, enacted earlier this year, amended Federal securities law to codify other portions of the CFTC-SEC jurisdictional agreement.

I would note that the conference report includes a compromise provision, not in the bill passed by the Senate. Under it, the Commodity Futures Trading Commission, before approving stock index futures or options contracts, will be required to consult with the SEC. For contracts submitted to the CFTC after December 8, 1982, the SEC will have authority to disapprove the contract if it believes the proposed new contract does not meet requirements set out under H.R. 5447. Any board of trade whose proposal for such a contract is rejected because of an SEC order will be able to appeal to Federal courts.

### ADMINISTRATIVE IMPROVEMENTS

H.R. 5477, as reported by the conference committee, makes a number of changes in the Commodity Exchange Act to improve the administration of the Federal regulatory effort.

The bill will streamline the rule review process and require the Commodity Futures Trading Commission to act expeditiously to approve proposed rules and contract market designations.

The bill substantially revises the process by which industry professionals are registered to do business under CFTC oversight. Generally, the bill spells out the criteria for disqualification and provides the Commission with flexibility in handling registration matters. The bill will also permit the Commission to cooperate with other entities, such as the National

Futures Association, in processing applications for registration.

IMPROVEMENTS IN ENFORCEMENT EFFORTS

H.R. 5477, as reported by the conference committee, makes changes in the Commodity Exchange Act to broaden the scope of, and strengthen, enforcement efforts under this act.

The bill will require contract markets to enforce rules that have been approved by the Commodity Futures

Trading Commission.

It will permit the Commission to set speculative limits by rule or regulation, as well as by order, and will make it unlawful for anyone to knowingly violate the speculative limits of contract markets that the Commission

has approved.

The bill will make it unlawful for any commodity pool operator or commodity trading adviser to permit a person to be associated with him if the pool operator or trading adviser knows, or should know, that the person is not registered. The bill also extends, to these associated persons, the antifraud provisions applicable to pool operators and trading advisers.

Also, it makes it unlawful for any registrant under the act to permit a person to be associated with him if the registrant knows, or should know, of facts that are grounds for statutory disqualification from registration. A registrant would be excused from this prohibition if he notifies the Commission of the fact and the Commission determines that the person should be registered anyway or temporarily licensed.

The bill extends the criminal provisions of section 9(a) of the act, which makes the conversion of margin money a felony, to all persons registered under the act. Under existing law, section 9(a) applies only to Futures Commission merchants. It also calls for mandatory disqualification from registration under the act for persons who commit crimes specified under section 9.

The bill amends the act to make persons who aid or abet in the commission of violations of the act or its regulations liable in judicial proceedings under the act, as well as in administra-

tive proceedings.

The bill includes a provision to establish greater accountability on the part of persons within an organization who control practices that give rise to violations of the act. Specifically, the bill provides that any person who directly or indirectly controls another person who violates the act or its regulations can be held liable for the violation to the same extent as the controlled person if the controlling person does not act in good faith or knowingly induces-directly or indirectly-the violation. This provision would apply to actions brought by the Commission, and the Commission would have the burden of proof.

OPEN SEASON

H.R. 5477, as reported by the conference committee, includes a proposal made by the Commodity Futures Trading Commission to declare open season on off-exchange scams operating outside the act's regulatory structure. The bill will amend the act to explicitly permit the application of all Federal and State laws to any person who should register under the act but fails to do so, and to any commodity transaction that is not conducted on, or subject to, the rules of a contract market or-unless otherwise specified by the Commission-a foreign board of trade. The bill will authorize the Commission to refer such cases to Federal or State agencies for appropriate disposition. This change would not apply to dealer options or leverage transactions, which would remain under the Commission's exclusive jurisdiction.

In conjunction with the provision, the bill will explicity permit the Commission to share, with States and foreign governments, information that is now subject to confidentiality provisions in the act, so long as the information is provided for law enforcement purposes and the Commission is satisfied that the information will be disclosed only in connection with law enforcement proceedings. Also, the bill will require the Commission to furnish, to State and local governments, information on persons obtained as part of registration, if requested by the State or local government.

Also, the bill authorizes States to bring actions in State courts to enforce antifraud sections of the Commodity Exchange Act against persons—but not including exchanges or registered futures associations—registered under the act. In these cases, the Commission could intervene in the State proceeding, and either the Commission or a defendant could remove the action to a Federal court.

IMPROVEMENTS IN REGULATION

Among the legislative proposals submitted to Congress by the Commission was one relating to the independent brokers who solicit and accept orders from the public on futures trades without handling funds, and who fulfill the trades they obtain through registered Futures Commission Merchants. Under current law, these brokers are not required to register. However, they are listed as agents of Futures Commission Merchants in the applications of the Commission merchants for registration, even though they are not subject to the control of the Futures Commission Merchants but are truly independent contractors.

H.R. 5477, as reported by the conference committee, calls for regulating these independent brokers by establishing a new category of commodity professionals, to be called introducing brokers, into which the independent

brokers will fall.

Introducing brokers will be required to register and be subject to ongoing regulation, as the Commission has requested, but would be treated separately from Commission merchants. They will have to stand on their own.

The conference committee adopted the House provisions, with modifications, relating to leverage transactions. Under the conference report, the Commission will specifically be required to regulate leverage transactions involving commodities other than agricultural commodities. However, the Commission will be authorized to prohibit leverage transactions in any commodity not being lawfully offered and sold on December 9, 1982, if the Commission finds that leverage transaction in the commodity would be contrary to the public interest.

I realize that, given the limitations on the Commission's resources to regulate an expanded industry, some caution in lifting the moratoria on leverage transactions should be exercised. However, the conference report does not ratify or extend the current moratoria since they are inherently anti-competitive and, thus, contrary to the fundamental objectives of economic competition and the free marketplace. Healthy competition between sound companies can insure as much public protection as rules governing their conduct. We want the double benefits of both rules and competition, and the sooner the better.

The bill requires the new National Futures Association, the industry self-regulatory group, to implement by September 30, 1985, a concrete plan for its regulatory activities as directed by the Commission. The Commission will be authorized to require the NFA and any other similar associations to take over certain regulatory activities, including the registration of commodity brokers and others engaged in futures dealings.

## RIGHTS OF INDIVIDUALS

H.R. 5447, as reported by the conference committee, specifically authorizes private suits to recover actual financial damages in some futures cases. Such cases, subject to certain limitations, could be brought when a person suffers financial damage in a commodity futures or related transaction, either on or off regulated markets, because of a violation of the Commodity Exchange Act by another person, such as a commodity dealer, trading adviser, or contract market. A related portion of the bill broadens the right of individuals to request arbitration of claims against commodity brokers.

#### MAJOR POLICY STUDIES

H.R. 5477, as reported by the conference committee, provides for a study, led by the Federal Reserve Board with the aid of the CFTC, the SEC, and the Treasury, to assess the effect of futures and options trading on the econ-

omy, including the effect of such trad ing on capital investment in industry and business, and to determine whether any new laws are needed to protect the national interest. Also, the study will seek to determine what effect stock index futures are having on the underlying securities and on capital formation. Following the study, the Federal Reserve Board will give Congress—by September 30, 1984—any recommendations growing out of the review. In a related area, the CFTC will be required to make a 2-year study of so-called insider trading in commodity futures markets and to report on whether it has enough authority to prevent any abuses in this area. The conference committee, in its report, instructed the CFTC to take immediate regulatory action if it finds insider trading problems that can be corrected with regulations under existing law.

#### CONCLUSION

Mr. President, the futures industry is an integral part of the Nation's

economy.

H.R. 5477, as reported by the conference committee, will update the Commodity Exchange Act to give the regulators of this industry the tools they need to insure that futures markets continue to meet the needs of those served by them. It will also make the Federal regulatory program more efficient and responsive to the needs of the industry.

Mr. President, I urge my colleagues to agree to the conference report. I wish again to express my appreciation to the distinguished chairman of the committee (Mr. Helms) and to Senator Lugar, chairman of the subcommittee, and all of the members and staff, on

both sides.

On our side, I especially thank Senator Boren, who took a lead on this particular legislation. This has always been one of the most complex pieces of legislation that we have had to deal with, because we are dealing with a large and complex industry and the regulatory machinery for dealing with that industry.

The Senator from Indiana, and I, have already discussed the contract sanctity provisions contained in the bill. These provisions are of great importance to our Nation's farmers and to the world at large as far as the trading interests of the United States are

concerned.

Mr. President, I yield to the distinguished Senator from Oklahoma.

Mr. BOREN. I thank the Senator

from Kentucky.

Mr. President, I wish to associate myself with the remarks that have already been made by the Senator from Kentucky and the Senator from Indiana and express my personal appreciation for being able to work with both of them and the distinguished chairman of the full committee, the Sena-

tor from North Carolina (Mr. Helms), on this particular piece of legislation. The subcommittee and the committee both worked long and hard on preparing this piece of legislation. We did our best to strike the proper balance between those who had different points of view on the most controversial issues, and to try to come forward with the bill that will protect the general public and the agricultural community and, at the same time, make possible the legitimate functions of the exchanges to be carried out without undue interference by unnecessary regulation.

We have had important features, as has already been mentioned, spelled out in this legislation with regard to contract sanctity. I strongly support that provision and am delighted that the committees of both Houses in conference have been able to include a very meaningful provision on that subject in the final work product.

Again, Mr. President, I am happy to endorse this legislation. I commend my colleagues, who worked long and hard on bringing us to this point, I urge my fellow Members of this body to approve the conference report.

Mr. JEPSEN. Mr. President, before we vote on the CFTC conference report, I would like to bring to the attention of my colleagues excerpts of a letter I received from a prominent constituent of mine, R. W. Fischer.

He, like many of us, is concerned with the reports \* \* \* the rumors that the President is being urged to veto this bill if it reaches the White House—the major reason being the inclusion of the contract sanctity provision

Like Bob Fischer, I believe this provision is needed. No longer should we let a cloud hang over export markets as to whether or not we will make good on our promise to ship grain. The 1980 embargo is proof of that—the year we lost our credibility as a reliable supplier.

Mr. Fischer points out that:

The fallout in the mid-continent would be awesome (if the President vetoes the bill with the contract sanctity provision in it). Farmers and agri-business men blame the Carter Embargoes for the agricultural recession. This move would put Reagan in the same corner.

The President told Ray Beck (Iowa Soybean Association President) in August—on the farm near Marshalltown—that he favored sanctity for all contracts. It was widely publicized through the agricultural community. Not signing would be a serious

It would also cause the Soviets to set up their plans to fill all their needs from other countries, or to do without. It would seriously impair plans and efforts towards a Long-Term Grain Agreement.

Most important, anticipation of Soviet belt-tightening would seriously hurt the world commodity markets.

That could precipitate a world financial crisis . . . the collapse of major financial in-

stitutions. The reason is: if the commodity exporting LDCs (Argentina, Brazil, and a host of smaller ones) cannot maintain export earnings for commodities, they will default on some loans, which could start the international banking system to unravel.

George Schultz and Paul Volcker are keenly aware of the hazards. What they may not realize is that a signal to the market that commodity sales might be inhibited for diplomatic reasons short of war or major emergency could be the straw that would initiate the process they are trying so hard to avoid.

I doubt if those in State or the White House who want to keep the trade-card in their hands have thought this through, or have any idea what it could do to the world financial system perched, as it is, on a knife-edge. In fact, I doubt if they know anything about commodity markets anyway, or their relation to financial markets.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. One final word, Mr. President. I want to pay my deepest respects to the staff on both sides, headed by George Dunlop for the majority and Carl Rose for the minority. Others who worked hard on this legislation were Bob Franks, Terry Wear, Ron Wilson, Jim O'Mara, Warren Oxford, Phil Fraas, and David Dyer.

Other staffers who assisted materially in the preparation of this piece of legislation were Chuck Connor, Jeff bergner, and Paula Tosina of Senator Lugar's office; Kelly Eversole of Senator Boren's staff; and CFTC staffers Dennis Dutterer, John Manley, and Pat Nicholette.

A lot of the aspects of this legislation were Greek to me as we moved into this, but I learned a lot as we moved along. As Senator Huddleston and Senator Boren have indicated, it is complicated legislation. The staff threaded its way through this maze of complexity and clarified the issues so that we emerged with a piece of legislation that was balanced and fair to all concerned.

I pay my respects to the staff on both sides.

Mr. President, I yield back the remainder of my time.

Mr. HUDDLESTON. I yield back all our time, Mr. President.

The PRESIDING OFFICER. All time having been yielding back, the question is on agreeing to the conference report.

The conference report was agreed to. Mr. HELMS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. BOREN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF AGRICUL-TURE, RURAL DEVELOPMENT, AND RELATED AGENCIES AP-PROPRIATIONS, 1983—CONFER-ENCE REPORT

The PRESIDING OFFICER. The clerk will report the next conference report.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7072) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1983, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conference.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of December 10, 1982.)

Mr. HUDDLESTON addressed the

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. HUDDLESTON. I suggest the

absence of a quorum.
The PRESIDING OFFICER. The

clerk will call the roll.

The assistant legislative clerk pro-

The assistant legislative clerk proceeded to call the roll.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COCHRAN. Mr. President, we have before us the conference report on H.R. 7072 making appropriations for the Agriculture, Rural Development, and Related Agencies programs for fiscal year 1983.

This conference report was passed by the House of Representatives earlier today by a vote of 324 to 73.

H.R. 7072 makes funds available for numerous important activities of the Department of Agriculture, such as research and extension, conservation, rural housing and farm loans, and farmer income and price support programs.

For the Commodity Credit Corporation (CCC), which is the funding source for our farm programs, \$10.5 billion is provided—nearly one-third of the bill's total.

A large portion of this bill—over 47 percent—consists of the various nutrition programs administered by USDA, including the food stamp program, the child nutrition programs, and the feeding program for women, infants, and children (WIC).

The bill also provides funding support for the Food and Drug Administration (FDA) and the Commodity Futures Trading Commission (CFTC),

and establishes lending levels for Rural Electrification Administration (REA) programs

Total obligation authority in this appropriations bill is \$34 billion. Of that total, \$31.7 billion is new budget authority. The difference of \$2.3 billion represents funds transferred from customs receipts for use in various nutrition programs.

The bill's budget authority total of \$31.7 billion is below the President's budget request by \$100 million, and below last year's level by \$108 million.

I have also received the assurances of the chairman of the Budget Committee (Mr. Domenici), that this bill falls within the 302(b) budget allocation for budget authority, under by \$500 million, and for outlays, under by \$200 million.

Since this bill was considered and passed by the Senate in September, the President has submitted amended budget requests totaling \$8.7 billion, \$6.7 billion for the Commodity Credit Corporation and \$2 billion for three major nutrition programs.

The committee of conference on H.R. 7072 considered 72 amendments in disagreement between the two Houses. The conferees did everything possible to resolve our differences and to make this bill fiscally responsible, reflective of true needs, and acceptable to both Houses of Congress, as well as to the administration. We have obtained positive indications that the President will sign the bill.

I urge my colleagues to support this important appropriations measure. The American farmer, rural Americans in every State, and participants in our vital nutrition programs are all

depending on it.

Mr. President, I commend and thank
the distinguished Senator from Missouri (Mr. Eagleton), who is the ranking Democrat on the Appropriations
Subcommittee for Agriculture. He has
provided very important leadership
and assistance to me personally and to
all of the members of this committee
as we worked on this bill.

I yield to the Senator from Missouri. Mr. EAGLETON. Mr. President, I thank my colleague (Mr. Cochran) for his kind remarks, and I return them in all sincerity in kind, both to him and to his excellent staff. I throw in my excellent staff as well.

Mr. President, the conferees on the fiscal year 1983 Agriculture appropriations bill labored for 3 days to achieve an agreement which balances the desires of the administration and the Congress as well as the needs of agriculture and the hungry of our Nation who depend on the funds provided by this bill.

Certain compromises were reached with which I do not totally agree, but in all I believes we have achieve a good bill which deserves the support of my colleagues, and should be signed into law.

The bill as reported by the conferees contains substantially more funding than was originally provided by either the House or the Senate. Over the last several weeks, the Reagan administration submitted budget amendments that total approximately \$9.4 billion. The majority of the funds requested by those amendments, \$6.7 billion, is necessitated by the disastrous failure of last year's farm program at reducing levels of surplus stocks of wheat, feed grains, and soybeans. As a result of these large stocks, commodity prices remain depressed and outlays for farm price support activities have skyrocketed. The conferees were faced with the need to replenish the Commodity Credit Corporation for the net cost of the price support programs. According to the administration's own estimates, if the additional funds for the CCC are not forthcoming by the end of December, the farm programs will have to be shut down.

In addition to the budget amendment for the Commodity Credit Corporation, the administration submitted a budget amendment for \$1.2 billion for the food stamp program, \$352 million for the child nutrition programs, and \$1.092 billion for the special supplemental food programs for women, infants, and children.

In submitting the budget amendment for food stamps and child nutrition, the President indicated that this would fully fund these programs according to the estimates of the Congressional Budget Office. It is important to point out, however, that the CBO estimates the President used are several months old and, very likely, inaccurately reflect the full funding needs for these programs.

Looking at the request for the food stamp program specifically, the President's full funding request of \$10,815,657,000 is actually below the estimates the subcommittee received from the Department of Agriculture just prior to our markup in September. What is key to point out, however, is that CBO's estimates were based on the following quarterly unemployment assumptions for fiscal year 1983; 9.5 percent for the first quarter, 9.1 percent for the second, 8.9 percent for the third, and 8.8 percent for the fourth quarter. It should be plainly and, unfortunately, painfully obvious to everyone that these assumptions are totally unrealistic. It was the clear opinion of the conferees that the President should submit a supplemental request for full funding of the food stamp program. Clearly, it would be inappropriate for the administration to even consider benefit reductions amongst program recipients unless the Congress was presented with and rejected a supplemental request which accurately reflected the full funding needs of the food stamp program.

I am pleased that the administration recognized the value of the WIC program by submitting a budget amendment at a level of funding equal to that which was provided in the Senate bill. It is my sincere hope that this is an indication that this administration has come to realize that the WIC program is highly cost effective, saving much more in avoided long-term medical care costs for low-birth-weight infants than the program itself costs.

Clearly, the direction provided in the Senate report that the WIC program be administered in accordance with the reallocation provisions of current law should not be ignored. It is most disturbing that it took court action to force compliance with this

direction last year.

The Senate bill had contained a provision I authored which prohibited the use of any funds provided by the bill to be used to place into effect any rule which would not maintain or enhance the nutritional integrity of the WIC food package. The conferees dropped this language after we had received word from the Department of Agriculture that they did not intend to place into effect in the near future any regulations which would not comply with the Senate language.

The conferees inserted language in the statement of the managers, proposed by Senator Andrews and modified by me, indicating their concern that the current nutritional quality of the WIC program be maintained and that any future modification of the national standards for the WIC food package be based on comprehensive scientific evidence necessitating the consideration of a food item as a

whole.

Recent news articles regarding the intent of this language have been misleading. This language should not impact changes in WIC regulations issued in 1980 and now implemented by virtually every State in the Nation. Those regulations were based on scientific evidence, as referenced in those regulations, and were in direct response to current law which states as follows:

To the degree possible, the Secretary shall assure that fat, sugar, and salt content of the prescribed foods is appropriate.

Any changes in regulations or national standards which would potentially allow the States to not maintain the nutritional quality of the WIC program currently implemented in the vast majority of the States would not be supported by the direction given by the conferees. The concern was over future regulations to be developed and implemented by the Food and Nutrition Service, as was the original intent of the Senate bill language. The conconcern about eliminating foods from the WIC food package based on a single component thereof, was likewise referring to future regulations not yet issued or implemented by the States. My overriding concern and that of the conferees was that the nutritional quality of the WIC program be maintained. This was the message of my original amendment and continues to be the message in the statement

of the managers.

Mr. President, the amendment to which I took exception in the conference report had the net effect of changing the mandate that was in both the House and Senate bills that no less than \$500 million be used for direct export credit, to a discretionary authority to permit the Secretary to spend up to \$500 million for direct export credits. In the current climate of the world marketplace the availability of reasonably priced credit can make the difference between export sales and no sales at all. I did not believe that now was the time to step back from the commitment to promote agricultural exports. It is my hope and it is the direction of the conferees that this administration use the export credit authority provided to the maximum extent. I can assure my colleagues that I will closely follow the administration's efforts in the export

The funding levels provided in the conference for research and extension as well as for the vital soil conservation programs funded by this bill were substantially above the President's budget request. We need to maintain a commitment to these programs if we expect to have a vital agricultural sector in the future.

I urge my colleagues to support the conference agreement.

Mr. President, I ask unanimous consent that a letter I received from the chairman and the ranking members of the Elementary, Secondary, and Vocational Education Subcommittee of the House Education and Labor Committee regarding the WIC program be made a part of the Record.

There being no objection, the letter was ordered to be printed in the

RECORD, as follows:

COMMITTEE ON EDUCATION AND LABOR, Washington, D.C., December 15, 1982. HOD. THOMAS EAGLETON, U.S. Senate,

Washington, D.C.

DEAR SENATOR EAGLETON: In view of your long and firm commitment to the Special Supplemental Food Program from Women, Infants and Children (WIC), we are writing to express our concern over language adopted in the Agriculture Appropriations Conference's Statement of Managers. Although the language is only advisory in nature, there is some question as to the meaning and effect of the language addressing the content of the prescription WIC food package.

As you know, WIC has been remarkably successful in improving the outcome of pregnancy and reducing the great medical and emotional costs of physical and mental handicaps resulting from low birth weight. Congress has consistently recognized the

critical role that the WIC program plays in promoting and protecting the present and future health of this nation's low-income women and infants at risk, and has defeated all proposals for cutting the WIC program budget during this past year.

When Congress extended the WIC program in 1978 and increased its funding authorization, it also adopted amendments concerning the WIC food package. [P.L. 95-6271 These amendments required that the sugar, fat and salt content of the WIC program package be set at "appropriate levels" [§ 17(f)(12)], and that the WIC package contain "supplemental foods" providing the essential nutrients found to be lacking in the diets of poor pregnant and nursing women, their infants and children. [§ 17(b)(14)].

Section 17(f)(12) of the Child Nutrition Act clearly requires that the Secretary of Agriculture consider the sugar content of individual food items when determining whether a food item is appropriate for inclusion in the WIC food package. Language in the Statement of Managers in the 1983 Agriculture Appropriations advising that the sugar content of an individual food item not be a basis for this decision is thus contrary to the Child Nutrition Act and cannot override the language of Section (17)(f)(12).

Just as the House and Senate authorizing committees had done during their deliberations about the WIC reauthorization, in developing proposed regulations to comply with the law, the Department of Agriculture obtained expert recommendations from the National Advisory Council on Maternal, Infant and Fetal Nutrition, a food package advisory panel, and the professional nutri-tion, medical and dental communities-atlarge. Of particular concern during review of the WIC food package was the level of added refined sugar in those cereals allowed in the program. Based upon these recommendations, the Department concluded that the most logical means of decreasing the amount of added sugar in the total WIC food package was to place a limit on refined sugar in those cereals allowed in the WIC program. A new limit of six (6) grams per one ounce serving of cereal was proposed.

The Department of Agriculture received over 1,000 public comments following publication of the proposed regulations. On the issue of sugar content in cereal alone, nearly 500 individuals responded. These comments were overwhelmingly in support of the Department's proposal to limit the content of added sugar in cereals available to WIC participants. Commenters repeatedly stated that the WIC program should remain a supplemental food program with an emphasis on nutrition education to improve eating habits. In addition, the added costs associated with highly sugared cereals were of concern to both the Department and commenters, as these costs would directly affect the number of eligible people served. The rulemaking record is clear that the adoption of the sugar limit was based on comprehensive. expert evidence, provided by members of the public health, medical, dental and nutrition communities. These changes are in the public's interest, and a positive step for the WIC program and its participants.

In November, 1980, these WIC food package regulations were issued in final form, and we fully expect USDA will implement these regulations nationwide, as scheduled on December 31, 1982. At this time nearly every state WIC program has implemented most, if not all, of the November 1980 food package final regulations.

We are seriously concerned that the language contained in the Statement of Managers could be interpreted by the cereal and sugar industries as an endorsement for the inclusion of costly, highly sugared cereals in the WIC program. Under such an interpre-tation, the entire package of prescribed WIC foods would become ripe for intrusion by any food industry seeking to expand their markets without regard for the exceptional nutritional needs of pregnancy, infancy, and childhood. Such an interpretation of this advisory language is in direct contradiction to the statutory mandate of § 17(f)(12) and legislative history of the WIC program. Obviously, the Statement of Managers cannot be interpreted to repeal the statute's

As the Chairman and the ranking members of the Elementary, Secondary and Vocational Education Subcommittee which has jurisdiction over the WIC program, we strongly oppose restoration of these food items in the WIC food package. In our judgment, such as inclusion would violate the Child Nutrition Act.

Sincerely.

CARL D. PERKINS,

Chairman.

WILLIAM F. GOODLING,

Member of Congress.

GEORGE MILLER,
Member of Congress.

Mr. COCHRAN. Mr. President, I understand the Senator from Nebraska has a statement that he would like to make, and a colloquy, and I yield to him at this time for that purpose.

The PRESIDING OFFICER. The

Senator from Nebraska.

Mr. EXON. I thank the Chair, and I thank my friend and colleague from

Mississippi.

Mr. President, I have had the pleasure during the 4 years that I have been in the Senate to work very closely on agricultural appropriations matters with the managers of the bill, the distinguished Senator from Mississippi and the distinguished Senator from Missouri. I want to compliment them for another job tremendously well done under some very, very difficult circumstances, especially the courtesy and consideration that they have always extended this Senator from Nebraska on my suggestions with regard

to agricultural appropriations. I am very pleased to see that the conference report to accompany H.R. 7072, making appropriations for Agriculture, contains \$827,000 as the first installment of Federal dollars for the Old West Region School of Veterinary Medicine. This amount is the result of extensive hearings and studies which have determined that there is a legitimate need for such a veterinary school. May I inquire of the distinguished chairman of the Agriculture Appropriations Subcommittee if he agrees that this sum contained in the conference report constitutes a Federal commitment to the continued appropriation of matching dollars to

complete this project?
Mr. COCHRAN. Mr. President, the
Senator from Nebraska is correct. The
sum of \$827,000 is the amount agreed

upon in conference with the House, and is the Federal share of the startup costs of the Old West Region Veterinary School of Medicine. Subsequent appropriations will be forthcoming as the project progresses.

Mr. EXON. I thank my friend from Mississippi, and I thank the Chair.

Mr. COCHRAN. Mr. President, let me add that this Senator appreciates very much the assistance of the Senator from Nebraska, not only with this item that is very important to his area of the country, but in all of our deliberations on the Agriculture appropriations bill.

Mr. President, I also want to thank most sincerely the members of the staff of this subcommittee who have really done an outstanding job in bringing us to this point, working our way through hearings earlier in the year, through the development of the bill, and conference with the House. I think an outstanding job has been done by each one of them.

Mr. LEAHY. Mr. President, the special supplemental food program for women, infants, and children (WIC) has been remarkably successful in improving the outcome of pregnancy and reducing the great medical and emotional costs of physical and mental handicaps resulting from low birth weight. There is some concern as to the meaning of the language adopted in the Agriculture appropriations conference's statement of managers, and the impact that this would have on this most valuable nutrition and preventive health program.

The language, although only advisory in nature, appears to contradict the statutory mandate of section 17(f)(12) of Public Law 95-627, the authorization legislation of the WIC program, which states that the Secretary of Agriculture must look at the sugar, fat, and salt content of the individual food items and that this must be a factor when determining the content of allowable goods in the WIC food package. In my view, the language contained in the statement of managers report is inconsistent with this and cannot override the language of the statute.

WIC food package regulations which take effect December 31, 1982, fully satisfy the statutory requirements of section 17(f)(12). I hope and fully expect that the Department of Agriculture will implement them without change.

• Mr. DOMENICI. Mr. President, I submit the following table for inclusion in the RECORD. The table presents spending totals for the Agriculture, rural development, and related agencies appropriation bill as reported from the committee of conference.

The table follows:

TABLE 1.—AGRICULTURE, RURAL DEVELOPMENT, AND RELATED AGENCIES—SPENDING TOTALS

[In billions of dollars]

	Fiscal ye	ar 1983
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed	0.4 34.1	1.4 19.9

scorekeeping procedures	-10.5 +.2	+.5
Adjusted total Budget resolution 302(b) allocation President's request 1 Adjusted total compared to:	24.3 24.8 24.0	21.8 22.0 21.6
Budget resolution 302(b)	5 +.3	2 +.2

¹ Includes President's budget amendments transmitted December 6, 1982 for food assistance programs, less CCC.●

Mr. DODD. Mr. President, while the Senate is approving the conference report on the fiscal year 1983 Agriculture appropriations bill. I would like to take this opportunity to comment on the language contained in the managers' statement. Accepting this report should not be construed as an indication that Congress does not intend the WIC regulations to go into effect on December 31, 1982. These regulations, as provided for in past legislation, best implement the statutory purpose of the WIC program which is to safeguard the health of mothers, infants, and children by providing them with the best nutritional supplements available.

EXPLANATION AS TO WHY SENATOR ABDNOR CHOSE NOT TO SIGN THE AGRICULTURAL AP-PROPRIATIONS CONFERENCE REPORT

Mr. ABDNOR. Mr. President, on Friday of last week, members of the Conference on Agricultural Appropriations were informed by the administration that the conference report on agricultural appropriations would be acceptable if but one word was changed. We were asked to substitute the word "more" for "less" in the provision calling upon the Secretary of Agriculture to spend not less than \$500 million in direct export credit loans provided by the Commodity Credit Corporation.

The conference report now reads that the Secretary shall not spend more than \$500 million for such programs.

Because of that change I choose not to sign an otherwise acceptable conference report.

I wish now to explain to my colleagues in the Senate, particularly those who are members of the Subcommittee on Agriculture Appropriations and especially Chairman Than Cochran, my reasons for not signing the conference report. And let me say that Chairman Cochran has done a masterful job in bringing forth the conference report under very difficult

circumstances, but I believe this issue must be raised.

The change in language, of course, provides the administration with the option to spend no funds in direct export credit loans.

Following the less than fruitful General Agreement on Tariffs and Trade conference held last month, the newspapers have been full of speculation concerning the good prospects of an

agricultural trade war.

The administration, by insisting on this language change, has sent a clear signal to our competitors that there will not be a war because we choose not to fight. Rather, we are going to disarm by dismantling our export credit program, raise the white flag, and become international agricultural trade pacifists. It is shocking to note that less than a month ago, Secretary Block in referring to the irresponsible attitude of other world agricultural trades, was quoted as saying:

They have to be realistic and realize that we do have ammunition on our side if we need to use it. We are not without firepower. We can fire if we have to.

Agriculture's Deputy Under Secretary for International Affairs stated: "the United States is not proposing to let its agricultural trade go by default" and "we intend to stand up for U.S. agricultural interests" and "our farmers depend on exports and it is our job to make sure those markets are there for them." The platitude that comes readily to mind is "talk is cheap" which, tragically, may accurately describe this administration's international farm policy.

And now, over the weekend, reports out of Brussels strongly confirm this administration's concessional approach to international agricultural trade. In a recent appearance before the Senate Agriculture Committee, Gary Myers, president of the National Council of Farmers Cooperatives of-

fered the observation:

The National Council firmly believes that the Administration will continue to be unsuccessful in their attempts to negotiate the issue of export subsidies with the EC because the U.S. is bargaining from a position of weakness.

Studying once again the agricultural conflict between the U.S. and the European Community will cost this country thousands of more farms and a further weakening in our competitive position in world agricultural markets.

It is going to take a lot of convincing that the administration did anything short of literally giving away the farm in Brussels.

I cannot help but contrast this country's too apparent lack of commitment and support to U.S. businesses in world trade versus its aggressive, challenging and confident approach to international military relations. Certainly we must have more than a single dimension to our foreign policy.

U.S. agriculture is an international advantage well worth defending, Mr. President. American agriculture has a decided, inherent advantage in food production. U.S. farmers presently provide food for an estimated 12 to 15 percent of the world's population. It is in the world's interest that the United States defend its innate advantage to produce food. Yielding world food markets to less efficient producers will have catastrophic global economic, political and social impacts.

It should not be an incidental note in world history that the most foodproductive land on the face of the Earth was placed in the hands of the most capable enterprising and innovative individuals and that these individuals were provided with an economic system which rewarded initiative, hard work and risk taking. For the first time in the history of mankind a country stands poised to produce and deliver food in proportion to the hunger in the world. Choosing not to compete in international agricultural markets would violate every social, political and economic principle of our democratic and capitalistic heritage.

Mr. President, given my hard-earned 10-year record in the Congress as a fiscal conservative, the amendment I intend to introduce shortly to the Agriculture Act of 1982 is symbolic of how desperate I view the current economic condition of American agriculture to be, and how bleak its future

prospects.

The amendment establishes a direct link between crop production and the Government's effort to expand exports. It recognizes the mutual obligation of farmers and the Government to contribute to the reduction of pricedepressing surplus grain stocks. Clearly, the quickest and most effective way to eliminate burdensome and costly surpluses is to simultaneously reduce production and expand exports. The amendment would implement an export market diversion program to complement the present paid land diversion program. The objective of the export market diversion program is to divert export markets toward U.S. farmers. The amendment establishes a parallel export market diversion fund equal in size to the total payments to farmers participating in the paid land diversion program. That is, for every dollar paid to farmers to divert land out of production a dollar will be used to promote and expand commercial export sales. The Secretary of Agriculture is directed to draw upon the export market diversion fund to finance export enhancing programs.

In addition to the export market diversion program being a needed further incentive for farmers to reduce output, our foreign competitors will view our unilateral decision to reduce production in a totally different light—the more successful we are at

reducing production the greater our capability to respond to market opportunities and challenges.

The amendment, in combination with the provisions of the Agricultural Act of 1982, constitutes the fundamental elements of a much overdue U.S. international farm policy—a policy which recognizes and is designed to effectively deal with realities of world agricultural markets during the decade of the 1980's.

Mr. COCHRAN. Mr. President, I know of no other Senator who has asked to be recognized or who would like to make a statement.

At this point, I move the conference report be adopted.

The PRESIDING OFFICER. Is all time yielded back?

Mr. COCHRAN. Mr. President, I yield back all my time. I am advised that the Senator from Missouri yields

back his time as well.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the conference report.

The conference report was agreed to.
Mr. COCHRAN. Mr. President, I
move to reconsider the vote by which
the conference report was agreed to.

Mr. EXON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. COCHRAN. Mr. President, I ask unanimous consent that the Senate consider the amendments in disagreement en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments in disagreement are as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 14 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum inserted by amendment, insert: \$323,221,000.

Resolved. That the House recede from its

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 37 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: ": Provided, That 20 percentum of the farm ownership loans and 20 percentum of the operating loans insured, or made to be sold and insured, under this provision may be for low-income limited resource borrowers; guaranteed economic emergency loans under the Emergency Agricultural Credit Adjustment Act of 1978, \$600,000,000."

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 70 to the aforesaid bill, and concur therein with an amendment as

follows:

In lieu of the matter inserted by said amendment, insert:

"Sec. 625. Notwithstanding any other provision of this Act, appropriations under this Act to reimburse the Commodity Credit Corporation for net realized losses sustained, but not previously reimbursed, are

\$10,466,057,000, and, as authorized by law, the Commodity Credit Corporation shall carry out an Export Credit Sales direct loan program of not more than \$500,000,000 in fiscal year 1983."

Mr. COCHRAN. Mr. President, I move that the Senate concur en bloc with the amendments of the House of Representatives to the amendments of the Senate numbered 14, 37, and 70.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Mississippi.

The motion was agreed to.

Mr. COCHRAN. I thank the Chair. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## SURFACE TRANSPORTATION ACT OF 1982

The Senate continued with the consideration of the bill.

Mr. DOLE. Mr. President, I would say I think we have an amendment to be offered by the distinguished Senator from Oklahoma that is acceptable, and then we, perhaps, can go to Senator Symms who has an amendment after that.

#### UP AMENDMENT NO. 1449

(Purpose: To exclude from the excise tax on heavy trucks certain farm trucks)

Mr. BOREN. Mr. President, I have an amendment I send to the desk.

The PRESIDING OFFICER (Mr. QUAYLE). The clerk will report.

The legislative clerk read as follows: The Senator from Oklahoma (Mr. Boren), for himself, Mr. Wallor and Mr. Pryor proposes an unprinted amendment numbered 1449.

Mr. BOREN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Subsection (a) of section 112 of the matter proposed to be inserted is amended by redesignating paragraph (4) as paragraph (5) and by inserting after paragraph (3) the following new paragraph:

(4) EXEMPTION OF FARM EQUIPMENT USED IN TRANSPORTING LIVESTOCK.—Subsection (a) of section 4063 is amended by adding at the end thereof the following new paragraph:

"(9) FARM EQUIPMENT DESIGNED TO TRANS-PORT LIVESTOCK.—The taxes imposed by section 4061 shall not apply in the case of any truck body, trailer body, or semitrailer body (or any part or accessory thereof) which is uniquely designed to transport livestock to and on farms.".

Mr. BOREN. This is a very noncontroversial amendment. The revenue impact of it is negligible, probably less

than \$1 million, which has been discussed with the Treasury.

It is an amendment that simply would expand the definition of agricultural vehicles in terms of the exemption of those vehicles from the manufacturer's excise tax, and would include those vehicles specifically developed for livestock transportation, both trucks and trailers, to and from farms for agricultural purposes.

Mr. DOLE. Mr. President, the Senator from Kansas is familiar with the amendment. I have discussed it with the Senator from Oklahoma and the Senator from Wyoming and others.

It was raised in committee, and we tried to resolve it in committee. We asked the Senator to defer the amendment so that we could confer with DOT and Treasury, and there is no objection to accepting it.

Mr. BOREN. The Senator is correct. We have scaled it down after consultation with Treasury and others, and it is now limited strictly to farm transportation of livestock. It is a slight expansion of the definition that is contained in the committee bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment (UP No. 1449) was agreed to.

Mr. BOREN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I understand Senator Sarbanes had an amendment that appeared to be acceptable. I would prefer to wait until Senator Stafford arrives. I know he is on his way to the floor.

Perhaps, in the meantime we can take up the amendment of Senator SYMMS. I am not certain whether it will be objectionable or not.

## UP AMENDMENT NO. 1450

Mr. SYMMS. Mr. President, I have an amendment at the desk that I offer on behalf of myself, Senator Boren, and Senator Grassley, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from Idaho (Mr. Symms), for himself, Mr. Boren, and Mr. Grassley, proposes an unprinted amendment numbered 1450 to the amendment proposed by Mr. Baker.

Mr. SYMMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment proposed by Mr. Baker, insert the following:

Sec. . EFFECTIVE DATE OF GENERATION-SKIPPING TRANSFER PROVISIONS.—Section 2006(c) of the Tax Reform Act of 1976 [Public Law 94-455] (relating to the effective dates of generation-skipping transfer provisions), as amended by section 702(n)(1) of the Revenue Act of 1978 [Public Law 95-600], is amended to read as follows:

#### "(c) EFFECTIVE DATES .-

"(1) In GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to any generation-skipping transfer (within the meaning of section 2611(a) of the Internal Revenue Code of 1954) made after December 31, 1984.

"(2) Exceptions.—The amendments made by this section shall not apply to any generation-skipping transfer—

"(A) under a trust which is irrevocable on December 31, 1984, but only to the extent that the transfer is not made out of corpus added to the trust after December 31, 1984,

"(B) in the case of a decedent dying after December 31, 1984, if the decedent on December 31, 1984, is under a mental disability to change the disposition of his property and either at no time thereafter regains his competence to dispose of such property or thereafter does regain his competence but, within the 2-year period following the first date upon which he regains such competence, dies without having amended the will (or revocable trust) in any respect during such 2-year period.

For purposes of subparagraph (A), (i) a trust shall be considered irrevocable on December 31, 1984, if on that date it is not subject to a power that would cause the value of the trust to be included in the grantor's gross estate for Federal estate tax purposes by reason of section 2038 of the Internal Revenue Code of 1954 (without regard to those powers relinquished during the 3-year period ending on that date) if the grantor died on that date; (ii) a trust created after December 31, 1984, by reason of the terms of, or the exercise of a power granted under, a trust which is, or is considered, irrevocable on December 31, 1984, shall be considered irrevocable on December 31, 1984; and (iii) any portion of the corpus of a trust which is, or is considered, irrevocable on December 31, 1984, remaining in trust after the post-December 31, 1984, release, exercise or lapse of a power of appointment over that portion of such corpus shall not be treated as corpus added to the trust.

"(3) TRUST EQUIVALENTS.—For purposes of paragraph (2), in the case of a trust equivalent within the meaning of subsection (d) of section 2611 of the Internal Revenue Code of 1954, the provisions of such subsection (d) shall apply."

Mr. SYMMS. Mr. President, I am offering this amendment today to delay the impact of the generation-skipping tax until after January 1, 1985. The generation-skipping tax is extremely complex and costly to administer. It is in fact so complex that even the most knowledgeable individuals or corporate fiduciaries, insurance people, accountants, and attorneys, all of whom are affected by this tax, are finding it extremely difficult to interpret and apply it.

This just delays it for 2 years so the Treasury will have time to work out what they consider an acceptable solution.

As a matter of fact, this amendment is supported by the American Bar Association, the American Bankers Association, the American Institute of Certified Public Accountants, the American College of Probate Council, and many State and local bar associations. They all favor the outright repeal of the tax and by them favoring the outright repeal of the tax tells us really that no one understands how the generation-skipping tax is to work.

As a result of that, hundreds of thousands of dollars have been spent in an attempt to understand the law and it has been done to no avail. Two volumes, each the size of the Yellow Pages, have been published in an at-

tempt to comprehend the law.

There are numerous, complicated analytical steps that must be followed in order to determine whether any amounts are held in trust that will be subject to the generation-skipping transfer tax. This analytical process often results in an unexpected and inequitable application of the tax.

It has been more than 5 years since the generation-skipping transfer tax became effective and the IRS still has not issued key generation-skipping definitional regulations. If the Internal Revenue Service is unable to fully comprehend the underlying statute, how can Congress expect taxpayers even to begin to comply with the law.

The generation-skipping transfer tax will not accomplish the purposes for which it was enacted. The wealthy can employ techniques which will avoid the tax. Therefore, the responsibility for paying the tax and the costs of administering it will fall unfairly upon the already overburdened middle- and

upper-middle income classes.

The purpose of all of our tax laws is to collect a tax. To date, the generation-skipping transfer tax has not collected 1 cent in taxes and is expected to collect maybe \$300 million in revenue in its 20th year. If the Congress intends to have a generation-skipping tax then it should implement a tax that individuals can easily pay. Individuals will inadvertently be tax evaders simply because they will not know that they have to pay this tax-let alone be able to interpret how to pay it. There is no line on the IRS 1040 form for income received from a generation-skipping trust. Unless, the bank is the executor of the estate and creator of the trust, it is very unlikely that anyone will know that they owe a

The generation-skipping transfer tax is a threat to our voluntary compliance tax system because individuals will involuntarily be tax evaders. The generation-skipping transfer tax cannot be defended on revenue grounds because it is very unlikely that the U.S. Government will ever

collect the \$300 million it expects to receive 20 years from now since nobody will know that they have to pay the tax. The tax is so complex that there are perhaps two attorneys in the United States who believe that they "almost" understand the statute. The statute will never work unless everyone in the estate plan dies in order. If anyone dies out of order, then everything falls apart, and the wrong generations start being taxed.

I know in the years that I have served as a Member of Congress, that the Congress has been able to do many things but there is one thing I am sure of and that is that Congress will never be able to make individuals understand or comply with this law, and more importantly, I do not believe that we will be able to make people die in order.

So I urge my colleagues to support the amendment. Again, this amendment will not cost the Treasury money. No revenue has been collected and it is extremely doubtful that any revenue will be collected in the next 2 years.

The amendment offered on behalf of myself and the ranking minority member of the Estate and Gift Tax Subcommittee, Senator Boren and Senator Grassley will simply impose a moratorium on the generation-skipping tax until the House and the Senate and the Treasury have had an opportunity to review this matter in detail as the subommittee reviewed this matter.

If this amendment is not passed, individuals will not be able to comply with the law because not only are they unable to understand the law but they will not be able to receive the necessary information from the IRS to complete the forms.

It is important that it be passed now because of the timing of the situation, as this will have to go into effect on the 1st of January of this coming year, January 1, 1983.

Mr. DOLE. Is that 1 year or 2 years? Mr. SYMMS. Mr. President, we made it 2 years.

I say to my good friend from Ohio that he already approved this earlier this year in another tax bill. We were unable to get it on the bill for 1 year. The reason I made it for 2 years, I say to my good friend from Ohio, is because for 2 years Senator Wallop, Senator Boren, and others on the Senate Finance Committee, have tried to get this worked out and tried to get some kind of a solution. We have yet to get regulations from Treasury that all of these distinguished lawyer groups-the American Bar Association, the American Bankers Association, the American Institute of Certified Public Accountants, the American College of Probate Counsel, and others-can understand.

So I felt, rather than do it for 1 year, that we should extend it for 2 years. Hopefully we will come up with some kind of a solution for it after 2 years. At the rate we are working in this body, I have little confidence that we will be able to do it in 1 year or the Treasury will be able to do it in 1 year. We will give them 2 years to get it corrected.

I urge my colleagues to accept this amendment. It will be one that their constituents that are affected by this will be greatly appreciative of and I think all Americans will be appreciative of.

Mr. METZENBAUM. Will the Senator yield for a question?

Mr. SYMMS. I am happy to yield for

Mr. METZENBAUM. I have three questions. First, What is the revenue impact? I am advised it would be \$250 million in the outyears. Second, Does Treasury have a position with respect to the proposal? Third, When did the Senator from Ohio agree to the 1-year measure?

Mr. SYMMS. Mr. President, I may be incorrect. If I am incorrect, I will stand correct. But last summer, or in the summer of 1981, the Senator from Idaho brought this up and my friend from Ohio has some objections to it. I personally discussed it with him on the floor at that time for a 1-year extension. Treasury objected to it and so we never offered the amendment. In personal conversations, the Senator from Ohio has never approved it on the floor.

Mr. METZENBAUM. Will the Senator from Idaho yield.

Mr. SYMMS. Let me answer the Senator's questions first.

On the revenue loss, first of all, there has never been any money raised on the generation-skipping tax debate. It is predicted it might raise even up to \$300 million 20 years from now. But no one else I know of, and I have not yet found an attorney that understands how to apply the generation-skipping tax, or tax accountant. That is why I think we find these various groups supporting outright repeal. I am not calling for repeal here tonight. I am only calling for an extension

One year would be fine, but it just seems to me, as complicated as this is and knowing the workings of the Finance Committee, that we would all be better served by making it 2 years so, hopefully, Treasury could come up with some kind of regulation or a solution to this problem.

Was there another question?

Mr. METZENBAUM. The Senator from idaho stated Treasury had been opposed to this amendment?

Mr. SYMMS. That is correct.

Mr. METZENBAUM. Would the Senator from Idaho be inclined to lay

the matter aside temporarily, without losing his position on the calendar, until such time as representatives of Treasury might get here? I do not see any of them on the floor at the moment. I think that might be productive.

Mr. SYMMS. The Senator from Idaho of course, would not like to do that. If it is necessary and I have no choice in the matter, I guess we could do that. But I only say to my friend from Ohio that this generation-skipping transfer tax is, in fact, so complex that we have yet to find a fiduciary, an accountant, corporate insurance people, or attorneys who are affected by the tax that are not finding it extremely difficult to interpret.

I would just say to my good friend from Ohio and appeal to him that the Senator from Idaho is in no way doing anything here that will cost the Treasury any money. It will not draw any money until 20 years, anyway, it is estimated. So we are talking about a delay of 2 years before it goes into effect. Because, as of 2 weeks from now, when we get into 1983, we will have many, many Americans in noncompliance with the law. And I know the Senator from Ohio is one of the champions to have voluntary compliance and to have equity in our Tax Code. This makes it possible to have equity in the Tax Code. I hope he would not ask me to set it aside at this point, because I have talked to Treasury on many occasions and have always received the same nonanswer from Treasury on this particular issue. I think it will be a waste of everyone's time to let this aside. I hope he will not ask that we do that.

Mr. President, I would also say that if some complication arose that the Senator had a good deal of concern with, I suppose maybe something could be worked out in the conference where the leadership on both sides could work out an agreement. I hope the Senator will not ask us to set it aside. I hope we can get this passed and have it behind us for another

year.

Mr. METZENBAUM. I will say to the Senator from Idaho that this is amending a rather recently passed piece of legislation that created the problem in the first instance. I think it only fair to point out that the essence of the generation-skipping trust, in effect, is a way for the wealthy skipping one generation as far as estate taxes are concerned.

Treasury has indicated, according to the reports which I have, that we are talking about \$250 million loss to the

Treasury in the outyears.

Under those circumstances, I do not think we can handle the matter in a casual way.

I have not suggested that the matter be defeated at this point, but I have suggested that it be laid aside until

Senator Dole can see to it that some of his own staff as well as Treasury arrive on the floor.

Mr. SYMMS. I would like to answer the Senator from Ohio that Senator DOLE, Senator Long, and members of the Finance Committee are very familiar with this. The staff is very familiar with it. I think it will not benefit anyone to lay this aside at this hour.

The wealthy people that the Senator talked about layered their trusts anyway. They are not affected. The kind of people who are affected are the ones who are quite wealthy so that they may owe an estate tax, but not wealthy enough to have the sophisticated type of legal help.

If the Senator would feel more comfortable about it, I would be happy to bring it back to 1 year. I can assure him that it will have no cost to the Treasury in this 2-year period, but I

will take it back to 1 year.

Maybe we can work it out next year. I would certainly like to get it on this

bill and have it behind us.

Mr. METZENBAUM. I suggest it be laid aside. I suggest that we lay it aside temporarily until Treasury arrives on the floor, without preventing it from being brought up at a subsequent hour.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. FORD. Mr. President, I have a minor amendment here which would expedite reclamation funding. I would like to pursue it, if it is all right with the floor manager of the bill. It was included in the nongermane list. Perhaps we could get it out of the way while they are trying to work out their problems.

Mr. DOLE. Would that be in the tax

area or a different title?

Mr. FORD. I am not sure. What this does is to expedite the funding under the office of Surface Mining which will be appropriated to those States which are qualified to accept the funding

Mr. DOLE. I think this is to amend title 2. Senator Stafford is on his way to the floor. The Senator from Kentucky and the Senator from Maryland both have amendments.

I am not familiar with it, but I know

he is on his way to the floor.

Mr. FORD. I asked him about that this afternoon and he was not sure about it going into the highway fund. What I have done is to insert it in the appropriate place. The Parliamentarian said that was the best way because he could not figure out exactly where

it should go. So I get caught in limbo here, whether it is under section 2 or section 1. Nobody objects to it.

Mr. DOLE. The Senator from Kansas has no objection, but I would

like at least--

Mr. FORD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SYMMS. Mr. President, I ask unanimous consent that the date on my amendment be changed from 1985 to December 31, 1983. In other words, it will reduce it by 1 year. Instead of being a 2-year extension, it will be a 1-year extension.

The PRESIDING OFFICER. The Senator has a right to modify his amendment. The amendment is so

modified.

The amendment, as modified, is as follows:

At the appropriate place in the amendment, insert the following:

SEC. . EFFECTIVE DATE OF GENERATION-SKIPPING TRANSFER PROVISIONS.—Section 2006(c) of the Tax Reform Act of 1976 (Public Law 94-455) (relating to the effective dates of generation-skipping transfer provisions), as amended by section 702(n)(1) of the Revenue Act of 1978 (Public Law 95-600), is amended to read as follows:

"(c) EFFECTIVE DATES .-

"(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to any generation-skipping transfer (within the meaning of section 2611(a) of the Internal Revenue Code of 1954) made after December 31, 1983.

"(2) Exceptions.—The amendments made by this section shall not apply to any gen-

eration-skipping transfer-

"(A) under a trust which is irrevocable on December 31, 1983, but only to the extent that the transfer is not made out of corpus added to the trust after December 31, 1983, or

or

"(B) in the case of a decedent dying after
December 31, 1983, if the decedent on December 31, 1983, is under a mental disability
to change the disposition of his property
and either at no time thereafter regains his
competence to dispose of such property or
thereafter does regain his competence but,
within the 2-year period following the first
date upon which he regains such competence, dies without having amended the bill
(or revocable trust) in any respect during
such 2-year period.

For purposes of subparagraph (A), (i) a trust shall be considered irrevocable on December 31, 1983, if on that date it is not subject to a power that would cause the value of the trust to be included in the grantor's gross estate for Federal estate tax purposes by reason of section 2038 of the Internal Revenue Code of 1954 (without regard to those powers relinquished during the 3-year period ending on that date) if the grantor died on that date; (ii) a trust created after December 31, 1983, by reason of the terms

of, or the exercise of a power granted under, a trust which is, or is considered, irrevocable on December 31, 1983, shall be considered irrevocable on December 31, 1983; and (iii) any portion of the corpus of a trust which is, or is considered, irrevocable on December 31, 1983, remaining in trust after the post-December 31, 1983, release, exercise or lapse of a power of appointment over that portion of such corpus shall not be treated as corpus added to the trust.

"(3) TRUST EQUIVALENTS.-For purposes of paragraph (2), in the case of a trust equivalent within the meaning of subsection (d) of section 2611 of the Internal Revenue Code of 1954, the provisions of such subsection

(d) shall apply.

Mr. DOLE. Mr. President, as I understand, there is no problem with that amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Idaho.

The amendment (UP No. 1450), as

modified, was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment, as modified, was agreed

Mr. SYMMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to

Mr. DOLE. As I understand, I say to Senator FORD, there is objection on both sides to his amendment.

Mr. FORD. Mr. President, the Energy Committee staff is here. The Energy Committee on this side says it is all right. I am on the Energy Committee. This is part of the legislation I sponsored. I wish we could get it cleared on the other side.

Why not consider it and, if it is wrong, we will take it down.

Mr. DOLE. All right.

## UP AMENDMENT NO. 1451

(Purpose: To expedite Office of Surface Mining grants to States for Abandoned Mine Land Reclamation projects)

Mr. FORD. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Kentucky (Mr. FORD), for himself, Mr. ROBERT C. BYRD, and Mr. HUDDLESTON, proposes an unprinted amendment numbered 1451.

Insert at the appropriate place in the

Baker substitute:

. Within 60 days of receipt of a complete abandoned mine reclamation fund grant application from any eligible State under the provisions of the Surface Mining Control and Reclamation Act (91 Stat. 460) the Secretary of Interior shall grant to such State any and all funds available for such purposes in the applicable appropriations

Mr. FORD. Mr. President, the amendment that I offer addresses a problem under the Surface Mining Control and Reclamation Act of 1977 (Public Law 95-87). At the outset, I would emphasize three points. The amendment does not open up Public Law 95-87. The amendment does not increase appropriations under the act. The amendment does not require the levy of any new tax or fee. The amendment does seek to accelerate payments to the States from the State's share of fees collected under the act for abandoned mine land reclamation projects.

Mr. President, the provisions of title IV of Public Law 95-87 were crucial in arriving at the compromises that led to the enactment of the Surface Mining Control and Reclamation Act. Payments to the States have been slow. This has not been solely due to OSM action, or inaction. States have been slow in sending in projects for approval. OMB scrutiny of the State allotments has been a factor.

Mr. President, to put the matter in perspective, data provided by the Office of Surface Mining show that through fiscal year 1982, State and tribe entitlements totaled Indian \$452,095,114. However, States Indian tribes had received only a total of \$93,105,763 of the entitlements.

Mr. President, I ask that the pertinent information on the status of individual State entitlements be printed in the RECORD at this point.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

## STATUS OF STATE ABANDONED MINE LAND FUND ENTITLEMENTS, FISCAL YEAR ENDED SEPT. 30, 1982

State or Indian tribe	Collections	Entitlements	Grants of entitlements
Alabama	\$28,491,723	\$14,245,862	\$3,977,002

## PROJECTED STATUS OF ABANDONED MINE LAND FUND, FISCAL YEAR 1983

	Amounts
Fees collected to date (including interest on late payments)	\$904,190,214 - 36,647,000
TotalLess appropriations 1979–82	867,543,214 -354,185,000
Total	513.358.214

PROJECTED STATUS OF ABANDONED MINE LAND FUND. FISCAL YEAR 1983—Continued

TATALETE SALES SERVICE	Amounts
Less anticipated appropriations 1983	-111,609,000
Balance Anticipated 1983 receipts.	401,749,214 229,515,000
Unappropriated balance	631,264,214

Mr. FORD. Before a State can submit projects for funding, it must have an approved regulatory program and an approved abandoned mine land reclamation program under its regulatory program. Twenty-four States have approved regulatory programs and 18 of these have an approved AML program. The six States without an approved program are in various stages of preparation (Alabama, Arkansas, Iowa, North Dakota, Utah, and Wyoming).

Mr. President, I ask unanimous consent that a summary of the status of AML plans for States where plans have not been approved be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

STATUS OF AML PLANS FOR STATES WHERE PLANS HAVE NOT BEEN APPROVED

Wyoming 1-Plan resubmitted to OSM on August 16, 1982. Anticipate approval of resubmission in February.

Arkansas 1-Awaiting plan amendment from state-overdue since September; approval and small grant anticipated in fiscal vear 1983.

Utah 1—State plan submission expected mid-January, approval and grant can be anticipated in the Spring.

Alaska—State is beginning to develop plan with October 1982 planning grant from OSM, approval possible late this fiscal year.

Iowa 1-Informal draft received by the OSM field office, currently under review, small construction grant anticipated this year.

Louisiana 1-Has no allocation, but state anticipates developing a plan in the future. Mississippi 1-No interest on the part of

the state in developing an AML plan; no allocation funds available.

Crow, Hopi, Navajo Tribes-The Crow and Hope Tribes have submitted plans; Navajo Tribe plan is expected this fiscal year. Until regulatory program legislation is enacted, these plans will be "on the shelf." No construction grants expected in fiscal year 1983.

Mr. FORD. Mr. President, I feel that my amendment requiring OSM to release money for grants within 60 days will act as a spur for States to submit AML plans for approval. It also will serve to spur all States with approved plans to submit projects for approval.

Mr. President, States are moving toward submission of projects. I ask unanimous consent that an OSM pro-

<sup>&</sup>lt;sup>1</sup>States with approved regulatory program, but no AML.

vided table setting forth, by State, a be printed in the Record at this point. was ordered to be printed in the list of approved and pending projects There being no objection, the table Record, as follows:

Mr. FORD. Mr. President, as to those States that are eligible, that have filed, it just says they can go to work reclaiming the land, it creates jobs, puts equipment to work, and it is an environmental improvement.

Mr. STAFFORD. Will the Senator yield for a question?

Mr. FORD. Yes, Mr. President.

Mr. STAFFORD. This, I understand, has to do with orphan mine sites.

Mr. FORD. That is correct, old orphan mines.

Mr. STAFFORD. Would this be what we might call an orphan amendment under the present circumstances?

Mr. FORD. Yes, Mr. President, we might call it that. It does reclaim the land, it does improve it environmentally, it does not levy a tax, and it puts people and equipment to work. We have 17-percent unemployment in the coalfields in our area. This helps reduce the unemployment.

Mr ROBERT C. BYRD. Mr. President, does the Senator from Kentucky have the floor?

Mr. FORD. Yes, Mr. President.

Mr ROBERT C. BYRD. Will he yield?

Mr. FORD. Yes.

Mr ROBERT C. BYRD. Mr. President, this amendment does correct these environmental hazards. Under the act, for abandoned mine land reclamation, fees are collected, so much per ton. It is placed in a fund. Part of it is a State portion, part of it a Federal portion. It will be used to put unemployed miners back to work. There are surface miners that are well equipped to do the work. There are construction firms that are well equipped to do the work. It is not Federal money per se; it is paid into the fund for this purpose.

Mr. FORD. Only half of it is returned to the States. The Federal Government keeps the other half.

Mr. ROBERT C. BYRD. The Federal Government should release some of the money.

I ask the Senator to put my name on it as a cosponsor.

Mr. FORD. Mr. President, I ask unanimous consent that the Senator from West Virginia (Mr. ROBERT C. BYRD) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. Mr. President, I ask unanimous consent that my colleague (Mr. Huddleston), be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. Chairman, I might say to my friend we are having the amendment read to Senator McClure, who is chairman of the committee which has the jurisdiction. This particular amendment has no problem, but we would like the Senator to forbear.

Mr. FORD. Mr. President, I had an understanding with the Senator that if it is not acceptable, I shall be the first to come to the floor and withdraw that amendment.

Mr. DOLE. Mr. President, we have been advised of that. We have read it to Senator McClure. He would like a chance to look at it. We have dispatched a copy to his office. I wonder if we could temporarily set it aside. It has been offered. We can get that far and if there is no objection, we can go ahead and take it.

Mr. FORD. Mr. President, I ask unanimous consent that my amendment be temporarily set aside and that it come back in sequence with the other amendments.

THE PRESIDING OFFICER. Without objection, the amendment is temporarily laid aside.

Mr. FORD. What bothers me just a mite is that other amendments will come along and be debated. I do not

want to lose my amendment our there somewhere,

A parliamentary inquiry,

THE PRESIDING OFFICER. The Senator will state it.

Mr. FORD. I understand it is temporarily set aside, the next item is taken up, then mine comes back in sequence?

The PRESIDING OFFICER. The Senator's amendment will occur after the next amendment is disposed of.

Mr. FORD. I thank the Chair.

Mr. DOLE. Mr. President, let me assure the Senator from Kentucky that we are trying to work it out.

Mr. FORD. I understand that, Mr. President. There is a lot of slip between the lip and the cup between 2 and 3 o'clock in the morning.

## UP AMENDMENT NO. 1452

(Purpose: To allow the transferability of Interstate System funds to 4R projects)

Mr. SARBANES. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Maryland (Mr. Sarbanes), for himself, Mr. Moynhan, and Mr. Mathias, proposes an unprinted amendment numbered 1452.

Mr. SARBANES. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In the appropriate place in the substitute insert the following new section:

#### INTERSTATE SYSTEM 4R TRANSFERABILITY

SEC. . Section 119 of title 23, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) (1) Upon application by a State and approval by the Secretary, the Secretary may authorize the transfer of not more than 50 per centum of the amount apportioned to such State in any fiscal year under

section 104(b)(5)(A) of this title to the apportionment under section 104(b)(5)(B) of

"(2) Any amounts so transferred under paragraph (1) of this subsection shall be restored by such State to the apportionment under section 104(b)(5)(A) of this title from apportionments to such State made for the following two fiscal years under section 104(b)(5)(B) of this title.

(3) In order to insure such restoration. transfers made under paragraph (1) of this subsection shall be limited to the total amount expected to be apportioned to such State under section 104(b)(5)(B) of this title for the fiscal years during which restoration

is required.

(4) If any State fails to restore the amounts of such transfer as required by paragraph (2) of this subsection, the cost estimate submitted to Congress under section 104(b)(5)(A) of this title for the cost of completing segments of the Interstate System open to traffic in such State (other than high occupancy vehicle lanes) for the fiscal year immediately following the period of restoration shall be reduced for such State in an amount equal to the amount transferred under this subsection.

Mr. SARBANES. Mr. President, I offer this amendment on behalf of myself, Mr. Moynihan, and Mr. Ma-THIAS. This amendment would allow a State to transfer interstate construction funds into the interstate rehabilitation and reconstruction 4R category with a payback provision. There is a requirement for a payback provision. This provision would greatly enhance funding flexibility and would promote the maximum and timely use of the anticipated new revenues.

Under the proposed amendment, a State could borrow interstate construction funds, use them on 4R projects, then pay back the fund to the interstate construction category when such projects are ready to com-

mence.

The provision would allow States to put funds immediately to use generating employment, contributing to economic recovery, and preserving the National System of Interstate and Defense Highways.

The required payback would insure the scheduled completion of the Interstate System and not require any additional authorizations beyond those

now being considered.

I think it is a very sensible amendment. It would enable us to move ahead by transferring from construction to rehabilitation, but then requiring a payback so we will not be drawing down that account over the cycle of this bill.

THE PRESIDING OFFICER. The

Senator from Vermont?

Mr. STAFFORD. The attention of the Senator from Vermont was temporarily diverted. I assume the Senator from Maryland asked that we accept the amendment?

Mr. SARBANES. That is correct.

Mr. STAFFORD. Speaking for myself and I think for the majority side, we have examined the amendment and we think it is desirable. We are prepared to accept it.

We understand from staff that the manager on the minority side (Mr. RANDOLPH) is also agreeable to accepting the amendment; so we are prepared to accept the amendment.

Mr. SARBANES. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maryland.

The amendment (UP No. 1452) was agreed to.

Mr. SARBANES. I move to reconsider the vote.

Mr. STAFFORD. I move to lay the motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD and Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Kansas. I just wanted to call up a small amendment.

Mr. DOLE. I have another amendment to offer, but I would just as soon take care of that one.

The PRESIDING OFFICER. It will take unanimous consent to set aside the Ford amendment.

Mr. ROBERT C. BYRD. I make that request.

The PRESIDING OFFICER, Without objection, it is so ordered.

UP AMENDMENT NO. 1453

(Purpose: To add "modifications to chloralkali electrolytic cells" as specially defined energy property eligible for the business energy credit)

Mr. ROBERT C. BYRD. Mr. President. I send an amendment to the desk and ask that it be immediately considered.

THE PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an unprinted amendment numbered 1453.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, the reading of the amendment will be dispensed with.

The amendment is as follows: At the end of the substitute amendment

add the following:

"(a) Paragraph (5) of section 48(1) of the Internal Revenue Code of 1954 (defining specially defined energy property) is amended-

(1) by striking out "or" at the end of subparagraph (L).

(2) by redesignating subparagraph (M) as subparagraph (N) and by inserting after subparagraph (L) the following new subparagraph

"(M) modifications to chlor-alkali electrolytic cells, or" and

(3) by striking out "(M)" in the second sentence and inserting in lieu thereof "(N)".

(b) The table contained in clause (i) of section 46(a)(2)(C) of the Internal Revenue Code of 1954 (relating to amount of credit) is amended by adding at the end thereof the following new subsection:

"VII. Chlor-Alkali Electrolytic Colls—Property described in 10 percent ...... Jan. 1, 1980 Dec. 31, Cells—Property describ section 48(1)(5)(M).

Mr. ROBERT C. BYRD. Mr. President, a while ago, I wrote a letter concerning this matter to the distinguished ranking member of the Finance Committee and to the distinguished chairman. I introduced a bill at that time which would allow the chlor-alkali industry, including a West Virginia plant, to modernize its electrolytic cells, which are used to produce raw materials for chemical feed stocks. It would also benefit a chlor-alkali modernization project which is now underway in Louisiana, I believe.

The distinguished Senator from Louisiana (Mr. Long) is nodding in the affirmative.

I have discussed this with the distinguished manager of the tax section of the bill and the ranking member. I believe it meets with their approval. I therefore hope that they will accept the amendment.

Mr. DOLE. I might suggest that it is also this Senator's understanding that the Treasury does not support this amendment. I have been told that the cost over what, 3 years-

Mr. ROBERT C. BYRD. Three to four years.

Mr. DOLE [continuing]. Is \$15 million.

Mr. ROBERT C. BYRD. An estimated \$15 million.

Mr. DOLE. But in any event, the Senator from Kansas is willing to accept the amendment and do what we can with it.

Mr. ROBERT C. BYRD. It would mean 200 jobs in this one plant in Natrium, W. Va.

ENERGY INVESTMENT CREDIT FOR MODIFICA-TIONS TO CHLOR-ALKALI ELECTROLYTIC CELLS

Mr. President, my amendment would afford the chlor-alkali industry, including a proposed cell modernization project at a West Virginia plant, the energy tax treatment legislatively provided alumina electrolytic cells by a 1980 amendment to the Windfall Profits Tax Act. It would also benefit a chlor-alkali modernization project which is now underway in Louisiana and was done in expectation of the energy credit. The chlor-alkali cell modernization program at the one West Virginia plant would create over 200 jobs during the next several years. The revenue impact of the enclosed modified amendment proposal would total an estimated \$15 million spread over 3 to 4 years. The revenue loss would be less than \$5 million in any one year.

On March 2, 1982, I introduced S. 2151, a bill similar to this amendment. On March 30, the Subcommittee on Energy and Agricultural Taxation held a hearing on S. 2151, at which the need for this legislation was presented.

A 10-percent energy investment credit is allowed under current law to encourage various types of energy conservation and conversion activities. One category of eligible investment for this energy credit is "specially de-fined energy property" under Internal Revenue Code section 48(1)(5). This category of energy conservation property includes 12 specified types of investment, such as recuperators, heat exchangers, preheaters, and modifications to alumina electrolytic cells. It is required for eligibility as specially defined energy property that this investment occur in connection with existing processes at existing industrial or commercial facilities and that it be for the principal purpose of reducing energy consumption. In addition to the 12 enumerated types of investment, the Secretary of the Treasury or his delegate is authorized, under code section 48(1)(5)(M), to specify by regulations other types of eligible specially defined energy property. The energy credit for specially defined energy property is generally available for investments which occur before January 1, 1983.

The chlor-alkali industry electrolytic uses cells to produce chlorine gas and caustic soda—basic feedstocks used in turn to produce a variety of other chemical products. The chlor-alkali industry nationwide uses more electricity than any other industry except the aluminum industry. It consumes 2 percent of all electricity used in the United States.

There is technology presently available that reduces energy usage in the electrolytic cell process commonly used by the chlor-alkali industry. This technology, for all practical purposes, is identical in function to modifications to alumina electrolytic cells which presently qualify for the energy investment credit as specially defined energy property under code section 48(1)(5)(L). Both involve changes to existing industrial processes for the purpose of reducing the amount of energy consumed. This would in turn result in substantial overall energy savings. At one chloralkali plant, which uses electricity generated by oil and natural gas, these modifications would reduce energy consumption by over 460,000 barrels of fuel-oil equivalent each year. These chlor-alkali cell modifications are basically motivated by energy efficiency. They would not increase the productive capacity of the cells and are not periodic replacements of cell components since the existing cell configurations can continue to be used for a number of years.

A facility in Natrium, Marshall County, W. Va., will be able to take advantage of this new provision, as will other chlor-alkali plants nationwide. This idea will help protect existing jobs, create new jobs, and save significant amounts of energy.

I want to express my appreciation to the distinguished chairman of the Finance Committee, Senator Dole, for his cooperation on this matter. I also want to thank the distinguished ranking member of the committee, Senator Long, for his assistance and unfailing support of this measure. Senator Randolph, a cosponsor of S. 2151, and Senators Domenici, Johnston, Matsunaga, and Specter also deserve thanks for their support of this effort.

Mr. DOLE. I am prepared to accept the amendment.

Mr. ROBERT C. BYRD. I thank the distinguished chairman.

Mr. LONG. I favor the amendment. Mr. ROBERT C. BYRD. I thank the ranking member.

The amendment (UP No. 1453) was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE addressed the Chair.
The PRESIDING OFFICER. The
Senator from Kansas.

UP AMENDMENT NO. 1454

(Purpose: To amend the Internal Revenue Code of 1954 to lower the limitation on defined benefit plans established for policemen and firemen)

Mr. DOLE. Mr. President, I send an amendment to the desk on behalf of the distinguished Senator from New York (Mr. D'AMATO). It affects the limitation of benefits under police and fireman's pension plans. I think the total cost is less that \$200,000. It has been cleared. It has been discussed. I know of no objection to the amendment.

Mr. FORD. Mr. President, I ask unanimous consent that my amendment be set aside temporarily.

The PRESIDING OFFICER. Without objection, it is ordered.

Mr. DOLE. I thank the Senator.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Kansas (Mr. Dole), on behalf of the Senator from New York (Mr. D'AMATO), proposes an unprinted amendment numbered 1454.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the Baker amendment insert the following:

SEC. . LIMITATION ON BENEFITS UNDER POLICE AND FIREMEN'S PENSION PLANS

(a) In General.—Paragraph (2) of section 415(b) of the Internal Revenue Code of 1954 (relating to annual benefit) is amended by adding at the end thereof the following new subparagraphs:

"(F) SPECIAL LIMITATION FOR QUALIFIED POLICE OR FIREMEN'S PENSION PLANS.—In applying subparagraph (C) with respect to a participant in a qualified police or firemen's plan, '55' shall be substituted for '62' each place it appears.

"(G) QUALIFIED POLICE OR FIREMEN'S PLAN DEFINED.—For purpose of this paragraph, the term 'qualified police or firemen's plan' means a defined benefit plan—

"(i) which is maintained by a State, or political subdivision thereof, for the benefit of all full-time employees of any police department or fire department that is organized and operated by such State or political subdivision to provide police protection, fire-fighting services, or emergency medical services for any area within the jurisdiction of such State or political subdivision,

"(ii) under which benefits are determined solely by reference to the length of service of the employee in—

"(I) such a police or fire department, or "(II) the armed forces of the United States, and

"(iii) which requires, as a condition of participation of any employee in the plan, that the sum of—

"(I) the number of years such employee was employed on a full-time basis by such State or political subdivision in such a police or fire department, plus

"(II) the number of years such employee served in the armed forces of the United States (to the extent such years are taken into account under the plan),

equals or exceeds 20 years.

(b) EFFECTIVE DATE.—The amendment made by this section shall take effect as if it had been included in section 235 of the Tax Equity and Fiscal Responsibility Act of 1982.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, as I understand it, the Senator from Louisiana has no objection to the amendment. The Senator from Kansas has no objection to the amendment.

The amendment (UP No. 1454) was agreed to.

(Later the following occurred:)

Mr. DOLE. Mr. President, earlier we failed to table the motion to reconsider on the D'Amato amendment. I move to table the reconsideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. What is the pending

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Kentucky.

Mr. FORD. Mr. President, will the Senator from Kansas indicate whether there is any word from Energy yet?

Mr. DOLE. We have dispatched, I may say to the Senator from Kentucky, a copy of the amendment to the distinguished chairman of the committee (Mr. McClure).

Mr. FORD. Mr. President, I ask unanimous consent that my amendment be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DURENBERGER addressed the Chair.

The PRESIDING OFFICER. The Senator from Minnesota.

UP AMENDMENT NO. 1455

(Purpose: To clarify the eligibility for interstate funding of four interstate highway projects)

Mr. DURENBERGER. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Minnesota (Mr. Duren-BERGER) proposes an unprinted amendment numbered 1455.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the Baker substitute insert the following

## PARKING FACILITIES

Subsection (b) of Section 108 of the Federal-Aid Highway Act of 1956, as amended, is further amended by adding before the last sentence thereof a new sentence as follows: "Notwithstanding any other provisions of law, including any other provision of this subsection, where a project is to be constructed (a) to provide parking garage ramps in conjunction with high occupancy vehicle lanes which flow into a distributor system emptying directly into ramps for offstreet parking with preferential parking for carpools, vanpools, and buses and the ramps are part of an environmental mitigation effort and are designed to feed into an aerial walkway system, or (b) to provide a parking lot near the terminus of an Interstate System spur route which radiates from an Interstate System beltway which will be used as an intermodal transfer facility for a light rail transit project to be constructed in the median of the spur route and the parking lot is part of an environmental mitigation effort, or (c) to provide a parking garage and associated facilities as part of an intermodal transfer facility with a transit system near or within an Interstate System route right-of-way which will have direct and indirect access to the facili-

ty by way of local streets and the parking garage and associated facilities are part of an environmental mitigation effort, or (d) to provide for the comprehensive upgrading of existing high occupancy vehicle lanes, new ramps and parking facilities at mass transit intermodal transfer points on an existing Interstate System rout which has tempohigh occupancy vehicle lanes in the median and the parking facilities and ramps are part of an environmental mitigation effort, the costs of such parking garage ramps, parking lots, parking garages, associated interchange ramps, high occupancy vehicle lanes, and other associated work eligible under 23 United States Code shall be eligible for funds authorized by this subsection as if the costs for these projects were included in the 1981 interstate costs estimate and shall be included as an eligible project in any future interstate cost estimate.

Mr. DURENBERGER. Mr. President, the amendment I have sent to the desk is necessary to clarify the eligibility for interstate funding of four important projects. When Congress approved the 1981 interstate cost estimate in the 1981 Highway Act, Public Law 97-134, it never intended that these projects should be excluded from interstate construction funding eligibility. However, the Federal Highway Administration has adopted a restrictive interpretation of the criteria set out in that act which has prevented these projects from being considered with funds apportioned under the interstate program.

Interstate eligibility for each of these four projects has been previously recognized either in floor statements by various Senators or in Appropriations Committee reports. Last fall, during debate on the 1981 cost estimate, this Senator noted the need for fringe parking facilities along Interstate 394 and established, in a colloquy with Senator Symms, that this project would be eligible for interstate construction funds.

Unfortunately, the FHWA has determined otherwise. Similarly, during debate on the 1981 act Senator RAN-DOLPH specifically indicated that the FHWA should approve for interstate construction funding a bus and parking facility proposed by the District of Columbia to be located adjacent to Interstate 295 in Southeast Washington, D.C. However, the FHWA has re-

peatedly refused to do so.

Appropriations Committee The report on the 1982 urgent supplemental bill, Senate Report 97-402, noted that the FHWA had failed to approve for interstate construction funding certain projects associated with I-95 in Dade County, Fla. These high occupancy vehicle lanes, parking facilities, and connections from the highway to rapid transit terminals should be constructed within the interstate program. The Florida projects were approved by the Federal Highway Administration on October 8, 1980, and the cost for all elements of this project was included in the interstate cost estimates for 1981.

Finally, the Appropriations Committee report on the 1982 Supplemental Appropriations Act, Senate Report 97-516 recognized that the I-295 bus and parking project in Washington, D.C., as well as a parking facility along I-795 near Baltimore, Md., should similarly qualify for interstate construction funding.

Mr. President, this amendment would not establish anything new. It would merely clarify prior congressional intent with respect to the scope of the interstate highway program and reverse the FHWA's overly restrictive interpretations of the 1981 act. It would require no new funding but merely allow the four States to spend moneys already available to them from their interstate apportionments. I should also add, Mr. President, that this amendment would not be necessary if the Federal Highway Administration had been more willing to follow the intent of Congress as expressed in the various reports mentioned above. I have been advised that Senators Mathias, Randolph, and CHILES have indicated their strong support for this amendment.

I believe that this has been cleared. Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. STAFFORD. As I understand, the principal impact of this legislation would be to finance construction of peripheral parking lots in order to facilitate movement of traffic in and out of metropolitan areas?

Mr. DURENBERGER. The Senator is correct.

Mr. STAFFORD. The Senator from Vermont thinks that this is a worthy program to proceed with, and on behalf of the majority I am prepared to accept the amendment. I understand from staff of the manager on this part of the bill for the minority (Mr. RANDOLPH) that this is agreeable to him, too. So we are prepared to accept the amendment.

Mr. DURENBERGER. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota.

The amendment (UP No. 1455) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. CRANSTON and Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The and the Senator from Kansas for clerk will call the roll.

The legislative clerk proceeded to call the roll

Mr. HUMPHREY addressed the Chair

The PRESIDING OFFICER. The Senator from New Hampshire.

Mr. HUMPHREY. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. I object.

CRANSTON addressed the Mr. Chair.

The PRESIDING OFFICER. Objection is heard. The clerk will continue to call the roll.

The legislative clerk resumed the call of the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will continue the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. HEFLIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. DOLE. I object.

The PRESIDING OFFICER (Mr. ABDNOR). Objection is heard.

Mr. HEFLIN. I ask that the quorum call go live.

The PRESIDING OFFICER. The clerk will continue the call of the roll. The assistant legislative clerk con-

tinued the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HUMPHREY. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the calling of the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. FORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FORD. I thank the distinguished Senator from New Hampshire.

AMENDMENT NO. 1451

Mr. President, we now have the distinguished Senator from Idaho here, the chairman of the Energy Committee, to discuss my amendment that is pending on the floor.

Mr. McCLURE. I wonder if the Senator from Kentucky would yield for a

series of questions.

Mr. FORD. I would be very pleased to yield to the Senator from Idaho.

Mr. McCLURE. Mr. President, first, I thank the Senator from Kentucky

making it possible for me to look at this amendment and consider it before it came up for consideration on the floor. Let me say I support the thrust of the amendment. It is the kind of thing we have been trying to get done. but I think we need to establish a little legislative history about what is meant by it so we know how it can be

What I would like to focus on for just a moment is the meaning of the term "complete abandoned mine reclamation fund grant application."

Now if I understand correctly, the meaning of that term should be in this context: First, a State must assume primacy; they have to have a program in place that is sufficient to be certified for administration of the program.

Mr. FORD. The Senator is correct.

Mr. McCLURE. Second, they must have an abandoned mine reclamation plan that is also approved by the Federal Government.

Mr. FORD. The Senator is correct. Mr. McCLURE. Then pursuant to that plan they must submit a grant application for a project which would have been through the EIS process.

Mr. FORD. Environmental assess-

Mr. McCLURE. Yes, the environmental assessment would have to be completed before it would be deemed a complete grant application.

Mr. FORD. The Senator is correct. Mr. McCLURE. And they would have to, in addition to that, be in position to spend the money once received by them. In other words, they would have to have their share of the project moneys in hand by the time the money would reach them so they

could spend the money. Mr. FORD. The Senator is correct. I might add one caveat to that. It is not this Senator's intention for the State to receive the money and put it in the Treasury and draw interest on it. What I am interested in is getting the job done based on the law so we can remove the orphan land banks, that we can make the environmental assessment and put the people to work. I fully agree with the Senator's statement.

Mr. McCLURE. I understand, too, that the process now in effect which you would not vary by this amendment is that there is an earmarking of funds by State that is done when the money is appropriated and then so much is set aside for each State.

Mr. FORD. The Senator is correct. I do not intend for one State to receive other States' money. What has been collected and what is due them is all they are entitled to based on what is appropriate.

Mr. McCLURE. So that this requirement for disbursement of the money would be confined to that amount of

money which has been set aside for that State's program.

Mr. FORD. The Senator is correct.

Mr. McCLURE. Mr. President, I say to the Senator from Kentucky that I am perfectly satisfied that the legislative history now tells us what is required, what would be the process; that the money would go into real reclamation activities and do so very

I commend the Senator from Kentucky for his amendment. I fully support it. I think it is a valuable addition to the bill and ought to get some people back to work and some mined areas reclaimed.

Mr. FORD. This also, I might say to my distinguished friend from Idaho. would accelerate the States to comply some and to get into this. This may be a little carrot and stick operation here. If they are not in, they do not get in, and they do not get the expedited procedure here. So I think it will help encourage the States to comply where they may be a little bit lax at the present time.

Mr. McCLURE.Will the Senator yield further?

Mr. FORD. Yes.

Mr. McCLURE. I agree with the statement of the Senator from Kentucky. I think it will be an additional carrot as well as an additional stick for the States. I think it it can stimulate greater activity on the part of the States. I think it is an excellent amendment. I hope it will be agreed

Mr. FORD. I yield back my time.

Mr. President, I ask unanimous consent that the distinguished Senator from Virginia (Mr. WARNER) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from Kentucky (Mr. Ford).

The amendment (UP No. 1451) was

Mr. FORD. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## UP AMENDMENT NO. 1456

Mr. DOLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

Mr. HUMPHREY. Mr. President. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Kansas (Mr. Dole for himself and Mr. Jepsen) proposes an unprinted amendment numbered 1456.

At the appropriate place in the amendment, insert the following:

SEC. DECREASE IN HOLDING PERIOD REQUIRED FOR LONG-TERM CAPITAL GAIN TREATMENT.

(a) In GENERAL.-

(1) Capital gains.—Paragraphs (1) and (3) of section 1222 of the Internal Revenue Code of 1954 (relating to other terms relating to capital gains and losses) are each amended by striking out "1 year" and inserting in lieu thereof "5 months".

(2) CAPITAL LOSSES.—Paragraphs (2) and (4) of section 1222 of such Code are each amended by striking out "1 year" and in-

serting in lieu thereof "6 months".

(b) CONFORMING AMENDMENTS.—The following provisions of the Internal Revenue Code of 1954 are each amended by striking out "1 year" each place it appears and inserting in lieu thereof "6 months":

(1) Paragraph (1)(B) of section 166(d) (re-

lating to nonbusiness debts).

(2) Subsection (a) of section 341 (relating to treatment of gain to shareholders in the

case of collapsible corporations).

(3) Paragraph (2) of subsection (a) and subparagraph (L) of subsection (e)(4) of section 402 (relating to capital gains treatment for certain distributions in the case of a beneficiary of an exempt employees' trust).

(4) Subparagraph (A) of section 403(a)(2) (relating to capital gains treatment for certain distributions in the case of a beneficiary under a qualified annuity plan).

(5) Paragraph (1) of section 423(a) (relating to employee stock purchase plans).

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. HUMPHREY. Objection.

The PRESIDING OFFICER. Objection is heard.

Mr. DOLE. Mr. President, I ask for yeas and nays.

The PRESIDING OFFICER. The clerk will resume the reading of the amendment.

The bill clerk resumed reading as follows:

(6) Paragraph (2) of section 582(c) (relat-

ing to capital gains of banks).

- (7) Subparagraphs (A) and (B) of section 584(c)(1) (relating to inclusions in taxable income of participants in common trust funds).
- (8) Paragraphs (3) and (4) of section 642(c) (relating to charitable deductions for certain trusts).
- (9) Paragraphs (1) and (2) of section 702(a) (relating to income and credits of partner).
- (10) Subparagraph (A) of section 817(a)(1) (relating to certain gains and losses in the case of life insurance companies).
- (11) Subparagraph (B) of section 852(b)(3) (relating to taxation of shareholders of regulated investment companies).
- (12) Subparagraph (A) of section 856(c)(4) (relating to definition of real estate investment trust).
- (13) Paragraphs (3)(B) and (7) of section 857(b) (relating to taxation of shareholders of real estate investment trust).
- (14) Paragraph (11) of section 1223 (relating to holding period of property).
- (15) Section 1231 (relating to property used in the trade or business and involuntary conversions).
- (16) Paragraph (2) of section 1232(a) (relating to sale or exchange in the case of bands and other evidences of indebtedness).
- (17) Subsections (b), (d), and subparagraph (A) of subsection (e)(4) of section

1233 (relating to gains and losses from short sales).

(18) Paragraph (1) of section 1234(b) (relating to treatment of the grantor of an option in the case of stock, securities, or commodities).

(19) Subsection (a) of section 1235 (relating to sale or exchange of patents).

(20) Paragraph (4) of section 1246(a) (relating to holding period in the case of gain on foreign investment company stock).

on foreign investment company stock).

(21) Section (i) of section 1247 (relating to loss on sale or exchange of certain stock in the case of foreign investment companies electing to distribute income currently).

(22) Subsection (b) and (g)(3)(C) of section 1248 (relating to gain from certain sales or exchanges of stock in certain foreign corporations).

(23) Subparagraph (A) of section 1251(e)(1) (defining farm recapture property).

(c) TECHNICAL AMENDMENT RELATING TO TIMBER, COAL, AND DOMESTIC IRON ORE.—Section 631 of such Code (relating to gain or loss in the case of timber, coal, or domestic iron ore) is amended—

(1) by striking out "for a period of more than 1 year" in the first sentence of subsection (a) and inserting in lieu thereof "on the first day of such year and for a period of more than 5 months before such cutting", and

(2) by striking out "1 year" in subsections (b) and (c) and inserting in lieu thereof "5 months".

(d) Technical Amendment Relating to Straddles.—Section 1092(d)(2) of such Code (defining position) is amended—

(1) by striking out clause (ii) of subparagraph (B) and inserting in lieu thereof the following:

"(ii) is part of a straddle none of the offsetting position of which would, if sold by the taxpayer on the last day on which such option could be exercised, result in the recognition of—

"(I) long-term capital gain or loss, or

"(II) in the case of a syndicate (within the meaning of section 1256(e)(3)(B)), long-term capital gain or loss or ordinary income or loss." and

(2) by adding at the end thereof the fol-

lowing new subparagraph:

"(C) Special rules for application of subparagraph (b)(ii).—For purposes of subparagraph (B)(ii)—

"(i) a stock option (other than an option meeting the requirements of section 1236 or which would meet such requirements if section 1236 applied to such option) held or granted by a dealer shall not be treated as meeting the requirements of such subparagraph unless such option is entered into the normal course of the dealer's trade or business, and

"(ii) the determination as to whether a sale would result in long-term capital gain or loss shall be made without regard to the rules of subsections (b) and (d) of section 1233 (as made applicable by reason of subsection (b))."

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

Mr. HUMPHREY. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The bill clerk continued reading the amendment, as follows:

(c) Technical Amendment Relating to Certain Short-Term Government ObligaTIONS.—Section 1232(a)(4)(A) (relating to certain short-term government obligations), as in effect before the amendments made by section 231(c)(4) of the Tax Equity and Fiscal Responsibility Act of 1982, and section 1232(a)(3)(A), as in effect after such amendments, are each amended by striking out "held less than 1 year."

(f) EFFECTIVE DATES .-

(1) In general.—Except as otherwise provided by this subsection, the amendments made by this section shall apply to sales and exchanges made after June 30, 1983.

(2) Conforming amendments.—The amendments made by subsection (b) shall

take effect on July 1, 1983.

(A) Conforming amendments; timber, etc.—The amendments made by subsections (b) and (c) shall not apply with respect to losses on the sale or exchange of property held by the taxpayer on June 30, 1983.

(4) STRADDLES.—The amendments made by subsection (d) shall apply to any position which is part of a straddle (within the meaning of section 1092(c) of the Internal Revenue Code of 1954) held after June 30, 1983.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 1457

Mr. DOLE. Mr. President, I send an amendment to the desk.

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. Dole for himself and Mr. Jepsen) proposes an unprinted amendment numbered 1457 to unprinted amendment numbered 1457.

In place of the language proposed to be in-

serted insert the following:

SEC. DECREASE IN HOLDING PERIOD REQUIRED FOR LONG-TERM CAPITAL GAIN TREATMENT.

(a) In GENERAL.-

(1) Capital Gains.—Paragraphs (1) and (3) of section 1222 of the Internal Revenue Code of 1954 (relating to other terms relating to capital gains and losses) are each amended by striking out "1 year" and inserting in lieu thereof "6 months".

(2) CAPITAL LOSSES.—Paragraphs (2) and (4) of section 1222 of such Code are each amended by striking out "1 year" and inserting in lieu thereof "6 months".

(b) Conforming Amendments.—The following provisions of the Internal Revenue Code of 1954 are each amended by striking out "1 year" each place it appears and inserting in lieu thereof "6 months":

(1) Paragraph (1)(B) of section 166(d) (relating to nonbusiness debts).

(2) Subsection (a) of section 341 (relating to treatment of gain to shareholders in the case of collapsible corporations).

(3) Paragraph (2) of subsection (a) and subparagraph (L) of subsection (e)(4) of section 402 (relating to capital gains treatment for certain distributions in the case of a beneficiary of an exempt employees' trust).

(4) Subparagraph (A) of section 403(a)(2) (relating to capital gains treatment for cer-

tain distributions in the case of a beneficiary under a qualified annuity plan).

(5) Paragraph (1) of section 423(a) (relating to employee stock purchase plans).

(6) Paragraph (2) of section 582(c) (relat-

ing to capital gains of banks).

- (7) Subparagraphs (A) and (B) of section 584(c)(1) (relating to inclusions in taxable income of participants in common trust
- (8) Paragraphs (3) and (4) of section 642(c) (relating to charitable deductions for certain trusts)
- (9) Paragraphs (1) and (2) of section 702(a) (relating to income and credits of partner).
- (10) Subparagraph (A) of section 817(a)(1) (relating to certain gains and losses in the case of life insurance companies).
- (11) Subparagraph (B) of section 852(b)(3) (relating to taxation of shareholders of regulated investment companies).
- (12) Subparagraph (A) of section 856(c)(4) (relating to definition of real estate investment trust).
- (13) Paragraphs (3)(B) and (7) of section 857(b) (relating to taxation of shareholders of real estate investment trust).
- (14) Paragraph (11) of section 1223 (relating to holding period of property).
- (15) Section 1231 (relating to property used in the trade or business and involuntary conversions).
- (16) Paragraph (2) of section 2132(a) (relating to sale or exchange in the case of bonds and other evidences of indebtedness).
- (17) Subsections (b), (d), and subparagraph (A) of subsection (e)(4) of section 1233 (relating to gains and loss from short sales)
- (18) Paragraph (1) of section 1234(b) (relating to treatment of the grantor of an option in the case of stock, securities, or commodities).
- (19) Subsection (a) of section 1235 (relating to sale or exchange of patents).
- (20) Paragraph (4) of section 1246(a) (relating to holding period in the case of gain on foreign investment company stock).
- (21) Subsection (i) of section 1247 (relating to loss on sale or exchange of certain stock in the case of foreign investment companies electing to distribute income current-
- (22) Subsections (b) and (g)(3)(C) of section 1248 (relating to gain from certain sales or exchanges of stock in certain foreign corporations).
- Subparagraph (A) of 1251(e)(1) (defining farm recapture property).
- (c) TECHNICAL AMENDMENT RELATING TO TIMBER, COAL, AND DOMESTIC IRON ORE.— Section 631 of such Code (relating to gain or loss in the case of timber, coal, or domestic iron ore) is amended-
- (1) by striking out "for a period of more than 1 year" in the first sentence of subsection (a) and inserting in lieu thereof "on the first day of such year and for a period of more than 6 months before such cutting",
- (2) by striking out "1 year" in subsections (b) and (c) and inserting in lieu thereof "6 months".
- (d) TECHNICAL AMENDMENT RELATING TO STRADDLES.-Section 1092(d)(2) of such Code (defining position) is amended-
- (1) by striking out clause (ii) of subparagraph (B) and inserting in lieu thereof the following:
- "(ii) is part of a straddle none of the offsetting positions of which would, if sold by the taxpayer on the last day on which such

option could be exercised, result in the recognition of-

'(I) long-term capital gain or loss, or

"(II) in the case of a syndicate (within the meaning of section 1256(e)(3)(B)), long-term capital gain or loss or ordinary income or loss.", and

(2) by adding at the end thereof the following new subparagraph:

(C) SPECIAL RULES FOR APPLICATION OF SUBPARAGRAPH (B) (II) .- For purposes of subparagraph (B)(ii)-

- "(i) a stock option (other than an option meeting the requirements of section 1236 or which would meet such requirements if section 1236 applied to such option) held or granted by a dealer shall not be treated as meeting the requirements of such subparagraph unless such option is entered into in the normal course of the dealer's trade or business, and
- "(ii) the determination as to whether a sale would result in long-term capital gain or loss shall be made without regard to the rules of subsections (b) and (d) of section 1233 (as made applicable by reason of subsection (b))."
- (e) TECHNICAL AMENDMENT RELATING TO CERTAIN SHORT-TERM GOVERNMENT OBLIGA-TIONS.-Section 1232(a)(4)(A) (relating to certain short-term government obligations), as in effect before the amendments made by section 231(c)(4) of the Tax Equity and Fiscal Responsibility Act of 1982, and section 1232(a)(3)(A), as in effect after such amendments, are each amended by striking out "held less than 1 year"

Mr. HUMPHREY. Mr. President, I ask unanimous consent that further reading be dispensed with.

Mr. BUMPERS. Objection.

The PRESIDING OFFICER. Objection is heard. The clerk will proceed.

Mr. DOLE. Mr. President, did somebody object?

Mr. BUMPERS. Yes, Mr. President, I objected.

The PRESIDING OFFICER. The objection is heard.

The assistant legislative clerk continued reading as follows:

(f) EFFECTIVE DATES .-

- (1) In general.-Except as otherwise provided by this subsection, the amendments made by this section shall apply to sales and exchanges made after June 30, 1983.
- AMENDMENTS.-The CONFORMING (2) amendments made by subsection (b) shall take effect on July 1, 1883.
- (A) CONFORMING AMENDMENTS; TIMBER, ETC.—The amendments made by subsections (b) and (c) shall not apply with respect to losses on the sale or exchange of property held by the taxpayer on June 30, 1983.
- (4) STRADDLES.—The amendments made by subsection (d) shall apply to any position which is part of a straddle (within the meaning of section 1092(c) of the Internal Revenue Code of 1954) held after June 30,

Mr. METZENBAUM and Mr. DOLE addressed the Chair.

Mr. METZENBAUM. Mr. President, the rules of the Senate provide that the first Member who is on the floor asking for recognition is entitled to that recognition. I was on the floor asking for recognition. The Chair looked over at the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

Mr. METZENBAUM. Mr. President, suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside for consideration of an amendment to be offered by the distinguished Senator from Missouri, and only for that purpose, with no amendments to be in order.

The PRESIDING OFFICER, Without objection, it is so ordered.

Mr. METZENBAUM. Is it with the understanding that it is only for this amendment, as originally indicated by the Senator?

Mr. DANFORTH. Yes.

Mr. METZENBAUM. With that understanding, I have no objection.

UP AMENDMENT NO. 1458

(Purpose: To exclude home energy assistance provided by private nonprofit organizations or by utilities from income for purposes of supplemental security income and the aid to families with dependent children programs)

Mr. DANFORTH. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Missouri (Mr. Dan-FORTH), for himself, Mr. Heinz, Mr. Duren-BERGER, Mr. PACKWOOD, Mr. PERCY, Mr. GRASSLEY, Mr. COHEN, Mr. SPECTER, Mr. ROTH, Mr. PRESSLER, Mr. HATFIELD, Mr. DECONCINI, Mr. WEICKER, Mr. ABDNOR, Mr. LUGAR, Mr. CHAFEE, Mr. MOYNIHAN, Mr. TSONGAS, Mr. HEFLIN, Mr. RIEGLE, Mr. BRAD-LEY, Mr. LEVIN, Mr. GLENN, Mr. SASSER, Mr. CRANSTON, Mr. BENTSEN, Mr. MITCHELL, Mr. EAGLETON, Mr. KENNEDY, Mr. SARBANES, Mr. CANNON, Mr. METZENBAUM, Mr. BOREN, Mr. MATSUNAGA, and Mr. BAUCUS, proposes an unprinted amendment numbered 1458.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the substitute add the following new section:

SEC. . (a) Section 1612(b) of the Social Security Act is amended-

(1) by striking out "and" at the end of paragraph (11);

(2) by striking out the period at the end of paragraph (12) and inserting in lieu thereof and"; and

(3) by adding at the end thereof the following new paragraph:

"(13) any assistance received to assist in meeting the cost of home energy, including

both heating and cooling, which (as determined under regulations of the Secretary by such State agency as the chief executive officer of the State may designate) is (A) based on need for such assistance, and (B) furnished by a private nonprofit agency, by a supplier of home heating oil or gas, by an entity providing home energy whose revenues are primarily derived on a rate-of-return basis regulated by a state or Federal governmental entity, or by a municipal utility providing home energy."

(b) Section 402 (a) of such Act is amend-

ed-

(1) by striking out "and" at the end of paragraph (33);

(2) by striking out the period at the end of paragraph (34) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the fol-

lowing new paragraph:

"(35) provide, at the option of the State, that in making the determination for any month under paragraph (7) the State agency shall not include as income any assistance received to assist in meeting the costs of home energy, including both heating and cooling, which (as determined under regulations of the Secretary by such State agency as the chief executive officer of the State may designate) is (A) based on need for such assistance, and (B) furnished by a private nonprofit agency, by a supplier of home heating oil or gas, by an entity whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal governmental entity, or by a municipal utility providing home energy."

(c) The amendments made by subsections (a) and (b) shall be effective with respect to home energy assistance received in months beginning on or after the date of the enactment of this Act and prior to July 1, 1985.

(d) The Secretary of Health and Human Services shall submit a report to the Congress, prior to April 1, 1985, on the implementation and results of the provisions of sections 1612(b)(13) and 402(a)(35) of the Social Security Act, including any recommendations with repect to whether such provisions should be extended in the same or modified form or allowed to expire.

Mr. DANFORTH. Mr. President, under the present law, if a private organization or an individual or a utility makes a contribution to an individual for the purpose of helping that individual pay his or her utility bill, the effect of that contribution is that it is counted as income for the purpose of computing AFDC or SSI benefits. Therefore, the result is that there is a dollar-for-dollar offset on AFDC or SSI payments for such contributions to the individual.

If, for example, a utility were to help an individual pay his utility bill, the indirect effect of that would be a contribution of a like amount to the U.S. Treasury; obviously, not what was intended by the individual and obviously a deterrent to people or organizations or utilities trying to do good things for other individuals.

This amendment has the effect of correcting that situation and providing that such payments would not be used to offset AFDC or SSI payments.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, it is an outstanding amendment. It is a good amendment. It has, I do not know, how many cosponsors?

Mr. DANFORTH. Approximately 35

cosponsors.

Mr. DOLE. Thirty-five to thirty-six. We have checked this with our staff, and I know of no objection to the amendment. It should be passed.

Mr. BRADLEY. Mr. President, I urge we adopt this amendment. I think it is a critical amendment at a

very difficult time.

Mr. LONG addressed the Chair.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. LONG. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DANFORTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COHEN). Without objection, it is so ordered.

Mr. DANFORTH. Mr. President, we have a little difficulty that has developed on this amendment we are trying to work out, and until we do so I withdraw the amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

Mr. DOLE. Mr. President, if the Senator will withhold, we have 4 or 5 amendments we think are noncontroversial. We have Treasury people in one room and we are working in there and on the floor, and I hope we might move some of the noncontroversial, nongermane amendments. Some that are controversial we are going to have problems with, but if in fact somebody believes it is truly noncontroversial, no big revenue impact, then we ought to see it because I agree with the majority leader that there are some of these things we can do and if we can we ought to do them. We have about four prospects, and if there are others, I would appreciate knowing about them.

Mr. PRYOR. Mr. President, will the Senator from Kansas yield? While we are waiting on the noncontroversial amendments what would be wrong with taking up a controversial amendment? I have one I would be glad to send to the desk.

Mr. DOLE. There is one right now I

would like to get to.

Mr. PRYOR. It is 10 after 9, and I have an amendment that I am sure is going to be controversial, but at least we could start on it.

Mr. DOLE. Give us a little time to work out four or five of these. I have no quarrel with that. I do not know what the amendment is.

Mr. PRYOR. It is a very fine amendment and one which, when I explain

Mr. DOLE. Mr. President, it is an it, should not be controversial, but it is atstanding amendment. It is a good right now.

Mr. DOLE. Does it refer to the gas tax or highway bill?

Mr. PRYOR. It refers to the gas tax. It refers to the excise portion of the gas tax. We have had no discussion on the excise tax, and it does refer to that particular section.

Mr. DOLE. I think the Senator from Kansas is familiar with the amendment. It is important and it would be refreshing to have an amendment that really dealt with the tax bill.

Mr. PRYOR. This would be a germane amendment. I know it would be a little unique. I would like at this time, if I could, go forward.

Mr. DOLE. The Senator from Kansas will certainly undertake to bring that up a little later.

Mr. PRYOR. A little later?

Mr. DOLE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. METZENBAUM. Objection.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk continued the call of the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HEFLIN. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. TSONGAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. HEFLIN. Objection.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. TSONGAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. I object.

The PRESIDING OFFICER. Objection is heard.

The clerk will resume the call of the roll.

The legislative clerk resumed the call of the roll.

Mr. TSONGAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? Without objection, it

is so ordered.

Mr. TSONGAS. Mr. President, for those of us who have amendments that are germane, I have one that changes the formula so that more money goes into repair than new construction, could we be advised as to what we should anticipate, whether we go tonight or whether we go tomorrow? What should we be doing at this time?

Mr. DOLE. Mr. President, if it deals with title I of the bill, the Senator from Kansas would be happy to go tonight. What we thought we would do in the next 20 or 30 minutes is to take care of four or five amendments. I was originally told they were noncontroversial. It seems they may be. There is a noncontroversial amendment pending now on the holding period, but that may turn out to be controversial.

I am aware of the amendment of the Senator from Massachusetts. It is one that ought to be considered. If we cannot resolve these noncontroversial amendments in the next 10 minutes, we will go to controversial amend-

Mr. TSONGAS. What about mine?

Mr. DOLE. That is fine with me. If it is germane, you have no problem anyway

Mr. TSONGAS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. With-

out objection, it is so ordered.

Mr. DOLE. Mr. President, we have now cleared an amendment to be offered by the distinguished Senator from Alaska (Mr. Murkowski). think he is prepared to offer that amendment now

Mr. MURKOWSKI. I thank the

Senator.

I send an amendment to the desk and ask for its immediate consider-

ation. The PRESIDING OFFICER. The

Chair advises that it will take unanimous consent to set aside the two

amendments pending.

Mr. DOLE. Mr. President, I ask unanimous consent that the amendments be temporarily set aside for the purpose of consideration of the amendment to be offered by the distinguished Senator from Alaska, Senator Murkowski.

Mr. METZENBAUM. With the understanding that no amendment to that amendment would be made.

Mr. DOLE. That is correct.

Mr. MURKOWSKI. I agree with that.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1459

(Purpose: To raise by \$1 the threshold amount of gross income which triggers the requirement that a dependent file an income tax return)

Mr. MURKOWSKI. Mr. President, I send an amendment to the desk and ask for its immediate consideration. I also ask unanimous consent that the senior Senator from Alaska (Mr. STEvens) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will state the amendment.

The legislative clerk read as follows: The Senator from Alaska (Mr. MURKOW-SKI), for himself and Mr. STEVENS, proposes an unprinted amendment numbered 1459.

Mr. MURKOWSKI. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in title I of the matter proposed to be inserted, insert the following:

SEC. -. DEPENDENTS REQUIRED TO MAKE RE-TURNS OF INCOME.

(a) In General.-Clause (iv) of section 6012(a)(1)(C) (relating to exceptions) is amended by striking out "of the exemption amount or more" and inserting in lieu excess of the exemption thereof "in

(b) Effective Date.-The amendment made by this section shall apply to taxable years beginning after December 31, 1981.

Mr. MURKOWSKI. Mr. President, the purpose of this amendment is technical in nature. It is strictly to provide minors in the State of Alaska, who are beneficiaries of a dividend, the privilege of not having to file for a social security number and income tax because the dividend would be fully deductible on the individual refund. This is supported by the Treasury Department and the IRS. There is absolutely no effect monetarily.

Mr. DOLE. Mr. President, I understand that this amendment has been cleared. I can verify it is supported by the Treasury Department. We have no objection to the amendment and are willing to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alaska (Mr. MURKOWSKI).

The amendment (UP No. 1459) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I understand the Senator from Illinois (Mr. DIXON) has an amendment that has been cleared. It is supported by the distinguished Senator from Louisiana (Mr. Long). Treasury has no objection to the amendment in its present form.

I ask unanimous consent that the amendment pending be temporarily set aside for the consideration of the amendment to be offered by the Senator from Illinois without additional amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

UP AMENDMENT NO. 1460

(Purpose: To require the Secretary of the Treasury to conduct a study with respect to the tax status of members of religious orders and to suspend application of certain revenue rulings)

Mr. DIXON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The

clerk will report.

The legislative clerk read as follows: The Senator from Illinois (Mr. DIXON) proposes an unprinted amendment numbered 1460.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment, insert the following:

SEC. -. TAX STATUS OF CERTAIN INCOME OF MEM-BERS OF RELIGIOUS ORDERS.

(a) STUDY .-

(1) In GENERAL.—The Secretary of the Treasury shall conduct a study of the effects of treating any member of a religious order who performs qualified services as the agent of such religious order with respect to such services for purposes of the Internal Revenue Code of 1954.

(2) REPORT .-

(A) In general.-The Secretary of the Treasury shall submit to Congress a final report on the study conducted under paragraph (1) by no later than 60 days after the date of enactment of this Act.

(B) PROPOSAL; RECOMMENDATIONS.-The report submitted under subparagraph (A)

shall include-

(i) proposals for legislative or administrative action which would-(I) have the effect of according to mem-

bers of religious orders the treatment de-

scribed in paragraph (1), and (II) minimize any tax avoidance or other abuses which may result from such treat-

(ii) the recommendations of the Secretary of the Treasury with respect to the tax status of members of religious orders who perform qualified services; and

(iii) proposals for any legislative or administrative action required to implement such recommendations.

(3) Definitions.—For purposes of this subsection-

(A) QUALIFIED SERVICES .- The term "qualified services" means services performed by a member of a religious order which-

"(i) are required by such religious order to be performed, and

"(ii) are performed by such member as an employee of-

'(I) an organization described in section 501 (c) (3) and exempt from tax under section 501 (a) (other than as an employee of

an unrelated trade or business (as defined in section 513) of such organization), or

"(II) an educational institution or hospital operated by a governmental entity described in section 170 (c) (1), and "(iii) are performed for remuneration—

"(ii) are performed for remuneration—
"(I) which, by reason of vows of poverty
and obedience made by such member, are
the property of such religious order, and

"(II) the use and disposition of which are

not controlled by such member.

(B) Member of religious order.—The term "member of a religious order" means any individual who is required to take a vow of poverty and obedience as a member of such religious order.

Mr. DIXON. Mr. President, this is a simple amendment to ask Treasury to make a study with respect to the tax treatment of religious persons performing charitable works for third-party employers, such as the Daughters of Charities, who work, for example, in a leprosarium in Louisiana. They are presently subject to income tax on funds that are earned by the sisters working at the leprosarium and which are passed over to the order. This has been cleared on both sides. Treasury has approved it, and I appreciate the support of the membership.

Mr. DOLE addressed the Chair. The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I confirm what the distinguished Senator from Illinois stated. This amendment was passed on an earlier occasion, and we had some difficulty in conference. As I understand it, that problem has been resolved.

We are willing to take this amendment to conference again. It has the support all over the country as far as Salina, Kans.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois (Mr. DIXON).

The amendment (UP No. 1460) was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I suggest to anyone else that has a truly non-controversial amendment that this is the time to bring it up. If they are controversial, we probably should discuss them further.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HEFLIN. Mr. President, object.

The PRESIDING OFFICER. Objection is heard.

The legislative clerk resumed the call of the roll.

Mr. TSONGAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TSONGAS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. It would take unanimous consent to set aside the pending amendment.

Mr. TSONGAS. I so request, Mr. President.

Mr. DOLE. Mr. President, I ask unanimous consent to temporarily set aside the pending amendment and proceed to the consideration of the

amendment to be offered by the distinguished Senator from Massachusetts (Mr. Tsongas), I think with reference to allocation, and no amendments be in order.

Mr. HEFLIN, I object.

The PRESIDING OFFICER. Objection is heard.

Mr. TSONGAS. Mr. President, I would make the same request.

The PRESIDING OFFICER. Is there objection?

Mr. DOLE. The Senator makes the same request?

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 1461

(Purpose: To reapportion funds from the Interstate System to 4R programs and bridge replacement and rehabilitation programs)

Mr. TSONGAS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows: The Senator from Massachusetts (Mr. Tsongas) proposes an unprinted amendment numbered 1461.

Mr. TSONGAS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 38, beginning with line 7, strike out all through page 39, line 14, and insert in lieu thereof the following:

Sec. 202. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of \$3,225,000,000 for the fiscal year ending September 30, 1984", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "the additional sum of \$2,000,000,000 for the fiscal year ending September 30, 1984, the additional sum of \$2,000,000,000 for the fiscal year ending September 30, 1985, the additional sum of \$2,000,000,000 for the fiscal year ending September 30, 1986, the additional sum of \$2,000,000,000 for the fiscal year ending September 30, 1987, the additional sum of \$1,000,000,000 for the fiscal year ending

September 30, 1988, the additional sum of \$1,000,000,000 for the fiscal year ending September 30, 1989, and the additional sum of \$1,000,000,000 for the fiscal year ending September 30, 1990."

On page 41 subsection (7) strike out "\$1,700,000,000" and insert in lieu thereof "\$2,513,000,000".

On page 41, subsection (7), strike out "\$1,700,000,000" and insert in lieu thereof "\$2,600,000,000".

On page 41, subsection (7), strike out "\$1,800,000,000" and insert in lieu thereof "\$2,700,000,000".

On page 41, subsection (7), strike out "\$2,000,000,000" and insert in lieu thereof "\$3,000,000,000".

On page 41, subsection (7), strike out "\$2,000,000,000" and insert in lieu thereof "\$3,500,000,000".

On page 41, subsection (7), strike out the period and insert in lieu thereof a comma and "\$2,000,000,000 for the fiscal year ending September 30, 1988, and \$2,000,000,000 for the fiscal year ending September 30, 1989.".

On page 45, strike out "\$800,000,000" and insert in lieu thereof "\$1,012,000,000".

On page 45, strike out "\$1,800,000,000" and insert in lieu thereof "\$2,700,000,000".

On page 45, strike out "\$2,400,000,000" and insert in lieu thereof "\$3,300,000,000".

On page 45, strike out "\$2,800,000,000" and insert in lieu thereof "\$3,800,000,000".

On page 45, strike out "\$3,200,000,000"

and insert in lieu thereof "\$4,700,000,000".

On page 45, strike out "\$3,400,000,000" and insert in lieu thereof "\$4,400,000,000".

On page 45, after September 30, 1988 strike out the period and insert in lieu thereof a comma and "and not to exceed \$1,000,000,000 for the fiscal year ending September 30, 1989.".

Mr. TSONGAS. Mr. President, if I could say to the Senator from Kansas, if he would like a lesson in social graces, which I have just acquired, I would be glad to yield to him for that purpose.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. TSONGAS. Yes.

Mr. DOLE. I understand, Mr. President, this amendment will be handled by the distinguished Senator from Vermont (Mr. STAFFORD), along with the distinguished Senator from West the distinguished Senator from West Virginia (Mr. RANDOLPH), who is now on his way to the Chamber. It does involve title I of the bill.

Mr. TSONGAS. Mr. President, I rise to offer an amendment to assure that the bill before us will achieve its intended and most compelling purpose, namely, the repair and rehabilitation of our Nation's roads and bridges.

We all remember the plea made by the President as to the need to repair the bridges and roads of our country. That, indeed, has been the thrust of the argument for the gasoline tax.

This urgent need justifies rapid consideration of the gasoline tax increase and the accompanying Federal Aid Highway Improvement Act.

Yet, as currently proposed—and I do not think most people understand this—the bill devotes more than half of its spending authority to the construction of new interstate highways and bridges rather than repair.

My amendment changes these spending priorities by reducing the authority for new interstate construction and correspondingly increasing the spending authority for interstate road and bridge repair.

What I am trying to do is to make the bill consistent with the public argument that has been made these many months.

many months.

Mr. President, we do not have order

in the Chamber.

The PRESIDING OFFICER. The Senate is not in order. The Senator from Massachusetts will not proceed until there is order.

The Senator from Massachusetts.

TSONGAS. Mr. President, in this bill, we ask the American taxpayers to dig into their pockets for an additional \$5.5 billion and contribute it to the highway trust fund. The rationale, we have heard, is the crying need for repair and maintenance of the public roads. I agree with that rationale. Such rehabilitation is essential for maintenance of a part of our transport network that is critical to our economy. The magnitude of our needs has been documented in virtually every major national news publication. Years of deferred maintenance have left many roads and bridges in desperate condition; 1 in every 10 miles of interstate highway is rated substandard by the Federal Highway Administration. One in every five bridges in the country is closed or restricted because of serious deficiencies. Dilapidated bridges are collapsing at the rate of 150 each year, resulting in the loss of a dozen lives on average.

Estimates of the cost to fix our public infrastructure run from \$600 billion to \$3 trillion, the size of the entire annual output of the U.S. economy. To deal with these massive needs, the measure before us would raise an additional \$27.5 billion over the next 5 years for the highway trust fund. Obviously, this sum would not pay for all necessary repairs. With needs so great and resources so limited, we must make special pains to put those resources to work where they are the most needed. That is why I am so concerned with the spending priorities of the Senate bill as it now

stands.

Let me deal with the bill as it currently exists. The bill provides \$27.225 billion in authorization to be spent on new interstate construction. This sum is more than half of the total \$50.825 billion authorization for the three main programs—interstate construction, interstate repair—the so-called 4R—and bridge repair. I believe our first priority should be maintaining our public infrastructure already in place, rather than bulldozing new roads and leaving other roads to crumble.

It seems to me it would be very difficult to argue why, given the clearly stated public needs for repair, half the money is going to go into new construction.

Further, much of the proposed increase of new construction could be for projects of questionable national

significance.

The CBO—and this is where we are getting our figures—in a June 1982 study of the Interstate System, concluded that many of its uncompleted portions are of local and regional, rather than national, importance. An independent analyst, Mark Scrotsky of Colorado, has calculated that 56 percent of the uncompleted segments are economically unwarranted, given the cost and anticipated benefit.

My amendment would simply change the spending priorities in the bill. It leaves \$11 billion in authority for new construction—an amount sufficient, according to CBO, to complete the interstate segments of national

significance.

I do not object to the moneys in the bill for new construction, Mr. President. I simply lower it so that the moneys available for new construction of highways will be consistent with what the CBO says is necessary to complete the program.

The additional \$16 billion of new construction spending authority now in the bill would reallocate to repair both Interstate roads and bridges. The amendment would change the authorization levels for the three programs in

these ways:

INTERSTATE CAPITAL CONSTRUCTION

The bill provides \$27.225 billion in construction authority over the next 7 years. This amendment reduces the authorization to \$11 billion—an authorization level sufficient to complete the nationally significant portions of the Interstate System.

INTERSTATE RESURFACING (SECTION 106)

The bill provides \$14.4 billion in authorization over the next 6 years. This amendment increases that authorization to \$21.5 billion—an amount sufficient to meet the long-term resurfacing needs estimated by the Department of Transportation.

So the first two numbers that we have used are, first, how much is required to complete the system of new construction. That figure comes from the CBO. Second, how much is necessary for interstate resurfacing. That number comes from the Department of Transportation. We then have section 3, bridge replacement and rehabilitation.

BRIDGE REPLACEMENT AND REHABILITATION (SECTION 103; SUBSECTION 6)

The bill currently provides for \$9.2 billion in authorization over the next 5 years. This amendment raises the authorization to \$18.313 billion to be spent over the next 7 years. This almost doubles the authorization cur-

rently in the bill and makes a serious effort to redress the woeful neglect of our bridge repair needs. The Federal Highway Administration estimated in its third annual report to Congress that it would cost over \$47 billion to replace or rehabilitate the Nation's deficient bridges. Obviously the longer we delay in taking serious corrective action, the higher the bill for repair will be.

This amendment would leave unchanged the total level of authorization in the bill for the three programs at \$50.8 billion. So in terms of budget impact, there is no change. It would not change the current formulas for apportioning these funds among the States. There is no change in that respect either. States certifying that their resurfacing needs are met, could still use remaining funds on new construction, as currently provided in the bill. So that remains in place, also. I would like to stress that my amendment would not designate uncompleted interstate segments as being of national or local significance. That is, it would not demap any of the current system. The amendment would leave State government with the discretion on how to proceed with new construction projects. I believe the changes in authorization proposed here would simply encourage the States to set priorities for their construction programs and to proceed with those segments of greatest importance. That also remains in place. More importantly, by matching spending authority with the areas of greatest need, we would give the States the power to spend where they see the greatest need. This approach begins to correct incentives built into the system that encourage States to proceed with unnecessary or marginal new construction projects for fear of losing Federal dollars whether or not the projects are needed.

At a time of severely limited governmental resources, I believe it is imperative that we make best use of each dollar by spending it on those repairs most critically needed. We simply cannot afford anything else.

It seems to me, Mr. President, the time has come to make sure that the dollars have been spent well. This is an attempt to move in that direction.

To sum up, I would like to note that States like Oregon, Michigan, Ohio, North Carolina, Montana, Arizona, Wisconsin, Missouri, and Louisiana are rated as having the greatest interstate pavement repair needs in the country. Obviously, in States with those kinds of needs, this would be a very beneficial amendment.

The Federal Highway Administration has listed the various States that have more than 30 percent deficient bridges which is a very high number, and included in that among others would be Connecticut, Florida, Georgia, Indiana, Iowa, Kentucky, Louisiana, Mississippi, Missouri, Nebraska, New York, North Carolina, Tennessee, Vermont, and Wisconsin.

I end by stating that it seems to me that the American people have been told that what we are into these days is infrastructure repair, and what my amendment does is simply try to be consistent with how this program has been sold and would also argue consistent with what the needs are of our Nation, the numbers coming from CBO and the Department of Transportation.

Finally, Mr. President, I ask unanimous consent that the following materials also be included in the Record. A summary table of changes in authorization made as a result of the amendment, a table of deficient bridges prepared by the Federal Highway Administration, a table of pavement deficiencies prepared by the Federal Highway Administration, and finally a report by a private consultant of traffic safety planning and management systems.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

# ECONOMICS OF COMPLETING THE INTERSTATE HIGHWAY SYSTEM

Twenty-six years after the start of the interstate highway program the interstate system remains incomplete. At the same time the system is incomplete, it is facing accelerating decay. While only 3.7 percent of the mileage remains to be completed, over \$40 billion will be required for that completion. This is about half of what has already been spent. Even though inflation distorts this proportion, \$40 billion is still a huge sum of money. More disturbing, though, is the decline and decay of the already completed sections of interstate highway. If the present system is to be brought back into good repair, huge new sums are going to have to be appropriated for maintenance and repaid. Estimates of this repair bill range between \$16 billion and \$30 billion for the next eight years. It is not likely that both the necessary repair and system completion can be financed by the American taxpayer.

The proposal for a five-cent per gallon gasoline tax increase for five years, calculated to raise \$27.5 billion dollars, it should be noted, will not pay for the completion of the interstate system. The tax proposal would pay for the repair bill on the interstate system. But if the motivation is to bring the interstate highway system back into good repair Congress could do that without any tax increase by simply scaling back or eliminating the completion program.

This brief paper, prepared by a Registered Professional Engineer practicing traffic engineering in Colorado, gives economic measures for each of the remaining segments of the interstate highway system where construction has not yet begun. These economic measures are similar to and based on the familiar economic Benefit Cost Ratios and New Present Values normally used in economic studies. (Benefit-cost ratios are the benefits of a project divided by the costs of that project. The Net Present Value is the benefit of a project minus the cost of the project.) This paper is being presented to help in the tough choices that face the American public and their leaders regarding the completion of the interstate highway system.

#### ECONOMIC CRITERIA FOR DECISION MAKING

The most usual criteria for economic decision making in the public sector is the economic benefit-cost ratio. This ratio simply compares the economic benefits of some project or program to the economic costs incurred in carrying out that project or program. If the ratio is greater than one, a project's benefits outweigh its costs, and it is said to be economically justified. If the ratio is less than one, on the other hand, the project's costs are greater than the economic benefits realized, and the project is not economically justified.

not economically justified.

While a single number, the benefit-cost ratio, either greater or smaller than one, is an easy way to communicate the economic justifiability of a project to an economist or other specialist, it often says nothing to the general public. This paper presents a more easily grasped means of communicating economic measures to the public and other non-specialists, and will hopefully make tough decisions easier, and their consequences more clearly understood.

The benefit-cost ratio is computed by combining all the economic benefits occurring during all the twenty years an economic analysis normally covers and comparing them to the costs of building or implementing a project or program. We can get a more graphic measure for the highway case if we divide all those benefits and costs by the number of trips that cars or trucks will make on the new highway project during the twenty years. This division gives us the costs and benefits per trip for the highway project. The costs and benefits per trip are very easily understood, have a very graphic meaning, and give the public and their decision makers new criteria upon which to base decisions.

To finally communicate the idea of costs and benefits per trip in a single number we can define the easily understood idea of a highway subsidy. If the costs of building the project are greater than the benefits the highway users will derive, we can call the excess of the cost over the benefit (which the taxpayers fund) the highway subsidy, or just plain subsidy. In cases where the benefits received are greater than the costs incurred, a "negative subsidy" is created. This negative subsidy" indicates an economically justifiable project. In the case of the 168 projects on the Interstate system where construction has not yet begun, 73 of them generate "negative subsidies", while 95 of them require tax subsidies from the American Taxpayer. The subsidies range from \$7.73 per trip to a negative \$12.18 per trip. Here is the list of the 168 interstate projects listed in order in increasing justifiability:

RESULTS OF SUBSIDY ANALYSIS FOR 168 INTER-STATE PROJECTS AWAITING START OF CON-STRUCTION

The results of the subsidy analysis for the remaining segments of interstate highway are shown in the list at the end of this report. The projects are identified by state, interstate route number, city or geographic area, and the Department of Transportation (DOT) national or local significance (given in a 1976 Federal Highway Administrative report) and DOT urban or rural classification.

The first column of numbers, the "excess of capital cost over benefits", is the taxpayer subsidy for each project. The next two columns give the individual costs and benefits per trip. Note that the subsidy is simply the difference in these two columns. Columns 4 and 5 give the costs and benefits for

each highway segment per vehicle mile. A vehicle mile is one vehicle traveling one mile. These columns remove the total length of the project from consideration, and can be compared from project to project. Columns 5 through 9 give cumulative project data for length, total cost, total user benefits and total vehicle miles traveled. Columns 10 and 11 give the overall benefit-cost ratio and net present value for the segment. These numbers are the usual output of a public works project economic analysis. The last four columns give the local or national designation from the Congressional Budget Office (CBO) study, The Interstate Highway System: Issues and Options, June 1982, The 20 year traffic growth estimate for the segment given by the Federal Highway Administration (FHWA), the percent of trucks in the main highway stream, also from FHWA, and the road type designation, from the CBO report.

In this list the first 95 projects require a subsidy. They are not economically justifiable. The last 73 projects generate "negative subsidies" and are economically justifiable.

#### NONECONOMIC CRITERIA FOR DECISIONMAKING

To make a decision on the future of the completion of the interstate system, we need to look at more than just this list of economic criteria. The interstate system was created for several reasons. The high speed highways save lives, they are more relaxing to drive on than ordinary highways, they make long distance communting or vacation trips possible, they increase land values along their corridors, some of them are pretty, they aid in the national defense, and so on. Many, in addition to the above, cut travel costs by relieving congestion and permitting higher speeds to be maintained.

The only thing measured with the benefitcost ratio (or the subsidy) is the relieving of congestion and the increased travel speed. The other reasons for building interstate highways are not measurable in economic terms. The answer to the question of whether the United States should complete noneconomically justifiable interstate segments cannot be given just in terms of economic analyses. Instead we have to turn to other ways of thinking.

For instance, how many of the original objectives of the interstate highway system have been realized? How much better may the original objectives be realized if an additional \$40 billion is spent on the interstate system? Would \$40 billion be best spent on completing the remaining 1575 miles (3.7% of the total 42,944 mile system) or repairing and maintaining the 96.3% that is complete. Or would something completely different give a greater return to the American taxpayer?

These questions are difficult and will require close attention of our country's leaders. While interstate highways are built to provide many benefits, in the decade of the 1980's any projects that are chosen to go forward in spite of non economic justifiability must be closely scrutinized and double checked. The choice to go forward with a project that is not economically justifiable must be fully documented and debated, must be consciously made by both the country's leaders and its citizens (it must not "slip through the cracks" or be swept along in a public works or job creation juggernaught), and must be supported by overwhelming reasons of non-economic nature.

## RECOMMENDATIONS

The facts are these:

1. The interstate highway system, as well as the rest of the nation's roads and bridges, is decaying at a rapidly accelerating rate.

2. Increasing quantities of new dollars, many of them Federal, will have to be devoted to highway repair and maintenance in the future. This is a new Federal expense, as in the past, according to Federal law, the states and the states alone repaired and maintained our nation's highways. This new expense is estimated to be between \$16 and \$30 billion dollars through 1990 just to bring the interstate system back into the condition it was in in 1975.

3. The interstate highway system, the 42,944 mile system of modern highways designed to connect the nation's major cities, is still not complete even though Congress has "accelerated constuction" on the system for 26 years.

4. While only 1575 miles of additional highway (3.7% of the total) is needed to "complete the system," these few additional miles will cost \$40 billion through 1990.

5. Most people agree that the original functions of the interstate system, to provide a network of modern high-speed highway to connect the nation's cities, is largely complete

6. The federal gasoline tax generates about one billion dollars for every penny of tax per gallon of fuel.

7. A five cent per gallon increase in gasoline tax for five years, at current gasoline consumption rates, would raise about \$27.5 billion dollars.

8. The \$27.5 billion nearly would cover the maximum amount estimated to repair and maintain the interstate system for the decade.

9. The \$27.5 billion would not complete the interstate system even if all of it were devoted to interstate completion.

10. If Congress wishes to bring the already existing interstate highways back into the condition they were in in 1975, it can do so without any tax increase if it simply declares the interstate system complete and provides no more funding for the 1575 remaining miles.

To simply cancel the remainder of the interstate system may be too quick and too simple a decision. After all, 73 interstate completion projects are economically justifiable in their own right. A responsible tactic may be to

1. postpone any further interstate completion until the existing interstate highways are brought back to the condition they were in in 1975.

2. After the repair and replacement work is complete, and after provision is made to ensure the interstate system will not again lapse into disrepair, consider constructing some of the more economically justifiable projects.

3. while the economically justifiable projects are under construction, study the non-economic values associated with the non-justifiable projects and determine which, if any, of those projects should be built in spite of their economic non-justifiability.

4. to give the states some guidance with their construction programs to adopt some time schedule, say January 15, 1985, by which to inform them of the projects to be built and those to be finally dropped from the federal construction program.

NOTES ON THE PREPARATION OF THIS REPORT

The economic measures given for the interstate segments in this paper were compiled by methods given in A manual for conducting Highway Economy Studies, by

David A. Curry and Dan G. Haney of the Stanford Research Institute, Menlo Park, California. This is a widely recognized and used highway economic analysis technique. The process was automated by placing it in a Comprpro 816 A mini-computer. The computer program was carefully calibrated to give identical results to the lengthy manual computations given in the Stanford technique.

Care must be exercised when using Benefit Cost ratios, especialy when priorities must be made among several projects, all of which are economically justified according to their benefit cost rations. This paper does not get into ranking, scheduling, or prioritizing projects, so there is no need to go into arcane economic theory to explain what these caveats might be. The reader should simply be made aware that the techniques used in this paper are specialized and cannot be thoughtlessly applied to other economic decision making problems.

All the data for the computations came from the Federal Highway Administration, as prepared by the individual states in their 104(b)(5) studies, to be compiled in the biannual Interstate Cost Estimate. This is the most uniform source for highway statistics for the 47 states that still have interstate segments to complete.

'However there is a caution that must be recognized when using the figures from the Interstate Cost Estimate (or the 104(b)(5) report as it is often referred to). The results of Stanford Benefit Cost technique is largely determined by levels of traffic congestion. That is, if congestion exists on the highway now or in the future, then the benefit cost measure of building a new road is very high. If congestion is not present at any time now or in the future then there is a very low benefit cost for building a new road. Unfortunately the Interstate Cost Estimate (ICE) provides present and future traffic levels assuming the interstate link exists. That means the ICE predicts traffic levels that do not exist today and will exist in the future if and only if the interstate link is completed. This is a built-in bias toward building. If the interstate link is not built, in many cases, the traffic cannot and will not build to the levels predicted in the Interstate Cost Estimate. Either other roads will be improved to handle the increased traffic, other modes of transportation will be created to handle the increased travel demand, some combination of these will occur, or some other event completly unforeseen will happen to preclude the traffic levels predicted in the ICE. In many cases the present roads simply cannot physically handle the traffic levels predicted in the ICE."

Accident costs for fatal injury and property damage only accidents have not been included in this examination. Generally speaking, the absolute number of accidents that could be prevented by building the segments under question is likely to be overshadowed by the costs of the segment.

It may be eloquently argued that human life or suffering cannot be valued in dollars, and hence any saving of life or prevention of suffering must take precedence over other economic considerations. This is a valid argument, and was mentioned in the section on non-economic criteria for decision-making.

But if decisions are going to be based on criteria of human life and suffering, decision makers must look not only at saving lives and preventing suffering on our highways, but also at saving lives and preventing suffering throughout society. If money is

spent to save lives and prevent suffering on our highways, which highway or segment of highway should get the money, and when? If money is spent on lifesaving devices in one highway location, it is not available to be spent in another location. Going a step further, if it is spent on highways, it cannot be spent on airway safety, or ship safety, or on heating subsidies for the indigent, or for food to feed the starving, or any of the others of hundreds of projects and programs that save human lives and prevent human suffering. Trying to sort out those choices would be an enormous undertaking, far beyond the scope of this paper. This paper is dealing with only 1575 miles of highway and \$40 billion of potential highway construction

The amount of total monetary savings over twenty years if all the segments were constructed, using accident rate statistics from Colorado, amounts to just over \$3.4 billion. This is only 8.5% of the \$40 billion investment required to complete the interstate highway system.

Maintenance costs are also not included in this cost-effectiveness examination. Maintenance costs are typically in the order of thousands of dollars per mile per year. Construction costs are in the order of millions of dollars per mile, or more frequently tens of millions of dollars per mile. It should be noted that out of the 168 interstate completion projects, 13 cost over \$100 million per mile. Including maintenance costs will not be a significant contribution to the cost-effectiveness measure.

#### CONCLUSION

This paper has discussed and disclosed the cost-effectiveness measures of the 168 individual projects required to "complete the interstate highway system". It uses the measure of a highway subsidy, or the excess of taxpayer costs to user benefits. Those subsidies range from a worst case of a \$7.73 taxpayer subsidy required per trip to a best case of users benefiting \$12.18 per trip more than the taxpayers have provided.

This paper has been presented in the belief that the American public is able to

make wise decisions if it has all the information available pertaining to that decision. We believe the public has not had this information available to it concerning the interstate highway system. We believe past decisions on completing the interstate highway system have been based upon arguments of "Congress' commitment" to finishing the interstate system, dedication to 1950's ideas of transportation needs, pressure from special interests having a financial interest in highway building, and the idea of an ever expanding Highway Users Trust Fund with which to build the interstate system.

We think the realities of shrinking highway dollars, shrinking growth rates in highway travel, greatly increasing repair and maintenance needs, and a newly perceived idea that we as a nation cannot afford all that we once thought we could, require this hard look at the concept of finishing the interstate system. We hope this new look at the concepts and benefits of interstate highway completion will aid in the discussion of and determination of this program.

The PRESIDING OFFICER. Does the Senator from Massachusetts yield the floor?

Mr. TSONGAS. I do.

The PRESIDING OFFICER. The Senator from Vermont.

Mr. STAFFORD. Mr. President, I have listened to the distinguished Senator from Massachusetts and the description of the amendment which he has offered to the part of the bill which was written by the Committee on Environment and Public Works. I have to reluctantly oppose the amendment offered by the Senator from Massachusetts, and at the outset I should point out that the provisions in the bill which the Senator from Massachusetts proposes to change were written by the Committee on Environment and Public Works and were adopted by the committee, as was the final product entirely, by a unanimous vote, as the chairman recalls it, 16 to nothing. So that as chairman of the committee I would in any event be constrained to have to oppose the amendment of the Senator.

I do so reluctantly. I support the concept of the distinguished Senator from Massachusetts, the concept that he seeks to implement, but I have to say that the amendment he has of-

fered does result, in the judgment of this Senator, in a radical redistribution of the funding as provided by the Committee on Environment and Public Works for interstate construction, 4R construction and bridge construction.

I believe the Federal aid highway program should increasingly be directed to insuring that the Nation's existing highway system is maintained in a manner that promotes safe, efficient transportation rather than the construction of grandiose new superhighways.

The Environment and Public Works Committee worked hard to develop a bill that significantly increases funding for the rehabilitation and repair of existing roads and bridges. At the same time, the committee's bill recognizes that there is a long history of planning and commitments by States to the completion of the Interstate System. Funding for interstate new construction in the committee bill is increased very little, even though revenues increase substantially assuming enactment of the tax increase. The increased revenues were directed almost entirely in the committee bill to the rehabilitation of existing roads and bridges.

Mr. President, the committee bill in the opinion of the Senator from Vermont strikes a balance between continuing funding levels already relied on and planned for by the States and emphasizing, on the other hand, repair and rehabilitation of our road systems and bridges so necessary.

Under the circumstances, Mr. President, without speaking further at the present time on the matter, I find myself forced to oppose the amendment of the Senator from Massachusetts and express the hope that the Senate will not adopt it.

Mr. RANDOLPH. Mr. President, I rise in opposition to the amendment. I join, of course, with the able chairman of our Committee on Environment and Public Works (Mr. Stafford) in congratulating our colleague from Massachusetts for his concern and his knowledge as presented in the amendment.

As has been indicated by our chairman, the measure now before us, which incorporates the provisions of the Senate including jurisdictional parts of the highway measure within the jurisdiction of our committee, was adopted after very carefully consideration.

I reiterate that there was very, very active consideration of many proposals, but when we came to reporting the legislation to the Senate it was by a vote of 16 to nothing that the measure comes before us.

Mr. President, the amendment offered by our able colleague from Massachusetts (Mr. Tsongas) is contrary to the policy of the Federal highway program since, as we recall, its inception in 1956. We realize that there are times certainly when changes should be made, but we must not forget that the Congress has designated 42,500 miles of a system of national interstate highways. We must not forget the very name of the network includes defense highways. That is a designation, and so there is this overall dual program for the interstates.

This system has approximately 1,200 miles at the present time that are not completed out of the 42,500 miles. This has been a massive, monumental program of construction. There are difficulties, of course, in connection with impact statements, environmental interests, in connection with the remaining 1,200 miles. No one can say tonight whether all of this mileage will be completed, but we do know that this system must be completed to the maximum extend possible.

Other Congresses have said to the present 97th Congress that this is a job of road building, bridge building, the network of our transportation arteries stretching in all the States, and, yes, this program must go forward if it is possible to complete the remaining 1.200 miles.

It is very important for us to understand in the Senate exactly what the amendment does. This proposal, I remind my colleagues, would reduce the authorizations for the construction of interstate roads to the level which would make completion under our present apportionment formula based on cost, which is the way it should be based, almost impossible.

Sufficient funds would not move to the States, the State of Massachusetts, the State of Vermont, the State of West Virginia, or any of our States under the current apportionment formula which have noncontroversial segments yet to complete. I have indicated that some of them are controversial.

Under the statute no mechanism is available to transfer apportionments from the State of Louisiana, shall we say, to the State of Texas. Certainly, this mechanism is something that we must consider. We must remember that we have to provide sufficient funds in the State which is able to move forward with contracts.

In 1981 here in the Senate and in the House of Representatives, Members addressed the growing problem of interstate completion by reducing— this is very important for us to remem-

ber in opposing this amendment-the cost to complete to \$37 billion. Eliminations under that proposal would take from this program eligible costs which are not necessary to provide for a system which is open to what we believe to be the traveling and the shipping public.

Now, we believe that what we have done by those amendments is satisfactory, I say to my colleague, the chairman of the committee, Mr. STAFFORD. We believe that those amendments expedited the completion of our important Interstate System. There is absolutely no well-reasoned need that we have heard of which would indicate otherwise. So there is no necessity to have a provision, I say in good candor, like that proposed in the current amendment.

As the Senator from Vermont says and as I echo, we do not rise in opposition to an amendment just because we want to preserve exactly what the Senate committee has done in bringing the measure to the floor. But we feel that on the merit of the amendment which has merit in it, and we said so, there should be a rejection of the proposal as set forth by our colleague from Massachusetts based on continuing national priority for interstate completion.

Mr. MELCHER. Mr. President, I wonder if the author of the amendment would agree to yield for some questions?

Mr. TSONGAS. Yes.

Mr. MELCHER. As we understand the amendment as it will affect Montana, over a period of time the State of Montana would receive something like \$30 million more 4R improvements.

Mr. TSONGAS. Let me say to the Senator that I am not in a position since we have asked the administration to get the recalculations back to us to suggest what those numbers would be. Some have said that would be the case, but I am certainly not in a position to certify that since the administration has been unable to get the numbers to us in time for this amendment to be proposed.

Mr. MELCHER. We have asked the Montana Department of Highways to comment on the amendment and I seek clarification from the Senator from Massachusetts on the points

they made.

They advise us that less funds would be available for interstate completion throughout the United States and that a State, however, would have the flexibility to reprogram its 4R funds if it can certify that its 4R needs have been met?

Mr. TSONGAS. That is correct.

I would say to the Senator that issue was raised and that is why that provision was put in so that States that wanted to move their moneys from resurfacing which has been completed into new construction could do that.

Mr. MELCHER. Our Department of Highways in Montana is unable to project when they would be able to certify that their 4R needs within Montana would have been met and completed. While the Senator's amendment would eliminate those parts of the interstates that are not categorized as being of national importance-and that is the main thrust of the Senator's amendment, is it not?

Mr. TSONGAS. It does not demap. There is no attempt in the amendment to demap any projected roadways. What we simply do is follow the CBO estimate of what is necessary to complete the nationally significant segments. But if we ever try to get into demapping process in the amendment we would be here all night.

Mr. MELCHER. Even though the segments of interstate that are incomplete in Montana would probably be categorized as of national importance, would it not also be likely that there would be less money available for those segments that were categorized as of national importance?

Mr. TSONGAS. No, because the number we arrived at for new construction was the CBO number, what is necessary for all nationally significant interstate sections, so we specifically put the number at an amount that would complete the system.

Mr. MELCHER. I do not believe the intent of the committee was to devise a system of allowing more money than was necessary to complete the system, or was it?

Mr. TSONGAS. I was not present during the deliberations, but the Congressional Budget Office estimates I have and that is where we began, and it seems to me that their June 1982 report is certainly current and should be given credence.

Mr. MELCHER. I simply state that the office of Montana Department of Highways feels that the amendment would reduce the amount of money available in the near term at least for interstate completion in Montana for about \$7 million, that it would receive more in reprograming money over the long run, but reluctantly they find it difficult to recommend passage of the amendment.

I thank the Senator for yielding.

Mr. BENTSEN. Mr. President, what you are seeing here is a very major reallocation of funds, and when we start to talk about whether one State gets a little more or gets a little less by this change, that is really not the point.

What we are looking at here more than any other section of this legislation is what is a true overall Federal project for the Nation.

That is the question of completion of the interstate which has been under-way for some 25 years. Ninetyfive percent of it is completed.

But what is proposed by the Senator from Massachusetts is that we cut the allocation for the completion of the interstate from \$27.2 billion to \$11 billion. He does turn around and put it to the 4R account, he puts it to bridge rehabilitation. But what you end up with will not be enough to do the job that has to be done even for those parts of the interstate that are noncontroversial.

Legislation adopted by Congress in 1978 established deadlines for the States to decide whether to build the remaining segments by September 30, 1983, and that the construction had to

begin by September 30, 1986.

These provisions were added to push the completion of the Interstate System. But for these provisions to be meaningful, for us to be able to see it accomplished, means you have to have adequate funds to do it. If this amendment were adopted, you simply would not have the funds to accomplish it, certainly not in the time frame we are talking about.

In 1981 Congress passed legislation to redefine the concept of what was included in the interstate construction category. Those were carefully crafted changes designed to assure that essential segments of that interstate were going to be built. We had extensive hearings in that regard, and yet we are talking about coming along now and taking some CBO estimate and making a very major change in what our hearings led us to decide as to what should be done.

Now to do that on the floor of the U.S. Senate tonight, I think, is a very

serious mistake.

To realistically complete this defined interstate in a timeframe that is consistent with the deadlines we have set forth is going to require the kind of funding levels that we have categorized in this particular bill.

The magnitude of the change proposed by this amendment is far beyond anything that was considered by the committee or proposed to the Senate when the interstate was de-

fined only a year ago.

If Congress seeks to deemphasize the completion of the interstate, as this amendment would drastically do, then it should fully understand the implications of that kind of an action.

The committee has never considered changes of this magnitude in the interstate, and the amendment should not be considered without the Members of this Senate undertanding what they are about to do in that regard. I think it would be a serious mistake. I think we ought to push for completion of the interstate.

We have fought long and hard to bring it to completion, and we have set forth legislation that will bring that about, and I strongly urge the Members of the Senate to uphold the allocations set forth by members of the committee who have had long and extensive hearings in that regard.

Mr. RANDOLPH. Mr. President, will my colleague from Texas yield?

Mr. BENTSEN. I would be happy to yield to my distinguished friend, the former chairman of the committee, and a man who has been long interested in the building of the Interstate System, who was here when it started, and who contributed so much to its progress. No Member of the Senate is more knowledgeable, or worked harder for completion of the interstate highway than the Senator from West Virginia. In 1937 he introduced the forerunner of the Interstate System, the Intercontinental Highway Act.

Mr. RANDOLPH. Mr. President, I

Mr. RANDOLPH. Mr. President, I think for the record we should know that within the structure of the Environment and Public Works Committee we have a Subcommittee on Transportation. That subcommittee was once called the Subcommittee on Roads, but we widened it for other forms of transportation to a degree, not losing, of course, the basic program of roadbuilding. The knowledgeable Senator from Texas was for many, many years the chairman of our subcommittee.

Mr. President, while the amendment—and I will be very frank to say—has laudatory goals with respect to the interstate 4R work in replacement of deficient bridges, the interstate construction, all of these will, we know if the amendment were adopted, decline significantly in the United States.

In our State of West Virginia we would not receive, Mr. President, enough annual apportionments of Federal funds to complete essential work on the important Interstate 64 and the equally important interstate which is listed as 77, that interstate being particularly valuable in the southern part of West Virginia.

So we have to be realistic, I say to the Senator from Massachusetts. Here is just one State that would suffer. All of the States, practically, with interstate programs still to be completed would come up short, and we do not feel, therefore, that the amendment has the equity which is necessary at a time when no interruption of the completion of the interstate should be brought to the surface. We should continue under the program we now have, doing as much as possible-we realize the environmental matters-I mentioned them, and they are understandable-but this program must go forward, and I believe the Senate desires that the measure, without unsound reasons, should be passed in the Senate as reported from your committee that has jurisdiction, has studied these matters and brings a bill to the floor of equity and a bill that is absolutely necessary if the work is to go forward.

Mr. SYMMS. Mr. President, will the Senator yield?

Mr. RANDOLPH. Yes; I yield to the able chairman of our Subcommittee on Transportation.

Mr. SYMMS. I thank the distinguished Senator from West Virginia. I quite agree with everything he has said, and what the Senator from Texas has said.

I think we should make the point here that the committee accepted an amendment earlier from the Senators from Maryland, Senator Sarbanes and Senator Mathias, which makes it much more flexible for the States to use the money either in repairs or new construction, with a payback.

There is a piece of paper around the floor here that has each respective State, what is gets, and I will only say to my colleagues do not look at this paper and think just because your State may get a little more money under the Tsongas formula and a little bit less under the committee formula that somehow you are getting less.

You end up, as Senator Bentsen so properly pointed out, that we have a policy working here that maybe your State may get slightly more money under the formula offered by our good friend from Massachusetts, However, it may take you 10 years longer to complete those uncompleted sections of the interstate, and there comes a tradeoff.

We tried to work this out so that it is the most equitable. We accepted the amendment of the two distinguished Senators from Maryland which allows more flexibility in the bill. But I think it would be a mistake to go this far with it because we start losing the significance of trying to tie this great land of ours all together with the completed Interstate System.

One other thing I think should be said. Last year, 1981, this committee reported language, as Senator Randolph said so well a few minutes ago, and I hope all our colleagues will understand this point, where we reduced and extended the authority of DOT to remap enough miles off the interstate, so that we reduced the total in the future from \$53.8 billion down to \$38 billion. So we are already doing what our good and able friend, the Senator from Massachusetts, is talking about.

But I think to take that extra step is a policy step that will delay possibly the completion of the Interstate System, and it could delay it for many, many years. So I think Senators should be very wary of looking at this and just thinking instantly that this is a great idea; that we will spend more money on repairs and less on new construction.

There is a little bit more to this than meets the eye, and I would urge all Senators to support the position that Senator Randolph and Senator Bentsen and the committee have taken on

this because I think it is a better posture for the entire Nation with a National Interstate System that this amendment be defeated.

Last year the committee reported legislation which the Congress approved that reduced the total cost to complete the interstate from \$53.8 billion to \$38 billion, as Senator Randolph just noted. The committee will continue to review the cost to complete the Interstate System.

It is important to complete the Interstate System as expeditiously as possible because many of the existing miles of interstate need major rehabilitation, and major amounts of money will be needed to preserve the

existing system.

I assure the distinguished Senator that the committee will continue to review this. However, until a determination is made that certain parts of the Interstate System should not be completed, we must continue the Federal commitment to complete the Interstate System. The Senator's amendment would only postpone both the completion of the system and the determination of what is essential for a connected Interstate System.

I yield back to the distinguished

Senator.

Mr. RANDOLPH. Mr. President, in conclusion, what the Senator from Idaho is saying is accurate. He has sketched what we have done. He has indicated the attention that we have given to this problem and what we have brought to the Senate is well reasoned.

It is not necessary for us to speak longer. We have spoken of our appreciation for the interest and concern of the Senator from Massachusetts. But we believe, in this area in which he is working with the pending amendment, that he is in error as to the result that would flow if his amendment is incorporated in the present measure.

I thank the Chair.

Mr. TSONGAS addressed the Chair. The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. TSONGAS. Mr. President, I will only take a couple of minutes and then I am going to ask that we vote on this and request the yeas and nays.

Mr. President, I find the discussion rather interesting, because the argument has been that we are not going to complete the Interstate System under the amendment. That simply is not the case. How do I know? Because I have in front of me the June 1982 report of the Congressional Budget Office. Who requested their report? I did not request it. It was the committee. So all I am doing is using numbers submitted by our Congressional Budget Office to the Senate committee.

The committee cannot have it both ways. Those of us who are relying upon the numbers submitted to the

committee have a right to argue that our numbers are credible. The CBO says \$11 billion to complete the system, and my amendment is \$11 billion. Now how are you going to go back and explain to your constituents why, if it takes \$11 billion to complete the system, you are going to put \$27 billion into the bill? How do you explain to your constituents, when you have a \$47 billion need on bridge repairs, that you only provide \$9 billion? If anything, this amendment of mine is overly skewed to new construction. It makes no sense to go beyond the \$11 billion necessary to complete the system at a time when the infrastructure is crumbling.

What has the debate been about these last few months? Crumbling infrastructure. That is why we justified the gasoline tax. Your vote on this amendment will determine whether we were talking about that or simply a figleaf to cover up undue expendi-

tures.

CBO says \$11 billion for new construction and it is in the amendment. DOT says \$14 billion for interstate resurfacing. It is in the amendment. FHA says \$47 billion for bridges. We do not have enough. Mine only has \$18 billion and the committee only had \$9 billion.

The Interstate Highway System is going to be completed with my amendment or without it. The question is whether we have before us legitimately a reconstruction and repair bill, because that is what has been sold to the American public. I want to give my colleagues a chance to vote on whether that indeed is going to be reality.

Mr. President, I ask for the yeas and

nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. Bentsen addressed the Chair.

The PRESIDING OFFICER. The

Senator from Texas.

Mr. BENTSEN. Mr. President, the reference that the Senator from Massachusetts made as to the request to the Congressional Budget Office was one to agree to set out our options for us. We have given those States until 1986 to make that decision, whether you map them out or not.

We did not choose to have the Federal Government make that decision for them. And so, under the procedure as we now have it, you will have a very orderly manner in which they will map those choices if they choose to do so. But the State will be making that decisions and I think that is the way it

ought to be.

If you accept the action taken by this amendment, you will force a much earlier conclusion on that. I believe we have an orderly process to accomplish it. I further believe that you still would have such a curtailment in

allocation to those areas that are not controversial that you would then in no way be able to complete them in a timeframe which we have called for in this piece of legislation.

So I would urge the Members of the Senate not to disrupt what has been a well thought out and orderly manner of bringing about the completion of the necessary parts of the interstate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Massachusetts (Mr. Tsongas). The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EXON (after having voted in the affirmative). Mr. President, on this vote, I have a live pair with the Senator from New York (Mr. Moyniman). If he were present and voting, he would vote "nay." I have voted "yea." Therefore, I withdraw my vote.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. Goldwater), the Senator from Utah (Mr. Hatch), and the Senator from Connecticut (Mr. Weicker), are necessari-

ly absent.

Mr. ROBERT C. BYRD. I announce that the Senator from California (Mr. Cranston), the Senator from Missouri (Mr. Eagleton), the Senator from Ohio (Mr. Glenn), and the Senator from Mississippi (Mr. Stennis), are necessarily absent.

I also announce that the Senator from New York (Mr. Moynihan), is absent because of illness.

I further announce that, if present and voting, the Senator from Ohio (Mr. Glenn), would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 17, navs 74, as follows:

[Rollcall Vote No. 413 Leg.]

So the amendment of Mr. Tsongas (UP No. 1461) was rejected.

Several Senators addressed the Chair

UP AMENDMENTS NOS. 1456 AND 1457 The PRESIDING OFFICER. The

Senator from Kansas.

The question recurs on the Dole amendment, two Dole amendments

(UP Nos. 1456 and 1457). The names of Mr. HARRY F. BYRD

and Mr. LEAHY were added as cosponsors of UP amendments Nos. 1456 and 1457.

SEQUENCE OF CERTAIN AMENDMENTS

Mr. DOLE. Mr. President, the Senator from Kansas understands that there is a number of noncontroversial amendments that can be disposed of. It is my understanding that they have been cleared with the distinguished Senator from Louisiana (Mr. Long), with the Senator from Alabama (Mr. HEFLIN), the Senator from New Hampshire (Mr. HUMPHREY), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Kansas.

If there is no objection, I would like to ask unanimous consent that the pending amendments be temporarily set aside for consideration of the amendment to be offered by the distinguished Senator from Delaware (Mr. ROTH), and no amendment to the amendment be in order, followed by an amendment by the distinguished Senator from Illinois, and no amendment be in order, and the distinguished Senator from North Carolina (Mr. HELMS), to a title that I do not control, but I think I can make the request for Senator Stafford. I make the same request for Senator Dodd, which is an amendment to title II of the bill, which is controlled by the Senator from West Virginia and the Senator from Vermont.

Mr. BAKER. Mr. President, will the Senator from Kansas yield to me without losing his right to the floor?

Mr. DOLE, Yes; I yield.

Mr. BAKER. Mr. President, the best I can count, that is about five amendments that we are stacking up.

May I inquire how many of those are going to require rollcall votes?

Mr. DOLE. None.

Mr. STAFFORD. None that I know

Mr. BAKER. Mr. President, could I ask the two managers of this bill for the practical purposes of this colloquy, Senator Dole and Senator Stafford, if they anticipate that there will be

measures up tonight which will require rollcall votes?

Mr. STAFFORD. Mr. Leader, speaking only for my part of the bill, I know of no amendments at this time that might require a rollcall vote to title II. I would ask my colleague (Mr. RAN-

DOLPH) if he knows of any.

Mr. RANDOLPH. Mr. President, we have checked these matters during the day. We believe there is no amendment-

Mr. HEFLIN. I have one. I have one that requires a rollcall.

Mr. DOLE. If it comes up.

Mr. HEFLIN. I have been trying to come up. I thought the Senator would get generous and allow me to come up.

Mr. DOLE. I think when everybody else leaves we could stay and debate it.

Mr. HELFIN. I believe the Christmas tree is too big. Maybe I just have

to object to everything.

Mr. DOLE. The Senator from Arkansas (Mr. PRYOR) has an amendment that would require a rollcall, if there is no objection to bringing it up-it is germane. Maybe we should not consider germane amendments. it would take what, about an But hour?

Mr. PRYOR. I would certainly think it would take no longer than that.

Mr. DOLE. I would say we could probably finish that by midnight.

Mr. BAKER, Mr. President, I thank the Senator. If he would yield further, may I say that I am obviously trying to figure out how long it would be useful and productive for the Senate to remain in session tonight. The best I can figure, on the basis of the information that we have just received, it looks like we are going to be here for another hour or so, with the possibility of a rollcall vote.

Mr. ROBERT C. BYRD. Mr. President, may we have the aisles cleared so that some of us can see the Chair?

The PRESIDING OFFICER. The majority leader is trying to make an announcement that is important to all of us. Senators will clear the well and conduct any conversation they have in the cloakrooms.

Mr. BAKER. Mr. President, I am prepared to ask the Senate to remain in as long as it serves a useful purpose in trying to dispose of the amendments that have been filed.

That, of course, is a matter that directs itself primarily to the attention of the managers of this bill and severtitles of this bill, but for the moment it looks like we have several amendments to deal with. There may or may not be rollcall votes on most of them, but Senators should plan to be here past midnight. I hope to have a further announcement to make a little later.

Mr. METZENBAUM addressed the Chair.

Mr. DOLE. Mr. President, the Senator from Kansas has the floor.

THE PRESIDING OFFICER. The Senator from Kansas has the floor unless he would yield without losing his right to the floor.

Mr. DOLE. Mr. President, I move to reconsider the vote on the Tsongas

amendment.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, as I understand, there is no objection to the four amendents.

Mr. METZENBAUM. Mr. President, may I respond to the Senator from Kansas? It is my understanding that the amendment of the Senator from Delaware will be limited to 1 year and that the amendment of the Senator from North Carolina is to be amended in the manner which he previously discussed

Mr. HELMS. It already has been.

Mr. METZENBAUM. And that the Senator from Illinois has an amendment having to do with the formula.

Mr. DIXON. Interstate transfer funds-I can tell the Senator from Ohio it has been cleared with the chairman of both committees, Finance and Public Works, and the ranking members on both sides.

Mr. METZENBAUM. And the amendment of the Senator from Connecticut?

Mr. DODD. The amendment is noncontroversial. It has been cleared on both sides.

Mr. METZENBAUM. Those were the only four amendments?

Mr. DOLE. Yes those are the only four.

Mr. METZENBAUM. Does the unanimous-consent request of the Senator from Kansas include the fact that these amendments shall have no amendments them that to and they

Mr. DOLE. The request does contain that statement, that no amendments to the amendment be in order in each case and that we will revert to the consideration of the pending amendment following disposition of those matters.

Mr. METZENBAUM. Is there any limit with respect to the time in connection with these amendments?

Mr. DOLE. No; I hope they take a long time myself.

Mr. METZENBAUM. I have no objection.

Several Senators addressed

The PRESIDING OFFICER. The Chair seeks clarification of the Senator from Kansas. Is he intending to lay aside his amendment until all four of these amendments are taken care of?

Mr. DOLE. That was the request of the Senator from Kansas, that the pending amendments be temporarily set aside for consideration of the

amendments of the distinguished Senator from Delaware (Mr. Roth), the Senator from Connecticut (Mr. Dopp), the Senator from Illinois (Mr. DIXON), and the Senator from North Carolina (Mr. Helms); that no amendments to the amendments be in order, and that we would revert to the pending amendment following disposition.

Mr. DIXON. Will the Senator from

Kansas yield to this extent?

Mine is actually two amendments, for clarification purposes, to be taken en bloc, but it does the same thing and

it is not controversial.

Mr. DOLE. If the Senator from Indiana will indulge the Senator from Kansas, I understand now that a previous amendment that was not noncontroversial has now been resolved so it is noncontroversial. It is coauthored by 36 of our colleagues, Senator BRAD-LEY, Senator DANFORTH, 2and others. The question on that has been resolved with Senator Long; is that correct?

Mr. DANFORTH. Yes.

Mr. DOLE. I would include that in the request unless there is some objection.

We had it up on the floor at one time and it was withdrawn so they could tighten up the amendments.

Mr. BUMPERS. Will the Senator

from Kansas yield further?

Mr. PRYOR. Reserving the right to object-

Mr. DOLE. I would be happy to

Mr. BUMPERS. Is the amendment of the Senator from Arkansas (Mr. PRYOR) included in that list?

Mr. DOLE. I would be happy to in-

clude that.

Mr. PRYOR. I would like to request that.

Mr. BUMPERS. Mr. President, that means the Pryor amendment will be included?

Mr. DOLE. It is not a noncontrover-

sial amendment.

Mr. BUMPERS. It is not noncontroversial, and as I understand it will re-

quire a rollcall vote.

Reserving the right to object, Mr. President-and I hope I do not have to-I was just wondering, can we do those sequentially the way the Sena-

tor has named them? Mr. DOLE. It is my hope-it might be better if we could do the Pryor amendment first and vote; everybody could go home except those who had an interest in the others. I would rather reverse the order, if I had my druthers. Unless there is some objection, we could take up the Pryor amendment first, have the rollcall, if the majority leader has no objection, do the four amendments and then-

Mr. HUDDLESTON. Will the Sena-

tor yield?

Mr. DOLE. Does the Senator have

any objection to that?

Mr. LEVIN. Reserving the right to object, if the Senator is going to in-

clude noncontroversial amendments in your list of priorities, I do not know how you handle the other controversial amendments. The amendment of the Senator from Arkansas, I do not want to do anything to jeopardize his chances, is a germane amendment, as I understand it. That can come after cloture. Some of us have nongermane controversial amendments we have been waiting to offer. I think we will avoid digging ourselves a deeper hole if we try to dispose of some of the nongermane controversial amendments, leaving the germane controversial amendments until after cloture.

I ask though if the Senator could add me, since we have a controversial amendment in there, if he could add the Levin-Specter unemployment com-

pensation amendment.

Mr. DOLE. Again the Senator from Kansas wishes to accommodate everyone in the Chamber.

Mr. HEFLIN. Include me.
Mr. DOLE. Including the distinguished Senator, my friend from Ala-

But if we take all the nongermane amendments I do not know why we have cloture. If we are going to have all the nongermane amendments and then vote for cloture, I do not know why we are going through the exer-

We are trying to eliminate nongermane amendments that are highly controversial. I hope we can accommodate the Senator from Michigan.

Also, if he will allow us to proceed with the others I think we always have in the past been able to accommodate the Senator from Michigan.

Mr. HEFLIN. Mr. President, I am going to have to object to it if the Senator is going into noncontroversial amendments. I wish to take my chances on getting mine up. The timeframe is running to 11 a.m. in the morning when we are going to vote on cloture if we come back at 10 a.m.

Mr. DOLE. Does the Senator object to noncontroversial amendments?

Mr. HEFLIN. No; I do not object to noncontroversial amendments, except I had agreed to a noncontroversial amendment, but if the Senator is getting into controversial amendments I think we all will compete not with each other but we are competing against the clock.

Mr. DOLE. That is right.

Mr. DODD. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. Would it not be likely to deal with the noncontroversial amendments? There are four of them. I do not think it will take 10 minutes to deal with those four. It has almost taken enough time to deal with all four of them already.

Mr. LEVIN. Mr. President, if the Senator from Kansas will yield for another question, I wonder if he and the majority leader would consider laying

down the number of controversial amendments tonight and voting on them tomorrow before cloture?

Mr. DECONCINI. That is a good idea.

Mr. DOLE. The Senator from Kansas cannot speak for the majority leader. I am certainly willing to consider that.

Mr. HEFLIN. Suggest the absence of a quorum while we consider it.

Mr. DOLE. Why do we not take care of the noncontroversial ones and make some progress and see what the controversial amendments are? We will take a look at the whip's check and then we can determine whether or not-

Mr. HEFLIN. I believe we can move to them.

Mr. MATSUNAGA. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. I am happy to yield.

Mr. MATSUNAGA. I have amendments that have been cleared on both sides of the aisle.

Mr. DOLE. They have been cleared on both sides. In fact, I think three of the four amendments are actually title II of the bill or are they not in title I of the bill? They are amendments that have been cleared by Senators RAN-DOLPH, STAFFORD, HEFLIN, HUMPHREY, METZENBAUM, and the other assistant commissioners.

Mr. MATSUNAGA. One has already been cleared. The other has been checked with the Treasury and the Treasury has withdrawn objection to that. I have that amendment ready also.

Could the Senator include my two amendments?

Mr. DOLE. If the Senator from Hawaii would clear it with the assistant commissioners I will be glad to put it on the list.

Mr. MATSUNAGA. It has been cleared with the three sides.

Mr. METZENBAUM. The Senator from Hawaii has one amendment that has been cleared having to do with shipping limitation of \$2,000 per passenger. His other amendment has not been cleared, the educational investments. I think he wanted to give that further consideration.

The one having to do with the passengers on ships has been cleared.

Mr. MATSUNAGA. The Senator from Ohio said it was OK.

Mr. METZENBAUM. I had said earlier I thought it would be. I was attempting to find the Senator to indicate that.

Mr. DOLE. Why do we not take the one on the ships?

Mr. MATSUNAGA. All right.

Mr. PRYOR. Mr. President, if the Senator from Kansas will yield, I may have a possible thought here that may help everyone.

If the Senator from Kansas would consider taking this amendment, first, let us vote, and then take the four noncontroversial amendments. I would be more than willing to set a time certain for the vote at, say, 20 minutes after 11, and then that would give us about 25 minutes. I may not take my portion of that period. So we could have a quick vote and move to the noncontroversial ones. I would be glad to do it if that will help accommodate.

Mr. DOLE. The Senator from Kansas wants to be fair. I am perfectly happy to do that. I do not want to offend the Senator from Alabama more than I have or offend the Sena-

tor from Michigan.

Mr. PRYOR. I do not want to offend anyone. As I say, I attempted to make that accommodation if that would be of assistance.

Mr. HEFLIN. Mr. President, I would like to have the same request for me

immediately following him.

Mr. DOLE. We are continuing a whip check on his amendment. It looks doubtful.

Mr. LEVIN. I am afraid to ask what the check looks like on ours.

Mr. DOLE. The Senator's looks better.

Mr. LEVIN. In that case I hope the Senator continues with the whip

I wonder if we cannot pursue the suggestion the Senator made about laying down the number of amendments tonight and voting in the morning prior to the cloture vote while taking up the noncontroversial amendments.

Mr. HEFLIN. And get it out of the

Mr. DOLE. I am willing to sit down with the Senator from Alabama and the minority and majority leader. Why do we not go ahead and take care of the five or six noncontroversial amendments, the one on the cruise ship and the one on the AFDSSI, Senator Danforth and Senator Bradley, plus the other four named, and then we are going to be here a while.

Then, who is first? I think the Sena-

tor from Delaware is first.

The PRESIDING OFFICER. Will the Senator from Kansas please restate his unanimous-consent request after all this discussion?

Mr. DOLE. Mr. President, if we may have order, I think it would be better

understood.

The PRESIDING OFFICER. The Senate will be in order while the Senator from Kansas recaps for clarification the unanimous-consent request.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendments be temporarily set aside.

Mr. ROBERT C. BYRD. Mr. President, I apologize to the Senator from Kansas for the interruption, but I think we should have order in the Senate. The Senator from Kansas asked for order, and we have not gotten it.

The PRESIDING OFFICER. The minority leader is correct.

Please have sufficient silence in the Senate so that we can hear the restatement of the unimous-consent request for clarification from the Senator from Kansas.

Mr. DOLE. I thank the distinguished minority leader.

I ask unanimous consent that the pending amendments be temporarily set aside for consideration of the following noncontroversial amendments:

An amendment to be offered by the distinguished Senator from Delaware, Senator Roth; an amendment by the Senator from Connecticut, Senator Dopp; an amendment by the Senator from Illinois, Senator Dixon-he has two amendments—an amendment by the Senator from North Carolina, Senator Helms; an amendment by the Senator from Missouri, Senator Dan-FORTH; and one amendment by the distinguished Senator from Hawaii, Senator Matsunaga, and that no amendments to the amendments be in order and that we will revert to consideration of the pending amendments following disposition of those amendments.

PRESIDING OFFICER. The there objection to that unanimous-

consent request?

Mr. MATSUNAGA. Mr. President, reserving the right to object, is the Senator excluding all amendments after that?

Mr. DOLE. No. I am just talking about the Senator's amendment not that it be subject to amendment.

We are going to have a lot of amend-

ments after this.

Mr. MATSUNAGA. Will the Senator restate his unanimous-consent request?

Mr. DOLE. I keep forgetting the names.

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. What I have requested, I say to the Senator from Hawaii, is that we consider the noncontroversial amendments. The Senator from Connecticut has one. The Senator from Illinois has two. The Senator from Hawaii has one. The Senator from Missouri has one. The Senator from Delaware has one. The Senator from North Carolina has one.

And that just takes care of six that are noncontroversial. There are probably 20 other amendments that we are working on that we may consider later, including one that I know the Senator from Hawaii has an interest in.

Mr. MATSUNAGA. That is right.

Mr. HEFLIN. I wonder if the distinguished Senator from Kansas will amend his unanimous-consent request to say that no amendment would take longer than 5 minutes.

Mr. DOLE. I am happy to do that. I think we can do them all in 5 minutes if we just do them.

The PRESIDING OFFICER. There has been a unanimous-consent request for a 5-minute limit on each amend-

Is there objection to that request? Without objection, it is so ordered.

The Chair recognizes the Senator from Delaware.

UP AMENDMENT NO. 1462

(Purpose: To amend the Tax Reform Act of 1976 to extend, for an additional 1 year, the exclusion from gross income of the cancellation of certain student loans)

Mr. ROTH. Mr. President, I send an unprinted amendment to the desk and I offer this amendment on behalf of myself, Senator Packwoop, Senator BENTSEN, and Senator BIDEN.

The PRESIDING OFFICER. The

amendment will be stated.

The legislative clerk read as follows: The Senator from Delaware (Mr. ROTH) for himself and Mr. Packwood, Mr. Bentsen, and Mr. Biden proposes an unprinted amendment numbered 1462.

Mr. ROTH. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Insert in the appropriate place in the bill the following: That subsection (c) of section 2117 of the Tax Reform Act of 1976 (relating to cancellation of certain student loans) is amended by striking out "January 1, 1983" and inserting in lieu thereof "January

Mr. ROTH. Mr. President, amendment I am offering very simply extends an existing provision in tax law which excludes from gross income the amount of a student loan forgiven by a hospital in exchange for the student's meeting postgraduation work requirements with that hospital. Since 1976, hospitals which suffer from a shortage of health care professionals, particularily those in rural areas, have been able to provide free educational benefits in return for the student working at the hospital for the required number of years after graduation. Under current law these educational benefits are tax free to the student. After January 1, 1983, this tax exemption will expire.

Mr. President, there is no reason to let this provision expire, this country faces a chronic shortage of registered nurses and other health professionals. This particular program is a cost effective and efficient way to address the problem. Many, many students have been able to receive an education they would not otherwise have been able to afford. Hospitals in rural areas have been able to recruit and retain qualified personnel. Health training programs administered by the Department of Health and Human Services currently offer the same kind of taxexempt loan program.

In hearings before the Finance Committee last week, witnesses testified that a 4-year extension was necessary because of the long-term nature of the commitments made in this program. The Treasury agreed that a 1-year extension would be acceptable. We cannot, and should not, take away this benefit from students who are in the "pipeline" of working off their educational loan.

Mr. President, in the spirit of compromise I am asking that we extend this exemption for 1 year for this worthy program which provides an educational opportunity in the health care professions.

I yield back the floor, Mr. President. The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, as indicated earlier, this amendment has been approved, it has been looked at by Treasury and looked at by a number of Senators. The majority has no objection. I think the distinguished Senator from Louisiana has no objection to the amendment.

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. DOLE. I yield back the time. Mr. ROTH. I yield back my time. The PRESIDING OFFICER. The

question is on agreeing to the amendment of the Senator from Delaware.

The amendment (UP No. 1462) was agreed to.

Mr. ROTH. I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

## UP AMENDMENT NO. 1463

Mr. DODD. Mr. President, I send an amendment to the desk and ask that it be reported.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from Connecticut (Mr. Dodd) proposes an unprinted amendment numbered 1463.

Mr. DODD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment add the following new section:

SEC. . Resolution on Highway Trust

SEC. . Resolution on Highway Trust Fund obligations.

Whereas a properly maintained national highway system is essential to the safe travel of American motorists and passengers and to the economic health of American trade and commerce; and

Whereas the administration and Congress have agreed that our national highway system is in serious disrepair and requires a major Federal restoration effort; and

Whereas the Highway Trust Fund was established in 1956 for the purpose of financing the construction, maintenance and repair of our highway system through a

system of federal taxes and highway programs; and

Whereas recent trust fund balances have reached historical highs and have not been adequately employed to finance needed maintenance and repair; and

Whereas accelerated trust fund obligations will permit an expansion of needed maintenance and repair, create employment opportunities and encourage cost savings

over time: Now, therefore, be it Resolved, That it is the Sense of the Congress that the administrators of the Federal Highway Trust Fund shall act to expedite highway program obligation, to the maximum extent that such can be accelerated under law.

Mr. DODD. Mr. President, very, very briefly, my amendment would add a new section to the gas tax bill that expresses the sense of the Congress that the administrators of the trust fund shall act as expeditiously as is permissible under law.

Mr. President, this is an amendment that I have discussed at some length with the distinguished Senator from Vermont (Mr. Stafford) and others. I believe we have reached agreement on this at this point.

Mr. President, I yield back the floor. Mr. STAFFORD addressed the Chair.

The PRESIDING OFFICER. Who yields time? Does the Senator from Kansas yield time to the Senator from Vermont?

Mr. STAFFORD. I would say respectfully to the Chair that I think the Senator from Vermont controls the time on this side.

The PRESIDING OFFICER. The unanimous-consent agreement had a certain order that provided for Sena-

certain order that provided for Senators to control the time, and if the Senator wishes to address this amendment, it is in order.

The Senator from Vermont.

Mr. STAFFORD. Mr. President, I have discussed this amendment offered by the distinguished Senator from Connecticut, which is a sense of the Senate resolution that the administrators of the Federal Highway Trust Fund shall act expeditiously, to expedite highway program obligations to the maximum extent those obligations can be extended by law, and that is the intent of the Committee on Environment and Public Works, and I think the Senate can get as much work out to help the unemployment situation as we possibly can.

So for the majority I am prepared to accept the Senator's amendment, and I believe the minority, Senator Randler, and I yield to Senator Randler, and I yield to Senator Randler, and I will be senator to be senato

Mr. RANDOLPH. I will state to the Senator discussing this measure that, of course, this is in the interest of the support of the obligation of highway funding and it is in order. We of the minority of the committee join with the majority of the committee in support of the amendment offered by the able Senator from Connecticut.

Mr. DODD. I thank the Senator.

The PRESIDING OFFICER (Mr. WARNER). Is all time yielded back?

Mr. STAFFORD. I yield back the time we have.

Mr. DODD. I yield back such time as I have.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut.

The amendment (UP No. 1463) was agreed to.

Mr. STAFFORD. I move to reconsider the vote by which the amendment was agreed to.

Mr. DODD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Illinois is next to be recognized.

### UP AMENDMENT NO. 1464

Mr. DIXON. Mr. President, on behalf of Senator Percy, Senator Kennedy, Senator Dodd, Senator Moyni-Han, Senator DeConcini, and Senator Weicker and myself I send to the desk an amendment.

The PRESIDING OFFICER. The clerk will report.

Mr. DIXON. There are two amendments en banc, Mr. President.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from Illinois (Mr. Dixon), for himself and others, proposes an unprinted amendment numbered 1464.

Mr. DIXON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 48, beginning with line 11, strike out all through page 49, line 2, and insert in lieu thereof the following:

"(c) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by deleting the words "the date of enactment of the Federal-Aid Highway Act of 1976 or the date of approval of each substitute project under this paragraph, whichever is later," and inserting in lieu thereof the words "June 30, 1980."

On page 49, between lines 14 and 15, insert the following:

(f) The third sentence of section 103(e)(4) of title 23, United States Code, is amended by deleting the words "Substitute projects" and inserting in lieu thereof "Concept programs for substitute projects".

Mr. DIXON. Mr. President, these amendments have been cleared with the chairman of the Public Works Committee, the chairman of the Committee on Finance, the ranking members on both of those committees, and all interested parties on both sides.

It has to do with the cost adjustment mechanism previously guaranteed us and other States in the law on interstate transfer fund use, and I request the support of the membership for these amendments.

Mr. President, the committee bill includes a provision eliminating the existing interstate transfer escalation clause. This would discontinue adjustments to the unfunded transfer balances after the fiscal year 1983 interstate cost estimate (ICE) is approved.

This change from current law could cost each State and local government participating in the interstate transfer programs literally millions, perhaps tens of millions, of dollars. The result will surely be that many interstate transfer substitute projects will not be able to be completed-construction will have to slow or even cease on some projects.

This occurs because capping the cost adjustment factor based on the fiscal year 1983 ICE artificially limits construction funds for substitute projects. Construction costs have declined for the past 2 years, because of the severe recession, a recession that has hit the construction industry particularly hard. In fact, some estimates indicate that unemployment in the building trades in my State is currently as much as 50 to 60 percent.

However, these construction cost decreases are unusual and do not reflect long-term construction price trends. Capping the cost adjustment factor, therefore, at a time of severe recession, and based on recession-caused price decreases, is neither equitable

nor sensible.

As the economy recovers from the recession, construction price increases will return, likely again outpacing the overall inflation rate. At the funding level proposed in the committee bill, the interstate transfer program will continue through 1990. If outstanding balances are frozen at the current artificially low level, the return of inflation would severely reduce the number of substitute projects ultimately built.

The escalation of balances for the interstate construction continues in the committee bill. I strongly believe it should also continue for the interstate transfer program. However, if the cost adjustment mechanism must he dropped, then at least an adjustment to transfer balances should be made so that future program accomplishments are not curtailed because of today's poor economic conditions.

Mr. President, the amendment I am offering accomplishes that objective. It would end the cost adjustment factor based, not on the artificially low, recession-caused fiscal year 1983 ICE, but rather on a year that more accurately reflects long-term construction cost trends-fiscal year 1980.

The Federal Government committed to the States and local governments involved that it would provide sufficient financing to complete all approved substitute projects. In reliance

on this commitment, the States and local governments have spent substantial amounts of their own money. Project construction is underway and will continue for the next several years, at least. I think it is imperative, therefore, that we give the participants in the program the maximum opportunity possible to complete all the approved substitute projects. Our previous promises to the States and local governments involved require us to do no less. I urge the Senate to adopt my amendment.

Mr. President, section 103(e)(4) of title 23 of the United States Code states, in relevant part, that:

Substitute projects under this paragraph [the Interstate transfer program] may not be approved by the Secretary under this paragraph after September 30, 1983, . .

My understanding of this clause is that it requires that a State's "concept plan" for substitute projects must be approved by the September 1983 date.

I do not believe, however, that the clause was ever intended to require the Secretary to approve every individual substitute project in detail by that time, nor do I believe that it should be potentially capable of that interpretation. Since, at the current and planned rate of interstate transfer spending, the program will run at least 6 more years, it is not reasonable to require that each project be finally approved by September 1983. Doing so would require States and local governments to have a project's plans and specification approved as much as 6 years or more before construction begins.

It would deny States and local governments, and the Department of Transportation any flexibility in substituting one project for another if cir-

cumstances should require it.

Along with my distinguished senior colleague from Illinois, Senator PERCY, therefore, I am offering an amendment to clarify legislative intent in this regard. The amendment makes it clear that the deadline only applies to the concept plan for substitute projects. I think this is a reasonable amendment, technical in nature, and, I would hope, noncontroversial; I urge its adoption.

Mr. PERCY. Mr. President, the interstate transfer program was created to permit States to withdraw unbuilt segments of the Interstate Highway System and to use the funds freed by this move for substitute highway and transit projects. The highway bill, as reported by the Senate Environment and Public Works Committee, eliminates the inflation adjustment and caps the amount which may be authorized for the program. I am pleased to join my distinguished colleague from Illinois, Senator Dixon, in offering an amendment to establish the 1980 construction inflation index as the benchmark to adjust the unfunded balance to inflation. The 1980 level is important because it does not include the 2 years of deflation we have had in the construction industry since that time. The 1980 index more accurately reflects long-term industry cost trends. The removal of the Crosstown Expressway in northeastern Illinois from the Interstate System has freed approximately \$700 million for substitute projects in the six-county Chicago area. Illinois' unfunded transfer balance, however, now stands at more than \$2 billion, representing approximately 35 percent of the nationwide total unfunded transfer balance. Illinois withdrew its interstate highway projects under a signed agreement with the Federal Government and expects to receive full funding.

Had the States and local governments chosen to build their interstate segments, they would have received a regular allocation under the highway trust fund. And, these States would have received an amount adjusted for inflated construction costs. It is simply unfair, now that an agreement is signed and sealed, to go back and deny these States full funding as reflected in the 1980 index.

For these reasons, I would urge my colleagues to support this amendment retaining the cost adjustment factor of existing law. I would note that this amendment has drawn the support of the U.S. Conference of Mayors and environmental groups. I know my colleagues will agree that it is only right for the Federal Government to live up to its part of the agreement in the withdrawal of the interstate segments.

Mr. President, I support the clarifying amendment of my distinguished and valued colleague from Illinois, Senator DIXON.

This amendment is a technical clarification to indicate that the existing September 30, 1983 deadline for Federal approval of "substitute projects" under the interstate transfer program only means the approval of a "concept plan," and not approval of a rigid and unchangeable project listing. Certainly, the existing law was never intended for the Federal Government to approve every single substitute project in detail by 1983. This amendment would not allow for such an interpretation, and I urge its adoption.

Mr. STAFFORD. Mr. President, for the majority I have had an opportunity to discuss these amendments with Senator Dixon and Senator Percy, and I am prepared for the majority to accept each of them.

Mr. RANDOLPH. Mr. President, I will say to the able Senator from Illinois that the thrust of this proposal is to provide funds for interstate transfers at the maximum level, and that is the reason why we support the proposal. It is well-reasoned and it is necessary, and we do give it our support.

Mr. DIXON. I thank my friend from West Virginia.

The PRESIDING OFFICER. Is all time yielded back?

Mr. STAFFORD, I yield back the time of the majority.

Mr. DIXON. I yield back my time. The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 1464) was agreed to.

Mr. DIXON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STAFFORD. I move to lay that

motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 5002 (AS MODIFIED)

Mr. HELMS. Mr. President, I call up amendment 5002 (as modified).

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from North Carolina (Mr.

HELMS) proposes an amendment numbered 5002 (as modified).

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the amendment insert the following:

APPROVAL OF RELOCATION OF INTERSTATE HIGHWAYS

SEC. . (a) Notwithstanding the provisions of section 4(b) of the Federal-Aid Highway Act of 1981, the Secretary may approve a change in location of any Interstate route or segment and approve, in lieu thereof, the construction of such Interstate route or segment in a new location if the original location of such route or segment-

(1) has been designated under section 103(e) of title 23. United States Code: (2) is serving Interstate travel as of the

date of enactment of this section; and (3) requires improvements which are eligible under the Federal-Aid Highway Act of

1981, and which would either involve major modifications in order to meet acceptable standards or result in severe environmental impacts and such major modifications or mitigation measures relating to the environmental impacts are not cost effective.

The cost of the construction of such Interstate route or segment on the location with funds available under section 108(b) of the Federal-Aid Highway Act of 1956, shall not exceed the estimated cost of the eligible improvements on the original location as eligible under the Federal-Aid Highway Act of 1981 and included in the 1983 Interstate cost estimate as approved by the Congress. Upon approval of a new location, any funds apportioned under section 104(b)(5)(A) of title 23, United States Code, which were expended on the route or segment in the original location shall be refunded to the Highway Trust Fund and credited to the unobligated balance of the State's apportionment made under section 104(b)(5)(A) of such title, and other eligible Federal-aid highway funds may be substituted in lieu thereof at the appropriate Federal share.

(b) When the Secretary approves a relocation of an Interstate route or segment under the provisions of subsection (a) of this section, such route or segment shall not be eligible for withdrawal under the provisions of section 103(e)(4) of title 23, United States Code, and shall be subject to the Interstate System completion deadlines provided in subsections (d) and (e) of section 107 of the Surface Transportation Assistance Act of 1978 or subject to Interstate System completion deadlines as may be determined by Congress.

Mr. HELMS. Mr. President, I ask unanimous consent that Mr. East be

listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

President, this amendment authorize the Secretary of Transportation to approve a change in location of Interstate 40 at Winston-Salem, N.C. Although the amendment is written in general terms, as far as I know it only affects the situation in Winston-Salem, N.C.

Briefly, Mr. President, there is an incomplete section of Interstate 40 running through Winston-Salem that is one of the most heavily traveled and dangerous sections of interstate highway anywhere in the country. It is an understatement to say this section of highway poses a serious safety prob-

The city fathers of Winston-Salem, together with State highway officials of North Carolina, have proposed an alternate route, a proposal U.S. Department of Transportation officials have no problem with. In fact, as far as I know, no one is opposed to the alternate route.

The problem, Mr. President, and the reason this amendment is needed, is that the Secretary of Transportation needs legislative authority to approve this redesignation. My amendment would authorize it.

I have contacted Senator STAFFORD and Senator RANDOLPH, chairman and ranking member of the Committee on Environment and Public Works; and Senator Symms and Senator Bentsen, chairman and ranking member respectively of the Transportation Subcommittee. As far as I know, all are in agreement with this amendment. It will not cost the taxpayers a penny.

Mr. President, I move the adoption

of my amendment.

Mr. President, I yield back the re-

mainder of my time.

Mr. STAFFORD. Mr. President, I have had an opportunity to confer with the distinguished Senator from North Carolina with respect to his amendment which proposes to circumvent the town of Winston-Salem at no additional cost and at no additional length of highway. It appears to me to be a meritorious amendment. I am prepared, for the majority, to accept

Mr. RANDOLPH. Will my colleague yield?

Mr. STAFFORD. I yield to my distinguished colleague, the ranking minority Member.

Mr. RANDOLPH. Mr. President, this is an approval of a realignment of an important interstate—and it is important. It is a segment that is necessary and certainly there should be no objection. We support the amendment.

Mr. HELMS. I thank the Senator. The PRESIDING OFFICER. Is all

time yielded back?

Mr. STAFFORD. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina (Mr. HELMS).

The amendment (No. 5002, as modified) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STAFFORD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Missouri.

UP AMENDMENT NO. 1465

(Purpose: To exclude home energy assistance provided by private nonprofit organizations or by utilities from income for purposes of the supplemental security income and the aid to families with dependent children programs)

Mr. DANFORTH. Mr. President, I send an amendment to the desk on behalf of myself and others and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from Missouri (Mr. Dan-FORTH), for himself and others, proposes an unprinted amendment numbered 1465.

Mr. DANFORTH. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the substitute add the following new section:

SEC. . (a) Section 1612(b) of the Social Security Act is amended-

(1) by striking out "and" at the end of paragraph (11):

(2) by striking out the period at the end of paragraph (12) and inserting in lieu thereof ; and"; and

(3) by adding at the end thereof the following new paragraph:

"(13) any assistance received to assist in meeting the costs of home energy, including both heating and cooling, which (as determined under regulations of the Secretary by such State agency as the chief executive of-ficer of the State may designate) (A) is based on need for such assistance, and (B) is assistance furnished in kind by a private nonprofit agency, or is assistance furnished by a supplier of home heating oil or gas or assistance by an entity providing home energy whose revenues are primarily de-rived on a rate-of-return basis regulated by

a State or Federal governmental entity, or by a municipal utility providing home energy

(b) Section 402(a) of such Act is amend-

(1) by striking out "and" at the end of paragraph (33);

(2) by striking out the period at the end of paragraph (34) and inserting in lieu thereof ; and"; and

(3) by adding at the end thereof the fol-

lowing new paragraph:

(35) provide, at the option of the State, that in making the determination for any month under paragraph (7) the State agency shall not include as income any assistance received to assist in meeting the costs of home energy, including both heating and cooling, which (as determined under regulations of the Secretary by such State agency as the chief executive officer of the State may designate) is (A) based on need for such assistance, and (B) assistance in kind furnished by a private nonprofit agency, or assistance furnished by a supplier of home heating oil or gas or by an entity whose revenues are primarily derived on a rate-of-return basis regulated by a State or Federal governmental entity, or by a municipal utility providing home energy.

(c) The amendments made by subsections (a) and (b) shall be effective with respect to home energy assistance received in months beginning on or after the date of the enactment of this Act and prior to July 1, 1985.

The Secretary of Health and Human Services shall submit a report to the Congress, prior to April 1, 1985, on the implementation and results of the provisions of sections 1612(b)(13) and 402(a)(35) of the Social Security Act, including any recom-mendations with respect to whether such provisions should be extended in the same or modified form or allowed to expire.

The cosponsors are as follows:

Mr. Heinz, Mr. Danforth, Mr. Duren-erger, Mr. Packwood, Mr. Percy, Mr. Percy, Mr. berger. Mr. Grassley, Mr. Cohen, Mr. Specter, Mr. Roth, Mr. Pressler, Mr. Hatfield, Mr. Domenici, Mr. Weicker, Mr. Abnor, Mr. Lugar, Mr. Chafee, and Mrs. Kassebaum.

Mr. Moynihan, Mr. Tsongas, Mr. Heflin, Mr. Riegle, Mr. Bradley, Mr. Levin, Mr. Glenn, Mr. Sasser, Mr. Cranston, Mr. Bent-sen, Mr. Mitchell, Mr. Eagleton, Mr. Kennedy, Mr. Sarbanes, Mr. Cannon, Mr. Metzenbaum, Mr. Boren, Mr. Matsunaga, Mr. Baucus, Mr. DeConcini, Mr. Payor, and Mr.

Mr. DANFORTH. This amendment would provide that SSI or AFDC payments not be reduced because of assistance furnished by energy suppliers to help low-income people meet their heating or cooling bills. It also would prevent a reduction in such payments when a nonprofit organization makes an "in-kind" donation to help such persons with their energy needs. This would include, for example, a payment made by a nonprofit organization directly to a utility company to help pay an individual's heating bill. I believe this meets the problem raised by Senator Long.

Mr. LONG. Yes. My concern was that the amendment not open the door to a disregard of regular cash payments made directly to welfare recipients by nonprofit agencies. Such a provision could easily be abused. This

provision is more limited but will allow nonprofit agencies to provide help as long as it is "in-kind" such as the donation of a heater or a payment made to a utility company to help meet a gas or electric bill.

Mr. HEINZ. Mr. President, I am pleased to be an author of this amendment which will further encourage the private sector to provide energy assistance to individuals and families with low incomes. As chairman of the Senate Special Committee on Aging, I have had a longstanding interest in developing and encouraging programs in both the public and private sectors, to assure that seniors who need help in paying for their energy costs receive

This amendment is necessary to resolve what may be a serious problem for many low-income senior citizens this winter-the reduction of their supplemental security income benefits because they might also receive financial assistance from private energy assistance programs. This unfortunate situation exists because of a provision in the SSI statute which requires, with certain exceptions, that support and maintenance, in kind or in cash, be counted as income in determining SSI eligibility and payment amounts. Program regulations define support and maintenance in kind as anything given to a recipient for food, clothing, or shelter. Gas, electricity, and fuel assistance from the private sector can be considered shelter support. These same statutory provisions and regulations apply to the AFDC program. Federal income energy assistance payments, however, are not considered to be income under present SSI and AFDC program rules.

At a time of rapidly rising energy costs, fuel assistance programs are more necessary than ever before. For example, gas prices have risen an estimated 20 to 60 percent over the past year in many parts of the country. Further increases are expected this

Many private utilities have sponsored programs, making available money or lines of credit to low-income citizens that have been quite effective in supplementing the Federal lowincome energy-assistance program. Approximately 25 investor-owned gas and electric utility companies have established fuel fund programs to assist low-income customers with their utility bills. Generally, the companies operating such fuel funds solicit contributions from their employees, customers, and/or stockholders. The funds are collected by the utilities and then turned over to a third party, a charitable organization such as the Red Cross or the Salvation Army, which determines who should receive the assistance and the amount, and then reimburses the utility.

In my home State of Pennsylvania, the Philadelphia Gas Works is setting aside up to \$500,000 in utility credits to customers for a fund to assist lowincome Phildelphians to meet the cost of gas heat.

In addition, the Equitable Gas Co. located in Pittsburgh, Pa., has dispersed over \$2 million dollars to assist their low-income customers, and a small fuel oil business located in Lebanon. Pa.-the Parr Co.-has begun to contribute to a special fund set up to assist needy individuals.

To have low-income persons who receive SSI and AFDC benefits lose those beneits upon receiving this private assistance is simply unfair. Nor do I believe that we want to have local voluntary efforts result in a loss of necessary health benefits for the poorest of our citizens. Since medicaid benefits are automatically provided to SSI and AFDC recipients. This could happen if assistance payments are counted as income and SSI and AFDC eligibility are terminated as a result.

Mr. President, we know that lowincome households generally consume considerably less energy than the average household. This means, among other things, that most low-income funds are already conserving about as much as possible. Yet their home energy bills have been unaffordably large. It would be a national disgrace to ask them to take further reductions in their incomes, and possibly lose their health benefits, because of prohibitive regulations that discourage and prevent local groups and companies from assisting low-income people with their high utility costs.

Mr. President, as we debate this issue, poor people around the Nation are approaching another hard winter and wondering how they will meet this year's heating bills. This simple amendment is a small step toward an adequate and fair response to their needs-but a step that is well worth

Mr. DANFORTH. Mr. President, this amendment relates to the treatment of both cash assistance from utilities and assistance in kind from private nonprofit organizations to help people pay their utility bills. It provides that such payments are not treated as income for the purpose of computing SSI and AFDC payments. It has been discussed on the floor a few hours ago in a slightly different version. Senator Long and I have worked out the difficulties on the question and I think it has been agreed to by all parties.

Mr. President, I wish to express my appreciation for considerable work on this bill by Frank McArdle and Mike Rodgers on the Special Committee on the Aging; Ted Blanton of my staff; and Joe Humphries, Mike Stern, and Sydney Olsen of the Finance Committee staff.

Mr. DOLE. Mr. President, the Senator correctly stated that the Senator from Louisiana originally had some question about the amendment, and that has now been resolved, as I understand it. There is no objection to the amendment. I yield back my time.

The PRESIDING OFFICER. All time being yielded back, the question is on agreeing to the amendment of the Senator from Missouri (Mr. Danforth).

The amendment (UP No. 1465) was

agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DANFORTH. I move to lay that

motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

UP AMENDMENT NO. 1466

(Purpose: To amend the Internal Revenue Code of 1954 to allow a business expense deduction for certain conventions on cruise ships and to reinstate the convention reporting requirements)

Mr. MATSUNAGA. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The

clerk will report.

The legislative clerk read as follows: The Senator from Hawaii (Mr. Matsunaga), for himself and Senators Inouye and Cranston, proposes an unprinted amendment numbered 1466.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place, insert the following new section:

SEC. —. DEDUCTION FOR CONVENTIONS ON CRUISE SHIPS.

(a) In GENERAL.—Subsection (h) of section 274 (relating to disallowance of certain entertainment, etc., expenses) is amended—

(1) by striking out the period at the end of paragraph (2) and inserting in lieu thereof a comma and the following: "unless the taxpayer meets the requirements of paragraph (5) and establishes that the meeting is directly related to the active conduct of his trade or business or to an activity described in section 212 and that—

"(A) the cruise ship is a vessel registered

in the United States; and

"(B) all ports of call of such cruise ship are located in the United States or in possessions of the United States.

In no event shall the amount of the deduction allowable to any taxpayer for any taxable year under section 162 or 212 with respect to any conventions, seminars, or other meetings held on any cruise ship exceed \$2,000 (\$1,000 in the case of a married individual filing separately).", and

(2) by adding at the end thereof the fol-

lowing new paragraph:

"(5) REPORTING REQUIREMENTS.—No deduction shall be allowed under section 162 or

212 for expenses allocable to attendance at a convention, seminar, or similar meeting on any cruise ship unless the taxpayer claiming the deduction attaches to the return of tax on which the deduction is claimed—

"(A) a written statement signed by the individual attending the meeting which in-

cludes-

"(i) information with respect to the total days of the trip, excluding the days of transportation to and from the cruise ship port, and the number of hours of each day of the trip which such individual devoted to scheduled business activities.

"(ii) a program of the scheduled business

activities of the meeting, and

"(iii) such other information as may be required in regulations prescribed by the Secretary; and

"(B) a written statement signed by an officer of the organizatin or group sponsoring the meeting which includes—

(b) The amendments made by this section

shall apply to taxable years beginning after December 31, 1982.

Mr. MATSUNAGA. Mr. President,

Mr. MATSUNAGA. Mr. President, the amendment which I am offering, with the cosponsorship of Mr. INOUYE and Mr. Grassley, would permit deductible business expenses for conventions held on American-flag cruise

The Finance Committee in 1980 established the current rules for business convention expenses. The committee adopted my proposal as an amendment to H.R. 5973, which was enacted as Public Law 96-608. In drafting the proposal, I disallowed, as the Treasury Department sought, all business convention expenses incurred on a cruise ship. I had initially planned to exempt conventions on American-flag cruise ships, but the Deputy Assistant Secretary for Tax Policy stated that the Treasury Department could not accept such an exemption. I did not pursue the issue, because I knew of no American ship in the cruise trade.

As events developed, I learned that an American ship did offer cruises for business conventions. Also, two ships have entered the Hawaiian trade and other American ships are seeking to enter the cruise trade which has been dominated completely by foreign flag ships. To encourage the building of American ships, I have introduced S. 2647, with the senior Senator for Hawaii (Mr. INOUYE).

There are defense as well as economic reasons to encourage the building of our merchant marine fleet. The British effort in the Falkland Islands underscored the importance not only of the Royal Navy, but also of the crucial role of the British merchant fleet. Forty-nine commercial ships were employed in British actions. They included container ships, tugs, trawlers, freighters, tankers, and most signifi-

cantly, three passenger ships, the *Queen Elizabeth*, the *Canberra*, and the *Uganda*, used as troop and hospital ships. Had these merchant vessels not been available, the movement of materials and personnel to the Falklands, leading to early victory for the British, would not have been possible.

Had we Americans been confronted with the same situation, we would have found ourselves in a sad plight, indeed, for although there was a time when the United States could boast of and take pride in its merchant fleet, it has today shriveled to the point where its effectiveness in an emergency is open to grave doubt. The passenger ships of the United States Line, the Grace Line, the Dollar Line, State Steamship Line, and the Matson Line no longer sail.

It was most heartening for me, therefore, to witness with 700 invited guests the inauguration of the SS Independence in the Hawaiian inter island cruise service, on June 5, 1982, in Honolulu Harbor. A beautifully refurbished luxury liner, the SS Independence joins its sister passenger cruise ship SS Constitution already providing interisland service in Hawaii. A most significant point to note is that both ships, owned by American Global Line, Inc., fly the American flag. Mr. Robert Suan, president of the company and his associates deserve not only commendation on their bold venture, but more importantly encouragement. Their success will likely lead others to follow suit.

I therefore introduced S. 2647 with Senator Inquye as a cosponsor to encourage the use of American passenger liners by American businessmen. Our bill would allow an annual tax deduction up to \$2,000 per taxpayer, or \$1,000 in the case of a married person filing separately, for expenses incurred in attending business conventions, seminars, or meetings on an American ship plying between American ports. The allowance would not apply to ships putting into foreign ports. To prevent abuse, the bill would impose additional reporting requirements which would not apply to usual business convention deductions.

The House considered a similar measure on the suspension calendar last Monday, and a large majority voted in its support, although not a two-thirds majority.

The finance Subcommittee on Taxation held hearings on S. 2647 December 10, 1982. The amendment before the Senate incorporates that bill, except that a limitation on the total deduction is included upon the insistence of the Senator from Ohio (Mr. Metzenbaum). The projected revenue loss is negligible.

I urge adoption of my amendment. The PRESIDING OFFICER. Who yields time?

Mr. DOLE. Mr. President, the Senator from Kansas has discussed this with the Senator from Hawaii. I understand the Treasury objection has been resolved. Is that correct?

Mr. MATSUNAGA. That is correct. Mr. DOLE. Mr. President, I know of no objection to the amendment. I yield back the remainder of my time.

The PRESIDING OFFICER. A11 time having been yielded back, the question is on agreeing to the amendment of the Senator from Hawaii (Mr. MATSUNAGA).

The amendment (UP No. 1466) was

agreed to.

Mr. MATSUNAGA. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Kansas.

Mr. PERCY. Mr. President, will the manager be good enough to set aside those amendments so we could take up one more noncontroversial amendment?

Mr. STAFFORD. Mr. President, I understand that the unanimous-consent agreement was for two amendments by Mr. Dixon and Mr. Percy. Only one has been handled so far. So I think the second one should be given the attention of the body at this time.

Mr. DIXON. Mr. President, a point of clarification, may I say to my distinguished friend from Kansas, I had two amendments and my distinguished senior colleague had the full subject matter of this amendment. It has all been cleared with everybody on both sides. I apologize to my senior colleague, but in the matter of putting this together he was off the floor temporarily. I ask that we get unanimous consent so that my senior colleague may proceed to the third amendment to which there is no objection.

Mr. DOLE. The Senator from Kansas has no objection that we temporarily set aside the pending amendments for the consideration of the amendment of the distinguished Senator from Illinois and that no amendment to the amendment be in order.

The PRESIDING OFFICER. Is there objection? Without objection. the Senator from Illinois is now recog-

## UP AMENDMENT NO. 1467

(Purpose: To allow approval of project to replace LaSalle Peru Bridge)

Mr. PERCY. Mr. President, I thank my distinguished colleague. As my valued and distinguished colleague from Illinois, Senator Dixon, has said, this has been cleared on both sides. It is a noncontroversial amendment.

Mr. President, I send an amendment to the desk and ask for its immediate consideration.

clerk will report.

The bill clerk read as follows:

The Senator from Illinois (Mr. PERCY), for himself and Mr. Dixon, proposes an unprinted amendment numbered 1466.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed

The PRESIDING OFFICER, Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

#### LASALLE PERU BRIDGE

The Secretary of Transportation may approve, under section 144(g) of title 23, United States Code, a project to replace the LaSalle Peru Bridge in the State of Illinois, which project is part of a complete replacement of U.S. Route 51 in a new location.

Mr. PERCY. Mr. President, I am offering an amendment along with my distinguished colleague from Illinois, Senator Dixon, to allow approval of a project to replace the LaSalle/Peru Bridge in Illinois. This amendment clarifies that this bridge is eligible under the bridge repair program. The LaSalle/Peru Bridge does not fall under the strict requirements of the Federal bridge repair program, and this amendment would permit the bridge to quality under the program.

The existing highway bridge on U.S. Route 51 over the Illinois River at La-Salle/Peru is functionally obsolete and in poor condition. The existing structure cannot accommodate projected traffic volumes, and routing the bridge through these twin cities of 22,000 would be expensive and undesirable. The design for this project has been approved and the cost estimated at \$47 million.

Mr. President, Illinois is particularly deserving of the authorization of this project due to the elimination of the Federal priority primary program. This program, which has funded construction of U.S. 51 from Rockford to Decatur, is eliminated under the highway bill as reported by the Senate Environment and Public Works Committee. A massive capital investment of over \$300 million-including over \$200 million in State funds-has been spent to date on Illinois' two priority primary routes, U.S. 51 and the so-called Kansas City to Chicago Expressway from Peoria to Quincy, Ill. Given this level of commitment, it is important that Federal funding not be terminated abruptly. And, recognizing this need, the House specifically authorized construction of the LaSalle/Peru Bridge, a vital segment of U.S. 51. Mr. President, I urge my colleagues to adopt this amendment.

Mr. DIXON. Mr. President, I am pleased to join my distinguished senior colleague from Illinois, Senator Percy, in offering an amendment to provide

The PRESIDING OFFICER. The funds for a new bridge across the Illinois River at La Salle-Peru.

This bridge would replace the existing inadequate structure on U.S. 51, and is part of the complete replacement of that heavily traveled route. The U.S. 51 corridor, between Rockford and Decatur, is one of the most heavily traveled highways in the State. It desperately needs expansion and modernization.

The State of Illinois, therefore, using Federal and State funds, has been constructing a new freeway along the general route of U.S. 51. The new bridge, which is included in H.R. 6211, is an essential part of the overall proj-

Funding construction of the new bridge out of discretionary bridge program funds is particularly important because the committee bill eliminates priority primary program financing, the chief source of Federal funds for the project.

I have spoken before on the importance of the Route 51 project to Illinois. It is a key transportation corridor down the center of the State, and would link five major interstate routes. I believe the bridge project is essential. I urge my colleagues, therefore, to support the Percy-Dixon amendment.

Mr. STAFFORD. Mr. President, for the majority, this being the highway part of the total bill, I have examined the amendment offered by my good friend, the distinguished Senator from Illinois, on the LaSalle-Peru Bridge, and in view of the language which has been agreed to I am prepared to accept the amendment for the majority.

Mr. RANDOLPH addressed the Chair.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. RANDOLPH. Mr. President, for the minority, we have no objection to the amendment.

The PRESIDING OFFICER. Is all time vielded back?

Mr. PERCY. I yield back the remainder of my time.

Mr. STAFFORD. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Illinois (Mr. PERCY).

The amendment (UP No. 1467) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DIXON. I move to lay that motion on the table.

The motion to lay on the table was

The PRESIDING OFFICER. The question now recurs on the amendment of the Senator from Kansas.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside for consideration of an amendment to be offered by the distinguished Senator from Arkansas (Mr. PRYOR) and that no amendments to the amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Arkansas is recog-

# UP AMENDMENT NO. 1468

(Purpose: To eliminate the increase in, and extension of, excise taxes on articles other than gasoline, diesel fuel, and special motor fuels and to maintain current gross weight, length, and width limitations for vehicles using interstate system)

Mr. PRYOR. Mr. President, I have an amendment at the desk. I ask unanimous consent at this time that I may have the right to modify the amendment. I have already submitted the amendment with modification.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the amendment, as modified.

The bill clerk read as follows:

The Senator from Arkansas (Mr. PRYOR) proposes an unprinted amendment numbered 1468.

Mr. PRYOR. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out sections 112-423 and insert in lieu thereof the following:

#### Subtitle D-Highway Trust Fund; Mass Transit Account

SEC. 131. EXTENSION OF HIGHWAY TRUST FUND.

(a) Extension.—Subsections (c) and (f) (3), (4), (6), and (7) of section 209 of the Highway Revenue Act of 1956 (23 U.S.C. 120

note) are amended as follows: (1) by striking out "October 1, 1984" each place it appears and inserting in lieu thereof

October 1, 1989", and
(2) by striking out "September 30, 1984", each place it appears and inserting in lieu thereof "September 30, 1989", and

(3) by striking "July 1, 1985" each place it appears and inserting in lieu thereof "July

(b) Conforming Amendments .-

(1) Management of trust fund.—Subsection (e)(1) of section 209 of the Highway

Revenue Act of 1956 is amended by striking 'Commerce" and inserting in lieu thereof "Transportation", and by striking "up to and including the fiscal year ending September 30, 1985".

(2) EXPENDITURES FROM TRUST FUND.—Subsection (f)(1) of section 209 of the Highway Revenue Act of 1956 is amended as follows:

"(1) FEDERAL-AID HIGHWAY PROGRAM .-Amounts in the Trust Fund shall be available, as provided by appropriation Acts, for making expenditures before October 1, 1990, to meet those obligations of the United States heretofore or hereafter incurred which are authorized by law or which are attributable to Federal-aid highways (including those portions of general administrative expenses of the Federal Highway Administration payable from such appropriations)."

(c) INVESTIGATION AND REPORT TO CONgress.-Section 210 of the Highway Reve-

nue Act of 1956 is repealed.

(d) CONFORMING AMENDMENTS TO LAND AND WATER CONSERVATION FUND.—Subsection (b) of section 201 of the Land and Water Conservation Fund Act of 1965 (16 U.S.C. 4061-11) is amended as follows:

(1) by striking out "October 1, 1984" and inserting in lieu thereof "October 1, 1989";

(2) by striking out "July 1, 1985" each place it appears and inserting in lieu thereof 'July 1, 1990".

(e) INCREASE IN AMOUNT TRANSFERRED TO NATIONAL RECREATIONAL BOATING SAFETY AND FACILITIES IMPROVEMENT FUND.—Clause (ii) of section 209(f)(5)(A) of the Highway Revenue Act of 1956 (23 U.S.C. 120 note) is amended-

(1) by striking out "\$20,000,000" and inserting in lieu thereof "\$45,000,000", and

(2) by striking out "October 1, 1983" and inserting in lieu thereof "October 1, 1989". SEC. 132 MASS TRANSIT ACCOUNT

(a) In General.-Section 209 of the Highway Revenue Act of 1956 is amended by adding at the end thereof the following new subsection:

(h) Mass Transit Account .-

"(1) In general.-There is established on the books of the Treasury of the United States an account within the Highway Trust Fund to be known as the 'Mass Transit Account'.

"(2) TRANSFERS TO MASS TRANSIT AC-COUNT.—The Secretary of the Treasury shall transfer to the Mass Transit Account oneninth of the amounts appropriated to the Highway Trust Fund under this section which are attributable to taxes under sections 4041 and 4081 imposed after March 31, 1983.

"(3) EXPENDITURES FROM ACCOUNT .-Amounts in the Mass Transit Account shall be available, as provided by appropriation Acts, for making capital expenditures before October 1, 1989 (including capital expenditures for new projects), under section 22 of the Urban Mass Transportation Act of 1964.

"(4) DUTIES OF THE SECRETARY OF THE TREASURY WITH RESPECT TO THE MASS TRANSIT ACCOUNT.-It shall be the duty of the Secretary of the Treasury to manage the Mass Transit Account and to make an annual report to the Congress as provided in subsection (e) of this section. The interest on, and the proceeds from the sale or redemption of any obligation held in the Mass Transit Account shall be credited to and form a part of the Mass Transit Account.

"(5) REPAYABLE ADVANCES.—There are hereby authorized to be appropriated to the Mass Transit Account, as repayable ad-

vances, such additional sums as may be required to make the expenditures referred to in paragraph (3) of this section. Advances made pursuant to this paragraph shall be repaid and interest on such advances shall be paid to the general fund of the Treasury when the Secretary of the Treasury determines that moneys are available in the Mass Transit Account for such purposes. Such interest shall be at rates computed in the same manner as provided in subsection (e)(2) of this section for special obligations and shall be compounded annually."

#### TITLE II-FEDERAL-AID HIGHWAY IMPROVEMENT SHORT TITLE

SEC. 261. This title may be cited as the "Federal-Aid Highway Improvement Act of

#### REVISION OF AUTHORIZATION FOR APPROPRIATIONS FOR INTERSTATE SYSTEM

SEC. 202. Subsection (b) of section 108 of the Federal-Aid Highway Act of 1956, as amended, is amended by striking out "the additional sum of \$3,225,000,000 for the fiscal year ending September 30, 1984", and all that follows through the period at the end of the sentence and by inserting in lieu thereof the following: "The additional sum of \$3,625,000,000 for the fiscal year ending September 30, 1984, the additional sum of \$3,800,000,000 for the fiscal year ending September 30, 1985, the additional sum of \$3,800,000,000 for the fiscal year ending September 30, 1986, the additional sum of \$4,000,000,000 for the fiscal year ending September 30, 1987, the additional sum of \$4,000,000,000 for the fiscal year ending September 30, 1988, the additional sum of \$4,000,000,000 for the fiscal year ending September 30, 1989, and the additional sum of \$4,000,000,000 for the fiscal year ending September 30, 1990.".

## HIGHWAY AUTHORIZATIONS

SEC. 203. (a) For the purpose of carrying out the following provisions of title 23, United States Code, the following sums are authorized to be appropriated out of the Highway Trust Fund:

(1) For the Federal-aid primary program not to exceed \$1,700,000,000 for the fiscal year ending September 30, 1983, \$2,100,000,000 for the fiscal year ending September 30, 1984, \$2,400,000,000 for the fiscal year ending September 30, 1985, and \$2,400,000,000 for the fiscal year ending September 30, 1986, and \$2,600,000,000 for the fiscal year ending September 30, 1987.

(2) For the Federal-aid rural program not to exceed \$614,520,548 for the fiscal year ending September 30, 1983, and \$700,000,000 for the fiscal year ending September 30. 1984, \$700,000,000 for the fiscal year ending September 30, 1985, \$700,000,000 for the fiscal year ending September 30, 1986, and \$700,000,000 for the fiscal year ending September 30, 1987.

(3) For the Federal-aid urban program not to exceed \$629,041,096 for the fiscal year ending September 30, 1983, and \$800,000,000 for the fiscal year ending September 30, 1984, \$800,000,000 for the fiscal year ending September 30, 1985, and \$800,000,000 for the fiscal year ending September 30, 1986, and \$800,000,000 for the fiscal year ending September 30, 1987.

(4) For forest highways not to exceed \$50,000,000 for the fiscal year ending September 30, 1983, \$50,000,000 for the fiscal year ending September 30, 1984, \$50,000,000 for the fiscal year ending September 30, 1985, and \$50,000,000 for the fiscal year ending September 30, 1986, and \$50,000,000 for the fiscal year ending September 30, 1987.

(5) For public lands highways not to exceed \$50,000,000 for the fiscal year ending September 30, 1983, \$50,000,000 for the fiscal year ending September 30, 1984, \$50,000,000 for the fiscal year ending September 30, 1985, and \$50,000,000 for the fiscal year ending September 30, 1986, and \$50,000,000 for the fiscal year ending September 30, 1987.

(6) For parkways and park highways \$75,000,000 for the fiscal year ending September 30, 1983 and \$100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

(7) For bridge replacement and rehabilitation under section 144 of title 23, United States Code, not to exceed \$1,700,000,000 for the fiscal year ending September 30, 1983, and \$1,700,000,000 for the fiscal year ending September 30, 1984, \$1,800,000,000 for the fiscal year ending September 30, 1985, and \$2,000,000,000 for the fiscal year ending September 30, 1986, and \$2,000,000,000 for the fiscal year ending September 30, 1986, and \$2,000,000,000 for the fiscal year ending September 30, 1987.

(8) For the highway safety improvement program not to exceed \$316,657,534 for the fiscal year ending September 30, 1983, and \$400,000,000 for the fiscal year ending September 30, 1984, \$400,000,000 for the fiscal year ending September 30, 1985, and \$400,000,000 for the fiscal year ending September 30, 1986, and \$400,000,000 for the fiscal year ending September 30, 1986, and \$400,000,000 for the fiscal year ending September 30, 1987.

(9) For Indian reservation highways \$75,000,000 for the fiscal year ending September 30, 1983 and \$100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

(b) The unapportioned or unallocated balance of sums authorized by sections 4 and 5 of the Federal-Aid Highway Act of 1982 is

(c)(1) For each of the fiscal years 1984, 1985, 1986, 1987, and 1988, no State, including the State of Alaska, shall receive less than one-half of 1 per centum of the total apportionment for the Interstate System under section 104(b)(5)(A) of title 23, United States Code. Whenever amounts made available under this subsection for the Interstate System in any State exceed the estimated cost of completing that State's portion of the Interstate System, and exceed the estimated cost of necessary resurfacing, restoration, rehabilitation, and reconstruction of the Interstate System within such State, the excess amount shall be eligible for ex penditure for those purposes for which funds apportioned under paragraphs (1), (2), and (6) of such section 104(b) may be expended.

(2) Subsection (g) of section 144 of title 23, United States Code, is amended as follows:

"(g) Of the amount authorized per fiscal year, for each of the fiscal years ending September 30, 1983, September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987, all but \$300,000,000 for fiscal years 1983, 1984, 1985, 1986, and 1987 shall be apportioned as provided in subsection (e) of this section; \$300,000,000 for fiscal years 1983, 1984, 1985, 1986, and 1987 of the amount authorized shall be available for obligation on the date of each such apportionment in the same manner and to the same extent as the sums apportioned on such date except that the obligation of such sums shall be at the discretion of the Secretary and shall be only for projects for those highway bridges the replacement and rehabilitation cost of each of which is more than \$10,000,000 and for any project for a highway bridge replacement or rehabilitation cost of which is less than \$10,000,000 if such cost is at least twice the amount apportioned to the State in which such bridge is located under subsection (e) of this section for the fiscal year in which application is made for a grant for such bridge. Not less than 15 per centum of the amount apportioned to each State in a fiscal year shall be expended for projects to replace or rehabilitate bridges located on public roads, other than those bridges on public roads functionally classified as arterials or major collectors. The Secretary after consultation with State and local officials may, with respect to a State, reduce the requirement for expenditure for bridges not on public roads functionally classified as arterials or major collectors when he determines that such State has inadequate needs to justify such expenditure."

(d) Of the sums apportioned to each State under subsections (a)(1), (a)(2), and (a)(3) of this section, beginning with fiscal year 1984, not less than 60 per centum of such program funds shall be expended by the States on projects for resurfacing, restoring, rehabilitating, and reconstructing existing highway facilities for the purpose of preseving or enhancing the operational integrity, efficiency, and safety of such existing highways unless the State certifies to the Secretary that such percentage of funds are in excess of the resurfacing, restoring, rehabilitating, and reconstructing needs of existing highways in the State and the Secretary accepts such certification.

#### DISCRETIONARY BRIDGE CRITERIA

Sec. 204. The Secretary of Transportation shall develop a selection process for discretionary bridges authorized to be funded under section 144(g) of title 23, United States Code, and shall propose and issue a final regulation no later than six months after the date of enactment of this Act, including a formula resulting in a rating factor based on the following criteria for such process. Such criteria shall give funding priority to those discretionary bridges already eligible under section 144(g) of title 23, United States Code. Eligible bridges after the issuance of a final regulation shall only include those with a rating factor of one hundred or less, based on a scale of zero to infinity. The criteria for such additional bridges which the Secretary shall consider

- (1) sufficiency rating computed as illustrated in appendix A of the Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation's Bridges, USDOT/FHWA (latest edition);
- (2) average daily traffic using the most current value from the national bridge inventory data;
  - (3) average daily truck traffic;
  - (4) defense highway system status;
- (5) the State's unobligated balance of funds received under section 144 of title 23, United States Code, and the total funds received under section 144 of title 23, United States Code;
  - (6) total project cost; and
- (7) special consideration should be given to bridges closed to all traffic or restricted to loads less than ten tons. Other unique considerations and the need to administer the program from a balanced national perspective should also be considered.

# INTERSTATE SYSTEM RESURFACING APPORTIONMENT

SEC. 205. (a) Section 104(b)(5)(B) of title 23, United States Code, is amended (1) by striking the number "55" and inserting in lieu thereof "60" and (2) by striking the number "45" and inserting in lieu thereof "40".

(b)(1) The Secretary of Transportation shall make a full and complete study regarding the procedures for distributing Federal financial assistance for resurfacing, restoring, rehabilitating, and reconstructing routes on the Interstate System in order to maintain a high level of transportation service. The study shall analyze current conditions and factors including, but not limited to, volume and mix of traffic, weight and size of vehicles, environmental, geographical, and meteorological conditions in various States, and other pertinent factors that can be utilized to determine the most equitable and efficient method of apportioning available Interstate 4R funds to the several States. In conducting the study the Secretary shall consider such criteria as need, national importance, impact on individual State highway programs, structural and operational integrity, and any other relevant criteria, to determine the most equitable method of distribution.

(2) In conducting this study the Secretary shall consult with other agencies of the Federal Government, the States and their political subdivisions, and other interested private organizations, groups, and individuals.

(3) The Secretary shall report to Congress not later than six months after the date of enactment of this section the results of such study together with recommendations for necessary legislation.

# INTERSTATE SYSTEM RESURFACING AUTHORIZATION

SEC. 206. Section 105 of the Federal-Aid Highway Act of 1978 is amended to read as follows: "In addition to any funds authorized to be appropriated, there is authorized to be appropriated out of the Highway Trust Fund, not to exceed \$175,000,000 per fiscal year for each of the fiscal years ending September 30, 1980, and September 30, 1981, not to exceed \$275,000,000 for the fiscal year ending September 30, 1982, not to exceed \$800,000,000 for the fiscal year ending September 30, 1983, not to exceed \$1,800,000,000 for the fiscal year September 30, 1984, not to ending exceed \$2,400,000,000 for the fiscal year ending 30, 1985, September not to exceed \$2,800,000,000 for the fiscal year September 30, 1986, not to \$3,200,000,000 for the fiscal year ending September 30, 1987, and not to \$3,400,000,000 for the fiscal year exceed ending September 30, 1988. Such sums shall be obligated for projects for resurfacing, restoring, rehabilitating, and reconstructing routes of the Interstate System designated under sections 103 and 139(c) of title 23, States Code (other than those on toll roads not subject to a Secretarial agreement provided for in section 105 of the Federal-Aid Highway Act of 1978), except that where a State certifies to the Secretary that any part of such sums are in excess of the needs of such State for resurfacing, restoring, re-habilitating, and reconstructing the Interstate System and the Secretary accepts such certification, such State may transfer sums apportioned to it under section 104(b)(5)(B) to its apportionment under section 104(b)(1) of title 23, United States Code. Such sums may also be obligated for projects for resur-

facing, restoring, rehabilitating, and reconstructing a toll road which has been designated as a part of the Interstate System if an agreement satisfactory to the Secretary of Transportation has been reached with the State highway department and any public authority with jurisdiction over such toll road prior to the approval of such project that the toll road will become free to the public upon the collection of tolls sufficient to liquidate the cost of the toll road or any bonds outstanding at the time constituting a valid lien against it, and the cost of maintenance and operation and debt service during the period of toll collections. The agreement referred to in the preceding sentence shall contain a provision requiring that if, for any reason, a toll road receiving Federal assistance under this section does not become free to the public upon collection of sufficient tolls, as specified in the preceding sentence. Federal funds used for projects on such toll road pursuant to this section shall be repaid to the Federal Treasury."

#### INTERSTATE SUBSTITUTION AUTHORIZATION

SEC. 207. (a) In addition to any funds authorized to be appropriated out of the general fund, there is authorized to be appropriated, out of the Highway Trust Fund, for substitute highway projects under section 103(e)(4) of title 23, United States Code, \$500,000,000 for the fiscal year ending September 30, 1983, \$600,000,000 for the fiscal year ending September 30, 1984, \$600,000,000 for the fiscal year ending September 30, 1985, and \$650,000,000 for the fiscal year ending September 30, 1986, and \$650,000,000 for the fiscal year ending September 30, 1987. Funds authorized to carry out this section shall be available for obligation in the same manner and to the same extent as if such sums were apportioned under chapter 1 of title 23, United States

(b)(1) The first sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which is within an urbanized area or which passes through and connects urbanized areas within a State and".

(2) The second sentence of section 103(e)(4) of title 23, United States Code is amended by striking "which will serve the urbanized area and the connecting nonurbanized area corridor from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the urbanized area or area to be served, and which are submitted by the Governor of the State in which the withdrawn route was located." and inserting in lieu thereof, "which will serve the area or areas from which the interstate route or portion thereof was withdrawn, which are selected by the responsible local officials of the area or areas to be served, and which are selected by the Governor or the Governors of the State or the States in which the withdrawn route was located if the withdrawn route was not within an urbanized area or did not pass through and connect urbanized areas, and which are submitted by the Governors of the States in which the withdrawn route was located."

(c)(1) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by inserting in the second sentence after the words "approved by Congress," the words "or up to and including the approved 1983 interstate cost estimate,

whichever is earlier,".

(2) The second sentence of section 103(e)(4) of title 23, United States Code, is

amended by striking in the second sentence the phrases "the date of enactment of the Federal-Aid Highway Act of 1976 or" and "whichever is later, and in accordance with the design of the route or portion thereof that is the basis of the latest cost esti-

(3) The second sentence of section 103(e)(4) of title 23, United States Code, is amended by inserting in the second sentence after the words "approval of each substitute project under this paragraph," the words "or the date of approval of the 1983 interstate cost estimate, whichever is earli-

(d) Section 103(e)(4) of title 23, United States Code, is amended by adding at the end of such subsection the following: "Any route or segment thereof added to the Interstate System after March 7, 1978, pursuant to specific legislation will not be eligible for withdrawal and substitution under this subsection."

(e) The first sentence of section 120(d) of title 23, United States Code, is amended by inserting after the words "traffic control signalization," the following: "including traffic control signalization projects under section 103(e)(4) of this title, notwithstanding the provisions of the fifth sentence of section 103(e)(4),".

#### FEDERAL-AID PRIMARY PROGRAM

SEC. 208. (a) Section 104(b)(1) of title 23, United States Code, is amended by (1) striking out "and priority primary routes" in the first sentence, and by (2) striking out "(other than the District of Columbia)" in the second sentence.

(b) Section 147 of title 23, United States

Code, is repealed.

(c) Effective on October 1, 1982, any unobligated amount authorized under subsection (c) of section 104 of the Federal-Aid Highway Act of 1978 shall be apportioned by the Secretary of Transportation in the same manner as funds apportioned under section 104(b)(1) of title 23, United States Code, for the Federal-aid primary system, and shall thereafter remain available for obligation for the same period as such apportionment.

(d) The analysis of chapter 1 of title 23 is

amended by deleting
"147. Priority Primary Routes."

and inserting in lieu thereof "147. Repealed.".

# FEDERAL-AID URBAN PROGRAM

SEC. 209. Section 103 of title 23, United States Code, is amended by deleting subsection (d) and inserting in lieu thereof the following:

"(d) The Secretary may approve Federalaid urban programs in urban areas which programs shall be selected by the appropriate local officials so as to serve the goals and objectives of the community, with the concurrence of the State highway department, as provided in section 105 of this title. The programs shall facilitate transportation in the urban area and include projects to: reduce congestion and improve the flow of traffic on arterial and collector routes, aid integration of different transportation modes to and from airports and other terminals and business districts, support clean air and energy conservation objectives, make highway capital improvements, improve highway safety, eliminate safety hazards and roadside obstacles, implement transportation systems management activities and serve other national goals and objectives. All public roads in urban areas are eligible except those on the primary system and the Interstate System. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to urban programs, except those provisions determined by the Secretary to be inconsistent with this subsection. The Secretary shall not waive the applicability of the planning requirements of section 134 of this title.".

#### FEDERAL-AID RURAL PROGRAM

SEC. 210. Section 103 of title 23, United States Code, is amended by deleting subsection (c) and inserting in lieu thereof:

"(c) The Federal-aid rural program shall be selected by the State highway agencies and the appropriate local road officials in cooperation with each other, subject to approval by the Secretary as provided in subsection (f) of this section and section 105 of this title. In making such selections, the needs of agriculture roads, rural mail routes, public school bus routes, local rural roads, airport and water port access roads, and goods movement shall be considered. All public roads, except those on the primary system, the Interstate System, and those in urban areas are eligible. Projects to improve highway safety and nonurbanized public transportation projects, including facilities and technical assistance, are also eligible for assistance under this section. The applicable provisions of chapters 1 and 3 of this title, including provisions applicable to Federal-aid systems, shall apply to rural programs, except those provisions determined by the Secretary to be inconsistent with this subsection.".

#### TRANSFERABILITY

SEC. 211. Paragraphs (1) and (2) of subsection (d) of section 104 of title 23, United States Code, are amended by striking out "50" each place it appears and inserting in lieu thereof at each such place "100".

# HIGHWAY SAFETY IMPROVEMENT PROGRAM

SEC. 212. (a) Section 151 of title 23, United States Code, is amended to read as follows: "8 151. Highway safety improvement program

"(a) The Secretary, in cooperation with the States, shall establish a highway safety improvement program for projects on any public road or street in rural or urban areas. Assistance shall be available under this program for highway safety improvement projects, as defined in subsection (a) of section 101 of this title; for railway-highway crossing projects as provided for in section 130 of this title; for the implementation of highway-related safety requirements and guidelines issued by the Secretary under section 402 of this title; and for the development, implementation, and evaluation of the highway safety improvement program required under subsection (b) of this section.

"(b) Each State shall develop and implement on a continuing basis a highway safety improvement program including procedures for the planning, implementation, and evaluation of highway safety improvement projects on all highways, with the specific objective of reducing the number and severity of highway traffic accidents. Each State shall have a process for collecting, maintaining, and analyzing accident, traffic, and highway data; for conducting engineering studies of hazardous locations, sections and elements, for assigning priorities to the various types of hazards identified; for implementing safety improvement projects in accordance with the priorities developed; and for the evaluation of the safety benefits obtained

"(c) Of the funds authorized to carry out this section each State shall expend 35 per centum of the sums apportioned for projects under section 203 of the Highway Safety Act of 1973 unless the State requests the Secretary to waive this minimum and the Secretary finds other safety projects are of a higher priority.

"(d)(1) Funds authorized to carry out this section shall be available for expenditure for projects on any public road (other than

the Interstate System).

(2) The Federal share payable on any project under this section shall not exceed 90 per centum of the cost thereof except that the Federal share of safety improvement projects for the elimination of hazards of rail-highway crossings shall not exceed that as provided in section 120(d) of this title.

"(3) The unobligated balance of contract authority established prior to enactment of this section for carrying out section 402 by the Federal Highway Administration shall remain available for obligation as provided prior to enactment of this section and shall lapse not later than September 30, 1984

"(e) Funds authorized to be appropriated to carry out this section shall be apportioned to the States as follows: 60 per centum in the ratio which the population of each State bears to the total population of all States, and 40 per centum in the ratio which the public road mileage in each State bears to the total public road mileage in all States. The annual apportionment for each State shall not be less than one-half of 1 per centum of the total apportionment. Such sums shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under section 104(b)(1), except that the Secretary is authorized to waive such provisions of this title that he deems inconsistent with the purposes of this section.

"(f) In any State wherein the State is without legal authority to construct or maintain a project under this section, such State shall enter into a formal agreement for such construction or maintenance with the appropriate local officials of the county or municipality in which such project is lo-

"(g) One-half of 1 per centum of funds authorized for carrying out this section shall be made available to the Secretary of the Interior, who shall exercise the responsibilities assigned to States under subsection (b) of this section in carrying out this section on Indian reservations. Such funds shall be subject to a deduction of not to exceed 5 per centum for the necessary costs of administering the provisions of this section.

"(h) Each State shall report to the Secretary of Transportation not later than December 30 of each year, on the progress being made to implement the highway safety improvement program and the effectiveness of safety improvements in reducing the number and severity of accidents. The Secretary of Transportation shall submit a report to the Congress not later than April 1 of each year on the progress being made by the States in implementing the highway

safety improvement program.".
(b) Section 152 of title 23, United States

Code, is repealed.

The analysis of chapter 1 of title 23, United States Code, is amended by deleting

"151. Pavement marking demonstration program.", and "152. Hazard elimination program.", and inserting in lieu thereof

"151. Highway safety improvement pro-program.", and

"152. Repealed."

(d) Section 203(e) of the Highway Safety Act of 1973 (Public Law 93-87), as amended by the Congressional Reports Elimination Act of 1980 (Public Law 96-470), is repealed.

#### HIGHWAY BRIDGE REPLACEMENT AND REHABILITATION PROGRAM APPORTIONED FUNDS

Sec. 213. (a) Subsection (e) of section 144 of title 23, United States Code, is amended to read as follows:

'(e) Funds authorized to carry out this section shall be apportioned among the several States on October 1 of the fiscal year for which authorized according to the lowing formula: All deficient bridges will be divided into four categories: (1) Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, eligible for replacement, (2) Federal-aid system bridges, and bridges on public roads functionally classified as arterials or major collectors, eligible for rehabilitation, (3) off-system bridges, and bridges on public roads not functionally classified as arterials or major collectors eligible for replacement, and (4) off-system bridges and bridges on public roads not functionally classified as arterials or major collectors eli-gible for rehabilitation. The square footage of deficient Federal-aid system bridges, or bridges on public roads functionally classified as arterials or major collectors, both those eligible for replacement and those eligible for rehabilitation, shall be multiplied by a factor of two. The square footage of deficient bridges in each category shall be multiplied by the average national unit cost, on a State-by-State basis, as determined by the Secretary; and the total cost of each State divided by the total cost of the Nation's deficient bridges shall yield the apportionment factors. No State shall receive more than 9.25 per centum or less than 0.25 per centum of the total apportionment for any one fiscal year. The Secretary shall make these determinations based upon the latest available data, which shall be updated annually. Funds authorized to carry out this section which are apportioned under this section shall be available for expenditure for three years after the close of the fiscal year for which they are authorized."

(b) Notwithstanding any other provision of law or Federal regulation, any new bridge which is to be constructed pursuant to section 144 of title 23, United States Code, in tandem with any existing major structure built after June 28, 1969, with no more than 2.7 miles of highway between them need not carry a roadway width in excess of 69 feet.

## FEDERAL LANDS HIGHWAYS PROGRAM

SEC. 214. (a) Section 202 of title 23, United States Code, is amended to read as follows:

"Sec. 202. Allocations.—(a) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest highways according to the relative needs of the various elements of the national forest system as determined by the Secretary, taking into consideration the need for access as identified by the Secretary of Agriculture through renewable resource and land use planning, and the impact of such planning on existing transportation facilities.

"(b) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for forest development roads and trails according to the relative needs of the various national forests. Such allocation shall be consistent with the renewable resource and land use planning for the various national forests.

(c) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for public lands highways among those States having unappropriated or unreserved public lands, nontaxable Indian lands or other Federal reservations, on the basis of need in such States, respectively, as determined by the Secretary upon application of the State highway departments of the respective States. The Secretary shall give preference to those projects which are significantly impacted by Federal land and resource management activities.

'(d) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for park roads and parkways each according to the relative needs of the various elements of the national park system, taking into consideration the need for access as identified through land use planning and the impact of such planning on existing transportation

facilities

"(e) On October 1 of each fiscal year, the Secretary shall allocate the sums authorized to be appropriated for such fiscal year for Indian reservation roads according to the relative needs of the various reservations as jointly identified by the Secretary and the Secretary of the Interior.'

(b) Section 204 of title 23, United States Code, is amended to read as follows:

"Sec. 204. Federal Lands Highways Program .- (a) Recognizing the need for all Federal roads which are public roads to be treated under the same uniform policies as roads which are on the Federal-aid systems, there is established a coordinated Federal lands highways program which shall consist of the forest highways, public lands highways, park roads, parkways, and Indian reservation roads as defined in section 101 of

title 23. United States Code.

'(b) Funds available for forest highways and public lands highways shall be used by the Secretary to pay for the cost of construction and improvement thereof. Funds available for park roads, parkways, and Indian reservation roads shall be used by the Secretary of the Interior to pay for the cost of construction and improvement thereof. In connection therewith, the Secretary and the Secretary of the Interior, as appropriate, may enter into construction contracts and such other contracts with a State, or civil subdivision thereof as deemed advisable. In the case of Indian reservation roads, Indian labor may be employed in such construction and improvement under such rules and regulations as may be prescribed by the Secretary of the Interior.

"(c) Before approving as a project on an Indian reservation road or bridge any project on a Federal-aid system in a State, the Secretary must determine the obligation of funds for such project is supplementary to and not in lieu of the obligation, for projects on Indian reservation roads and bridges, of a fair and equitable share of funds apportioned to such State under sec-

tion 104 of this title.

"(d) Cooperation of States, counties, or other local subdivisions may be accepted in construction and improvement, and any funds received from a State, county, or local subdivision shall be credited to appropriations available for the class of Federal lands highways to which such funds were contrib-

"(e) Construction of each project shall be performed by contract awarded by competitive bidding, unless the Secretary or the Secretary of the Interior shall affirmatively find that, under the circumstances relating to such project, some other method is in the public interest.

"(f) All appropriations for the construction and improvement of each class of Federal lands highways shall be administered in conformity with regulations and agreements jointly approved by the Secretary and the Secretary of the appropriate Federal land managing agency.

(g) The Secretary shall transfer to the Secretary of Agriculture from appropria-tions for forest highways such amounts as may be needed to cover necessary administrative expenses of the Forest Service in connection with forest highways.

"(h) Funds available for each class of Federal lands highways shall be available for adjacent vehicular parking areas and scenic

easements.'

(c)(1) The definition of "park roads and trails" in section 101(a) of title 23, United States Code, is amended to read as follows: "The term 'park road' means a public road that is located within or provides access to an area in the national park system."

(2) The term "Indian reservation roads and bridges" in section 101(a) of title 23, United States Code, is amended to read as "Indian reservation roads"; and the defini-tion of such term is amended by deleting the words "and bridges" each place they appear and by inserting the word "public" before "roads" the first place it appears

(3) Section 101(a) of title 23, United States Code, is amended by adding after the defini-tion of the term "forest development roads and trails" the following new definition: "The term 'Federal lands highways' in accordance with section 204 of this title means forest highways, public lands highways, park roads, parkways, and Indian reservation roads which are public roads."

(d) Sections 206, 207, 208, 209, and 214(c) of title 23, United States Code, are repealed.

(e) The analysis of chapter 2 of title 23, United States Code, is amended by deleting the following headings:

"202. Apportionment or allocation.";

"204. Forest highways."

"206. Park Roads and trails.";

"207. Parkways.";

"208. Indian reservation roads."; and

"209. Public lands highways." and inserting in lieu thereof:

"202. Allocations.";

"204. Federal Lands Highways Program.";

"206. Repealed.";
"207. Repealed.";

"208. Repealed."; and "209. Repealed.".

(f) Section 203 of title 23, United States Code, is amended by striking out the term 'park roads and trails" wherever it appears and inserting in lieu thereof the term "park road".

# PROGRAM CONSOLIDATION

Sec. 215. (a)(1) Sections 143, 148, 155, and 156 of title 23, United States Code, are repealed.

(2) Section 163 of the Federal-Aid Highway Act of 1973, as amended, is repealed.

(b)(1) Any unobligated balance of contract authority established by any Act prior to enactment of subsection (a) of this section for carrying out sections 143 and 148 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unexpended balance of sums appropriated prior to enactment of subsection

(a) of this section for carrying out sections 155 and 156 of title 23, United States Code, and section 163 of the Federal-Aid Highway Act of 1973, as amended, shall remain available for expenditure under the conditions applicable prior to such enactment.

(3) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out sections 148, 155, and 156 of title 23, United States Code, is rescinded.

(c) The analysis of chapter 1. United

States Code, is amended by striking

"143. Economic growth center development highways.'

and inserting in lieu thereof

"143. Repealed."; by striking

"148. Development of a national scenic and recreational highway.'

and inserting in lieu thereof

"148. Repealed.":

by striking

"155. Access highways to public recreation areas on certain lakes.

and inserting in lieu thereof

"155. Repealed.": and by striking

"156. Highways crossing Federal projects." and inserting in lieu thereof

"156. Repealed.".

#### CARPOOL AND VANPOOL PROJECTS

SEC. 216. (a) Section 120(d) of title 23. United States Code, is amended by inserting before the words "may amount to 100 per centum" the words "or commuter carpooling and vanpooling".

(b) The Secretary of Transportation is authorized and directed to expend such sums as are necessary out of the administrative funds authorized by subsection (a) of section 104, title 23, United States Code, to carry out the provisions of subsection (d) of section 126 of the Federal-Aid Highway Act of 1978.

# PUBLIC TRANSPORTATION

SEC. 217. Section 142 of title 23, United States Code, is amended as follows:

(1) In subsection (a)(1) delete in the first sentence the words "bus lanes" and insert in lieu thereof the following: "high occupancy vehicle lanes" and delete the words "bus and other" and insert in lieu thereof the fol-

lowing: "high occupancy vehicle and".
(2) In subsection (b) delete the word "bus" and insert in lieu thereof "high occupancy

vehicle".

(3) In subsection (f) delete the words 'public mass transportation systems" and insert in lieu thereof "high occupancy vehicles".

## FRINGE AND CORRIDOR PARKING

SEC. 218. Section 137 of title 23, United States Code, is amended by inserting the

following new subsection (f):

"(f)(1) The Secretary may approve for Federal financial assistance from funds apportioned under section 104(b)(5)(B) of this title, projects for designating existing facilities, or for acquisition of rights of way or construction of new facilities, for use as preferential parking for carpools, provided that such facilities (1) are located outside of a central business district and within an interstate highway corridor, and (2) have as their primary purpose the reduction of vehicular traffic on the interstate highway.

(2) Nothing in this subsection, or in any rule or regulation issued under this subsection, or in any agreement required by this subsection, shall prohibit (1) any State, po-

litical subdivision, or agency or instrumentality thereof, from contracting with any person to operate any parking facility designated or constructed under this subsection, or (2) any such person from so operating such facility. Any fees charged for the use of any such facility in connection with the purpose of this subsection shall not be in excess of the amount required for operation and maintenance, including compensation to any person for operating the facility.

"(3) For the purposes of this subsection, the terms 'facilities' and 'parking facilities' are synonymous and shall have the same meaning given 'parking facilities' in subsection (c) of this section".

#### EMERGENCY RELIEF

SEC. 219. (a)(1) The first sentence of subsection (a) of section 125 of title 23, United States Code, is amended by striking the first sentence thereof and inserting in lieu there-of the following: "An emergency fund is authorized for expenditure by the Secretary, subject to the provisions of this section and section 120 of this title, for the repair or reconstruction of highways, roads, and trails which the Secretary shall find have suffered serious damage as the result of (1) natural disaster over a wide area such as by floods, hurricanes, tidal waves, earthquakes, severe storms, or landslides, or (2) catastrophic failures from any external cause, in any part of the United States. In no event shall funds be used pursuant to this section for the repair or reconstruction of bridges which have been permanently closed to all vehicular traffic by the State or responsible local official because of imminent danger of collapse due to structural deficiencies or physical deterioration.".

(2) Subsection (a) of section 125 of title 23. United States Code, is further amended by inserting in the second sentence, as that sentence read prior to the amendments made by paragraph (1) of this subsection, after the word "appropriated" the words "from the Highway Trust Fund".

(b) Notwithstanding any other provision of law, all expenditures made under section 125 of title 23, United States Code, prior to the fiscal year ending September 30, 1978. are authorized to have been appropriated from the Highway Trust Fund.

(c) Subsection (a) of section 125 of title 23, United States Code, is amended by inserting in the second sentence after the words "after September 30, 1976," the words "and not more than \$100,000,000 is authorized to be expended in any one fiscal year commencing after September 30, 1980,

(d) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the period at the end of the first sentence, inserting a colon in lieu thereof, and by adding the following: "Provided, That obligations for projects under this section, including those on highways, roads, and trails mentioned in subsection (c) of this section, resulting from a single natural disaster or a single catastrophic failure shall not exceed \$30,000,000 in any State.'

(e) The amendments made by subsection (d) of this section shall apply to natural disasters or catastrophic failures which the Secretary finds eligible for emergency relief subsequent to the date of enactment of this section.

(f) Subsection (f) of section 120 of title 23, United States Code, is amended to read as

"(f) The Federal share payable on account of any repair or reconstruction provided for by funds made available under section 125

of this title shall not exceed 75 per centum of the cost thereof: Provided, That the Federal share payable on account of any repair or reconstruction of forest highways, forest development roads and trails, park roads and trails, parkways, public lands highways, public lands development roads and trails, and Indian reservation roads may amount to 100 per centum of the cost thereof. The total cost of a project may not exceed the cost of repair or reconstruction of a compa-rable facility. As used in this section with respect to bridges and in section 144 of this title, 'a comparable facility' shall mean a facility which meets the current geometric and construction standards required for the types and volume of traffic which such facility will carry over its design life."

(g) All obligations for projects resulting from a natural disaster or catastrophic failure which the Secretary finds to be eligible for emergency relief subsequent to the date of enactment of this subsection shall provide for the Federal share required by subsection (f) of section 120 of title 23, United States Code, as amended by this section.

(h)(1) Subsection (b) of section 125 of title 23, United States Code, is amended by striking the words "the Federal-aid highway systems, including the Interstate System" and by inserting in lieu thereof the words "the Interstate System, the Primary System, and on any routes functionally classified as arterials or major collectors," in the two places the stricken words appear.

(2) Subsection (c) of section 125 of title 23, United States Code, is amended by striking the words "on any of the Federal-aid highway systems" and inserting in lieu thereof the words "routes functionally classified as arterials or major collectors".

#### BICYCLE TRANSPORTATION PROGRAM

Sec. 220. Section 217 of title 23, United States Code is amended—

(1) by striking in the first sentence of subsection (a), the words "and the multiple use of highway rights-of-way" and "on or in conjunction with highway rights-of-way":

(2) by inserting after the first sentence in subsection (a) the following: "Federal-aid highway projects may include nonconstruction programs or projects which can reasonably be expected to enhance the safety and use of bicycles.";

(3) by striking out in subsection (b) the words "that provided in section 120 of this title" and inserting in lieu thereof "100 per centum"; and

(4) by striking out subsection (e).

# HIGHLAND SCENIC HIGHWAY

SEC. 221. Section 161(f) of the Federal-Aid Highway Act of 1973, as amended by section 21 of Public Law 96-106, is further amended to read as follows:

"(f) The Highland Scenic Highway as authorized by subsection (a) of this section and all associated lands and rights-of-way shall be managed as part of the Monongahela National Forest for scenic and recreational purposes. Vehicle use shall be confined to passenger cars, recreational vehicles, and limited truck traffic to the extent such use is compatible with the purpose for which the highway was constructed. Commercial use by trucks shall be limited and controlled by permit."

## ALLOCATION OF URBAN FUNDS

SEC. 222. Section 150 of title 23, United States Code, is amended by adding the following sentence at the end thereof: "Funds allocated to an urbanized area under the provisions of this section may, at the request of the Governor and upon approval of

the appropriate local officials of the area and the Secretary, be transferred to the allocation of another such area in the State or to the State for use in any urban area.".

#### CERTIFICATION ACCEPTANCE

SEC. 223. (a) Subsection 117(a) of title 23, United States Code, is amended by striking out "projects on Federal-aid systems, except the Interstate System," and inserting in lieu thereof "Federal-aid projects on systems other than the Interstate System" and by adding at the end thereof the following new sentence: "Notwithstanding the above, the Secretary may discharge any of his responsibilities under this title relative to the physical construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects using the procedures of this section.".

(b) Subsection 117(b) is amended by striking out "make a final inspection of each subject project upon its" and inserting in lieu thereof "establish procedures for the inspection of such projects upon".

(c) Subsection 117(f)(1) is amended by striking out the words "the Federal-aid secondary system," when they first appear and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System," and by striking out "all projects on the Federal-aid secondary system" and inserting in lieu thereof "such projects".

(d) Subsection 117(f)(3) is revised to read as follows:

"(3) Paragraphs (1) and (2) of this subsection shall not be construed to relieve the Secretary of his obligation to establish procedures for the inspection of such projects upon completion and to require an adequate report of the estimated and actual cost of construction as well as other information as

he determines necessary.".

(e) Subsection 105(b) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Sectetary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects".

(f) Subsection 106(b) of title 23, United States Code, is amended to read as follows:

"(b) In addition to the approval required under subsection (a) of this section, proposed specifications for projects for construction, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation and reconstruction projects, except in States where all public roads and highways are under the control and supervision of the State highway department, shall be determined by the State highway department and the appropriate local road officials in cooperation with each other.".

(g) Subsection 112(e) of title 23, United States Code, is amended by striking out "projects on the Federal-aid secondary system" and inserting in lieu thereof "projects, as defined by the Secretary and which are not on the Interstate System except for the construction phase of Interstate resurfacing, restoration, rehabilitation, and reconstruction projects,".

# DEFENSE ACCESS ROAD

SEC. 224. Section 210(c) of title 23, United States Code, is amended by striking "Not exceeding \$5,000,000 of any funds appropriated under the Act approved October 16, 1951 (65 Stat. 422)", and inserting in lieu

thereof "Funds appropriated for defense maneuvers and exercises".

#### MAINTENANCE

SEC. 225. (a) Subsection (a) of section 116 of title 23, United States Code, is amended by striking the second sentence.

(b) Subsection (b) of section 116 of title 23, United States Code, is amended by striking "constructed on the Federal-aid secondary system or within a municipality,".

(c) The second sentence of subsection (c) of section 116 of title 23, United States Code, is amended to read as follows: "If, within ninety days after receipt of such notice, such project has not been put in proper condition of maintenance, the Secretary shall withhold approval of further projects of all types on one or more of the Federal-aid systems or programs in the State highway district, municipality, county, other political or administrative subdivision of the State, or the entire State, in which such project shall be located, as the Secretary deems most appropriate until such project shall have been put in proper condition of maintenance."

(d) Section 109 of title 23, United States Code, is amended by striking subsection (m) and by relettering subsection (n) as (m).

(e) Section 116 of title 23, United States Code, is amended by adding subsection (f) as follows:

"(f) The Secretary shall issue guidelines describing the criteria applicable to the Interstate System in order to insure that the condition of these routes is maintained at the level required by the purposes for which they were designed.".

(f) Section 119 of title 23, United States Code, is amended by striking subsection (b).

(g) Section 116 of title 23, United States Code, is amended by adding subsection (g) as follows:

'(g) Not later than one year after the date of issuance of initial guidelines under sub-section (f) of this section each State shall have a program for the Interstate System in accordance with such guidelines. Each State shall certify on January 1 of each year that it has such a program and the Interstate System is maintained in accordance with the program. If a State fails to certify as required or if the Secretary determines a State is not adequately maintaining the Interstate System in accordance with such program, the next apportionment of funds to such State for the Interstate System shall be reduced by amounts equal to 10 per centum of the amount which would otherwise be apportioned to such State under section 104 of this title. If, within one year from the date the apportionment for a State is reduced under this subsection, the Secretary determines that such State is maintaining the Interstate System in accordance with the guidelines the apportionment of such State shall be increased by an amount equal to the reduction. If the Secretary does not make such a determination within such one year-period, the amount withheld shall be reapportioned to all other eligible States."

## CONSTRUCTION

SEC. 226. (a) Subsection (a) of section 114 of title 23, United States Code is amended to read as follows:

"(a) The construction of any highways or portions of highways located on a Federal-aid system or under a Federal-aid program shall be undertaken by the respective State highway departments or under their direct supervision. The construction work and labor in each State shall be in accordance

with the laws of that State and applicable Federal laws. Except as provided in section 117 of this title, the Secretary shall establish procedures for the inspection and approval of such construction. Construction may begin as soon as funds are available pursuant to subsection (a) of section 118 of this title. The State highway department shall not erect any informational signs other than official traffic control devices conforming with standards developed by the Secretary on any project where actual construction is in progress and visible to highway users."

(b) Subsection (a) of section 113 of title 23, United States Code, is amended to read as follows: "The Secretary shall take such action as may be necessary to insure that all laborers and mechanics employed by contractors or subcontractors on the construction work performed on highway projects on the Federal-aid systems, the primary as well as its extensions in urban areas, and the Interstate System, or under the Federalaid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs, shall be paid wages at rates not less than those prevailing on the same type of work on similar construction in the immediate locality as determined by the Secretary of Labor in accordance with the Act of August 30, 1935, known as the Davis-Bacon Act (40 U.S.C. 267a)."

(c) Subsection (c) of section 121 of title 23, United States Code is amended by striking the words "following inspections".

#### RESEARCH AND PLANNING

SEC. 227. (a) Subsection (c) of section 307, title 23, United States Code, is amended by adding paragraph (5) as follows:

- "(5) The sums provided pursuant to paragraph (2) of this subsection shall be combined and administered by the Secretary as a single fund which shall be available for obligation for the same period as funds apportioned under section 104(b)(1) of this title."
- (b) Subsection (c)(2) of section 307, title 23, United States Code, is amended by strik-"1964" and inserting in lieu thereof "1983", and by striking "section 104" and inserting in lieu thereof "sections 104 and 144"
- (c) Section 120 of title 23, United States Code, is amended by adding a subsection (i) as follows:
- "(i) The Federal share payable on account of any project financed under section 307(c) of this title shall be 85 per centum, except that in the case of any State containing nontaxable Indian lands, individual and tribal, and public domain lands (both reserved and unreserved) exclusive of national forests and national parks and monuments. exceeding 5 per centum of the total area of all lands therein, the Federal share shall be increased by a percentage of the remaining cost equal to the percentage that the area of all such lands in such State is of its total area, except that such Federal share payable on any project in any State shall not exceed 95 per centum of the total cost of any such project.".

(b) Section 307(c)(1) of title 23, United States Code, is amended by adding in the last sentence after "highways and highway systems" the words "and for study, research and training on engineering standards and construction materials, including evaluation and accreditation of inspection and test-

#### NONDISCRIMINATION

SEC. 228. (a) The first and third sentences of subsection (a) of section 140 of title 23, United States Code, are amended by striking the words "or national origin" and inserting in lieu thereof the words "national origin or sex"

(b) Section 140 of title 23. United States Code, is amended by adding new subsection

(c) as follows:

- "(c) The Secretary, in cooperation with any other department or agency of the Government, State agency, authority, association, institution, corporation (profit or nonprofit), or any other organization or person, is authorized to develop, conduct, and administer training programs and assistance programs in connection with any program under this title in order that minority businesses may achieve proficiency to compete. on an equal basis, for contracts and subcontracts. Whenever apportionments are made under subsection 104(a) of this title, the Secretary shall deduct such sums as he may deem necessary, not to exceed \$10,000,000 per fiscal year, for the administration of this subsection. The provisions of section 3709 of the Revised Statute, as amended (41 U.S.C. 5), shall not be applicable to contracts and agreements made under the authority herein granted to the Secretary notwithstanding the provisions of 41 U.S.C.
- (c) The title of section 140 of title 23, United States Code, is amended to read:

"§ 140. Nondiscrimination"

and the analysis of chapter 1 of title 23, United States Code, is amended by striking

"140. Equal employment opportunity." and inserting in lieu thereof

"140. Nondiscrimination.".

#### INTERAGENCY AGREEMENTS

SEC. 229. (a) Chapter 1 of title 23, United States Code, is amended by adding after section 156 the following new section:

# "§ 157. Interagency agreements

"Not later than one hundred and eighty days after the date of enactment of this section, the Secretary shall enter into agreements with the Secretaries of the Departments of Interior and Defense, the Administrator of the Environmental Protection Agency, and the heads of such other Federal departments, agencies, and instrumentalities as the Secretary determines, to minimize, to the greatest extent possible, duplication, paperwork, and delays in the development and approval of projects under this title and any other provision of law relating to the Federal highway programs. Notwithstanding any other provision of law, such agreements shall provide that actions on applications or requests for permits, licenses, findings, and other approvals and determinations required for such projects will be fully coordinated by the Department of Transportation with the review process established under the National Environmental Policy Act of 1969, as amended, and, to the greatest extent practicable, that a decision with respect to each such application or request will be made contemporaneously with approval of the environmental impact statement, finding of no significant impact, or categorical exclusion required for such project, but in no event later than one hundred and eighty days after the date of approval of such environmental review document.

(b) The analysis of chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following:

"157. Interagency agreements.".

#### OBLIGATION LIMITATION AND ALLOCATION FORMULA

Sec. 230. (a) Notwithstanding any other provision of law, the total of all obligations for Federal-aid highways and highway safety construction programs for fiscal year 1983 shall not exceed \$12,000,000,000, for fiscal year 1984 shall not exceed \$12,800,000,000, for fiscal year 1985 shall not exceed \$13,600,000,000, for fiscal year 1986 shall not exceed \$14,500,000,000, and for fiscal year 1987 shall exceed not \$14,900,000,000. These limitations shall not apply to obligations for emergency relief under section 125 of title 23, United States Code, section 9 of the Federal-Aid Highway Act of 1981, and section 118 of the Union Station Redevelopment Act of 1981, No obligation constraints shall be placed upon any ongoing emergency project carried out under section 125 of title 23, United States

(b) For the fiscal years 1983, 1984, 1985, 1986, and 1987, the Secretary shall distribute the limitation imposed by subsection (a) by allocation in the ratio which sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to each State for such fiscal year bears to the total of the sums authorized to be appropriated for Federal-aid highways and highway safety construction which are apportioned or allocated to all the States for such fiscal

year.

(c) During the period October 1 through December 31, 1982, no State shall obligate more than 35 per centum of the amount distributed to such State under subsection (b), and the total of all State obligations during such period shall not exceed 25 per centum of the total amount distributed to all States under such subsection.

(d) Notwithstanding subsections (b) and

(c), the Secretary shall-

(1) provide all States with authority sufficient to prevent lapses of sums authorized to be appropriated for Federal-aid highways and highway safety construction which have been apportioned or allocated to a State, except in those instances in which a State indicates its intention to lapse sums apportioned under section 104(b)(5)(A) of title 23, United States Code;

(2) after August 1, 1983, August 1, 1984. August 1, 1985, August 1, 1986, and August 1, 1987, respectively, revise a distribution of the funds made available under subsection (b) if a State will not obligate the amount distributed during that fiscal year and redistribute sufficient amounts to those States able to obligate amounts in addition to those previously distributed during that fiscal year. In revising such distributions, the Secretary shall give priority to those States which, because of statutory changes under these amendments and under Public Law 97-134, have experienced substantial proportional reductions in their apportionments and allocations; and

(3) not distribute amounts authorized for administrative expenses and forest highways.

# CERTIFICATION OF STATE PROCEDURES

SEC. 231. (a) The Secretary of Transportation in cooperation with the State of Vermont shall carry out a project to demonstrate the feasibility of reducing the time and the cost required to complete highway projects, other than projects on the Interstate System, in areas that require improved access between rapidly growing suburban areas and established urban core areas, by extending the coverage of State certifica-tions under section 117(a) of title 23 of the United States Code, to any Federal law, regulation, or policy that applies to such

(b) In implementing this section, the Secretary shall review applications for projects submitted by the State of Vermont with respect to which the State agrees to assume the responsibility of the Secretary with regard to any such Federal law, regulation, or policy. The Secretary shall be deemed to have fulfilled his responsibility under such

law, regulation, or policy, provided that—
(1) the Secretary finds that the State has procedures which are sufficient to assure that the project will be carried out in accordance with the provisions of such law,

regulation, or policy;

(2) the State highway department is authorized and consents to accept the jurisdiction of the Federal courts in any suit brought to enforce any such Federal law or regulation; and

(3) the State highway department certifies that the project has been carried out in accordance with the procedures specified under subsection (b)(1) of this section.

(c) In carrying out the demonstration project authorized under this section, the Secretary may continue to discharge his responsibilities directly with respect to those laws, regulations, and policies for which he finds State procedures are not sufficient.

(d) In implementing this section, the Secretary shall consider the procedures devel-oped pursuant to section 141 of the Federal-Aid Highway Act of 1976, as amended, and shall encourage the State to carry out its responsibilities in cooperation with appropriate political subdivisions of the State.

(e) There is authorized to be appropriated out of the Highway Trust Fund to carry out the project authorized under this section a

sum not to exceed \$50,000,000.

(f) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(g) Not later than six months after the completion of such project, the Secretary shall submit a report to Congress which includes, but is not limited to, a description of the methods used to accomplish the project and the changes, if any, required to adopt expanded certification. The report should also contain recommendations for applying the methods to other highway projects, and any changes to existing law which may be necessary to permit more widespread use of expanded certification acceptance.

# ALASKA HIGHWAY

SEC. 232. (a) Subsection (a) of section 218 of title 23, United States Code, is amended by adding after the second sentence the following: "In addition to such funds, the State of Alaska is authorized to expend on such highway any Federal-aid highway funds apportioned to the State of Alaska under this title as its Federal share. Notwithstanding any other provision of law any obligation limitation enacted for fiscal year 1983 or for any fiscal year thereafter shall not apply to projects authorized by the previous sen-

(b) This amendment shall be effective upon the date of the enactment of this Act. TERRITORIAL HIGHWAY PROGRAM

SEC. 233. (a) Section 215 of title 23, United States Code, is hereby repealed.

(b)(1) The unobligated balance of sums appropriated prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available for obligation under the conditions applicable prior to such enactment.

(2) The unappropriated balance of sums authorized prior to enactment of subsection (a) of this section for carrying out section 215 of title 23, United States Code, shall remain available until expended under the conditions applicable prior to such enact-

(c) Section 120(i) of title 23, United States Code, repealed.

(d) Section 401 of title 23, United States Code, is amended by deleting the second sentence thereof.

(e) The sixth sentence of section 402(c) of title 23, United States Code, is amended to read as follows: "The annual apportionment to each State shall not be less than one-half of 1 per centum of the total apportion-

(f) The analysis of chapter 2 of title 23, United States Code, is amended by deleting: "215. Territories highway development pro-

gram.' and inserting in lieu thereof:

"215. Repealed.".

## ACCELERATION OF BRIDGE PROJECTS

SEC. 234. Section 147 of the Surface Transportation Assistance Act of 1978, as amended by section 15 of Public Law 96-106 (93 Stat. 798) is repealed. Funds previously set aside in accordance with such section 147 shall be available for obligation for a period of two years from the date of enactment of this Act. Such funds may be obligated under the same conditions which existed prior to the repeal of such section 147. Funds not obligated within that period of availability shall be permanently withdrawn and such funds shall be apportioned by the Secretary to the several States in accordance with section 144(e) of title 23, United States Code.

## LAKE ROAD EROSION DEMONSTRATION

SEC. 235. (a) The Secretary of Transportation is authorized to carry out demonstra-tion projects in and around Devils Lake, North Dakota, for the purpose of demonstrating construction techniques to prevent wave erosion on closed basin lakes with grade level highway crossings.

(b) The Secretary is authorized to reimburse from funds authorized by subsection (c) the State of North Dakota for funds previously expended on projects described in

subsection (a).

(c) There is authorized to be appropriated, out of the Highway Trust Fund, to carry out this section not to exceed \$4,500,000 for the fiscal year ending September 30, 1983

(d) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall not exceed 75 per centum of the total cost thereof and such fund shall remain available until expended.

## TRUCK SAFETY DEMONSTRATION

SEC. 236. The Secretary of Transportation, in cooperation with the State of Idaho, shall conduct a project on a primary segment of highway experiencing a high incidence of truck accidents. The study shall include an analysis of factors contributing to truck ac cidents such as weather conditions, sight distance, road curvature, roadway width, and gradient. The study shall also include an analysis of the benefit-cost ratio of certain safety improvements implemented to correct hazards contributing to truck acci-

(b) There is authorized to be appropriated, out of the Highway Trust Fund, to out this section not to exceed carry \$6,500,000

(c) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this subsection shall be 100 per centum of the total cost thereof and such funds shall remain available until expended.

(d) The Secretary of Transportation shall submit to Congress a report on the results of the demonstration project not later than one hundred and eighty days after comple-

tion of such project.

#### DEFINITION

SEC. 237. The definition of the term "construction" in section 101(a), title 23, United States Code, is amended by striking the period at the end thereof and inserting in lieu thereof the following: "and also includes costs incurred by the State in performing Federal-aid project related audits which directly benefit the Federal-aid highway program.'

#### REPORTS

SEC. 238. (a) Section 307 of title 23, United States Code, is amended by adding a new subsection (e) as follows:

"(e) The Secretary shall report to the Congress in January 1983, and in January of every second year thereafter, estimates of the future highway needs of the Nation."

(b) Section 3 of Public Law 89-139, 79 Stat. 578, August 28, 1965, and section 17 of the Federal-Aid Highway Act of 1968 are hereby repealed.

#### CONSTRUCTION BY STATES IN ADVANCE OF APPORTIONMENT

SEC. 239. (a) Section 115(a) of title 23, United States Code, is amended to read as follows:

'(a)(1) When a State has obligated all funds apportioned or allocated to it under sections 103(e)(4), 104, or 144 of this title, other than Interstate funds, and proceeds to construct any highway substitute, Federalaid system or program or bridge project, other than an Interstate project funded under section 104(b)(5) of this title, without the aid of Federal funds in accordance with all procedures and all requirements applicable to such a project, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under sections 103(e)(4), 104, or 144 of this title if-

"(A) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects, and

"(B) the project conforms to the applicable standards adopted under section 109 of

"(2) The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State. No application may be approved which will exceed the State's expected apportionment of such authorizations.

(b) Section 115(c) of title 23, United States Code, is amended by striking "104" and inserting in lieu thereof "103(3)(4), 104, or

144"

# DESIGN AND CONSTRUCTION QUALITY ASSURANCE

Sec. 240. (a) The Secretary of Transportation is directed to coordinate a study with the National Bureau of Standards, the American Society for Testing and Materials, the Office of Technology Assessment, and other organizations as deemed appropriate, (1) to determine the existing quality of design, construction, products, use, and systems for highways and bridges; (2) to determine the need for uniform standards and criteria for design, processing, products, and applications, including personnel training and implementation of enforcement techniques; and (3) to determine the manpower needs and costs of developing a national system for the evaluation and accreditation of testing and inspection agencies.

(b) The Secretary shall submit such study to the Congress not later than one year after the date of enactment of this section.

#### VENDING MACHINES

Sec. 241. Notwithstanding section 111 of title 23, United States Code, before October 1, 1983, any State may permit the placement of vending machines in rest and recreation areas and in safety rest areas constructed or located on rights-of-way of the National System of Interstate and Defense Highways in such State. Such vending machines may only dispense such food, drink, and other articles as the State highway department determines are appropriate and desirable. Such vending machines may only be operated by the State. In permitting the placement of vending machines under this section, the State shall give priority to vending machines which are operated through the State licensing agency designated pursuant to section 2(a)(5) of the Act of June 20, 1936, commonly known as the Randolph-Sheppard Act (20 U.S.C. 107(a)(5)). The costs of installation, operation, and maintenance of vending machines under this section shall not be eligible for Federal assistance under title 23, United States Code.

# RELOCATION OF UTILITY FACILITIES

SEC. 242. (a) Section 101(a) of title 23, United States Code, as amended by section 237 of this Act, is amended by inserting the phrase "and utility appurtenances," after the word "crossings," in the definition of "construction"

(b) Section 123 of title 23, United States

Code, is amended-

(1) by striking in subsection (a) "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting in lieu thereof "a Federal-aid system or under a Federal-aid program,"; and (2) by adding a new subsection (d) at the

end thereof to read as follows:

"(d) When a State relocates utilities solely to correct hazards to the traveling public from utility appurtenances on or near the right-of-way of Federal-aid projects, the Secretary may waive the provisions of subsection (a) of this section to the extent such provisions restrict Federal participation in such work if the Secretary determines such waiver would serve a public purpose by facilitating the State's safety improvement program.".

#### TECHNICAL AMENDMENTS

SEC. 243. (a) Section 101(a) of title 23, United States Code, is amended as follows:

(1) In the tenth sentence, by inserting the words "or under one of the Federal-aid pro-grams" immediately after the words "Federal-aid systems":

(2) In the nineteenth sentence, by striking the period at the end thereof and adding the words "or under the Federal-aid pro-

(3) In the thirtieth sentence, by deleting the words "secondary system" and inserting in lieu thereof the words "rural program", and by deleting the word "system" and in-

serting in lieu thereof the word "program";
(4) In the thirty-first sentence, by deleting the word "system" each time it appears and inserting in lieu thereof the word "pro-

gram": and

(5) By adding after the twenty-eighth sentence the following sentence: "The term 'Federal-aid program' means any one of the Federal-aid highway programs described in section 103 of this title.'

(b)(1) Section 103 of such title is amended by adding to the title the words "and pro-grams" after the words "Federal-aid sys-

(2) Section 103(a) is amended to read as follows:

"(a) For the purpose of this title, the Federal-aid systems, which consist of the primary system and the Interstate System, along with the Federal-aid programs, which consist of the Federal-aid rural program and the Federal-aid urban program, are established and continued pursuant to the provisions of this section.

(3) Section 103(f) is amended to read as follows

"(f) The Secretary shall have authority to approve in whole or in part the Federal-aid primary system, the Federal-aid rural program, the Federal-aid urban program, and the Interstate System, as and when such systems and programs or portions thereof are designated, or to require modifications or revisions thereof. No Federal-aid system or program or portion thereof shall be eligible for projects in which Federal funds participate until approved by the Secretary.

(4) Subsections (g) and (h) of section 103

are repealed: and

(5) The analysis of chapter 1 of title 23 is amended by deleting

"103. Federal-aid systems." and inserting in lieu thereof

"103. Federal-aid systems and programs.".

(c) Section 104 of such title is amended as follows:

(1) In subsections (a) and (b)(1), by inserting the words "and programs" immediately after the words "Federal-aid systems" each time they appear:

(2) In paragraph (2) of section 104(b), by deleting the words "secondary system" and inserting in lieu thereof the words "rural program"

(3) In paragraph (6) of section 104(b) by deleting the word "system" and inserting in

lieu thereof the word "program'

(4) In subsection (c)(1), by deleting the "commencing with the apportionment of funds authorized to be appropriated under subsection (a) of section 102 of the Federal-Aid Highway Act of 1956 (70 Stat. 374).": and

(5) In subsection (f)(1), by inserting the words "and programs" immediately after

the words "Federal-aid systems".

(d) Section 105 of such title is amended as follows:

(1) In the first sentence of subsection (a) by inserting the words "and programs" after the words "Federal-aid systems", and by deleting in the third sentence the comma and all that follows and inserting a period after the word "part": and

(2) In subsection (d) by deleting the words "programs for", and by deleting the words "on the Federal-aid urban system" and inserting in lieu thereof the words "under the

Federal-aid urban program".

(e) Section 106 of such title is amended as follows:

(1) Section 106(b) is amended by striking the word "on" and inserting in lieu thereof the word "under," and by striking the word 'system" each place it appears and inserting in lieu thereof the word "program".

Section 106(d) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid

system"

(f)(1) Section 108(a) of such title is amended by inserting the words "or under any of the Federal-aid highway programs," immediately after the words "Interstate System," the first time they appear, and by inserting the words "and programs" immediately after the words "Federal-aid highway systems" the second time they appear;

(2) Section 108(c)(2) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system"; and

(3) The last sentence of section 108(c)(3) is amended by inserting the words "or under the Federal-aid program" immediately after the words "Federal-aid system".

(g)(1) Section 109(a) of such title is amended by inserting the words "or under any Federal-aid program" immediately after

the words "Federal-aid system"

(2) Section 109(c) is amended by deleting the words "Projects on the Federal-aid secondary system" and inserting in lieu thereof the words "Federal-aid rural program

(3) Section 109(e) is amended by deleting the phrase "No funds shall be approved for expenditure on any Federal-aid highway,' and inserting in lieu thereof the following phrase: "No funds shall be approved for expenditure on any highway on the Federalaid highway system or under the Federalaid highway program,";

(4) Section 109(h) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Feder-

al-aid system"

(5) Section 109(i) is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system" each time they appear in the first and second sentences, by inserting the words "or under a Federal-aid program" im-mediately after the words "Federal-aid system" in the third sentence, by inserting the words "or program" immediately after the words "Federal-aid system" in the fifth sentence, and by inserting the words "or under" immediately after the word "on" in such sentence: and

(6) Section 109(1)(1) is amended by inserting the words "or under any Federal-aid program" immediately after the words

"Federal-aid system"

(h)(1) Section 113(a) of such title is amended by deleting the words "the primary and secondary, as well as their extensions in urban areas, and the Interstate System, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems," and inserting in lieu thereof the words "the primary as well as its extensions in urban areas, and the Interstate System, or under the Federal-aid programs, authorized under the highway laws providing for the expenditure of Federal funds upon the Federal-aid systems and programs,"; and

(2) Section 113(b) is amended by inserting the words "or under any of the Federal-aid programs" immediately after the words

'Federal-aid systems"

(i) Section 115(a) of such title is amended

to read as follows:

'(a) When a State has obligated all funds for the primary system or for any of the Federal-aid programs, other than the Interstate System, apportioned to it under section 104 of this title, and proceeds to construct any projects without the aid of Federal funds, including one or more parts of any project, on the primary system or under any of the Federal-aid programs in such State, other than the Interstate System, as that system may be designated or any of those programs may be comprised at that time, in accordance with all procedures and all requirements applicable to projects on the primary system or under any such program, except insofar as such procedures and requirements limit a State to the construction of projects with the aid of Federal funds previously apportioned to it, the Secretary, upon application by such State and his approval of such application, is authorized to pay to such State the Federal share of the costs of construction of such project when additional funds are apportioned to such State under section 104 of this title if-

(1) prior to the construction of the project the Secretary approves the plans and specifications therefor in the same manner as other projects on the Federal-aid system or under the Federal-aid program involved,

(2) the project conforms to the applicable standards adopted under section 109 of this title.

The Secretary may not approve an application under this section unless an authorization is in effect for the fiscal year for which the application is sought beyond the currently authorized funds for such State and that no application may be approved which will exceed the State's expected apportion-

ment of such authorization.".

(i) Section 118(d) of such title is amended by inserting the words "or under a Federalaid program" immediately after the words

"Federal-aid system"

(k)(1) Section 120(a) of such title is amended by deleting in the first sentence all of the words between "(a)" and "(A)" and inserting in lieu thereof the words "Subject to the provisions of subsection (d) of this section, the Federal share payable on account of any project, financed with primary, rural, or urban funds, on the Federal-aid primary system, under the Federal-aid rural program, and under the Federal-aid urban program shall either"; and

(2) Section 120(g) is amended by deleting the words "Federal-aid highways" and inserting in lieu thereof the words "Federal-

aid projects".

(1) Section 121(c) of such title is amended by inserting the words "or under a Federalaid program" immediately after the words

"Federal-aid system".

(m) Section 123(a) of such title is amended by deleting the words "the Federal-aid primary or secondary systems or on the Interstate System, including extensions thereof within urban areas," and inserting

in lieu thereof the words "a Federal-aid system or under a Federal-aid program."

(n) Section 124(a) of such title is amended by inserting the words "or under any of the Federal-aid programs," immediately after "including the phrase the Interstate System,"

(o) Section 129 of such title is amended as

(1) In subsection (c), by inserting the words "and programs" immediately after the words "Federal-aid highway systems";

(2) In subsections (f) and (g)(2), by inserting the words "or programs" immediately after the words "Federal-aid systems" each

time they appear; and

(3) In subsection (i), by deleting the words "Federal-aid system, other than the Inter-state System," and inserting in lieu thereof the words "Federal-aid project other than one of the Interstate System,".

(p) Section 135(b) of such title is amended by placing a period after the word "flow" and deleting the remainder of the sentence.

(g) Section 137(a) of such title is amended by deleting the words "project on the Feder-al-aid urban system" and inserting in lieu thereof the words "project under the Federal-aid urban program".

(r) Section 140(a) of such title is amended by inserting the words "or under any of the Federal-aid programs" immediately after

the words "Federal-aid systems"

(s) Section 141(b) of such title is amended

to read as follows:

"(b) Each State shall certify to the Secretary before January 1 of each year that it is enforcing in accordance with section 127 of this title all State laws respecting maximum vehicle size and weights permitted on all roads receiving funds under the Federal-aid program, including the primary system, the Interstate System, and is a route functionally classified as an arterial or major collector.

(t) Section 142 of such title is amended as follows:

(1) In subsection (a)(1) by inserting the words "and highways under the Federal-aid programs" immediately after the words "Federal-aid systems", and by deleting the words "as a project on any Federal-aid system":

(2) In subsection (a)(2) by deleting the words "project on the Federal-aid urban system" each place it appears and inserting in lieu thereof "project under the Federal-

aid urban program"; and

(3) In subsection (e)(2) by deleting the words "projects on the Federal-aid urban system" and inserting in lieu thereof "projects under the urban program".

(u) Section 149 of such title is amended by inserting the words "or under any Federal-aid program" immediately after the words "Federal-aid system".

(v) Section 150 of such title is amended as

(1) By deleting the word "system" in the title and inserting the word "program" in

(2) By amending the analysis of chapter 1 of title 23, United States Code, by deleting: "150. Allocation of urban system funds."

and inserting in lieu thereof:

"150. Allocation of urban program funds.". (w) Section 302(b) of such title is amended by deleting the words "on the Federal-aid secondary system," and inserting in lieu thereof the words "under the Federal-aid rural program", and by deleting the words "secondary funds," and inserting in lieu thereof the words "rural funds,".

(x) Section 304 of such title is amended by inserting the words "and highways under the Federal-aid programs" between the between the word "systems" and the comma.

(y) Section 317(d) of such title is amended by inserting the words "or under a Federalaid program" immediately after the words

"Federal-aid system".

(z) Section 320(a) of such title is amended by inserting the words "or programs" imme-diately after the words "highway systems" in the second sentence.

(aa) Section 322 of such title is amended as follows:

(1) In subsection (c)(1) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is a route functionally classified as an arterial or major collector,"; and

(2) In subsection (c)(2) by deleting the words "any Federal-aid system," and inserting in lieu thereof the words "the Interstate System, the Primary System, or is not a route functionally classified as an arterial or

major collector.'

(bb) Section 402(d) of such title is amended by inserting the words "and programs" immediately after the words "Federal-aid systems"

#### TEMPORARY MATCHING FUND WAIVER

Sec. 244. (a) Notwithstanding any other provision of law, the Federal share of any qualifying project approved by the Secretary of Transportation under section 106(a) of title 23, United States Code, and of any qualifying project for which the United States becomes obligated to pay under section 117 of title 23, United States Code, during the period beginning on the date of enactment of this Act and ending September 30, 1983, shall be such percentage of the construction cost as the State highway department requests, up to and including 100 per centum.

(b) For purposes of this section, the term "qualifying project" means a project ap-proved by the Secretary of Transportation under section 106(a) of title 23, United States Code, or a project for which the United States becomes obligated to under section 117 of title 23, United States Code, for which the Governor of the State submitting the project has certified, in accordance with regulations established by the Secretary, that sufficient funds are not available to pay the cost of the non-Federal share of the project.

(c) The total amount which may be obligated for qualifying projects in any State under subsection (a) shall not be greater than the excess of-

(1) the amount of obligation authority distributed to such State for fiscal year 1983 under section 104(b) of this Act, over

(2) the amount of obligation authority distributed to such State for fiscal year 1982 under section 3(b) of the Federal-Aid High-

way Act of 1981.

(d) The total amount of such increases in the Federal share as are made pursuant to subsection (a) for any State shall be repaid to the United States by such State on or before September 30, 1984. Such payments shall be deposited in the Highway Trust Fund and such repaid amounts shall be credited to the last apportionment made for the category of funds for which the money so used was originally apportioned.

If a State has not made the repayment as required by subsection (d) of this section, the Secretary shall deduct from funds apportioned to a State under section 104(b) of title 23, United States Code, except for section 104(b)(5)(A), in each of the fiscal years ending September 30, 1985, and September 30, 1986, a pro rata share of each category of such apportioned funds, the total amount of which shall be equal to 50 per centum of the amount needed for repayment.

#### MINIMIZATION OF CONTRIBUTIONS

Sec. 245. (a) On October 1, the Secretary of Transportation shall allocate among the States, as defined in title 23, United States Code, amounts sufficient to insure that a State's percentage of apportionments in each such fiscal year of primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard elimination, and railhighway crossings funds under sections 104(b), 144, and 152 of title 23. United States Code and section 203 of the Highway Safety Act of 1973, as amended, shall not be less than 85 per centum of the percentage of estimated tax payments attributable to highway users in that State paid into the Highway Trust Fund, excluding the Mass Transit Account, in the latest fiscal year for which data is available.

(b) Amounts allocated pursuant to subsection (a) of this section shall be available for obligation when allocated for the year authorized plus three fiscal years, shall be subject to the provisions of title 23, United States Code, and may be obligated for primary, secondary, Interstate, urban, bridge replacement and rehabilitation, hazard rail-highway crossings elimination. and projects. Obligation limitations for Federalaid highways and highway safety construction programs established by this Act or any subsequent Act shall not apply to obligations made under this section except where the provision of law establishing such limitation specifically amends or limits the applicability of this sentence. Sums allocated pursuant to this section shall not be considered to be sums allocated for purposes of section 104(b) of this Act.

(c) In order to carry out this section there is authorized to be appropriated, out of the Highway Trust Fund, excluding the Mass Transit Account, \$526,000,000 for the fiscal year ending September 30, 1983, and such sums as may be necessary for each of the fiscal years ending September 30, 1984, September 30, 1985, September 30, 1986, and September 30, 1987.

## INNOVATIVE TECHNOLOGIES

SEC. 247. (a) The Congress hereby finds and declares that it is in the national interest to encourage and promote utilization by the States of highway and bridge surfacing, resurfacing, or restoration materials which are produced from recycled materials or which contain asphalt additives to strengthen the materials. Such materials conserve energy and reduce the cost of resurfacing or restoring our highways.

(b) The Secretary of Transportation is hereby authorized for each of the fiscal years through September 30, 1985, to increase the Federal share as provided in sections 119, 120, and 144 of title 23, United States Code, by 5 per centum of any project submitted by the State highway departments which contains in the plans, specifications, and estimates submitted pursuant to section 106 of title 23, United States Code, the use of the materials described in subsection (a). To be eligible for such supplemental Federal assistance, significant amounts of asphalt additives or recycled materials must be used in each project approved by the Secretary.

#### ENERGY IMPACTED ROADS

SEC. 248. (a) Section 105 of title 23, United States Code, is amended by adding at the end thereof the following new subsection—

"(h) In preparing programs to submit in accordance with subsection (a) of this section, the State highway department may give priority to projects for the reconstruction, resurfacing, restoration, or rehabilitation of highways which are incurring a substantial use as a result of transportation activities to meet national energy requirements and which will continue to incur such use, and in approving such programs the Secretary may give priority to such projects."

(b) Section 120 of title 23, United States Code, is amended by adding at the end thereof the following new subsection—

"(k) Notwithstanding any other provision of this section, the Federal share payable on account of any project under this title to reconstruct, restore, and rehabilitate any highway which the Secretary determines, at the request of any State, is incurring a substantial use as a result of transportation activities to meet national energy requirements and will continue to incur such use is 85 per centum of the cost of such project."

# DEMONSTRATION PROJECT—DOWNTOWN CONGESTION RELIEF

SEC. 249. (a) The Secretary of Transportation is authorized to carry out a demonstration project on the Federal-aid urban system for the construction of a high level bridge over a high volume intercoastal waterway segment. The project shall demonstrate the reduced congestion resulting in the downtown area from the construction of such a bridge which serves a major port. Such project shall be subject to the provisions of chapter 1 of title 23, United States Code, applicable to highway projects on the Federal-aid system.

(b) There is authorized to be appropriated to carry out this section, out of the Highway Trust Fund, not to exceed \$23,000,000 for the fiscal year ending September 30, 1983. Funds authorized to carry out this section shall be available in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that such funds shall remain available until expended. Obligations for this project shall not be subject to any obligation limitation for Federal-aid highways.

(c) In carrying out this section, the Secretary shall consult with the Secretary of the Army and the Commandant of the Coast Guard concerning permit procedures which will expedite completion of this bridge.

(d) The Secretary shall report to Congress upon completion of the project the results of this demonstration project, together with any recommendations the Secretary deems necessary.

# DEMONSTRATION PROJECT

SEC. 250. (a) The Secretary is authorized to carry out a demonstration project in the vicinity of east Baton Rouge, Louisiana, for the purpose of demonstrating the efficacy of reducing traffic congestion in the immediate vicinity of a partial-diamond, partial-cloverleaf interchange which connects an east-west highway on the Interstate System and a four lane highway not on such system by providing a direct access ramp to, and a travel lane on, the Interstate highway and by eliminating a crossover which is used for access to the Interstate highway.

(b) There is authorized to be appropriated to carry out this section, out of the High-

way Trust Fund, not to exceed in the aggregate \$5,000,000 for the fiscal years beginning after September 30, 1982.

(c) Funds authorized by this section shall be available for obligation in the same manner and to the same extent as if such funds were apportioned under chapter 1 of title 23, United States Code, except that the Federal share of the cost of any project under this section shall be 100 per centum of the total cost of such project, and such funds shall remain available until expended.

## TITLE III-MASS TRANSIT

#### SHORT TITLE

SEC. 301. This title may be cited as the "Federal Public Transportation Act of 1982".

# AMENDMENTS TO SECTION 3 CAPITAL GRANT PROGRAM

SEC. 302. (a) Section 3(a)(2)(A) of the Urban Mass Transportation Act of 1964 (hereinafter in this title referred to as the "Act") is amended—

(1) by striking out "and" at the end of clause (i);

(2) by striking out the period at the end of clause (ii) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof the following;

"(iii) sufficient capability to maintain the facilities and equipment.".

(b) Section 3(a) of the Act is amended by adding at the end thereof the following:

"(5) The Secretary shall take into account the adverse effect of decreased commuter rail service in considering applications for assistance under this section for the acquisition of rail lines and all related facilities used in providing commuter rail service which are owned by a railroad subject to reorganization under title 11, United States Code."

## DIRECT TRANSIT ASSISTANCE FUND

SEC. 303. (a) The section heading of section 4 of the Act is amended to read as follows:

# "DIRECT TRANSIT ASSISTANCE FUND"

- (b) Section 4(b) of the Act is repealed.(c) Section 4 of the Act is amended—
- (1) by striking the second sentence in subsection (a) and inserting in lieu thereof the following: "The Federal grant for any project to be assisted under section 3 which involves the construction of a new fixedguideway system or an extension to an existing system (other than an exclusive facility for buses) shall be in an amount equal to 60 per centum of the net project cost. The Federal grant for any other project to be assisted under section 3 shall be in amount equal to 70 per centum of the net project cost. Notwithstanding the preceding two sentences, the Federal share of the total project cost of any project covered by a full funding contract, letter of intent, or letter of commitment in effect on the date of enactment of the Federal Public Transportation Act of 1982, or those projects within the federally agreed upon scope for the Washington, District of Columbia, metropolitan area transit system (as of such date),
- shall not be altered.";
  (2) by redesignating subsection (a) as subsection (b); and
- (3) by inserting after "Sec. 4." the following:
- ing:
  "(a)(1) To finance assistance under sections 3, 8, 9, 16(b), and 18 of this Act, and to finance assistance under subsection (e) of this section, there are authorized to be ap-

propriated not to exceed \$3,130,000,000 for the fiscal year ending September 30, 1983; \$3,130,000,000 for the fiscal year ending September 30, 1984; and \$3,130,000,000 for the fiscal year ending September 30, 1985. Amounts appropriated for the purposes of sections 3, 8, 9, 16(b) and 18 of this Act and subsection (e) of this subsection shall remain available until expended.

(2) Of the amount appropriated pursuant to this subsection, the Secretary shall make available for the purposes of sections 6, 10, and 11 of this Act, and for administrative costs, including salaries and necessary expenses, not to exceed \$75,000,000 for the fiscal year ending September 30, 1983, \$75,000,000 for the fiscal year ending September 30, 1984, and \$75,000,000 for fiscal year ending September 30, 1985. Amounts appropriated for the purposes of sections 6, 10, and 11 shall remain available until expended.

"(3) Of the remaining amount appropriated pursuant to this subsection, the Secre-

tary shall make available

"(A) 24 per centum (10 per centum beginning with the fiscal year ending September 30, 1985) for grants and loans under section 3(a) of this Act:

"(B) 67.25 per centum (79.63 per centum beginning with the fiscal year ending September 30, 1985) for grants under section 9(a)(2) of this Act for urbanized areas with populations of two hundred thousand or more:

"(C) 6.5 per centum (7.7 per centum beginning with the fiscal year ending September 30, 1985) for grants under section 9(a)(3) of this Act for urbanized areas with populations under two hundred thousand: and

'(D) 2.25 per centum (2.67 per centum beginning with the fiscal year ending September 30, 1985) for grants under section 18 of this Act

"(4) Of the funds available for obligation under section 3 \$50,000,000 shall be used for the purposes of section 8 of this Act. Nothing herein shall prevent urbanized areas from using additional funds available under this subsection for planning purposes.

(d) Subsections (c), (d), (e), and (f) of such

section are repealed.

(e) Subsection (g) is redesignated as subsection (c) and is amended by adding at the end thereof the following: "Notwithstanding the preceding sentence or any other provision of this Act, the total amount authorized to be appropriated under this Act and under Public Law 96-148 may not exceed \$3,495,000,000 for the fiscal year ending September 30, 1983; and \$3,495,000,000 for the fiscal year ending September 30, 1984.".

(f) Subsection (h) of such section is redes-

ignated as subsection (d).

(g) Subsection (i) of such section is redesignated as subsection (e) and is amended by striking out "available pursuant to section 4(c)(3(A)" and inserting in lieu thereof "appropriated for the purpose of section 3".

#### FORMULA CAPITAL AND OPERATING ASSISTANCE PROGRAM

SEC. 304. (a) The Urban Mass Transportation Act of 1964 is amended by inserting immediately after section 8 the following new

"FORMULA CAPITAL AND OPERATING ASSISTANCE PROGRAM

"SEC. 9. (a)(1) Grants under this section shall be available to finance the planning, acquisition, construction, improvement, and operating costs of facilities, equipment, and associated capital maintenance items for use, by operation or lease or otherwise, in mass transportation service. As used in this section, the term 'associated capital maintenance items' means any equipment and materials each of which costs no less than 1 per centum of the current fair market value of rolling stock comparable to the rolling stock for which the equipment and materials are to be used.

"(2) To provide grants to urbanized areas with populations of two hundred thousand or more, the Secretary shall apportion for expenditure for each fiscal year the sums authorized and appropriated pursuant to section 4(a)(3)(B) as follows:

"(A) 68 per centum of such sums shall be apportioned among urbanized areas as fol-

"(i) 75 per centum shall be made available for expenditure in only those urbanized areas or parts thereof with a population of one million or more, and on the basis of a formula under which such urbanized area or parts thereof will be entitled to receive an amount equal to the sum of-

(I) 50 per centum of the amount available under this paragraph mulitiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized areas or part thereof bears to the total bus revenue vehicle miles in all such

urbanized areas:

'(II) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area or part thereof, as designated by the Bureau of the Census, bears to the total population of all such urbanized areas as shown by the latest Federal census;

'(III) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by

the Secretary; and

"(ii) 25 per centum shall be made available for expenditure in only those urbanized areas or parts thereof with a population of less than one million and on the basis of a formula under which such urbanized areas or parts thereof will be entitled to receive an amount equal to the sum of-

(I) 50 per centum of the amount available under this paragraph multiplied by the ratio which the total bus revenue vehicle miles operated in or directly serving such urbanized area or part thereof bears to the total bus revenue vehicle miles in all such

urbanized areas;

'(II) 25 per centum of such amount multiplied by the ratio which the population of such urbanized area or part thereof, as designated by the Bureau of the Census, bears to the total population of all such urbanized areas as shown by the latest available Federal census; and

'(III) 25 per centum of such amount multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by

the Secretary; and

"(B) 32 per centum of such sums shall be made available for expenditure on the basis of a formula under which such urbanized areas or parts thereof will be entitled to receive an amount equal to the sum of-

"(i) 60 per centum of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of fixed guideway revenue vehicle miles, as de-

termined by the Secretary; and

"(ii) 40 per centum of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of fixed guideway route miles, as determined by the Secretary.

No urbanized area providing commuter rail service and having a population of seven hundred and fifty thousand or more shall receive less than 0.75 per centum of the sums made available under this subparagraph (B). Under this subparagraph, fixed guideway revenue vehicle or route miles provided, and passengers served thereby, in an urbanized area of less than two hundred thousand population, where such revenue vehicle miles or route miles and passengers served would otherwise be attributable to an urbanized area with a population of 1,000,000 or more in an adjacent State, shall be attributable to the public body in the State in which such urbanized area of less than two hundred thousand population is located as if the public body were an urbanized area of two hundred thousand or more so long as such public body contracts, directly or indirectly, for such service. For the purpose of this subparagraph, the terms fixed guideway revenue vehicle miles' and 'fixed guideway route miles' shall include ferry boat operations directly or under contract by the designated recipient.

"(3) To make grants to urbanized areas with populations of less than two hundred thousand, the Secretary shall apportion for expenditure for each fiscal year the sums authorized and appropriated pursuant to

section 4(a)(3)(C) as follows:

"(A) 50 per centum of the amount available under this paragraph multiplied by the ratio which the population of such urbanized areas in the State bears to the total population of all such urbanized areas in all States as shown in the latest available Federal census; and

(B) 50 per centum of such funds multiplied by a ratio for such urbanized areas determined on the basis of population weighted by a factor for the average density for urbanized areas in such State as determined

by the Secretary.

'(4)(A) The Federal grant for any construction project under this subsection shall not exceed 80 per centum of the net project cost of such project. The Federal grant for any project for operating expenses shall not exceed 50 per centum of the net project cost of such project. The remainder shall be provided in cash from sources other than Federal funds or revenues from the operation of public mass transportation systems. Any public or private transit system funds so provided shall be solely from undistributed cash surpluses, replacement or depreciation funds or reserves available in cash, or new capital.

(B) The amount of funds apportioned under this section which may be used for operating assistance shall not exceed 80 per centum of the amount of funds apportioned in fiscal year 1982 under paragraphs (1)(B), (2)(B), and (3)(B) of section 5(a) of this Act to an urbanized area with a population of one million or more, 90 per centum of funds so apportioned to an urbanized area with a population of two hundred thousand or more and less than one million population; and 95 per centum of funds so apportioned to an urbanized area of less than two hundred thousand population. Notwithstanding the preceding sentence, an urbanized area that became an urbanized area for the first time under the 1980 census may use not to exceed 40 per centum of its apportionment under this section for operating assistance.

"(5)(A) Notwithstanding the provisions of paragraph (4)(B), any recipient may, in fiscal years 1983 and 1984, transfer the use for operating assistance a portion of its apportionment under this section that other-

wise is available only for capital assistance, except that the recipient's total operating assistance under this section (including any amounts transferred from its capital apportionment) for the fiscal year in which the transfer occurs shall not exceed the amount of Federal funds such recipient was apportioned under sections 5(a)(1)(A), 5(a)(2)(A), and 5(a)(3)(A) of this Act for the fiscal year ending September 30, 1982. The total operating assistance under this section (including any amounts transferred from its capital apportionment) for a recipient in an urbanized area that became an urbanized area for the first time under the 1980 census may not exceed 50 per centum of its apportionment under this section.

"(B) Any recipient that intends to carry out a transfer under this subsection shall, at the time it submits a statement of activities the Secretary under subsection

(b)(1)(B)-

"(i) certify that it has provided public notice of its intent to transfer its capital apportionment (including notice of the funding reductions resulting from utilization of this subsection and other requirements of this subsection) and provided an opportunity for public comment; and
"(ii) certify that it has developed a three-

year plan to assure that in the fiscal year ending September 30, 1985, it will not need to use and will not use its capital apportion-

ment for operating assistance.

"(C) Whenever any recipient transfers its capital apportionment for operating assistance in accordance with the requirements of this subsection, two-thirds of the amount transferred shall be available to the recipient for operating assistance and the remaining one-third amount shall be available to the Secretary to make discretionary grants under this section. In making such discretionary grants, first priority shall be given to any urbanized area that is apportioned an amount under this section in fiscal year 1983 which is less than the amount such urbanized area was apportioned under section 5 of this Act for the fiscal year ending September 30, 1982. Any amounts remaining shall be available for discretionary construction grants under this section subject to the second and third sentences of section 4(b).

'(D) The authority of recipients to use the provisions of this paragraph shall termi-

nate on September 30, 1984.

"(6)(A) The Governor, responsible local officials, and publicly owned operators of mass transportation services in accordance with the planning process required under section 8 of this Act shall designate a recipient or recipients to receive and dispense the funds appropriated under this section that are attributable to urbanized areas of two hundred thousand or more population. In any case in which a statewide or regional agency or instrumentality is responsible under State laws for the financing, construction and operation, directly, by lease, contract, or otherwise, of public transportation services, such agency or instrumentality shall be the recipient to receive and dispense such funds. As used in this section, the term 'designated recipient' shall refer to the recipient selected according to the procedures required by this section.

'(B) Sums apportioned under this subsection not made available for expenditure by designated recipients in accordance with the terms of subparagraph (A) shall be made available to the Governor for expenditure in urbanized areas or parts thereof with popu-

lations of less than two hundred thousand.
"(7) The Governor may transfer an amount of the State's apportionment under

paragraph (3) to supplement funds apportioned to the State under section 18(a) of this Act, or to supplement funds apportioned to urbanized areas with populations of 300,000 or less under this subsection. The Governor may make such transfers only after consultation with responsible local officials and publicly owned operators of mass transportation services in each area to which the funding was originally apportioned pursuant to paragraph (3). The Governor may transfer an amount of the State's apportionment under section 18(a) to supplement funds apportioned to the State under paragraph (3). Amounts transferred shall be subject to the capital and operating assistance limitations applicable to original apportionments of such amounts.

(8) Sums apportioned under this section shall be available for obligation by the Governor or designated recipient for a period of three years following the close of the fiscal year for which such sums are apportioned. Any amounts so apportioned remaining unobligated at the end of such period shall be added to the amount available for apportionment under this section for the succeed-

ing fiscal year.

(9) As used in this subsection, the term 'density' means the number of inhabitants per square mile, and the term 'population' means population as designated by the Bureau of the Census as shown by the latest available Federal census.

"(b)(1) To receive a grant under this sec-

tion for any fiscal year, a recipient—
"(A) shall comply with title VI of the Civil Rights Act of 1964 in the use of funds under this Act, and subsections (e), (f), and (g) of section 3 of this Act, and section 13 of this

"(B) shall, within the time specified by the Secretary, submit a statement of activities to be funded under this section prepared pursuant to subsection (d), a description of its proposed use of funds, and the certifications required by this subsection;

(C) shall provide satisfactory assurances, in such manner and form as may be required by the Secretary and in accordance with such terms and conditions as the Secretary may prescribe, that the rates charged elderly and handicapped persons during nonpeak hours for transportation utilizing or involving the facilities and equipment of the project financed with assistance under this subsection will not exceed one-half of the rates generally applicable to other persons at peak hours, whether the operation of such facilities and equipment is by the applicant or is by another entity under lease or otherwise.
"(2) Upon receipt of the statement, de-

scription, and certifications required by this section, after finding that a recipient is in compliance with paragraph (1), and after compliance with the National Environmental Policy Act of 1969 using the provisions of subsection (e) or otherwise, the Secretary shall make the amounts determined pursuant to this section available to the recipient.

"(c) To receive a grant under this section. the recipient must certify that the recipient

"(1) has or will have the legal, financial, and technical capacity to carry out the proposed project;

"(2) has the authority to apply for the grant under this subsection;

(3) will carry the project in compliance with the Uniform Relocation Assistance and Land Acquisition Policies Act of 1970 and section 7 of this Act;

"(4) will have satisfactory continuing control, through operation, lease, or otherwise, over the use of the facilities or equipment assisted under this Act and will maintain such facilities and equipment;

"(5) in carrying out procurements under this subsection, will use competitive procurements (as defined or approved by the Secretary), will not use procurements utilizing exclusionary or discriminatory specifications, and will carry out procurements in compliance with section 401 of Public Law 95-599:

"(6) will comply with the National Flood Insurance Act of 1968;

"(7) has complied with the requirements of subsections (d) and (e);

"(8) has available and will provide funds from other than Federal sources as required by section 4 of this Act and has complied with the requirements of sections 8, 16, and 19 of this Act; and

"(9) has a locally developed process to solicit and consider public comment prior to raising fares or implementing a major reduction of transit service.

"(d) Each recipient shall-

"(1) make available to the public information concerning the amount of funds available under this subsection and the range of activities that the recipient proposes to undertake with such funds;

"(2) develop a proposed statement concerning activities to be funded in consultation with interested parties, including pri-

vate transportation providers:

"(3) publish a proposed statement in such a manner to afford affected citizens, private transportation providers, or as appropriate, local elected officials an opportunity to examine its content and to submit comments on the proposed statement and on the performance of the recipient; and

"(4) hold one or more public hearings to obtain the views of citizens on activities to

be funded under this subsection.

In preparing the final statement to be submitted to the Secretary, the recipient shall consider any such comments and views, particularly those of private transportation providers, and shall, if deemed appropriate by the recipient, modify the proposed statement. The final statement shall be made available to the public. Compliance with this paragraph will satisfy the requirements of subsection (d) of section 3.

(e)(1) In order to assure that the National Environmental Policy Act of 1969, and other provisions of law which further the purposes of such Act (as specified in regulations issued by the Secretary), are effectively implemented in connection with the expenditure of funds under this subsection. and to assure to the public undiminished protection of the environment, the Secretary, in lieu of the environmental protection procedures otherwise applicable, may, under regulations issued by him, provide for the release of funds to recipients who assume all of the responsibilities for environmental review, decisionmaking, and acting pursuant to such Act, and such other provisions of law as the regulations of the Secretary specify, that would apply to the Secretary were he to undertake such projects as Federal projects. The Secretary shall issue regulations to carry out this section only after consultation with the Council on Environmental Quality.

"(2) The Secretary shall approve the release of funds in accordance with the procedures authorized by this subsection only if. at least fifteen days prior to such approval

and prior to any commitment of funds, the applicant has submitted to the Secretary a request for such release accompanied by a certification which meets the requirements of paragraph (3). The Secretary's approval of any such certification shall be deemed to satisfy his responsibilities under the National Environmental Policy Act of 1969 and such other provisions of law as the regulations of the Secretary specify insofar as those responsibilities relate to the application and release of funds for projects to be carried out pursuant thereto which are covered by such certification.

(3) A certification under the procedures authorized by this subsection shall

'(A) be in a form acceptable to the Secre-

"(B) be executed by the chief executive officer or other officers of the applicant qualified under regulations of the Secretary;

"(C) specify that the applicant has fully carried out its responsibilities as described

under paragraph (1); and

"(D) specify that the certifying officer-

"(i) consents to assume the status of a responsible Federal official under the National Environmental Policy Act of 1969 and each provision of law specified in regulations issued by the Secretary to the extent that as the provisions of such Act or other such provisions of law apply pursuant to paragraph (1); and

"(ii) authorizes and consents on behalf of the applicant and himself to accept the jurisdiction of the Federal courts for the purposes of enforcement of his responsibilities

as such an official.

The Secretary shall not approve a grant for a project under this section unless he finds that such project is part of the approved program of projects required by section 8 of this Act.

'(g) As soon as practicable after receiving the submissions required in this section, the Secretary shall enter into an annual projects agreement with the Governor, his designee, or the designated recipient of each

urbanized area.

"(h)(1) Each recipient of assistance under this section shall submit to the Secretary annually, at a time determined by the Secretary, a statement concerning the use of funds made available under this section together with an assessment of how such use compares to the statement of activities identified under subsection (d). The Secretary shall, at least on an annual basis, conduct, or require the recipient to have independently conducted, reviews and audits as may be deemed necessary or appropriate by the Secretary to determine whether-

'(A) the recipient has carried out its activities submitted in accordance with subsection (b)(1)(B) in a timely and effective manner and has a continuing capacity to carry out those activities in a timely and ef-

fective manner; and

"(B) the recipient has carried out those activities and its certifications and has used its Federal funds in a manner which is consistent with the requirements of this Act and other applicable laws. Audits of the use of Federal funds shall be conducted in accordance with the accounting standards of the General Accounting Office.

"(2) In addition to the reviews and audits described in paragraph (1), the Secretary shall, not less than once every three years, perform a full review and evaluation of the performance of a recipient in carrying out the recipient's program, with specific reference to compliance with statutory and administrative requirements, and consistency of actual program activities with the statement of proposed activities required under subsection (b) of this section and the planning process required under section 8.

"(3) The Secretary may make appropriate adjustments in the amount of annual grants in accordance with the Secretary's findings under this subsection, and may reduce or withdraw such assistance or take other action as appropriate in accordance with the Secretary's review, evaluation, and audits under this subsection.

"(i) The provisions of section 1001 of title 18, United States Code, apply to any certification or submission under this section. In addition, if any false or fraudulent statement or related act within the meaning of section 1001 of title 18. United States Code. is made in connection with a certification of submission under this subsection, the Secretary may terminate and seek appropriate reimbursement of the affected grant or grants directly or by offsetting funds available under this subsection.

'(j) A recipient may request the Secretary to approve its procurement system. If, after consultation with the Office of Federal Procurement Policy, the Secretary finds that such system provides for competitive procurement, the Secretary shall approve such systems for use for all procurements financed under this subsection. Such approval shall be binding until withdrawn. A certification from the recipient under subsection (c)(5) is still required.".

#### LETTERS OF INTENT

SEC. 305. Section 3(a)(4) of the Act is amended-

(1) by inserting after the first sentence thereof the following: "At least thirty days prior to the issuance of a letter of intent under this paragraph, the Secretary shall notify, in writing, the Committee on Public Works and Transportation of the House of Representatives and the Committee on Banking, Housing, and Urban Affairs of the Senate, of the proposed issuance of such letter of intent.":

(2) by striking out "in section 4(c)" and inserting in lieu thereof the following: "to

carry out section 3"; and
(3) by adding at the end thereof the following: "Funding for projects covered by letters of intent or letters of commitment issued, and full funding contracts executed, prior to the date of enactment of the Federal Public Transportation Act of 1982 shall be given priority in making grants under this section after the date of enactment of such Act. None of the terms and conditions of any such letter of intent and full funding contract may be altered unless agreed to by all parties to the contract. The Secretary may not, directly or indirectly, take any action with respect to future available budget authority except as provided by this paragraph."

# AMENDMENTS TO SECTION 5 URBAN MASS TRANSIT PROGRAM

SEC. 306. Section 5 of the Act is amended-(1) by adding immediately after subsection (c)(4) the following:

"(5) Apportionments for fiscal year 1975 shall be deemed to have lapsed on September 30, 1977, and apportionments for fiscal year 1976 shall be deemed to have lapsed on September 30, 1978."; and

(2) by adding at the end thereof the fol-

lowing new subsection:

(o) Notwithstanding any other provision of this section, sums authorized, appropriated, and apportioned pursuant to this section that have not lapsed shall remain available as initially apportioned to the urbanized areas or parts thereof for expenditure in accordance with the provisions of this section until September 30, 1985.".

#### AMENDMENTS TO SECTION 12

SEC. 307. (a) Section 12(c)(1) of the Act is amended by inserting before the semicolon the following: ", and such term also means any bus rehabilitation project which extends the economic life of a bus five years or

(b) Section 12(c)(2) of the Act is amended by inserting before the semicolon the following: "and any public transportation facility which utilizes a right-of-way rail usable by other forms of transportation and also means a public transit facility which utilizes a fixed catenary system".

#### AMENDMENTS TO THE REPORTING SYSTEM

SEC. 308. Section 15(b) of the Act is amended by striking out "section 5" and inserting in lieu thereof "section 5 or 9"

#### AMENDMENTS TO FORMULA GRANTS FOR NONURBANIZED AREAS

SEC. 309. (a) Section 18(a) of the Act is amended by striking out "section 4(e)" and inserting in lieu thereof 4(a)(3)(D)".

(b) Subsection (c) of such section is amended by striking out "three years" in the first sentence and inserting in lieu

thereof "two years".

(c) Subsection (c) of such section is amended by inserting after the first sen-tence thereof the following: "After September 30, 1982, any amounts remaining unobligated at the end of such period of which are deobligated at the end of such period shall be added to the amount available for apportionment under section 4(a)(3)(D).

## AMENDMENTS TO SECTION 16

SEC. 310. Section 16(b) of the Act is amended by striking out "section 4(c)(3) of this Act, 2 per centum" and inserting in lieu thereof "section 4(a)(3)(A) of this Act, 3.5 per centum".

#### INTERCITY BUS SERVICE/TERMINAL DEVELOPMENT PROGRAM

SEC. 311. Sections 21 and 22 of the Act are repealed.

#### WATERBORNE TRANSPORTATION DEMONSTRATION PROJECT

SEC. 312. Section 320(b) of the Surface Transportation Assistance Act of (Public Law 95-599) is amended by adding at the end thereof the following: "No funds are authorized to be appropriated to carry out the provisions of subsection (a) after September 30, 1982."

## REPEAL OF SAFETY AUTHORITY

SEC. 313. Section 107 of the National Mass Transportation Assistance Act of 1974 (Public Law 93-503) is repealed.

# TRANSIT CAPITAL INFRASTRUCTURE PROGRAM

Sec. 314. (a) In addition to amounts authorized under section 3(a) of the Urban Mass Transportation Act of 1964, there are authorized to be appropriated from the Transit Account of the Highway Trust Fund not to exceed \$550,000,000 for the fiscal year ending September 30, 1983, and \$1,100,000,000 per fiscal year for each of the fiscal years ending September 30, 1984, and September 30, 1985. Nothwithstanding the preceding sentence, the amount authorized to be appropriated for any fiscal year shall not exceed the amount as estimated annually by the Secretary of the Treasury to be re-ceived in the Transit Account of the Transit Account of the Highway Trust Fund includ-

ing interest thereon in each such fiscal year from subsections (a) and (b) of section 4041 of the Internal Revenue Code of 1954 and section 4081 of the Internal Revenue Code of 1954.

(b) Using sums available pursuant to subsection (a) the Secretary is authorized to make grants under this section to finance ubran transit capital infrastructure projects for fiscal years 1983 and 1984. The Secretary shall award grants under this section to applicants with projects which can begin construction or manufacturing within the shortest possible time. The Secretary may not limit grants under this section for bus purchases if the Secretary finds that qualified bus manufacturers do not have the capacity to meet the requirements of the preceding sentence. To the extent practicable the Secretary shall emphasize projects which are labor intensive.

(c) The Secretary shall, to the extent practicable, provide for a fair and equitable distribution among all States of funds appropriated pursuant to this section. In any fiscal year, amounts so distributed to recipients in any State shall not be less than onehalf of 1 per centum of the funds available under this section in that fiscal year. The Secretary is authorized to withdraw funds made available under this section for use for transit capital infrastructure projects and to use those funds to make grants for eligible highway projects under title 23, United States Code. The Secretary shall not approve a grant for such a highway project unless he has received assurances from the Governor, on behalf of urbanized areas of less than two hundred thousand population, made after consultation with operators of publicly owned mass transportation systems in such areas, or the designated recipient, in an urbanized area of two hundred thousand or more population, made after consultation with mass transportation providers in such urbanized areas, that there are not a sufficient number of qualified transit capital infrastructure projects within that fiscal year within such State or urbanized area to use the funds distributed by the Secretary under this section. The aggregate amount of such nontransit grants shall not exceed 15 per centum of the total funds available under this section in any fiscal year.

(d) As used in this section, the term "transit capital infrastructure development project" means any project in an urbanized area or portion thereof involving the acquisition, rehabilitation and replacement of rolling stock, the construction, rehabilitation, and modernization of commuter rail and fixed guideway systems, the construction, rehabilitation, modernization, and replacement of bus facilities and related equipment, the renovation and improvement of historic transportation facility with related private investment, and intermodal terminals.

(e) The Federal share for projects approved under this section shall be 80 per centum.

(f) The limitations contained in subsections (b), (c), (d), and (e) shall expire on September 30, 1984. After that date funds authorized under subsection (a) shall be available under the requirements of section 3(a) of the Urban Mass Transportation Act of 1964.

(g) Except as othewise provided by this section, a grant under this section shall be subject to the same terms and conditions as are applicable to grants under section 3 of the Urban Mass Transportation Act of 1964.

#### TITLE IV-COMMERCIAL MOTOR VEHICLE SAFETY

# DEFINITIONS

SEC. 401. For purposes of this title, unless the context otherwise requires, the term-

(1) "commerce" means trade, traffic, or transportation within the jurisdiction of the United States between a place in a State and a place outside of such State, or which affects trade, traffic, or transportation between a place in a State and a place outside of such State:

(2) "commercial motor vehicle" means any self-propelled or towed vehicle used on the highways in commerce principally to transport passengers or cargo

(A) if such vehicle has a gross vehicle weight rating of ten thousand or more

(B) if such vehicle is designed to transport more than ten passengers, including the

(C) if such vehicle is used in the transportation of materials found by the Secretary to be hazardous for the purposes of the Hazardous Materials Transportation Act, as amended (49 U.S.C. 1801 et seq.);

(3) "employee" means-

(A) a driver of a commercial motor vehicle (including an independent contractor while in the course of personally operating a commercial motor vehicle);

(B) a mechanic:

(C) a freight handler; or

individual other than (D) any employer;

who is employed by a commercial motor carrier and who in the course of his employment directly affects commercial motor vehicle safety, but such term does not include an employee of the United States, any State, or a political subdivision of a State who is acting within the course of such em-

(4) "employer" means any person engaged in a business affecting commerce who owns or leases a commercial motor vehicle in connection with that business, or assigns employees to operate it in commerce, but such term does not include the United States, any State, or a political subdivision of a

State;
(5) "person" means one or more individuals, partnerships, associations, corporabusiness trusts, or any other organized group of individuals;
(6) "Secretary" means the Secretary of

Transportation; and

(7) "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, or the Commonwealth of the Northern Marianas.

## DUTIES

SEC. 402. Each employer and employee shall comply with the safety and health rules, regulations, standards, and orders issued pursuant to this title which are applicable to his own actions and conduct.

## REGULATORY AUTHORITY AND STANDARDS

SEC. 403. (a) The Secretary shall establish and revise such rules, regulations, standards, and orders as may be necessary in order to further the purpose of this title. The Secretary shall where practicable consider costs and benefits before revising existing rules, regulations, standards, orders or before promulgating new rules, regulations, standards, or orders. Such rules, regulations, standards, and orders shall be directed toward assuring that-

(1) commercial motor vehicles are safely maintained, equipped, loaded, and operated;

(2) the responsibilities imposed upon drivers of commercial motor vehicles do not impair a driver's ability to operate safely;

(3) the physical condition of drivers of commercial motor vehicles is adequate to

enable them to drive safely; and

(4) the operation of commercial motor vehicles does not create deleterious effects on the physical condition of such drivers.

(b)(1) The Secretary shall promulgate any such rule or regulation within a period of one year after the date of commencement of any proceeding respecting such rule or regulation. If the Secretary determines that any such promulgation will not be completed within such time period, the Secretary shall immediately notify the Congress and shall furnish the reasons for the delay, information regarding the resources assigned, and the projected completion date, for any such proceeding. If such rule or regulation has not been promulgated within one year after the date of the commencement of any proceeding with respect to such rule or regulation, the Secretary shall supply the Congress with current data regarding the information specified in the preceding sentence, and shall provide the Congress with such information at the end of every sixty-day period thereafter during which the proceeding remains incomplete.

(2) All rules, regulations, standards, and orders issued under this section shall be promulgated in accordance with section 553 of title 5, United States Code (without regard to sections 556 and 557 of such title), except that the time periods specified in paragraph (1) of this subsection shall apply to such

promulgation.

(c) The Secretary may waive in whole or in part application of any rule, regulation, standard, or order established under this section with respect to any person or class of persons if he determines that such waiver is in the public interest and is consistent with the safe operation of commercial motor vehicles. Any waiver permitted under this subsection shall be published in the Federal Register, together with the reasons for such waiver. Any final agency action taken under this section is subject to judicial review as provided in chapter 7 of title 5. United States Code.

(d)(1) The Secretary and the Director of the National Institute for Occupational Safety and Health shall, in consultation with the Secretary of Labor, undertake a study of health hazards to which employees engaged in the operation of commercial motor vehicles are exposed, and shall develop such materials and information as are necessary to enable such employees to carry out their employment in a place and manner free from recognized hazards that are causing or are likely to cause death or serious physical harm. The study shall include recommendations regarding the most appropriate method for regulating and protecting the health of operators of commercial motor vehicles. Such study shall be submitted to the Congress within one year after the date of enactment of this title.

(2) There are authorized to be appropriated out of the Highway Trust Fund to the Secretary for fiscal year 1984 not to exceed \$1,500,000 for purposes of carrying out the provisions of this subsection.

(e) The Secretary, the Director of the National Institute for Occupational Safety and Health, and the Secretary of Labor shall coordinate their activities to insure adequate protection of the safety and health of operators of commercial motor vehicles. Such Secretaries and Director shall attempt to minimize paperwork burdens, to assure maximum coordination, and to avoid overlap or the imposition of undue burdens on persons subject to such rules, regulations, standards, and orders.

#### GENERAL POWERS

Sec. 404. (a) The Secretary is authorized to conduct, directly or indirectly, such research, development, demonstrations, and training activities as are considered appropriate to develop rules, regulations, standards, and orders authorized to be promulgated under section 403 of this title, to design and develop improved enforcement procedures and technologies, and to familiarize affected persons with such rules, regulations, standards, and orders.

(b) In carrying out his functions under this title, the Secretary is authorized to perform such acts including conducting investigations and inspections, compiling statistics, making reports, issuing subpenas, requiring production of documents, records, and property, taking depositions, holding hearings, prescribing recordkeeping and reporting requirements, and carrying out and contracting for such research, development, testing, evaluation, and training as he determines necessary to carry out the provisions of this title, or rules, regulations, standards, or orders issued pursuant thereto. With respect to the provisions of this title, if the Secretary approves a plan pursuant to section 411 of this title, the Secretary may delegate to a State such functions respecting the enforcement (including investigations) of the provisions of this title or rules, regulations, standards, or orders issued pursuant thereto as he determines appropriate to carry out the provisions of this title.

#### INSPECTIONS AND WARRANTS

Sec. 405. (a)(1) To carry out the Secretary's responsibilities under this title, agents of the Secretary are authorized to enter upon, inspect, and examine facilities, equipment, operations, and pertinent records without advance notice, in accordance with the provisions of paragraph (2) of this subsection. Any such agent of the Secretary shall display proper credentials when requested and may consult with employers and employees and their duly authorized representatives, and shall offer them a right of accompaniment.

(2)(A) A warrant under this paragraph shall be required for any entry or administrative inspection (including impoundment of motor vehicles or motor vehicle equipment) authorized by this section, except if such entry or inspection is—

(i) with the consent of the employer or agent of the employer in charge of the business, establishment, or premises;

 (ii) in situations involving inspection of motor vehicles where there is reasonable cause to believe that the mobility of the motor vehicle makes it impractical to obtain a warrant;

(iii) in any other exceptional or emergency circumstance where time or opportunity to apply for a warrant is lacking:

(iv) for access to and examination of books, records, and any other documentary evidence which can be easily altered, manufactured, or falsified; and

(v) in any other situations where a warrant is not constitutionally required.

(B) Issuance and execution of administrative inspection warrants shall be as follows:

(i) Any judge of the United States or of a State court of record, or any United States magistrate, may, within his territorial jurisdiction, and upon proper oath or affirmation showing probable cause, issue warrants for the purpose of conducting administrative inspections authorized by this section and of impoundment of motor vehicles or motor vehicle equipment appropriate to such inspections. For the purposes of this section, the term "probable cause" means a valid public interest in the effective enforcement of this title, or rules, regulations, standards, or orders issued thereunder sufficient to justify administrative inspections of the area, establishment, premises, records, or motor vehicles, or contents thereof, in the circumstances specified in the application for the warrant.

(ii) A warrant shall be issued only upon an affidavit of an officer, or representative of the Secretary having knowledge of the facts alleged, sworn to before the judge or magistrate and establishing the grounds for issuing the warrant. If the judge or magistrate is satisfied that grounds for the application exist or that there is a reasonable basis for believing they exist, he shall issue a warrant identifying the area, establishment, premises, or motor vehicle to be inspected, the purpose of such inspection, and, where appropriate, the type of property to be inspected, if any. The warrant shall—

(I) identify the items or type of property to be impounded, if any;

(II) be directed to a person authorized under this section to execute it;

(III) state the grounds for its issuance and the name of the person or persons whose affidavit has been taken in support thereof;

(IV) command the person to whom it is directed to inspect the area, establishment, premises, records, or motor vehicle identified for the purpose specified, and where appropriate, shall direct the impoundment of the property specified;

(V) direct that it be served during the hours specified in it; and

(VI) designate the judge or magistrate to whom it shall be returned.

(iii) A warrant issued pursuant to this section must be executed and returned within ten days of its date unless, upon a showing by the Secretary of a need therefor, the judge or magistrate allows additional time in the warrant. If property is impounded pursuant to a warrant, the person executing the warrant shall give the person from whom or from whose premises the property was taken a copy of the warrant and a receipt for the property taken or shall leave the copy and receipt at the place from which the property was taken. The return of the warrant shall be made promptly and shall be accompanied by a written inventory of any property taken. The inventory shall be made in the presence of the person executing the warrant and of the person from whose possession or premises the property was taken, if they are present, or in the presence of at least one credible person other than the person making such inventory, and shall be verified by the person executing the warrant. The judge or magistrate, upon request, shall deliver a copy of the inventory to the person from whom or from whose premises the property was taken and the applicant for the warrant.

(iv) The judge or magistrate who has issued a warrant under this section shall attach to the warrant a copy of the return and all papers filed in connection therewith and shall file them with the clerk of the district court of the United States for the judicial district in which the inspection was made.

#### DUTY TO INVESTIGATE COMPLAINTS; PROTECTION OF COMPLAINANTS

SEC. 406. (a) The Secretary shall timely investigate any nonfrivolous written complaint alleging that a material violation of any rule, regulation, standard, or order issued under this title is occurring or has occurred within the preceding sixty days. The complainant shall be timely notified of findings resulting from such investigation. The Secretary shall not be required to conduct separate investigations of duplicative complaints.

(b) Notwithstanding the provisions of section 552 of title 5, United States Code, the Secretary shall not disclose the identity of complainants unless it is determined that such disclosure is necessary to prosecute a violation. If disclosure becomes necessary, the Secretary shall take every practical measure within his authority to assure that the complainant is not subject to harassment, intimidation, disciplinary action, discrimination, or financial loss as a result of such disclosure.

#### PENALTIES

SEC. 407. (a) If the Secretary finds that a violation of sections 402 through 417 of this title has occurred, the Secretary shall issue a written notice to the violator. Such notice shall describe with reasonable particularity the nature of the violation found and the provision which has been violated. The notice shall fix a reasonable time for abatement of the violation, specify the appropriate civil penalty, if any, and specify the actions which the Secretary proposes to be taken in order to avoid subsequent similar violations. The notice shall indicate that the violator may, within fifteen days of service, notify the Secretary of his intention to contest the matter. In the event of a contested notice, the Secretary shall afford such violator an opportunity for a hearing, pursuant to section 554 of title 5, United States Code, following which the Secretary shall issue an order affirming, modifying, or vacating the notice of violation.

(b) Except as hereinafter provided, any person who is determined by the Secretary to have committed an act which is a violation of recordkeeping requirements issued by the Secretary pursuant to this title shall be liable to the United States for a civil penalty not to exceed \$500 for each offense. Each day of a violation shall constitute a separate offense, except that the total of all civil penalties assessed against any violator for all offenses relating to any single recordkeeping violation shall not exceed \$10,000. If the Secretary determines that a substantial health or safety violation exists or has occurred which could reasonably lead to, or has resulted in, serious personal injury or death, he may assess a civil penalty not to exceed \$10,000 for each offense: Provided, however, That except for recordkeeping violations, no civil penalty provided under this title shall be assessed against an employee for violations of this title unless the employee is an operator of a commercial motor vehicle and the Secretary determines that such employee's actions constituted gross negligence or reckless disregard for safety, in which case such employee shall be liable for a civil penalty not to exceed \$1,000. The amount of any civil penalty, and a reasonable time for abatement of the violation, shall by written order be determined by the Secretary, taking into account the nature, circumstances, extent, and gravity of the violation committed and, with respect to the violation, the degree of culpability, history of prior offenses, ability to pay, effect on ability to continue to do business, and such other matters as justice and public safety may require. In each case, the assessment shall be calculated to induce further compliance.

(c) The Secretary may require any violator served with a notice of violation to post a copy of such notice or statement thereof in such place or places and for such duration as the Secretary may determine appropriate to aid in the enforcement of this title.

(d) If, upon inspection or investigation, the Secretary determines that a violation, or combination of violations, poses an imminent hazard to safety, the Secretary shall order a vehicle or employee operating such vehicle out of service or order an employer to cease all or part of his commercial motor vehicle operations. In making any such order, the Secretary shall impose no restriction on any employee or employer beyond that required to abate the hazard. Subsequent to the issuance of such order, opportunity for review shall be provided in accordance with section 554 of title 5, United States Code, except that such review shall occur not later than ten days following issuance of such order.

(e) Any person other than an employee who knowingly and willfully violates any provision of this title or who knowingly and willfully makes any false statement or representation required under this title shall, upon conviction, be subject for each offense to a fine not to exceed \$25,000 or imprisonment for a term not to exceed one year, or both: Provided, however, That if such violator is an employee he shall only be subject to penalty if while operating a commercial motor vehicle his activities have led or could have led to death or serious injury, in which case he shall be liable, upon conviction, for a fine not to exceed \$2,500.

(f) The Secretary shall promulgate regulations establishing penalty schedules designed to induce timely compliance for persons failing to comply promptly with the requirements set forth in notices and orders.

(g) Any aggrieved person who, after a hearing, is adversely affected by a final order issued under this section may, within thirty days, petition for review of the order in the United States court of appeals in the circuit wherein the violation is alleged to have occurred or where he has his principal place of business or residence, or in the United States Court of Appeals for the Dis-trict of Columbia Circuit. Review of the order shall be based on a determination of whether the Secretary's findings and conclusions were supported by substantial evidence, or otherwise not in accordance with law. No objection that has not been urged before the Secretary shall be considered by the court, unless reasonable grounds existed for failure or neglect to do so. The commencement of proceedings under this subsection shall not, unless ordered by the court, operate as a stay of the order of the Secretary.

(h) The Secretary may obtain enforcement, including injunctive relief, of any penalties or orders issued under this section by applying to the United States district court for the district where the violation occurred or where the cited party has his principal place of business or residence. In addition to granting enforcement, the district court may assess an appropriate penalty for noncompliance and award such further relief as justice and public safety may require.

 (i) All penalties and fines imposed under this section shall be deposited into the Treasury as miscellaneous receipts.

(j) In any action brought under this section, subpenas for witnesses who are required to attend a United States district court may run into any other district.

(k) In any proceeding for criminal contempt for violation of an injunction or restraining order issued under this section, trial shall be by the court, or, upon demand of the accused, by a jury, conducted in accordance with the provisions of rule 42(b) of the Federal Rules of Criminal Procedure.

#### REPRESENTATION BEFORE THE COURTS

SEC. 408. Except as provided in section 518(a) of title 28, United States Code, relating to litigation before the Supreme Court, the General Counsel of the Department of Transportation may appear for and represent the Secretary in all proceedings and in any civil litigation brought under this title. Prior to making any such appearance and representation, the General Counsel of the Department of Transportation shall consult with and inform the Attorney General of the United States of his activities pursuant to this section.

#### PROTECTION OF EMPLOYEES

SEC. 409. (a) No person shall discharge, discipline, or in any manner discriminate against any employee with respect to the employee's compensation, terms, conditions, or privileges of employment because such employee (or any person acting pursuant to a request of the employee) has filed any complaint or instituted or caused to be instituted any proceeding under or related to this title or other authorities of the Secretary relating to commercial motor vehicle safety, or has testified or is about to testify in any such proceeding, or because such employee has exercised, on behalf of himself or others, any right afforded by this title.

(b) No person shall discharge, discipline, or in any manner discriminate against an employee with respect to the employee's compensation, terms, conditions, or privi-leges of employment for refusing to operate a vehicle when such operation constitutes a violation of any Federal rules, regulations, standards, or orders applicable to commercial motor vehicle safety or health, or because of the employee's reasonable apprehension of serious injury to himself or the public due to the unsafe condition of such equipment. The unsafe conditions causing the employee's apprehension of injury must be of such nature that a reasonable person, under the circumstances then confronting the employee, would conclude that there is a bona fide danger of an accident, injury, or serious impairment of health, resulting from the unsafe condition. In order to qualify for protection under this subsection, the employee must have sought from his employer, and have been unable to obtain, correction of the unsafe condition.

(c)(1) Any employee who believes he has been discharged, disciplined, or otherwise discriminated against by any person in violation of subsection (a) or (b) of this section may, within one hundred and eighty days after such alleged violation occurs, file (or have filed by any person on the employee's behalf) a complaint with the Secretary of Labor alleging such discharge, discipline, or discrimination. Upon receipt of such a complaint, the Secretary of Labor shall notify the person named in the complaint of the filing of the complaint.

filing of the complaint.

(2)(A) Within sixty days of receipt of a complaint filed under paragraph (1) of this

subsection, the Secretary of Labor shall conduct an investigation and determine whether there is reasonable cause to believe that the complaint has merit and notify the complainant and the person alleged to have committed a violation of this section of his findings. Where the Secretary of Labor has concluded that there is reasonable cause to believe that a violation has occurred, he shall accompany his findings with a proposed order providing the relief prescribed by subparagraph (B) of this paragraph. Thereafter, either the person alleged to have committed the violation or the complainant may, within thirty days, file objections to the proposed order and request a hearing on the record. Such hearings shall be expeditiously conducted. Where a hearing is not timely requested, the proposed order shall be deemed a final order which is not subject to judicial review. Upon the conclusion of such hearing, the Secretary of Labor shall issue a final order within one hundred and twenty days. In the interim, such proceedings may be terminated at any time on the basis of a settlement agreement entered into by the Secretary of Labor, the complainant, and the person alleged to have committed the violation.

(B) If, in response to a complaint filed under paragraph (1) of this subsection, the Secretary of Labor determines that a violation of subsection (a) or (b) of this section has occurred, the Secretary of Labor shall order (i) the person who committed such violation to take affirmative action to abate the violation, (ii) such person to reinstate the complainant to the complainant's former position together with the compensation (including back pay), terms, conditions, and privileges of the complainant's employment, (iii) compensatory damages, and (iv) where appropriate, exemplary damages. If such an order is issued, the Secretary of Labor, at the request of the complainant, may assess against the person against whom the order is issued a sum equal to the aggregate amount of all costs and expenses (including attorney's fees) reasonably incurred, as determined by the Secretary of Labor, by the complainant for, or in connection with, the bringing of the complaint upon which the order was issued.

(d)(1) Any person adversely affected or aggrieved by an order issued after a hearing under subsection (c) of this section may obtain review of the order in the United States Court of Appeals for the circuit in which the violation, with respect to which the order was issued, allegedly occurred, or the circuit in which such person resided on the date of such violation. The petition for review must be filed within sixty days from the issuance of the Secretary of Labor's order. Such review shall be in accordance with the provisions of chapter 7 of title 5, United States Code, and shall be heard and decided expeditiously.

(2) An order of the Secretary of Labor, with respect to which review could have been obtained under this section, shall not be subject to judicial review in any criminal or other civil proceeding.

(e) Whenever a person has failed to comply with an order issued under subsection (c)(2) of this section, the Secretary of Labor shall file a civil action in the United States district court for the district in which the violation was found to occur in order to enforce such order. In actions brought under this subsection, the district courts shall have jurisdiction to grant all appropriate relief, including injunctive relief, reinstatement, and compensatory and exempla-

ry damages. Civil actions brought under this subsection shall be heard and decided expeditiously.

#### GRANTS TO STATES

SEC. 410. Under the terms and conditions of this title, and subject to the availability of funds, the Secretary is authorized to make grants to States for the development or implementation of programs for the enforcement of Federal rules, regulations, standards, and orders applicable to commercial motor vehicle safety and compatible State rules, regulations, standards, and orders.

#### STATE ENFORCEMENT

SEC. 411. (a)(1) The Secretary shall formulate procedures for any State to submit a plan whereby the State agrees to adopt, and to assume responsibility for enforcing rules, regulations, standards, and orders in compliance with this title. Such plan shall be approved by the Secretary if, in his judgment, the plan is adequate to promote the objectives of this title, and the plan—

(A) designates the State motor vehicle safety agency responsible for administering

the plan throughout the State;

(B) contains satisfactory assurances that such agency has or will have the legal authority, resources, and qualified personnel necessary for the enforcement of such rules, regulations, standards, and orders;

(C) gives satisfactory assurances that such State will devote adequate funds to the administration of such plan and enforcement of such rules, regulations, standards, and

orders;

(D) provides a right of entry and inspection sufficient to enforce the provisions of this title;

(E) provides civil penalty procedures, rights, and remedies comparable to those set forth in section 407 of this title;

(F) provides that all reports required pursuant to this title be submitted to the State agency, and that such agency make available upon request to the Secretary all such reports:

reports;
(G) provides that such State agency will adopt such uniform reporting requirements and use such uniform forms for recordkeeping, inspections, and investigations as may be established and required by the Secre-

tary; and

(H) requires registrants of commercial motor vehicles to make a declaration of knowledge of applicable Federal and State safety rules, regulations, standards, and orders.

(2) If a plan submitted under paragraph (1) of this subsection is rejected, the Secretary shall provide the State a written explanation of his action and shall permit the State to modify and resubmit its proposed plan for approval, in accordance with the procedures formulated in such paragraph.

(b) The Secretary shall, on the basis of reports submitted by the State agency, and on his own inspections, make a continuing evaluation of the manner in which each State with a plan approved under this section is carrying out such plan. Whenever the Secretary finds, after affording due notice and opportunity for comment, that a State plan previously approved is not being followed or that it has become inadequate to assure the enforcement of rules, regulations, standards, or orders issued under this title, he shall notify the State of withdrawal of approval of such plan. Upon receipt of such notice, such plan shall cease to be in effect. Any State aggrieved by a determination of the Secretary pursuant to this subsection

may seek judicial review pursuant to chapter 7 of title 5, United States Code. The State may, however, retain jurisdiction in any case commenced before the withdrawal of the plan whenever the issues involved do not directly relate to the reasons for the withdrawal of approval of the plan.

(c) The Secretary shall not approve any plan under this section which does not provide that the aggregate expenditure of funds of the State and political subdivisions thereof, exclusive of Federal funds, for commercial motor vehicle safety programs will be maintained at a level which does not fall below the average level of such expenditures for its last two full fiscal years preceding the date of enactment of this title.

#### STATE REGULATIONS

SEC. 412. (a) Except as may otherwise be provided in this or any other law, any State agency may adopt additional or more stringent safety rules, regulations, standards, or orders for commercial motor vehicle safety if such rules, regulations, standards, or orders are not inconsistent with the Federal rules, regulations, standards, and orders issued under this title.

(b) Nothing in this title shall affect existing hours-of-service regulations of any State applying to commercial motor vehicle operations occurring wholly within that State, unless the Secretary affirmatively finds upon review of a State's hours-of-service regulations that such regulations (1) materially diminish commercial motor vehicle safety or the health and safety of employees, (2) are not required by compelling local conditions, or (3) unduly burden interstate commerce. If the Secretary makes such an affirmative determination, he may require such State to adopt Federal hours-of-service regulations.

## FEDERAL SHARE OF COSTS

Sec. 413. By grants authorized under this title, the Secretary shall reimburse any State an amount not to exceed 80 per centum of the costs incurred by that State in that fiscal year in the development and implementation of programs to enforce commercial motor vehicle rules, regulations, standards, or orders adopted pursuant to this title. The funds of the State and political subdivisions thereof which are required to be expended under section 411(c) of this title shall not be considered to be part of the non-Federal share. The Secretary is authorized to allocate, among the whose applications for grants have been approved, those amounts appropriated for grants to support such programs pursuant to such criteria as may be established.

# AUTHORIZATIONS

Sec. 414. To carry out the purposes of sections 410 and 411 of this title, there is authorized to be appropriated out of the Highway Trust Fund not to exceed \$10,000,000 in the fiscal year ending September 30, 1984, not to exceed \$20,000,000 in the fiscal year ending September 30, 1985, not to exceed \$30,000,000 in the fiscal year ending September 30, 1986, not to exceed \$40,000,000 in the fiscal year ending September 30, 1987, and not to exceed \$50,000,000 in the fiscal year ending September 30, 1988. Appropriated funds authorized by this section shall be used to reimburse to States the Federal pro rata share of costs incurred. Grants made pursuant to the authority of this title shall be for periods not to exceed one fiscal year, ending at the end of a fiscal year.

# ANNUAL REPORT

Sec. 415. As part of the Secretary's annual report to the Congress required by section

12 of the Department of Transportation Act (49 U.S.C. 1658), the Secretary shall make a written report to the Congress concerning his efforts and his current plans to upgrade the safety and health of operators of commercial motor vehicles. The report shall include, but not be limited to, an evaluation of commercial motor vehicle safety or health programs of the Department of Transportation, an outline of problem areas and appropriate steps to alleviate them, and recommendations for closer coordination and cooperation among agencies of the Federal Government and between the Federal Government and the States to enforce the rules, regulations, standards, and orders issued pursuant to this title.

#### APPLICABILITY

SEC. 416. Nothing in this title shall apply to the operation of any vehicles engaged in farming activities and logging operations as defined by the Secretary.

# COMMERCIAL MOTOR VEHICLE SAFETY ADVISORY COMMITTEE

SEC. 417. (a)(1) Not later than twelve months after the date of enactment of this title, the Secretary shall establish a Commercial Motor Vehicle Safety Advisory Committee and appoint the initial members of the Committee. The Committee shall be composed of the Secretary and fifteen members, each of whom shall be experienced in the safety regulation of commercial motor vehicles or technically qualified by training, experience or knowledge to evaluate commercial motor vehicle rules or regulations. The Committee shall be appointed by the Secretary, after consultation with public and private agencies and organizations concerned with commercial motor vehicle safety. Members shall include representatives of State governments, the motor carrier industry, shippers, union drivers and independent owner-operators, and the public.

(2) A Chairman shall be selected by a majority of the members of the Committee.

(3) Each member appointed by the Secretary shall hold office for a term of three years, except that (A) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term; (B) the terms of office of members first taking office after the date of enactment of this title shall expire as follows: Five at the end of one year after the date such Committee members are appointed by the Secretary; five at the end of two years after the date such Committee members are appointed by the Secretary; and five at the end of three years after the date such Committee members are appointed, as designated by the Secretary at the time of appointment; and (C) the term of any member shall be extended until the date on which the successor's appointment is effective. None of the members appointed by the Secretary who has served a threeyear term, other than Federal officers or employees, shall be eligible for reappointment within one year following the end of his preceding term.

(4) Members of the Committee other than Federal employees may be compensated at a rate to be fixed by the Secretary, but not to exceed the daily equivalent of the maximum annual rate of basic pay then currently payable under the General Schedule under section 5332 of title 5, United States Code, for each day (including traveltime) when engaged in the actual duties of the Committee. All members, while away from their homes or regular places of business, may be al-

lowed travel expenses, including per diem in lieu of subsistence as authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently. Payments under this section shall not render members of the Committee employees or officials of the United States

for any purpose. (b) The Advisory Committee shall advise, consult with, and make recommendations to the Secretary on matters relating to the activities and functions of the Department in the field of commercial motor vehicle safety. The Committee is authorized to review research projects or programs submitted to or recommended by it in the field of commercial motor vehicle safety and recommend to the Secretary any such projects which it believes show promise of making valuable contributions to human knowledge with respect to the cause and prevention of commercial motor vehicle accidents. The Committee is also authorized to review. prior to issuance, rules, regulations, standards, and orders proposed to be issued by order of the Secretary under the provisions of this title and to make recommendations thereon. Such recommendations shall be published in connection with the Secretary's determination or order.

(c) The Committee shall meet with the Secretary (or his designee) at least once

every year.

(d) There are authorized to be appropriated for each of the fiscal years ending on September 30, 1984, 1985, and 1986, not to exceed \$125,000 for purposes of carrying out the provisions of this section.

#### AUTHORIZATION OF APPROPRIATIONS

Sec. 418. For the purposes of carrying out the provisions of title 23, United States Code, the following sums are hereby authorized to be appropriated out of the Highway Trust Fund:

(1) for carrying out sections 307(a) and 403 of title 23, United States Code (relating to highway safety research and development) by the Federal Highway Administration, \$13,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and

September 30, 1988;

(2) for carrying out section 402 of title 23, United States Code (relating to highway safety programs) by the National Highway Traffic Safety Administration, \$100,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988: and

(3) for carrying out section 403 of title 23, United States Code (relating to highway safety research and development) by the National Highway Traffic Safety Administration, \$31,000,000 per fiscal year for each of the fiscal years ending September 30, 1985, September 30, 1986, September 30, 1987, and September 30, 1988.

# APPORTIONMENT

SEC. 419. (a) Section 401 of title 23, United States Code, is amended by striking the second sentence.

(b) Section 402(c) of title 23, United States Code, is amended by striking ", except that the apportionments to the Virgin Islands, Guam, and American Samoa shall not be less than one-third of 1 per centum of the total apportionment"

## NATIONAL UNIFORM STATE REGULATION

SEC. 420. (a) There is established in the Department of Transportation a working group, composed of the Secretary (or an official of the Department appointed by the

Secretary) and not to exceed fifty-one members to be appointed by the Secretary. The Secretary shall select the Chairman of the Committee from among the Committee members. The appointed members shall be selected from among representatives of various State governments concerned with vehicle registration, fuel tax, and third structure tax requirements of States. The term of members shall not exceed eighteen months.

(b)(1) The working group shall advise, consult with, and make recommendations to, the Secretary regarding uniform State regulations of interstate motor carriers. The working group is authorized to develop and recommend to the Secretary standards for uniform State regulation of interstate motor carriers in regard to vehicle registration, fuel tax, and third structure tax requirements. These standards shall include-

(A) standardized procedures and forms:

(B) base State certification:

(C) single State unit for filings, applications, and permits;

(D) payment to the base State of fees and taxes due other States;

(E) equitable distribution of revenues; and (F) a limit on fees paid for identification stickers, plates or other indicia.

Such standards shall not define or include the amounts of any State registration fees, fuel taxes, or third structure taxes.

(2) The working group shall also:

(A) define an approach to resolve any discrepancies in States' implementation of standards ultimately promulgated by the Secretary:

(B) identify permanent bodies to develop and recommend future modification to such

standards; and

(C) consult with public and private interests contributing to, affected by, or concerned with State motor carrier requirements during the development of the standards.

(c) Members of the working group who are not officers or employees of the United States shall, while attending meetings or conferences of such working group or otherwise engaged in the business of such working group, be entitled to receive compensation at a rate fixed by the Secretary, but not exceeding \$100 per diem, including travel time. While away from their homes or regular places of business, members of the working group may be allowed travel expenses, including per diem in lieu of subsistence, as authorized in section 5703 of title 5, United States Code, for persons in the Government service employed intermittently. Payments under this subsection shall not render members of the working group employees or officials of the United States for any purpose.

(d) The recommendations required by subsection (b) of this section shall be submitted to the Secretary within eighteen months of the date of enactment of this title.

(e) The Secretary may initiate rulemaking after the Secretary has received such recommendations in order to implement those recommendations found acceptable and in compliance with the criteria defined in subsection (b)(1) of this section.

(f) If the working group fails to make such recommendations within eighteen months after the date of enactment of this title, the Secretary may develop such standards and initiate rulemaking to promulgate regulations implementing those standards.

#### MINIMUM FINANCIAL RESPONSIBILITY FOR MOTOR CARRIERS

SEC. 421. (a) Section 30(a)(2) of the Motor Carrier Act of 1980 (Public Law 96-296; 94 Stat. 820) is amended to read as follows:

"(2) The minimum level of financial responsibility established by the Secretary under paragraph (1) of this subsection for any vehicle shall not be less than \$750,000, except that the Secretary may by regulation reduce such amount for any class of vehicles or operations if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service."

(b) Section 30(b) of the Motor Carrier Act of 1980 (Public Law 96-296; 94 Stat. 821) is

amended to read as follows:

"(b)(1) The Secretary shall establish regulations to require minimum levels of financial responsibility sufficient to satisfy liability amounts (to be determined by the Secretary) covering public liability, property damage, and environmental restoration for the transportation of hazardous materials (as defined by the Secretary), oil or hazard-ous substances (as defined by the Administrator of the Environmental Protection Agency), or hazardous wastes (as defined by the Administrator of the Environmental Protection Agency) by motor vehicle in interstate commerce, foreign commerce, or intrastate commerce.

"(2) The minimum level of financial responsibility established by the Secretary under paragraph (1) of this subsection for any vehicle transporting in interstate commerce, foreign commerce, or intrastate com-

merce-

"(A) hazardous substances (as defined by the Administrator of the Environmental Protection Agency), in cargo tanks, portable tanks, or hopper-type vehicles, with capacities in excess of 3,500 water gallons;

"(B) in bulk class A and B explosives, poison gas, liquefied compressed gas, or

compressed gas; or

"(C) a large quantity of radioactive materials;

shall not be less than \$5,000,000, except that the Secretary may by regulation reduce such amount for any class of vehicles or operations if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service.

"(3) The minimum level of financial responsibility established by the Secretary under paragraph (1) of this subsection for any vehicles transporting in interstate, foreign, or intrastate commerce any material, oil, substance, or waste not subject to the provisions of paragraph (2) of this subsection shall not be less than \$1,000,000, except

"(A) the Secretary may by regulation reduce such amount for any class of vehicles or operations if the Secretary finds that such reduction will not adversely affect public safety and will prevent a serious disruption in transportation service;

"(B) in the case of any class of vehicles transporting any such material, oil, sub-stance, or waste in intrastate commerce other than in bulk, the Secretary, by regulation, may reduce such amount if the Secretary finds that such reduction will not ad-

versely affect public safety; and

"(C) in the case of any class of vehicles transporting any such material, oil, substance, or waste in interstate commerce in quantities less than those requiring placarding under the Department of Transportation's hazardous materials regulations, the Secretary may by regulation reduce such amount if the Secretary finds that such reduction will not adversely affect public safety.

"(4) If, at the end of the one-year period beginning on the date of enactment of this Act, the Secretary has not established regulations to require minimum levels of financial responsibility as required by paragraph (1) of this subsection for any class of transportation of hazardous materials, oil, hazardous substances, or hazardous wastes by motor vehicle in interstate, foreign, or intrastate commerce, the levels of financial responsibility for such class of transportation shall be the \$5,000,000 amount set forth in paragraph (2) of this subsection or the \$1,000,000 amount set forth in paragraph (3) of this subsection, as the case may be, until such time as the Secretary, by regulation, changes such amount under this subsection."

(c) Section 30(f) of the Motor Carrier Act of 1980 (Public Law 96-296; 94 Stat. 823) is amended to read as follows:

"(f) This section shall not apply to motor vehicles having a gross vehicle weight rating (GVWR) less than ten thousand pounds, if such vehicles are not used to transport any quantity of class A or B explosives, any quantity of poison gas, or a large quantity of radioactive materials in interstate or foreign commerce."

Mr. PRYOR. Mr. President, could we have order in the Chamber?

The PRESIDING OFFICER. The Senate will be in order.

Mr. PRYOR. I will speak for only a few minutes because I think this amendment speaks for itself.

First, just for a moment, I would like to say, Mr. President, that this piece of legislation before the Senate this evening is basically divided into two particular sections. One section is that section which deals with a 5-centagallon fuel tax. All of us are very familiar with what this does. We all know basically what it will bring to our States. We all know generally how many miles of highways we can build with this money that we derive from this 5-cent-a-gallon tax.

That, to me, right now is not the issue because there is another issue involved in this particular legislation, which I think is a larger issue, in all due respect to the very distinguished committees that worked on this particular legislation.

It is my opinion, after studying this legislation, that we are not fully aware today of what the effects of the use tax and excise tax portion of this legislation is going to have on the following:

We do not know how it is going to affect the trucking industry. I would like to say first this is not a trucking bill. It has not been endorsed by the National Trucking Association. To the very best of my knowledge, the National Trucking Association has no knowledge that this bill is even before the Senate. We have not been bombarded with mail to support or to vote down this legislation.

So, we do not have any real impact or fore knowledge of the impact this excise tax and this use tax is going to have upon the truckers of our country.

Second, we have no idea, Mr. President, of the impact of this legislation and these two taxes upon food prices, upon agriculture, upon industry, and upon ultimately the consumers of America

How much is going to be added to the consumers' bill every time they go to the grocery store, every time they go to the market, every time they go to K-Mart or whatever it might be, to buy merchandise as a consumer?

We do not have a record on this bill. The reason we do not have a record on this bill to look at, to study, and to try to derive some facts and figures from is pretty simple. This bill was introduced into the House on November 30, into the other body. Five days later this bill was approved by the House and sent to the Senate.

We have now been on this piece of legislation for 3 days. It is late in the evening. We are just now beginning to talk, Mr. President, about the merits and the demerits of this particular mammoth tax-use fee that is being brought before us as a Congress.

I would like to say that basically what this amendment does is very simple. It certainly says that the 5-cent-a-gallon gasoline or fuel tax should go through. That is up to you, that is up to me, that is an individual decision.

What it does is to attempt to separate the excise tax and the use tax portion of this bill over into the first part of next year to give us a time to hold hearings, to give us the opportunity for these affected industries to come forward, to make their case, and to have their say as we have always given any industry and any affected party that same right.

It does not cost this Government one dime of revenue to delay this particular tax. The reason it costs us no revenue is because the excise tax and the use tax will not even be in effect by the time we have the opportunity to come forward in February or March and enact a piece of legislation, one, that we all understand, and, two, where we know what the impact is ultimately going to be.

It is my opinion, Mr. President, that if this tax that we are voting on at this late hour, or on tomorrow in all probability, is fair on December 15, 10 days before Christmas, that it will be just as fair on February 15 when we have given an ample opportunity to the people affected and the people who will pay this tax—I must say an enormous increase—an opportunity to be heard.

We can do this. We can do it without a loss of revenue. Mr. President, when we do it, I think full well we will be meeting the fairness test, and I think full well that we will be at that time discharging our obligation.

Finally, Mr. President, I would like to say once again, I would like to

stress, that this particular legislation is not all that appealing to the truckers for this reason: In addition to setting aside the issue of the use tax and the excise tax into February or March of next year, it also sets aside three other areas. I think Senators should be very careful to note this.

It sets aside the 80,000-pound mandate; it sets aside the new width that truckers can have; it sets aside the new length that truckers can have, the existing proposal that we have before us today.

It will consider the length, width, and weight issues along with the amount of tax that they should charge in one package when we can deliberate, when we can look at this whole issue and we can legislate in an atmosphere that I think will be conducive not only to the productivity of this country but also to the protection of the consumers of America.

Mr. President, I wish to yield to the distinguished Senator from Kansas if he would like to make a rebuttal. That is my case. I shall be happy to answer any questions about what this legislation is about.

Mr. DOLE. Mr. President, first, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. DOLE. I thank the distinguished Senator from Arkansas. I certainly do not quarrel with what he said except we have been considering, on the Senate side, at least, some major changes in the taxing of trucks, the excise taxes and the user taxes, for a number of months. In fact, we held hearings a number of months ago. I believe that we are going to have an additional amendment tomorrow, the Senator from Kansas understands, from some of our colleagues on both sides that will even do more for the trucking industry.

I understand that they are very concerned, and I understand that they are concerned with justification. They are going from some \$240 up to what was a recommended \$2,700 tax. That was reduced to \$2,000 in the House, \$1,600 in the Senate Finance Committee, and we are working on a package that may or may not come to fruition, that will reduce that, even, to \$1,200. It is going to be phased in over a 3-year period.

I say to the Senator from Arkansas that this Senator has had direct discussions with representatives of the American Trucking Association and with truckers in my own State. We have had our staff discuss the legislation with truckers in other States.

Having said that, it seems to me if we delay as the Senator from Arkansas suggests, then we are going to say to all the other people who use the highways, "You pay for it; the truckers are not going to have to do a thing. Next year, they can come back and maybe we will or maybe we will not do something next year."

Under the amendment, the automobile drivers will have to pay the largest share for highway and bridge repairs. There may be and there is disagreement over the fair share that truckers should pay. The distinguished Senator from Idaho has been a leader in this area. We have discussed it with him, with Senator Boschwitz, Senator Melcher, Senator Jepsen, and others who have been concerned about the share truckers would pay.

It seems to this Senator that if we want a bill, if we want this bill to pass—I assume most of us want it to pass; at least we have spent a long time on it if we do not—we ought to make certain that we include everyone in the bill at this time. Notwithstanding the merits of the arguments, I hope that at the appropriate time, the distinguished majority leader will move to table the amendment.

We are in a situation now where heavy trucks pay only 26 percent of the funds going into the trust fund. Under the amendment, the trucks' share would be decreased while others' share would be increased.

The Senator from Kansas is not an expert in this area. I do not subscribe to all the studies made by the Department of Transportation. We have, in effect, discarded those studies in an effort to find some fair way to address the concerns not only of the big, big truckers but smaller truckers in States like Kansas, Iowa, and other States, as well as truckers up and down the line.

I hope this amendment is not adopted, Mr. President. Again, I do not quarrel with the author of the amendment, his motive or intent. Next year, the Senator from Arkansas will be a member of the Senate Committee on Finance and if he finds that there should be, by some rare happenstance, inequity in what we have done, we shall be happy to take it up with a member of the Finance Committee.

Mr. PRYOR. If I may briefly respond, Mr. President, I appreciate the Senator's remarks. I would like to remind my colleagues that basically, what we are faced with here is a great unknown. We are about to pass an enormous tax on one industry. I am one here who comes tonight saying that we know that the truckers should pay a higher degree of tax on our highways. They use our highways more; without question, they have a very divastating effect on certain segments of our highway system. But that is not the issue. The issue is what is a fair price, what is a fair tax, and when does a tax become a punishment?

I think, if I read the legislation correctly, we are bordering on a punishment tax.

I only conclude by saying that we need to know the real impact and

effect of this tax and not deliberate in a lameduck session, not deliberate at 11:30 at night, not worry and fret about what this tax is going to mean. We need to know what it is going to mean. That is why I think this tax should be postponed, separated from the rest of this legislation, and that we have a hearing in February or March and bring legislation back to the Senate and to the House for final disposition.

I did want to call for the yeas and nays. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I do not wish to cut off any Senator who wishes to comment on this amendment. As Senator Dole points out, I do intend to make a tabling motion. If no other Senator seeks recognition to speak on this, I am prepared to do so now.

I move to lay this amendment on the table. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay the amendment on the table. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. I announce that the Senator from Arizona, (Mr. Goldwater), the Senator from Utah (Mr. Hatch), the Senator from Oregon (Mr. Packwood), the Senator from Delaware (Mr. Roth), and the Senator from Connecticut (Mr. Weicker), are necessarily absent.

Mr. ROBERT C. BYRD. I announce that the Senator from Virginia (Mr. Harry F. Byrr, Jr.), the Senator from California (Mr. Cranston), the Senator from Arizona (Mr. DeConcini), the Senator from Missouri (Mr. Eacleton), the Senator from Nebraska (Mr. Exon), the Senator from Ohio (Mr. Glenn), the Senator from Louisiana (Mr. Johnston), the Senator from Massachusetts (Mr. Kennedy), and the Senator from Mississippi Mr. Stennis), are necessarily absent.

I also announce that the Senator from New York (Mr. Moynihan), is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 48, navs 37, as follows:

[Rollcall Vote No. 414 Leg.]

#### YEAS-48

Abdnor	Garn	Murkowski
Andrews	Gorton	Pell
Baker	Grassley	Percy
Baucus	Hart	Proxmire
Bentsen	Hatfield	Quayle
Boren	Hawkins	Randolph
Bradley	Havakawa	Rudman
Brady	Heinz	Schmitt
Burdick	Humphrey	Simpson
Chafee	Jepsen	Stafford
Cochran	Kasten	Stevens
D'Amato	Laxalt	Symms
Danforth	Leahy	Thurmond
Dole	Mathias	Tower
Domenici	McClure	Wallop
Durenberger	Melcher	Warner

#### NAYS-37

Armstrong	Heflin	Mitchell
Biden	Helms	Nickles
Boschwitz	Hollings	Nunn
Bumpers	Huddleston	Pressler
Byrd, Robert C.	Inouye	Pryor
Cannon	Jackson	Riegle
Chiles	Kassebaum	Sarbanes
Cohen	Levin	Sasser

#### NOT VOTING-15

Byrd,	Glenn	Packwood
Harry F., Jr.	Goldwater	Roth
Cranston	Hatch	Stennis
DeConcini	Johnston	Weicker
Eagleton	Kennedy	
Exon	Movnihan	

So the motion to lay the amendment on the table was agreed to.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I move to lay that motion on the table. The motion to lay on the table was

agreed to.

Mr. DOLE. Mr. President, I suggest the absence of a quorum.

Mr. BAKER. Mr. President, will the Senator withhold for a moment?

Mr. DOLE. I withhold.

The PRESIDING OFFICER. The majority leader is recognized.

## ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I announce that there will be no more roll-call votes tonight.

I remind Senators the Senate is convening at 10 a.m. tomorrow and I expect we will be on this bill by 10:30 a.m. The cloture vote will occur after a quorum is established 1 hour after the conventing time.

The Senators who have amendments they wish to offer before cloture are urged to be here and on deck early tomorrow morning.

Mr. DOLE addressed the Chair.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, if we can have order, I think there are two or three noncontroversial amendments which have been cleared all the way around, but I do not think we can take them up until we have more order.

The PRESIDING OFFICER. The Chair requests that order be restored to the Chamber. The Chair respectfully requests that Senators take their seats and that conversations be conducted in the cloakrooms and that members of the staff retire to the rear of the Chamber.

ORDER FOR RECESS UNTIL 9:45 A.M. TOMORROW; AND FOR THE RECOGNITION OF SENATOR GRASSLEY ON TOMORROW

Mr. BAKER. Mr. President, can I ask the Senator to yield for 1 more minute?

Mr. DOLE. I yield to the majority leader.

Mr. BAKER. I have just been advised that one Senator will require a special order in the morning, and in order to make sure there is some time available for Members to offer amendments, I ask unanimous consent that the time for the Senate to convene be changed from 10 o'clock to 9:45; and I ask unanimous consent that the Senator from Iowa (Mr. Grassley) have a special order for not to exceed 15 minutes, and follow on the recognition of the two leaders under the standing order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DOLE, Mr. President, as the Senator from Kansas indicated, there are two or three noncontroversial amendments I understand there is no objection to that we would like to dispose of because we are going to try to do our best to accommodate those who have nongermane amendments between now and the cloture votes tomorrow. One of those is an amendment, I understand, by the distinguished Senator from Idaho, the distinguished Senator from Vermont, the distinguished Senator from Hampshire, and the Distinguished Senator from North Carolina.

So I ask unanimous consent that the pending amendment be temporarily set aside for the consideration of the amendment of the distinguished Senator from Idaho and that no amend-

ment thereto be in order.

Mr. LEVIN. Mr. President, reserving the right to object, I wonder if the Senator from Kansas will make provision to lay down an amendment tonight with the vote scheduled for tomorrow morning prior to the rollcall on cloture? We have a couple of amendments which we have been waiting to get to. I am not seeking a rollcall tonight. I understand there are no more rollcalls.

I would like to lay it down tonight, have a rollcall before cloture tomorrow, and I am wondering if the Senator from Kansas can make provision for that? This is a bipartisan amendment to have unemployment compen-

sation extended.

Mr. DOLE. I would only say to the Senator from Michigan if we are going to try to do that I am not certain that we have got time before the cloture vote, which will be after—Mr. President, I suggest the absence of a quorum.

Mr. PRESIDENT, I understand that while they are discussing the amendment of the Senator from Idaho that a noncontroversial amendment will be offered by the Senator from Pennsylvania, which has been cleared all the way around. We are going to try to accommodate the Senator from Michigan, which we are working on right now, and we are trying to work out something with the Senator from Alabama.

So I ask unanimous consent that the pending amendment be temporarily set aside for consideration of the amendment by the distinguished Senator from Pennsylvania (Mr. Heinz) and no amendment to the amendment be in order.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

#### UP AMENDMENT NO. 1469

(Purpose: Relating to the exemption from taxation under provisions other than the Internal Revenue Code of 1954)

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. Heinz) for himself and Mr. Percy proposes an unprinted amendment numbered 1469.

Mr. HEINZ. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place insert the following:

SEC. . INTEREST EXEMPT OTHER THAN UNDER THE INTERNAL REVENUE CODE OF 1954.

(a) In General.—Section 103 (relating to interest on certain governmental obligations) is amended by redesignating subsection (m) as subsection (n) and by inserting after subsection (l) the following new subsection:

"(m) Obligations Exempt Other Than Under This Title.—

"(1) PRIOR EXEMPTIONS.—For purposes of this title, notwithstanding any provision of this section or section 103A any obligation the interest on which is exempt from taxation under this title under any provision of law which is in effect on the date of the enactment of this subsection (other than a provision of this title) shall be treated as an obligation described in subsection (a).

"(2) NO OTHER INTEREST TO BE EXEMPT EXCEPT AS PROVIDED BY THIS TITLE.—Notwithstanding any other provision of law, no interest on any obligation shall be exempt from taxation under this title unless such

interest—

"(A) is on an obligation described in paragraph (1), or

"(B) is exempt from taxation under any provision of this title.".

(b) CONFORMING AMENDMENTS .-

(1) Section 851(b) (relating to definition of regulated investment company) is amended by striking out "103(a)(1)" and inserting in lieu thereof "103(a)".

(2) Section 852 (relating to taxation of regulated investment companies and their shareholders) is amended by striking out "103(a)(1)" each place it appears and inserting in lieu thereof "103(a)".

(3) Section 3454(a)(2)(B) (relating to definitions of interest, dividend, and patronage dividends) is amended by striking out "law" and inserting in lieu thereof "this title".

(4) Section 6049(b)(2)(B) (relating to returns regarding payments of interest) is amended by striking out "law" and inserting in lieu thereof "this title".

(5) Section 6362(b)(4)(A) (relating to qualified State individual income taxes) is amended by striking out "103(a)(1)" and inserting in lieu thereof "103(a)".

Mr. LONG. Mr. President, I have not heard an explanation of the amendment. Are we going to have an explanation or is it going to be read?

Mr. HEINZ. Mr. President, if the Senator will permit me, I do intend to

explain the amendment.

Mr. President, the 1976 Revenue Act created the ability of mutual funds in section 152 to pass through most tax-exempt interest from tax-exempt securities under 103 to the investors of mutual funds.

At the time the legislation was drafted, I am advised that there was an oversight, that tax-exempt bonds under other statutes other than those under the Finance Committee jurisdiction, which are all, of course, 103 statutes, was not considered at that time.

Since that time several mutual funds have made investments in the securities which are tax exempt under laws

other than section 103(a).

The purpose of this amendment is to permit mutual funds to pass through to their shareholders tax-exempt interest received on obligations, mostly housing bonds, by the way, which are tax exempt by virtue of noncode statutes which should be under our Finance Committee jurisdiction.

Under present law mutual funds can pass through under the Internal Reve-

nue Code.

This amendment would bring those other statutory non-Code tax-exempt bonds under section 103.

Mr. LONG. Mr. President, that amendment has not been cleared with the Senator from Louisiana, but I believe it is all right and, therefore, I will not object to it.

Mr. HEINZ. I thank my friend from Louisiana.

Mr. DOLE. Mr. President, I regret that it was not cleared with the Senator from Louisiana. I thought it had been and I apologize for indicating that it was.

Mr. HEINZ. It is my mistake. I cleared it with some people on the other side and I thought clearing it

that way was all that was necessary, and I apologize.

Mr. DOLE. I have no objection.

ADDITIONAL COSPONSOR—UP AMENDMENT NO. 1469

Mr. BOSCHWITZ. Mr. President, I yield for a unanimous-consent request of the Senator from illinois.

Mr. PERCY. Mr. President, I ask unanimous consent that I be added as a cosponsor to amendment No. 1469, the mutual fund amendment of Senator Heinz. We have worked together on this

In 1976, I offered an amendment to a tax bill that allows mutual funds to pass through to small investors the tax exemption on tax-exempt bonds. Previously, only the direct purchaser of those bonds could claim that exemption from taxes. This amendment essentially led to the creation of the tax-exempt mutual fund industry.

Attorneys have recently learned that there was a technical oversight in the 1976 law. Several types of tax-exempt bonds—HUD project notes, Puerto Rican, Virgin Islands, and Indian tribal bonds—are not eligible for this passthrough.

The HUD notes are the most seriously affected by this technicality. If the correction is not made, the market for these HUD notes—mostly public housing—will shrink as mutual funds stop buying them.

I was pleased to join with Senator Heinz in introducing this important clarification and urge my colleagues to support it.

Mr. DOLE. Will the Senator from Illinois yield?

Mr. PERCY. I am happy to yield.

Mr. DOLE. I want to thank the distinguished Senator from Illinois for calling this to our attention and to express my appreciation for the cooperation the Senator from Pennsylvania provided to the Senator from Illinois and the Senator from Kansas.

Mr. PERCY. I have enjoyed working with the distinguished chairman of the committee on this amendment. I think it is an extremely important amendment. The mutual fund industry was created by an amendment that we worked out some time ago. Recently there has come to light a technical difficulty that exempted certain types of bonds and was a hardship to those affected by it. I think this will preserve our original intention.

I thank my distinguished colleague. Certainly, we have enjoyed working with Senator Heinz on it.

Mr. DOLE Mr. President, we appreciate the Senator from Illinois calling it to our attention.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendment (UP No. 1469) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. HEINZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the pending amendment be temporarily set aside and the distinguished Senator from North Carolina be recognized to propose an amendment and that any amendment to the amendment not be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### UP AMENDMENT NO. 1470

(Purpose: To provide relief for certain pension plan distributions received during 1976 and 1977 and transferred to an individual retirement account)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows: The Senator from North Carolina (Mr. Helms) proposes an unprinted amendment numbered 1470.

Mr. HELMS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the Baker substitute, insert the following:

SEC. 204. TREATMENT OF CERTAIN DISTRIBUTIONS FROM A QUALIFIED TERMINATED PLAN.

(a) In General.—For purposes of the Internal Revenue Code of 1954, if—

(1) a distribution was made for a qualified terminated plan to an employee on December 16, 1976, and on January 6, 1977, such employee transferred all of the property received in such distribution to an individual retirement account (within the meaning of section 408(a) of such Code) established for the benefit of such employee, and

(2) the remaining balance to the credit of such employee in such qualified terminated plan was distributed to such employee on January 21, 1977, and all the property received by such employee in such distribution was transferred by such employee to such individual retirement account on January 21, 1977,

then such distributions shall be treated as qualifying rollover distributions (within the meaning of section 402(a)(5)(D) of such Code) and shall not be includible in the gross income of such employee for the taxable year in which paid.

(b) QUALIFIED TERMINATED PLAN.—For purposes of this section, the term "qualified terminated plan" means a pension plan—

(1) with respect to which a notice of sufficiency was issued by the Pension Benefit Guaranty Corporation on December 2, 1976, and

(2) which was terminated by corporate action on February 20, 1976.

(c) REFUND OR CREDIT OF OVERPAYMENT BARRED BY STATUTE OF LIMITATIONS.—Notwithstanding section 6511(a) of the Internal

Revenue Code of 1954 or any other period of limitation or lapse of time, a claim for credit or refund of overpayment of the tax imposed by such Code which arises by reason of this section may be filed by any person at any time within the 1-year period beginning on the date of enactment of this Act. Sections 6511(B) and 6514 of such Code shall not apply to any claim for credit or refund filed under this subsection within such 1-year period.

Mr. HELMS. Mr. President, my amendment relates to the treatment of certain distributions from a qualified terminated pension plan, and is designed to remedy the problem encountered by a North Carolina citizen, John Pope.

Mr. Pope had a pension plan with his company, Variety Wholesalers, Inc. The plan was terminated in 1976, and there was a distribution of all the plan's assets in December of that year except for an insurance policy on Mr. Pope's life. Mr. Pope wished to purchase the life insurance policy but could not because at the time Pension Benefit Guaranty Corp. regulations prohibited the sale of a life insurance policy by a pension plan.

In early 1977 Mr. Pope established a rollover IRA account with the proceeds from his payout. Also in early 1977, the PBGC changed its regulations governing the sale of a life insurance policy by a pension plan to allow such a sale. Mr. Pope was able to purchase his policy, and he promptly deposited these funds in a rollover IRA account. A complete rollover of all funds received by Mr. Pope from the terminated pension plan was thus accomplished within 60 days of the plan's termination.

The IRS audited Mr. Pope's 1976 and 1977 tax returns and disallowed the entire rollover because of a technicality that requires all payouts to be made within 1 calendar year. The IRS assessed an income tax deficiency, plus interest and a substantial penalty.

Mr. President, Mr. Pope has been unjustly penalized by the IRS because the PBGC changed the rules regarding the sale of a life insurance policy by a pension plan. When Mr. Pope's pension plan was terminated, PBGC regulations barred the sale of his life insurance policy. But within weeks the PBGC changed its regulations to allow such a sale.

Congress never intended to penalize taxpayers who comply with requirements of the Employee Retirement Income Security Act, but who nevertheless face adverse treatment by the IRS because the payout of the proceeds of a terminated pension plan straddles 2 calendar years.

Mr. President, my amendment would allow Mr. Pope's distribution to be treated as a qualifying rollover distribution. To my knowledge, Mr. Pope's situation is unique, and my amendment would apply to no other taxpayer. Its effect on the Treasury would be

Mr. DOLE. Mr. President, this has been cleared on all sides. The Senator from North Carolina discussed it with Senator Long and Senator Metz-ENBAUM. I have no objection to the amendment. In fact, I was there, I might say to the Senator from North Carolina, throughout the hearing. This is a case that deserves attention. Mr. Pope was also present. I hope the amendment will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Caro-

lina (Mr. HELMS).

The amendment (UP No. 1470) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Kansas.

UP AMENDMENT NO. 1457, AS MODIFIED

Mr. DOLE. Mr. President, I send a modification of my second degree amendment to the desk.

The PRESIDING OFFICER. The amendment is so modified.

The amendment (UP No. 1457, as

modified) follows: In place of the language prepared to be in-

serted insert the following:

SEC. . DECREASE IN HOLDING PERIOD REQUIRED CAPITAL LONG-TERM TREATMENT.

(a) In GENERAL.

(1) Capital Gains.—Paragraphs (1) and (3) of section 1222 of the Internal Revenue Code of 1954 (relating to other terms relating to capital gains and losses) are each amended by striking out "1 year" and inserting in lieu thereof "6 months".

(2) Capital Losses.—Paragraphs (2) and (4) of section 1222 of such Code are each amended by striking out "1 year" and inserting in lieu thereof "6 months".

(b) Conforming Amendments.-The following provisions of the Internal Revenue Code of 1954 are each amended by striking out "1 year" each place it appears and inserting in lieu thereof "6 months":

(1) Paragraph (1)(B) of section 166(d) (re-

lating to nonbusiness debts).

(2) Subsection (a) of section 341 (relating to treatment of gain to shareholders in the case of collapsible corporations).

(3) Paragraph (2) of subsection (a) and subparagraph (L) of subsection (e)(4) of section 402 (relating to capital gains treatment for certain distributions in the case of a beneficiary of an exempt employees' trust).

(4) Subparagraph (A) of section 403(a)(2) (relating to capital gains treatment for certain distributions in the case of a beneficiary under a qualified annuity plan).

(5) Paragraph (1) of section 423(a) (relating to employee stock purchase plans).

(6) Paragraph (2) of section 582(c) (relat-

ing to capital gains of banks).

(7) Subparagraph (A) and (B) of section 584(c)(1) (relating to inclusions in taxable income of participants in common trust funds).

- (8) Paragraphs (3) and (4) of section 642(c) (relating to charitable deductions for certain trusts).
- (9) Paragraphs (1) and (2) of section 702(a) (relating to income and credits of partner).
- (10) Subparagraph (A) of section 817(a)(1) (relating to certain gains and losses in the case of life insurance companies).
- (11) Subparagraph (B) of section 852(b)(3) (relating to taxation of shareholders of regulated investment companies).
- (12) Subparagraph (A) of section 856(c)(4) (relating to definition of real estate investment trust).
- (13) Paragraphs (3)(B) and (7) of section 857(b) (relating to taxation of shareholders of real estate investment trust).

(14) Paragraphs (11) of section 1223 (relating to holding period of property).

(15) Section 1231 (relating to property

used in the trade or business and involuntary conversions). (16) Paragraph (2) of section 1232(a) (re-

lating to sale or exchange in the case of bonds and other evidences of indebtedness).

- (17) Subsections (b), (d), and subparagraph (A) of subsection (e)(4) of section 1233 (relating to gains and losses from short sales).
- (18) Paragraph (1) of section 1234(b) (relating to treatment of the grantor of an option in the case of stock, securities, or commodities).

(19) Subsection (a) of section 1235 (relating to sale or exchange of patents).

(20) Paragraph (4) of section 1246(a) (relating to holding period in the case of gain on foreign investment company stock).

(21) Subsection (i) of section 1247 (relating to loss on sale or exchange of certain stock in the case of foreign investment companies electing to distribute income currently).

(22) Subsections (b) and (g)(3)(C) of section 1248 (relating to gain from certain sales or exchanges of stock in certain foreign corporations).

(23) Subparagraph (A) of section 1251(e)(1) (defining farm recapture property).

- (c) TECHNICAL AMENDMENT RELATING TO TIMBER, COAL AND DOMESTIC IRON ORE.—Section 631 of such Code (relating to gain or loss in the case of timber, coal, or domestic iron ore) is amended-
- (1) by striking out "for a period of more than 1 year" in the first sentence of subsection (a) and inserting in lieu thereof "on the first day of such year and for a period of more than 6 months before such cutting", and
- (2) by striking out "1 year" in subsections (b) and (c) and inserting in lieu thereof "6 months"
- (d) TECHNICAL AMENDMENT RELATING TO STRADDLES.-Section 1092(d)(2) of such Code (defining position) is amended-

(1) by striking out clause (ii) of subparagraph (B) and inserting in lieu thereof the following:

"(ii) is part of a straddle none of the offsetting positions of which would, if sold by the taxpayer on the last day on which such option could be exercised, result in the recognition of-

"(I) long-term capital gain or loss, or

"(II) in the case of a syndicate (within the meaning of section 1256(e)(3)(B)), long-term capital gain or loss or ordinary income or loss.", and

(2) by adding at the end thereof the following new subparagraph:

"(C) SPECIAL RULES FOR APPLICATION OF SUBPARAGRAPH (B) (ii) .- For purposes of subparagraph (B)(ii)-
